

**Purpose**

This document provides you with key information about this investment fund. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this portfolio and to help you compare it with other investment funds.

Product

Select Absolute Alpha Portfolio

a sub-fund of AB SICAV I

Class A EUR H Shares (ISIN: LU0736559278)

AB SICAV I is an open-ended investment company with variable capital (*société d'investissement à capital variable*) and is managed by AllianceBernstein (Luxembourg) S.à r.l., a member of the AllianceBernstein Group, which is authorised in Luxembourg, and regulated by the *Commission de Surveillance du Secteur Financier* (CSSF). For more information on this Fund, please refer to www.alliancebernstein.com or call +352 46 39 36 151.

This document was published on 25/02/2026.

What is this product?**Type**

This is an open-ended investment fund.

Term

The Portfolio does not have a specific maturity date. The Board may unilaterally decide to liquidate the Portfolio in accordance with the Fund's prospectus.

Investment objective

The Portfolio seeks to increase the value of your investment over time through capital growth.

Investment policy

Under normal market conditions, the Portfolio typically invests in equity securities. The Portfolio mainly invests in medium and large capitalisation companies that are traded in the US.

The Portfolio seeks to minimise the volatility of returns through diversification among industries and through managing its long and synthetic short positions.

The Portfolio's net long exposure is usually between 30% and 70% of the Portfolio's assets, and remains positive at all times, although the Investment Manager may reduce it during times of unusually high market risk.

The Investment Manager uses fundamental company research to take long and short positions on securities with positive or negative growth potential, respectively, and to seek risk-adjusted returns.

The Portfolio may be exposed to any currency.

The Portfolio uses derivatives for hedging (reducing risks), efficient portfolio management and other investment purposes (including to take synthetic short positions).

Terms to understand

Derivatives: Financial instruments whose value is linked to one or more rates, indices, share prices or other values.

Equities: Securities that represent an ownership stake in a company.

Long positions: Positions that result in gains for the Portfolio when security prices rise and losses when security prices fall.

Net long exposure: The market value of the long positions is greater than the market value of the short positions.

Other investment purposes: In line with the Portfolio's investment objective and policy, means to gain exposure and/or to manage duration.

Short positions: Positions that result in gains for the Portfolio when security prices fall and losses when security prices rise.

Volatility: Measure of the pricing behavior of a security.

Responsible investing

The Portfolio is classified as Article 8 under Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR). For more information, please refer to the SFDR Pre-Contractual Disclosures in the Fund's prospectus.

Benchmark

S&P 500 Index used for performance comparison.

The Portfolio is actively managed and the Investment Manager is not constrained by its benchmark. Please see the Fund's prospectus for more information.

Intended retail investor

The Portfolio is intended for investors with a basic knowledge and limited/no experience of investing in funds. This Portfolio is intended for investors seeking to increase the value of their investment over the recommended holding period and understand the risk of losing some or all the capital invested.

Portfolio currency

The reference currency of the Portfolio is USD.

Share class currency

The reference currency of the share class is EUR.

Hedged share class: This share class seeks to reduce the effect of exchange rate fluctuations between the Portfolio's base currency and the currency of the share class.

Distribution policy

This share class is a non-distributing share class. Income and capital gains derived from the Portfolio are reinvested.

Redemption

Shares may be redeemed on any day when both the New York Stock Exchange and Luxembourg banks are open for business (each a Business Day). The latest price units and other practical information for this Portfolio can be found at: www.alliancebernstein.com

Depositary

Brown Brothers Harriman (Luxembourg) S.C.A.
80, route d'Esch, L-1470 Luxembourg

What are the risks and what could I get in return?

Risk

Lower risk

Higher risk

The risk indicator assumes you keep your investment in the Portfolio for 5 years.

This is the recommended holding period for this Portfolio.

You may not be able to sell your shares easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator (SRI) is a guide to the level of risk of this Portfolio compared to other investment funds. It shows how likely it is that the Portfolio will lose money because of movements in the markets.

The Portfolio is classified as 3 out of 7, which is a medium-low risk class.

