

## Key Investor Information

This document provides key investor information about this Fund. It is not a marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

### CPR Croissance Réactive - P

ISIN code: (C) FR0010097683

UCITS in the form of a Fonds Commun de Placement (FCP) Fund

This Fund is managed by CPR Asset Management, an Amundi group company

#### Objectives and Investment Policy

By subscribing in CPR Croissance Réactive - P, you are investing in a diversified international portfolio combining several classes of assets: equities (including small caps), interest rates, credit (including securities rated "Speculative Grade", i.e. those with ratings lower than or equal to BB+ [Source S&P/Fitch] or Ba1 [Source: Moody's] or deemed equivalent based on the criteria used by the Management Company), money-market investments, currency, commodities (except agricultural commodities), alternative strategies related to all geographic areas (including emerging markets).

It is actively managed. The Fund profile may thus alternate and invest predominantly in bonds or in stocks.

It will be mainly invested in UCIs.

The investment objective is to outperform over the medium term—a minimum of four years—the capitalised €STR index by 3.50%, net of management fees, with maximum projected volatility of 15%.

The benchmark index is available on the website: <https://www.emmi-benchmarks.eu/>

The UCI is actively managed and aims to outperform its benchmark index. Its management is discretionary: it is primarily exposed to benchmark index issuers and may be exposed to issuers not included in this index. The management strategy includes monitoring the difference between the portfolio's risk level and that of the index. A significant difference in comparison to the risk level of this index is anticipated.

CPR Croissance Réactive favours UCIs (including ETFs) that incorporate an ESG approach (Environmental, Social and Governance criteria) into their investment process<sup>(1)</sup>.

(1) Selected funds may in principle implement ESG approaches that are different to and independent of each other.

To achieve this, the management team defines the allocation of equities, bonds and money market instruments which may diverge from the proportions of the index while at the same time complying with maximum volatility. It then proceeds to a geographic and/or thematic allocation and to the corresponding investment choices. These decisions are taken based on market, financial data and risk forecasts.

Up to 100% of the Fund's assets may be invested in UCIs. It may also hold real securities directly (50% maximum): equities, debt securities and money market instruments.

The equities exposure will range from 0% to 80% of the total assets of the portfolio.

The part of the investments in interest rate and money market instruments (including through UCIs) will range from 20% to 80% of the total assets of the Fund.

In its risk and credit category assessment, the Management Company relies on its teams and on its own methodology which incorporates, among other factors, the ratings issued by the major rating agencies.

The Fund may also invest up to 30% of its assets in "Speculative Grade" securities, i.e. those with ratings lower than or equal to BB+ [Source: S&P/Fitch] or Ba1 [Source: Moody's] or deemed equivalent based on the criteria used by the Management Company. The downgrading of an issuer by one or more rating agencies does not automatically lead to the disposal of the securities concerned; the Management Company relies on its in-house assessment when deciding whether or not to keep the securities in the portfolio.

The sensitivity of the portfolio, an indicator that measures the impact of the change in interest rate on performance, varies within a [-2; +5] range.

Derivative financial instruments or temporary acquisitions and sales of securities may be used for hedging and/or exposure purposes.

The Fund promotes environmental, social and governance (ESG) criteria as covered under Article 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (the "Disclosure Regulation").

The Fund carries a sustainability risk, as defined in the risk profile in the prospectus.

The benchmark index neither evaluates nor includes its components according to these environmental and/or social characteristics and is therefore not in line with the ESG characteristics promoted in the portfolio.

CPR Croissance Réactive - P is denominated in EUR.

CPR Croissance Réactive - P has a recommended term of investment of more than 4 years.

CPR Croissance Réactive - P accumulates its net profit and net capital gains realised.

You may redeem your units at each net asset value, calculated on a daily basis in accordance with the terms specified in the prospectus.

#### Risk and reward profile

This Fund's risk level reflects the maximum projected volatility of the portfolio.

- Historical data used to calculate the digital risk indicator may not be a reliable indicator of the future risk profile of the Fund.
- The risk category associated with this Fund is not guaranteed and may shift over time.
- The lowest category does not mean "risk free".
- The capital is not guaranteed.

Particular risks for the Fund not included in this indicator are:

- Credit risk: this is the risk of sudden deterioration in the creditworthiness of an issuer or that of its default.
- Liquidity risk: it presents the risks that a financial market, when volumes traded are low or if there are tensions on such market, might not be able to absorb the sell (or buy) volumes without causing the price of the assets to significantly drop (or rise).
- Counterparty risk: this is the risk of default by a market operator, including a total return swap counterparty, that prevents it from honouring its obligations to the Fund.
- The use of futures may increase or decrease the potential for market movements in your portfolio to be amplified.

The occurrence of one of these risks may decrease the net asset value of your portfolio. For more information regarding risks, please refer to the *Risk Profile* section of this Fund's Prospectus.

## Charges

The charges and fees paid are used to cover the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	None

The percentage indicated is the maximum that can be deducted from your capital before it is invested (entry) or redeemed (exit).

### Charges taken from the Fund over a year

Operating expenses	1.61%* including tax of average net assets
--------------------	--

### Charges taken from the Fund under certain specific conditions

Performance fee	20% p.a. of any gain above that of the reference asset, up to 2% (incl. tax) of the net assets.
	No fee was deducted for the prior fiscal year.

The **entry** and **exit charges** shown are maximum figures. In certain cases, the fees paid may be lower - further information may be obtained from your financial advisor.

\*The **ongoing charges** are based on figures from the previous financial year ended December 2021. This percentage may vary from year to year.

It excludes:

- Performance fees.
- Brokerage fees, except for the entry and exit charges paid by the Fund when buying or selling units or shares in another UCI.

The calculation of the performance fee applies on each calculation date of the net asset value, in accordance with the procedures set out in the prospectus.

The comparison between the net assets of the unit and the Reference Assets (as defined in the prospectus) is performed over a maximum observation period of five years. The performance fee represents 20% of the difference between the net assets of the unit (before deduction of the performance fee) and the Reference Assets, provided that this difference is positive and that, since the start of the observation period as defined above, the relative performance of the unit against the Reference Assets is positive or zero. Underperformance over the preceding five years must be offset before a provision can be recorded again.

The anniversary date corresponds to the calculation date of the last net asset value in December. The Management Company may receive the provision on an anniversary date, at which point a new observation period begins.

**The performance fee is payable even if the unit's performance over the observation period is negative, provided that the unit outperforms the Reference Assets.**

For further information regarding costs, please refer to the "Costs and Fees" section of the Fund's Prospectus available online at [www.cpr-am.com](http://www.cpr-am.com) or upon request to the Management Company.

## Past performance

- The chart shown is not a reliable indicator of future performance.
- Annual performance is calculated after deduction of all fees charged by the Fund and the costs related to the purchase of other UCIs and investment funds.
- This Fund was launched in 1997.
- The performance shown opposite is that of CPR Croissance Réactive - P launched in 1997. For more information, please consult our website [www.cpr-am.com](http://www.cpr-am.com).
- The benchmark index is: 100% CAPITALISED ESTR (OIS)
- Annual performance is calculated based on net asset values denominated in EUR.
