CPR Silver Age - P ISIN code: (A/D) FR0010836163

UCITS in the form of a Fonds Commun de Placement (FCP) Fund

This Fund is managed by CPR Asset Management, an Amundi group company

Objectives and Investment Policy

Classification by the French Market Regulator (AMF): International equities.

By subscribing in CPR Silver Age - P, you are investing in a portfolio of European equities related to the theme of the ageing of the population.

The investment objective is to outperform the European equity markets in the long term – over a minimum of five years – by taking advantage of the momentum of European stocks linked to the ageing of the population.

As the Fund's management is based on a specific theme for which there is no representative benchmark index, a benchmark index that is relevant for this Fund cannot be defined. However, as guidance, the euro-adjusted MSCI Europe index (net dividends reinvested) will be used ex-post as a benchmark to gauge the performance of the portfolio, without limiting its management.

The index is available on the website: www.msci.com/equity.

To achieve this, the investment policy seeks to select the best performing European securities in various sectors benefiting from the ageing of the population (pharmaceuticals, medical equipment, savings, etc.). Within this universe, the management is carried out in two stages: segment allocation defined based on the growth prospects of each sector and selection of securities within each sector through an approach that is both quantitative and qualitative while also including liquidity and market capitalisation criteria.

Within this theme and for diversification purposes, the Fund may also invest up to 25% of its assets in securities from other geographical areas.

Your Fund is intended to be fully invested in European equities.

The equities exposure will range from 75% to 120% of the portfolio's total assets.

For the management of its liquidity, the portfolio may invest up to 25% in money-market and interest-rate products.

Derivative financial instruments or temporary acquisitions and sales of securities may be used for hedging and/or exposure purposes.

CPR Silver Age - P has a recommended term of investment of more than 5 years.

CPR Silver Age - P accumulates and/or distributes its net profit and the net profits achieved.

You may redeem your units at each net asset value, calculated on a daily basis in accordance with the terms specified in the prospectus.

Risk and reward profile

This Fund's risk level reflects its European equities investment theme.

- Historical data used to calculate the digital risk indicator may not be a reliable indicator of the future risk profile of the Fund.
- The risk category associated with this Fund is not guaranteed and may shift over time.
- The lowest category does not mean "risk free".
- The capital is not guaranteed.

Particular risks for the Fund not included in this indicator are:

- Liquidity risk: it presents the risks that a financial market, when volumes traded are low or if there are tensions on such market, might not be able to absorb the sell (or buy) volumes without causing the price of the assets to significantly drop (or rise).
- Counterparty risk: this is the risk of default by a market operator, including a total return swap counterparty, that prevents it from honouring its obligations to the Fund.
- The use of futures may increase or decrease the potential for market movements in your portfolio to be amplified.

The occurrence of one of these risks may decrease the net asset value of your portfolio. For more information regarding risks, please refer to the *Risk Profile* section of this Fund's Prospectus.

Charges

The charges and fees paid are used to cover the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
