## What is this product?

### TYPE

This product is a sub-fund of BNY Mellon Global Funds, plc an open-ended umbrella type investment company with variable capital, organised as an Undertakings for Collective Investment in Transferable Securities (UCITS).

### OBJECTIVES

#### Investment objective

To achieve a total return in excess of a cash benchmark (as described below) over an investment horizon of 3-5 years.

#### Investment policies

##### The Fund will:

- invest anywhere in the world;
- follow a broad 'multi-asset' portfolio approach (e.g. company shares (i.e. equities) and similar investments, bonds and similar debt investments and cash);
- invest in bonds, issued by governments and companies, with high and low credit ratings (i.e. investment grade and/or sub-investment grade bonds as rated by Standard and Poor's or similar agencies);
- gain exposure to commodities (e.g. gold), property, renewable energy and infrastructure through stock exchange listed securities and/or collective investment schemes;
- invest on a long and short basis;
- invest in derivatives (financial instruments whose value is derived from other assets) to help achieve the Fund's investment objective. The Fund will also use derivatives with the aim of risk or cost reduction or to generate additional capital or income;
- limit investment in other collective investment schemes to 10%;
- exclude direct investment in corporate issuers with material involvement in activities the Investment Manager deems harmful from an environmental and/or social perspective e.g., tobacco production. All issuers in which investments are made follow good governance practices;
- exclude investment in sovereign issuers that the Investment Manager deems to exhibit material negative management of ESG factors;
- promote environmental and social characteristics pursuant to Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR"); and
- invest at least 10% of its Net Asset Value (NAV) in issuers that meet the definition of sustainable investment under SFDR.

##### The Fund may:

- invest in emerging markets;
- invest up to 10% of its NAV in China A-shares via the Stock Connect;
- invest up to 10% of its NAV in debt securities traded in the China interbank bond market via Bond Connect;
- invest up to 10% of its NAV in contingent convertible securities (CoCo's);
- invest up to 10% of its NAV in Structured Notes;
- invest up to 8.5% of its NAV in systematic trading strategies, which are quantitative and rule-based in nature that seek to deliver returns across different market conditions. These strategies may either not be directly accessible through traditional investment

instruments such as equities or bonds, or may be implemented more efficiently (from an operational and/ or cost perspective). Access to these strategies may be gained through instruments such as Structured Notes, derivatives and collective investment schemes; and

- invest in cash and cash-like investments.

#### Benchmark

The Fund will measure its performance against 1 Month EURIBOR + 4% per annum (the "Cash Benchmark"). The Cash Benchmark is used as a target against which to measure the performance of the Fund over 5 years before fees. However, a positive return is not guaranteed and a capital loss may occur.

EURIBOR is the Euro Interbank Offer Rate and is a reference rate that is constructed from the average interest rate at which Eurozone banks offer unsecured short-term lending on the inter-bank market. The Fund is actively managed, which means the Investment Manager has discretion over the selection of investments, subject to the investment objective and policies disclosed in the Prospectus.

**Redemption and Dealing:** you can buy and sell your shares in the Fund between 9:00 and 17:00 (Irish time) on each business day in Ireland. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is EUR 5,000.

**Distribution Policy:** net income generated will be retained within the Fund and reflected in the value of your shares.

### PRODUCT TERM

This product does not have a maturity date. The board of BNY Mellon Global Funds, plc may terminate the Fund unilaterally in accordance with the fund documentation. In addition, your investment may be terminated unilaterally where you no longer comply with the conditions set out in the fund documentation including minimum holding requirements.

### INTENDED RETAIL INVESTOR

This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium-low level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

## What are the risks and what could I get in return?

### RISKS

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of BNY Mellon Fund Management (Luxembourg) S.A. to pay you.

**Be aware of currency risk.** Where the share class is denominated in a different currency to that of your home jurisdiction, you will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at [www.bny.com/investments](http://www.bny.com/investments).

### PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

**What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

**The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.**

The stress scenario shows what you might get back in extreme market circumstances.

**Unfavourable:** this type of scenario occurred for an investment between November 2021 and December 2025.

**Moderate:** this type of scenario occurred for an investment between March 2019 and March 2024.

**Favourable:** this type of scenario occurred for an investment between December 2016 and December 2021.

Where insufficient fund performance history exists, an appropriate benchmark has been used as a proxy.

## What happens if BNY Mellon Fund Management (Luxembourg) S.A. is unable to pay out?

Investors are unlikely to face a financial loss should BNY Mellon Fund Management (Luxembourg) S.A. fail or default. While BNY Mellon Fund Management (Luxembourg) S.A. is responsible for management and administration of the Fund, it does not hold the assets of the Fund, including monies payable to investors. The Depositary is responsible for the safekeeping of the assets of the Fund. Investors may suffer loss, up to the value of their entire investment, if the Fund or the Depositary is unable to pay out. BNY Mellon Fund Management (Luxembourg) S.A. has no obligation to pay out in this scenario and there is no applicable investor compensation scheme to cover any loss in such an event.

## What are the costs?

**The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.**

### COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- € 10,000 is invested.

Example Investment € 10,000	if you exit after 1 year	if you exit after 5 years (recommended holding period)
<b>Total Costs</b>	<b>€ 188</b>	<b>€ 1,062</b>
<b>Annual cost impact*</b>	<b>1.9%</b>	<b>1.9%</b>

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.0% before costs and 2.1% after costs.
