Call +33 (0) 1 44 45 85 65 for more information

AXA Funds Management S.A. is regulated by Commission de Surveillance du Secteur Financier.

This Product is authorised in Luxembourg and in accordance with the UCITS Directive.

**Date of Production of the KID:** 01/01/2023

## What is this product?

### Type

The Product is a share of the Sub-fund "AXA World Funds - Global Optimal Income" (the Sub-fund) which is part of the SICAV "AXA World Funds" (the "Company").

### Term

This product has no maturity date, although it has been created for 99 years and could be liquidated under the conditions led down in the articles of incorporation of the company.

### Objectives

#### Investment Objective

The Sub-Fund seeks to achieve a mix of stable income and capital growth measured in Euro by investing in a mix of equities and fixed income securities issued by governments and companies, over a long term period.

#### Investment Policy

The Sub-Fund is actively managed without reference to any benchmark.

The Sub-Fund is actively and discretionarily managed in order to capture opportunities in the equity and security markets of any type and aims at not exceeding a 15% annual volatility. The Sub-Fund is managed with an Interest Rate Sensitivity ranging from minus 4 to 8. Investment decisions are based on a combination of macroeconomic, sector and company specific analysis. The securities selection process is mainly based on a rigorous analysis of the companies' business model, quality of management, growth prospects and overall risk return profile. The Fixed Income allocation is managed in order to mitigate the volatility of equity returns.

The Sub-Fund invests in or is exposed to up to 100% of its net assets in equities (including high dividend equities), fixed income securities issued by any governments, investment grade corporate securities and/or money market instrument. The Sub-Fund may also notably invest or be exposed to: up to 50% in callable bonds, up to 40% of its net assets in securities from emerging markets, up to 20% in sub-investment grade securities and up to 15% in securities traded on the CIBM through Bond Connect.

Investment and sub-investment grade ratings are based on the average linear ratings of Standard & Poor's, Moody's and Fitch ratings (i.e. agencies ratings are converted into numerical values which, after being averaged, provide a value that is converted back into the nearest usual rating) or, if unrated, deemed equivalent by the Investment Manager. If securities are unrated, they must be judged equivalent to the respective applicable level by the Investment Manager.

The Sub-Fund may, up to 10%, hold distressed and defaulted securities as a result of their rating downgrade, if they are considered to be consistent with the Sub-Fund's objective. These securities are expected to be sold within 6 months unless specific events prevent the Investment Manager from sourcing their liquidity.

The Sub-Fund may also invest in or be exposed to commodities through eligible investments (e.g. indices) up to 35% of its net assets.

The investment policy may be achieved by direct investments and through derivatives, especially by entering for instance into total return swaps on equities, commodity and volatility indices or bonds and credit derivatives swaps. The Investment Manager monitors the market risk below a VaR limit of 7% of the Sub-Fund's NAV, under normal market conditions. The VaR used by the investment manager will have a 5 Business Days horizon and 95% confidence level parameters. This means that there is a probability of 5% that the SubFund's NAV may lose more than 7% of its value within a 5 Business Days horizon. Such VaR corresponds to a 1% probability, under normal market conditions, that the Sub-Fund's NAV may lose more than 20% of its value within a 20 Business Days. The Investment Manager expects that the level of leverage of the Sub-Fund based on the sum of the notional approach will be between 0 and 3. However, the attention of any investor in the Sub-Fund is drawn to the fact that the effective level of leverage of the Sub-Fund may be higher than the expected level of leverage set forth above from time to time due to market conditions. Derivatives may also be used for hedging purposes.

The Sub-Fund may invest up to 5% of net assets in contingent convertible bonds (CoCos).

The Sub-Fund is a financial product that promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

### Income

For Capitalisation share classes (Cap), the dividend is reinvested.

### Investment Horizon

The risk and the reward of the product may vary depending on the expected holding period. We recommend holding this product at least for 5 years.

### Processing of subscription and redemption orders

The subscription, conversion or redemption orders must be received by the Registrar and Transfer Agent on any Valuation Day no later than 3 p.m. Luxembourg time. Orders will be processed at the Net Asset Value applicable to the following Valuation Day. The investor's attention is drawn to the existence of potential additional processing time due to the possible involvement of intermediaries such as Financial Advisers or distributors.

The Net Asset Value of this Sub-Fund is calculated on a daily basis.

### Intended retail investor

The sub-fund is designed for retail investors who have neither financial expertise nor any specific knowledge to understand the sub-fund but nevertheless may bear total capital loss. It is suitable for clients who seek growth of capital. Potential investors should have an investment horizon of at least 5 years.

### Depositary

State Street Bank International GmbH (Luxembourg Branch)

### Further Information

Please refer to the 'Other relevant information' section below.

## What are the risks and what could I get in return?

### Risk Indicator

We have classified this product as 4 out of 7 which is the a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the return of the product.

**Be aware of currency risk.** If your local currency is different from the Product currency, you will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks not included in the SRI can be materially relevant, such as counterparty risk, derivatives risk. For further information, please refer to the prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

## Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product and the suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		5 years	
Example Investment:		€10000	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment		
Stress	What you might get back after costs	€5800	€5240
	Average return each year	-42.00%	-12.12%
Unfavourable	What you might get back after costs	€7950	€7950
	Average return each year	-20.50%	-4.48%
Moderate	What you might get back after costs	€10070	€12260
	Average return each year	0.70%	4.16%
Favourable	What you might get back after costs	€11770	€14780
	Average return each year	17.70%	8.13%

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: this type of scenario occurred for an investment between 2021 and 2022.

Moderate scenario: this type of scenario occurred for an investment between 2016 and 2021.

Favourable scenario: this type of scenario occurred for an investment 2013 and 2018.

An appropriate benchmark of the Product was used to calculate the performance.

## What happens if AXA Funds Management S.A. is unable to pay out?

The product's underlying assets are held separately by the depositary. If we encounter financial difficulties, these assets will not be affected. If the Product suffers a loss due to the depositary default you may lose the whole or part of your investments. There is no compensation or guarantee scheme protecting you from a default of the Product's depositary.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	€702	€1567
Annual cost impact (*)	7.1%	2.9% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.0% before costs and 4.2% after costs.

We may share part of the costs with the person selling you the Product to cover the services they provide to you. They will inform you of the amount when required by the applicable laws.

### Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	5.5 % of the amount that you pay when you enter the investment. This includes distribution costs of 5.5 % of the amount invested. This is the maximum amount you will pay. The person who sold you the product will inform you of the actual costs.	Up to €550
Exit costs	We do not charge an exit fee for this Product.	€0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.5% of the value of your investment per year. This percentage is based on actual costs over the last year.	€137
Transaction costs	0.2 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	€15
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this Product.	€0

## How long should I hold it and can I take money out early?

### Recommended holding period: 5 years

This Product has no minimum required holding period, the 5 years has been calculated to be in line with the time frame which the Product may need in order to achieve its investment objectives.

You may sell your investment before the end of the recommended holding period without penalty. The performance or risk of your investment may be negatively impacted. The section "What are the costs?" provides information on the impact of costs over time.

## How can I complain?

Complaints shall be addressed to the Complaint Handling Officer with the complainant's details (name, role, contact details, involved account numbers and any other relevant document) to the following address AXA Funds Management S.A. 49, avenue J.F. Kennedy L-1855 Luxembourg Grand Duchy of Luxembourg.
