Website of the manufacturer: www.carmignac.com

Date of production of the KID : 31/03/2023

WHAT IS THIS PRODUCT?

Type: Carmignac Patrimoine is a French common fund (Fonds Commun de Placement – FCP), governed by European Directive 2009/65/EC (UCITS)

Objective: The fund's objective is to obtain, over a recommended investment horizon of three years, a performance, net of fees, above that of the fund's reference indicator, composed of 20% capitalised €STER, 40% MSCI AC WORLD NR (USD) index and 40% ICE BofA Global Government Bond Index. The fund seeks to invest sustainably and applies a socially responsible investment approach.

The fund's main performance drivers are as follows: (i) Equities: at least 25% of the fund's net assets are invested in equities, a maximum of 50% of its net assets are exposed to international equities (all capitalisations, without restrictions in terms of sector or region, with up to 25% of net assets exposed to emerging countries, with a maximum of 10% in the Chinese domestic market (common limit including equities, debt securities and money market instruments on China's domestic market); (ii) Fixed income products: at least 40% of the fund's net assets are invested in fixed and/or floating rate government and/or corporate bonds and money market instruments. The average rating of the bonds held by the fund shall be at least investment grade as rated by at least one of the leading rating agencies or deemed equivalent by the management company. Emerging market fixed income products may not exceed 25% of net assets, including a maximum of 10% in the Chinese domestic market; (iii) Currencies: the fund may use currencies other than the fund's valuation currency for exposure or hedging purposes. Up to 5% of fund's net assets may be invested in unlisted securities.

The decision to buy, hold or sell fixed income products will not automatically and solely depend on their rating but also an internal analysis based mainly on return, credit rating, liquidity and maturity criteria. The manager may use Relative Value strategies as performance drivers, looking to take advantage of the relative value between different instruments. Short positions may also be taken through derivatives.

This fund is an actively managed UCITS: the investment manager has discretion over the composition of the portfolio, subject to the stated investment objectives and policy. The fund's investment universe is at least partly derived from the indicator. The fund's holdings and the weightings may substantially deviate from the composition of the indicator. There is no limit set on the level of such deviation.

The fund promotes environmental/social characteristics in accordance with Article 8 of the sustainability-related financial disclosures regulation (SFDR) through "best-in-universe" and "best-effort" approaches and an active engagement policy. An analysis of extra-financial criteria leads to a reduction of at least 20% in the Fund's investment universe through negative screening to exclude companies whose non-financial ratings reflect high risk. In addition, the fund invests at least 10% of its net assets in sustainable investments within the meaning of the SFDR. The definition of sustainable investment used by the fund uses the framework of the United Nations Sustainable Development Goals (SDGs). This framework is only one of the frameworks that can be used to illustrate positive results; others may reveal different results. The Fund's sustainability risk may differ from that of the reference indicator.

Term: The fund was launched on 3 March 2004 for a period of 99 years, except in the cases of early dissolution or extension.

Intended retail investor: Due to the fund's bond market exposure, and its equity market exposure to a lesser extent, this fund is suitable for investors who do not plan to withdraw their money within 3 year(s), and whose goal is to grow their investment without any capital guarantee.

The appropriate amount to invest in this fund depends on the personal situation of the investor, their knowledge of investment products and experience, their personal wealth, their cash requirements now and in the future, and their degree of risk aversion.

Investments may be redeemed each business day on request. Subscription and redemption requests are centralised on each NAV calculation and publication day before 18:00 CET/ CEST and are executed on the next business day using the previous day's NAV.

The Depository of the sub-fund is BNP Paribas Securities Services, Luxembourg branch.

These units are accumulation units.

