

Key investor information

This document provides you with key investor information about this UCITS. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this UCITS. You are advised to read it so you can make an informed decision about whether to invest.

H2O MULTIBONDS

ISIN code: FR0013393329 H2O MULTIBONDS EUR SR unit

Management Company: H2O AM LLP (BPCE Group)

OBJECTIVES AND INVESTMENT POLICY

- The UCITS' objective is to outperform the daily capitalised EONIA by 2.10% per year, over a minimum recommended investment period of three years, after deduction of management fees. The EONIA (European Overnight Index Average) corresponds to the average overnight rate in the eurozone. It is calculated by the European Central Bank and published by the European Banking Federation on www.emmi-benchmarks.eu. For indicative purposes only, the Fund's performance may be compared ex-post to that of the JP Morgan Government Bond Index Broad. The JP Morgan Government Bond Index Broad is made up of global government bonds whose minimum rating is BBB- (Standard & Poor's) and Baa3 (Moody's). It includes the coupons.
- The investment policy of the UCITS is based on a very dynamic management style that seeks to unlock performance on the global fixed income and currency markets. The management team strives for a global portfolio allocation and then picks the securities making up the portfolio. To do this, it determines its strategy based on its macroeconomic forecasts, its capital flow analysis and its assessment of financial asset prices. The manager's investments are in keeping with a modified duration range of 0 to 10. The modified duration range indicates the variation in a bond's price when interest rates change by 1%.
- The UCITS' portfolio may be exposed to any currency and to all types of bonds issued by sovereign governments or private issuers. They may include the full range of financial ratings and be of any nationality, be it a developed country or emerging market, and may include securitisation instruments.
- The AMF classification of this UCITS is: Bonds and other international debt securities.
- The UCITS uses derivative instruments and temporary purchases and sales of securities to achieve its investment goals.
- The UCITS is actively managed. Its management objective refers to the benchmark index, which is also a component of the performance fee calculation. The UCITS may invest in instruments that are included in the index, but its composition is in no way constrained by this market index.
Actively managed: the investment manager has the flexibility to select the securities that make up the portfolio, in accordance with the UCITS' objectives and investment policy.
- The UCITS accumulates its income.
- Redemption requests are received every day by 12.30 p.m. at the latest and are executed daily.

RISK AND REWARD PROFILE

The risk and reward indicator reflects the UCITS' exposure to international interest rate and currency markets.

- The historical data used to calculate the level of risk may not provide a reliable indication of the UCITS' future risk profile.
- The lowest category does not mean a risk-free investment.
- The risk category associated with this UCITS is not guaranteed and may change over time.

Major risks for the UCITS that are not taken into account in the benchmark:

- **Credit risk:** credit risk arises from the risk of a deterioration in the quality of an issuer and/or an issue, which may result in a decrease in the value of the security. It may also arise if an issuer included in the portfolio defaults on repayment at maturity.
- **Liquidity risk:** liquidity risk represents the price reduction that the UCITS might potentially have to accept in order to sell certain assets for which there is insufficient market demand.
- **Counterparty risk:** counterparty risk is the risk that a counterparty with which the UCITS has entered into over-the-counter contracts is unable to meet its obligations towards the UCITS.
- **Impact of management techniques, particularly Forward Financial Instruments:** the risk related to management techniques is the risk of increased losses caused by the use of forward financial instruments such as over-the-counter financial contracts and/or transactions involving the temporary purchase and sale of securities.

CHARGES

The charges and fees you pay are used to cover the running costs of the UCITS, including the costs of marketing and distributing units. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	2.00%
Exit charge	None

The percentage indicated is the maximum that might be taken out of your money before it is invested. In certain cases, investors may pay less. Investors can obtain the actual amount of the entry and exit charges from their advisor or distributor.

Charges deducted by the UCITS over the previous financial year

Ongoing charges	1.77%*
-----------------	--------

Performance-related charges deducted by the UCITS

Performance fee	25% of the UCITS' outperformance of the benchmark, the daily capitalised EONIA, beyond 2.1% per year.
-----------------	---

The ongoing charges do not include:

- performance fees.
- Intermediary charges, except in the case of entry and/or exit charges paid by the UCITS when it buys or sells units in another collective investment scheme.

For more information on charges, investors are advised to refer to the "Charges" section of the prospectus for this UCITS, available from the website at www.h2o-am.com.

*Because of the date the unit was created, only an estimate of the ongoing charges is given. This figure may vary from year to year.

PAST PERFORMANCE

There is insufficient data to provide investors with useful information regarding past performance.

- UCITS launch year: 2010.
- Year the H2O MULTIBONDS EUR SR unit was launched: 2019.
