The Commissariat aux Assurances is responsible for the supervision of AXA Wealth Europe with respect to this key information document. This PRIIP is authorised in Luxembourg.

Key information document revised on 11/04/2025.

You are about to buy a product that is not simple and that can be difficult to understand.

What is this product?

Objectives

The investment strategy aims to preserve the invested capital. Cash, money market instruments and fixed-income investments (directly or via undertakings for collective investment (UCIs)) represent the majority of investments. Equities (directly or via UCIs) represent the smallest part of the asset allocation.

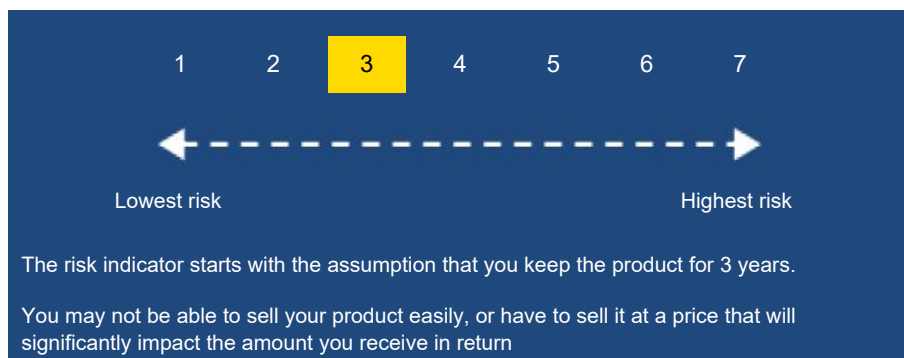

Targeted retail investors

This investment profile is intended for investors with an investment horizon of around 3 years and seeking low exposure to fluctuations in the financial markets with a strong preference for fixed income instruments.

The Defensive profile is a generic profile built on the basis of an average of the profiles of the same type, specific to each management company of the dedicated internal funds. The quantitative data presented in this document is therefore likely to differ in terms of the levels of SRI, performance and costs actually observed for the profile specific to each management company.

What are the risks and what are the rewards?

Risk indicator

- 1 = the lowest risk category
- 2 = a low risk category
- 3 = a low to medium risk category
- 4 = an average risk category
- 5 = a risk category between medium and high
- 6 = a high risk category
- 7 = the highest risk category

The product can be invested in underlying assets with a liquidity risk. This risk is not taken into account in the above summary risk indicator. Certain underlying assets may have a maturity or recommended holding period longer than the recommended holding period of the Product. The risk inherent in the product may be significantly higher than that represented by the summary risk indicator if an asset is not held until maturity or during the entire recommended holding period.

The synthetic risk indicator makes it possible to assess the level of risk of this product compared to others. It indicates the likelihood that this vehicle will incur losses in the event of market movements.

We have classified this product in category 3 out of 7, which is a low to medium risk category. In other words, the potential losses related to the product's future performance are at a low to medium level, and, if the situation on the markets deteriorates, it is unlikely that our ability to pay you will be affected.

The product may be invested in underlying assets denominated in a currency other than its reference currency. The currencies of these assets may vary depending on currency fluctuations and negatively impact the value of the underlying assets of the product. This risk is not taken into account in the risk indicator.

Performance scenarios

What you get will depend on how the market performs. Future market trends will vary and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios presented are examples using the best and worst performances, as well as the average performance of the product over the past 10 years. The scenarios shown represent examples based on the results of the past performance of composite indices and on certain assumptions. Markets could perform very differently in the future.

Recommended holding period: 3 years Investment example: € 10,000			
Scenarios		If you exit after 1 year	If you exit after 3 years
Minimum	There is no guaranteed minimum return. You could lose some or all of your investment.		
Stressed	What you could get after deducting costs	5 440 €	7 180 €
	Average annual return	-45,60 %	-10,46 %
Unfavourable	What you could get after deducting costs	€ 9,070	9 540 €
	Average annual return	-9,35 %	-1,57 %
Moderate	What you could get after deducting costs	€ 10,170	10 660 €
	Average annual return	1,67 %	2,15 %
Favourable	What you could get after deducting costs	11 530 €	12 020 €
	Average annual return	15,31 %	6,33 %

Scénario défavorable : Ce type de scénario s'est produit pour un investissement entre 03/2017 et 03/2020

Scénario intermédiaire : Ce type de scénario s'est produit pour un investissement entre 11/2021 et 11/2024

Favourable scenario: This type of scenario occurred for an investment between 12/2018 and 12/2021

The stress scenario shows what you could get in extreme market situations, and does not take into account the case in which we were unable to pay.

The figures shown include all costs of the product itself but not the costs associated with the insurance product. They do not necessarily take into account all fees due to your advisor or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you receive.

What will this investment cost me?

It is possible that the person who sells this product to you or who advises you about this product will ask you to pay additional fees in connection with these services. If this is the case, this person will inform you of how much they are and will indicate the impact of all costs on your investment over time.

Costs over time

The tables show the amounts deducted from your investment in order to cover the different types of costs. These amounts depend on the amount you invest, the time you hold the product and the return of the product. The amounts shown here are illustrations based on an example investment amount and different possible holding periods.

We have assumed:

- that during the first year you will recover the amount you invested (annual return of 0%).
- that for the other holding periods, the product will perform as indicated in the moderate scenario.
- € 10,000 is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	152 €	€ 493
Annual cost impact (*)	1.5 %	1.6% each year

(*) Elle montre dans quelle mesure les coûts réduisent annuellement votre rendement au cours de la période de détention. Par exemple, elle montre que si vous sortez à la fin de la période de détention recommandée, il est prévu que votre rendement moyen par an soit de 3,70 % avant déduction des coûts et de 2,15 % après cette déduction.

Composition of costs

One-off entry or exit costs		If you exit after 1 year
Entry costs	We do not charge an entry cost for this product.	€ 0
Exit costs	We do not charge an exit cost for this product.	€ 0
Recurring costs (taken each year)