Risks materially relevant to the Portfolio but not adequately captured by the SRI:

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events, which could amplify everyday risks and could trigger other risks, such as:

Counterparty risk: If an entity with which the Portfolio does business becomes insolvent, payments owed to the Portfolio could be delayed, reduced and/or eliminated.

Currency risk: In the event of a share class denominated in a different currency than the investor's local currency, the return of the investor will be impacted by the exchange rate between the share class currency and the investor's local currency.

Liquidity risk: Certain securities could become hard to buy or to sell at a desired time or price.

You can find more information about the other risks in the Fund's prospectus at: www.alliancebernstein.com

Performance Scenarios

What you will get from this share class depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the share class over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. If applicable, for any periods before the share class activation/reactivation a similar share class proxy was used to replicate expected returns.

Recommended holding period:		5 years	
Example Investment:		10,000 EUR	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return and you could lose some or all of your investment.		
Stress	What you might get back after costs	6,690 EUR	6,090 EUR
	Average return each year	-33.1%	-9.5%
Unfavourable	What you might get back after costs	8,300 EUR	9,800 EUR
	Average return each year	-17.0%	-0.4%
Moderate	What you might get back after costs	9,970 EUR	11,900 EUR
	Average return each year	-0.3%	3.5%
Favourable	What you might get back after costs	11,580 EUR	13,110 EUR
	Average return each year	15.8%	5.6%

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest EUR 10,000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other investment funds.

The scenarios presented are an estimate of future performance based on evidence from the past, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment.

The figures shown include all the costs of the share class itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Unfavourable scenario: This type of scenario occurred for an investment between November 2024 and December 2025.

Moderate scenario: This type of scenario occurred for an investment between July 2019 and July 2024.

Favourable scenario: This type of scenario occurred for an investment between March 2020 and March 2025.

What happens if AllianceBernstein (Luxembourg) S.à r.l. is unable to pay out?

The Fund's assets are held with a separate company, the depositary, so the Fund's ability to pay out would not be affected by the insolvency of AllianceBernstein (Luxembourg) S.à r.l.

However, in the event of the depositary's insolvency, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the depositary is required by law to segregate its own assets from the assets of the Fund. There is no investor compensation scheme in place which may offset, all or part, of this loss.

What are the costs?

Costs over time: The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold your investment in the Portfolio. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the share class performs at the greater of 0 % or as shown in the moderate scenario;
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	887 EUR	2,433 EUR
Annual cost impact (*)	9.0%	5.3% each year

(*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.8% before costs and 3.5% after costs.

The person advising on or selling you this Portfolio may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

We may share part of the costs with the person selling you the Portfolio to cover the services they provide to you.

Composition of costs: The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

For additional information about share class characteristics and costs, please refer to the prospectus which is available at www.alliancebernstein.com

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	This will be 5.00% of the amount you pay when entering this investment. This is the most you will pay, and you could pay less.	Up to 500 EUR
Exit costs	There is no exit fee charged on the share class.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	2.06% of the value of your investment per year. This is an estimate based on actual costs over the last year.	206 EUR
Transaction costs	0.62% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments of the Portfolio. The actual amount will vary depending on how much we buy and sell.	62 EUR
Incidental costs taken under specific conditions		
Performance fees	The performance fee is equal to 20.00% a year of any returns following the High Water Mark principle. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation of 1.18% is the average over the last 5 financial years.	118 EUR

How long should I hold it and can I take money out early?

The Portfolio has no required minimum holding period but is designed for long-term investment; an investment period of minimum 5 years is recommended. Shares in the Portfolio can be purchased and redeemed on each Business Day. For practical information, please refer to the "What is this product?" section.

How can I complain?

Complaints can be submitted in writing:

- By post to: AllianceBernstein (Luxembourg) S.à r.l., Attn. Complaint Handling Officer, 2-4, rue Eugène Ruppert, L-2453 Luxembourg
- Via email to: ABLux-complaint@alliancebernstein.com

For more information, please refer to: www.alliancebernstein.com/go/Complaint-Policy