The fund prospectus and latest key information document, as well as the latest annual report are available on the website www.carmignac.com, directly from the manufacturer or on the website www.fundinfo.com. Information on past performance for the last 10 years, where this data is available, and calculations of monthly past performance scenarios are available on the website www.carmignac.com.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator : the summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Risks not sufficiently considered by the indicator include:

- Counterparty risk: the fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations.
- Credit risk: the fund is invested in securities whose credit rating may decline, meaning there is a risk that the issuer may not be able to meet its commitments. Should an issuer's creditworthiness deteriorate, the value of the bonds or derivatives linked to this issuer may fall.
- Liquidity risk: the markets in which the fund participates may be subject to temporary illiquidity. These market distortions could have an impact on the pricing conditions under which the fund may be caused to liquidate, initiate or modify its positions.

← Lower risk Higher risk →

The recommended holding period is 3 year(s).

If the fund is denominated in a currency other than the official currency of the country where the fund is being marketed, the return, when expressed in the official currency of the country where the fund is being marketed, may change depending on currency fluctuations.

This product does not include any protection from future market performance so you could lose some or all of your investment.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the fund to pay you.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The returns you obtain from this product depend on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown represent examples using the best and worst performance, as well as the average performance of the product over the last ten years. Markets may develop very differently in the future.

Recommended holding period:		3 years	
Example Investment:		10 000 CHF	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	8 340 CHF	7 020 CHF
	Average return each year	-16.60%	-11.13%
Unfavourable	What you might get back after costs	8 340 CHF	7 020 CHF
	Average return each year	-16.60%	-11.13%
Moderate	What you might get back after costs	10 160 CHF	10 250 CHF
	Average return each year	1.60%	0.83%
Favourable	What you might get back after costs	12 240 CHF	12 250 CHF
	Average return each year	22.40%	7.00%

This table shows the money you could get back over 3 years, under different scenarios, assuming that you invest CHF 10 000,00.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

Your maximum loss would be that you will lose all your investment.

The figures shown include all costs of the product itself, but not necessarily all charges due to your advisor or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you receive.

- The unfavourable scenario occurred for an investment between June 2021 and December 2022.
- The moderate scenario occurred for an investment between November 2014 and November 2017.
- The favourable scenario occurred for an investment between October 2018 and October 2021.

WHAT HAPPENS IF CARMIGNAC GESTION IS UNABLE TO PAY OUT?

For your protection, the assets of the fund are held with a separate entity, the custodian, so that the fund's ability to pay would not be affected by the insolvency of the management company. In the event of failure of the latter, the assets of the product held by the depository will not be affected. In the event of default by the depository, the risk of financial loss of the product is mitigated due to the legal segregation of the assets of the depository from those of the product.

There is no compensation or guarantee system in place that would fully or partially offset this loss.

WHAT ARE THE COSTS?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that these costs will have on your investment.

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest 10 000,00 CHF. The figures are estimates and may change in the future.

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

Cost over time

	If you exit after 1 year	If you exit after 3 years
Total costs	644 CHF	1 180 CHF
Annual cost impact (*)	6.4%	3.8% each year

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	4,00 % of the amount you pay in when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	Up to 400 CHF
Exit costs	We do not charge an exit fee for this product.	0 CHF
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1,51% of the value of your investment per year. This estimate is based on actual costs over the past year.	151 CHF
Transaction costs	0,80% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on the quantity we buy and sell.	80 CHF
Incidental costs taken under specific conditions		
Performance fees	20,00% max. of the outperformance once performance since the start of the year exceeds that of the reference indicator and if no past underperformance still needs to be offset. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years, or since the product creation if it is less than 5 years.	13 CHF

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Given the fund's exposure to the bond market, and to the equity market to a lesser extent, the recommended investment period is more than 3 year(s).

However, you can redeem your investment without incurring any penalties at any point during this period, or stay invested for longer.

Redemptions are possible daily. In exceptional circumstances, your right to request the redemption of your investment may be suspended.

HOW CAN I COMPLAIN?

If you have any complaints about this product or the manufacturer's conduct, you can use different means of communication: you can lodge them by email to complaints@carmignac.com, by post to 24 Place Vendôme, 75001 Paris, France, or by telephone on (+33) 01 42 86 53 35.

In all cases, you must clearly state your contact details (name, address, telephone number and email address) and give a brief explanation of your complaint. More information is available on our website www.carmignac.com.
