AXA Funds Management S.A. is regulated by Commission de Surveillance du Secteur Financier.
This Product is authorised in Luxembourg and in accordance with the UCITS Directive.
Date of Production of the KID: 01/01/2023

What is this product?

Type

The Product is a share of the Sub-fund "AXA World Funds - Euro Credit Short Duration" (the Sub-fund) which is part of the SICAV "AXA World Funds" (the "Company").

Term

This product has no maturity date, although it has been created for 99 years and could be liquidated under the conditions led down in the articles of incorporation of the company.

Objectives

Investment Objective

The Sub-Fund's investment objective is to seek performance by investing in investment grade corporate and government debt securities in Euros over a medium term period.

Investment Policy

The Sub-Fund is actively managed in reference to the ICE BofA Euro Corporate 1-3 Yrs index (the "Benchmark") in order to capture opportunities in the Euro investment grade corporate and government bonds market. The Sub-Fund invests at minimum one third of its net assets in the components of the Benchmark. Depending on its investment convictions and after comprehensive macroeconomic and microeconomic analysis of the market, the Investment Manager can take more active positioning in terms of duration (duration measures in numbers of years, the portfolio's sensitivity to interest rate variations), geographical allocation and/or sector or issuer selection compared to the Benchmark. Thus, the deviation from the Benchmark is expected to be significant. However, in certain market conditions (high credit market volatility, turmoil…), the Sub-Fund's positioning on the above indicators may be close to the Benchmark.
The following investment decisions are undertaken after comprehensive macroeconomic and microeconomic analysis of the market:
- sector allocation
- geographical allocation
- issuer selection
- instrument selection

The Sub-Fund invests at least two thirds of its total assets in Euro denominated corporate, government and public institutions debt securities:
- rated investment grade (the arithmetic average of available ratings from Standard & Poor's, Moody's and Fitch)

The Sub-Fund will not invest in securities rated CCC+ or below by Standard & Poor's or equivalent rating by Moody's or Fitch (the lowest rating will be considered) or if unrated then deemed to be so by the Investment Manager in the best interest of the Sub-Fund's Shareholders. In case of downgrade below B- by Standard & Poor's or equivalent rating by Moody's or Fitch (the lowest rating will be considered) or if unrated then deemed to be so by the Investment Manager in the best interest of the Sub-Fund's Shareholders, securities will be sold within 6 months.
The total assets of the Sub-Fund may be invested in or exposed to callable bonds and up to 25% of its net assets to perpetual bonds issued by banks, insurance companies and non-financial corporates.
The selection of credit instruments is not exclusively and mechanically based on their publicly available credit ratings but also on an internal credit or market risk analysis. The decision to buy or sell assets is also based on other analysis criteria of the Investment Manager.
The Sub-Fund may also invest up to one third of tis net assets in Money Market Instruments.
The Sub-Fund may invest up to 10% of net assets in contingent convertible bonds (CoCos).
Within the limit of 200% of the Sub-Fund's net assets, the investment strategy may be achieved by direct investments and/or through derivatives, especially by entering into Credit Default Swaps. Derivatives may also be used for hedging purposes.
The Sub-Fund targets a sensitivity between 0 to 4: if interest rates increase by 1%, the Net Asset Value of the Sub-Fund may decrease up to 4%.
The Sub-Fund is a financial product that promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.
The Share Class aims at hedging the foreign exchange risk resulting from the divergence between the reference currency of the Sub-Fund and the currency of this Share Class by using derivatives instruments whilst retaining the exposure to Investment Policy of the Sub-Fund.

Income

For Capitalisation share classes (Cap), the dividend is reinvested.

Investment Horizon

The risk and the reward of the product may vary depending on the expected holding period. We recommend holding this product at least for 2 years.

Processing of subscription and redemption orders

The subscription, conversion or redemption orders must be received by the Registrar and Transfer Agent on any Valuation Day no later than 3 p.m. Luxembourg time. Orders will be processed at the Net Asset Value applicable to such Valuation Day. The investor's attention is drawn to the existence of potential additional processing time due to the possible involvement of intermediaries such as Financial Advisers or distributors.
The Net Asset Value of this Sub-Fund is calculated on a daily basis.

