What is this product?

Type	This product is a share of an investment company qualifying as an undertaking for collective investment in transferable securities (UCITS).
Term	This sub-fund has no maturity date. However, the board of directors may decide to close the sub-fund under certain circumstances.
Objectives	The investment objective of the East Capital Global Emerging Markets Sustainable is to provide long-term capital growth through exposure to companies in Emerging Markets. Sustainable investing means recognising that, environmental, social and governance factors may directly influence the long-term business profitability of companies. The sub-fund intends to gain exposure to companies that manage sustainability risks and/or contribute to sustainable development in Emerging Markets. Environmental, social and governance factors are fully integrated into the investment process. The sub-fund will invest at least 75% of its assets directly or indirectly in equity or equity-related securities (such as, but not limited to, ADRs and GDRs) of companies domiciled in Emerging Markets or that exercise a significant part of their economic activity there. Indirect exposure to companies located in Emerging Markets will be achieved, inter alia, by investing in UCITS, other UCIs, as well as through UCITS eligible structured products such as participatory notes and/or equity-linked notes. The sub-fund may invest directly up to 30% of its net assets in China A-Shares through the Shanghai-Hong Kong Stock Connect and/or through the Shenzhen-Hong Kong Stock Connect, or through any other eligible means providing PRC stock market access. <i>Benchmark:</i> The portfolio is actively managed on a discretionary basis with reference to a benchmark. While the product compares its performance against the MSCI Emerging Markets Index (Total Return Net), it does not try to replicate this benchmark and freely selects the securities that it invests in. The deviation with this benchmark can be significant.
Intended retail investor	This fund may not be appropriate for investors who plan to withdraw their money within 5-10 years.
Other information	<i>Depositary:</i> Skandinaviska Enskilda Banken. AB (publ) – Luxembourg Branch <i>Dividend income:</i> This class is a capitalisation class meaning that income is reinvested. <i>Conversion right:</i> The investor has the right to convert his investment in shares of one sub-fund into shares of the same sub-fund or another sub-fund. The investor can obtain information about how to convert in the prospectus of the fund. <i>Segregation:</i> The assets and liabilities of a sub-fund are segregated pursuant to the law so that the commitments and liabilities of one sub-fund do not affect the other sub-funds. <i>Additional information:</i> Additional information about the fund, copies of its prospectus, the latest annual and semi-annual report and the latest prices of shares may be obtained free of charge from the Management Company or on www.eastcapital.com. The prospectus and the periodic reports are prepared for the entire fund and are available in English. The Management Company may inform you about other languages in which these documents are available. This sub-fund was launched in 2005 and this share class in 2005. The currency of the share class is expressed in EUR.

What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: Currency risk, emerging market risk, Risks associated with the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 15 years. Markets could develop very differently in the future.

Unfavourable scenario: This type of scenario occurred for an investment between October 2024 and December 2025.

Moderate scenario: This type of scenario occurred for an investment between April 2012 and April 2022.

Favourable scenario: This type of scenario occurred for an investment between September 2011 and September 2021.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if East Capital Asset Management S.A. is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depositary Skandinaviska Enskilda Banken. AB (publ) – Luxembourg Branch. Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- 10,000 EUR is invested

	If you exit after 1 year	If you exit after 5 years	If you exit after 10 years
Total costs	732 EUR	2,289 EUR	5,594 EUR
Annual cost impact (*)	7.3%	3.4% each year	2.9% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.1% before costs and 6.3% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