Intended retail Investor

The sub-fund is designed for retail investors who have neither financial expertise nor any specific knowledge to understand the sub-fund but nevertheless may bear total capital loss. It is suitable for clients who seek growth of capital. Potential investors should have an investment horizon of at least 2 years.

Depositary

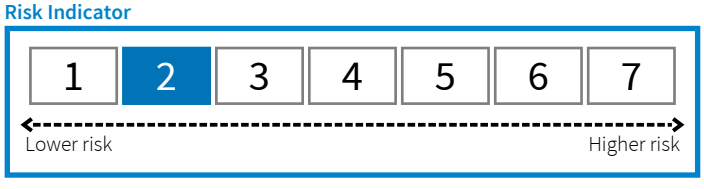

State Street Bank International GmbH (Luxembourg Branch)

Further Information

Please refer to the 'Other relevant information' section below.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 2 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7 which is the a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the return of the product.
Be aware of currency risk. If your local currency is different from the Product currency, you will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.
Other risks not included in the SRI can be materially relevant, such as counterparty risk, derivatives risk. For further information, please refer to the prospectus.
This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor . The figures do not take into account your personal tax situation, which may also affect how much you get back.
What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.
The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		**2 years**	
Example Investment:		**10000 CHF**	
		If you exit after 1 year	**If you exit after 2 years**
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment		
Stress	What you might get back after costs	8840 CHF	9030 CHF
	Average return each year	-11.60%	-4.97%
Unfavourable	What you might get back after costs	9070 CHF	9030 CHF
	Average return each year	-9.30%	-4.97%
Moderate	What you might get back after costs	9660 CHF	9610 CHF
	Average return each year	-3.40%	-1.97%
Favourable	What you might get back after costs	10000 CHF	10110 CHF
	Average return each year	0.00%	0.55%

The stress scenario shows what you might get back in extreme market circumstances.
Unfavourable scenario: this type of scenario occurred for an investment between 2020 and 2022.
Moderate scenario: this type of scenario occurred for an investment between 2016 and 2018.
Favourable scenario: this type of scenario occurred for an investment 2012 and 2014.

What happens if AXA Funds Management S.A. is unable to pay out?

The product's underlying assets are held separately by the depositary. If we encounter financial difficulties, these assets will not be affected. If the Product suffers a loss due to the depositary default you may lose the whole or part of your investments. There is no compensation or guarantee scheme protecting you from a default of the Product's depositary.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
We have assumed:
- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- CHF 10 000 is invested

	If you exit after 1 year	**If you exit after 2 years**
Total costs	403 CHF	505 CHF
Annual cost impact (*)	4.1%	2.6% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.6 % before costs and -2.0 % after costs.
We may share part of the costs with the person selling you the Product to cover the services they provide to you. They will inform you of the amount when required by the applicable laws.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	3.0 % of the amount that you pay when you enter the investment. This includes distribution costs of 3.0 % of the amount invested. This is the maximum amount you will pay. The person who sold you the product will inform you of the actual costs.	Up to 300 CHF
Exit costs	We do not charge an exit fee for this Product.	0 CHF
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.9% of the value of your investment per year. This percentage is based on actual costs over the last year.	88 CHF
Transaction costs	0.1 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	14 CHF
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this Product.	0 CHF

How long should I hold it and can I take money out early?

Recommended holding period: 2 years

This Product has no minimum required holding period, the 2 years has been calculated to be in line with the time frame which the Product may need in order to achieve its investment objectives.

You may sell your investment before the end of the recommended holding period without penalty. The performance or risk of your investment may be negatively impacted. The section "What are the costs?" provides information on the impact of costs over time.

How can I complain?

Complaints shall be addressed to the Complaint Handling Officer with the complainant' details (name, role, contact details, involved account numbers and any other relevant document) to the following address AXA Funds Management S.A. 49, avenue J.F. Kennedy L-1855 Luxembourg Grand Duchy of Luxembourg.
