AXA Funds Management S.A. is regulated by Commission de Surveillance du Secteur Financier.

This Product is authorised in Luxembourg and in accordance with the UCITS Directive.

Date of Production of the KID: 01/01/2023

What is this product?

Type

The Product is a share of the Sub-fund "AXA World Funds - ACT Emerging Markets Short Duration Bonds Low Carbon" (the Sub-fund) which is part of the SICAV "AXA World Funds" (the "Company").

Term

This product has no maturity date, although it has been created for 99 years and could be liquidated under the conditions led down in the articles of incorporation of the company.

Objectives

Investment Objective

To seek performance, in USD, by investing mainly in short duration debt securities issued in the emerging debt universe over a medium term period, whose carbon footprint is at least 30% lower than that of the index composed of 75% J. P. Morgan Corporate Emerging Market Bond Index Broad Diversified + 25% J. P. Morgan Emerging Market Bond Index Global Diversified (Benchmark). As a secondary 'extra-financial objective', the water intensity of the portfolio aims at being at least 30% lower than the Benchmark.

Investment Policy

The Sub-Fund is actively managed in order to capture opportunities in emerging short duration bonds market, primarily investing in securities that are part of the Benchmark universe. The investment manager has broad discretion over the composition of the portfolio and can take exposure to companies, countries or sectors not included in the Benchmark, even though the Benchmark constituents are generally representative of the Sub-Fund's portfolio. The deviation from the Benchmark is likely to be significant.

The Sub-Fund invests in transferable debt securities issued by emerging countries governments, corporations, public or private companies and supranational entities in non-local currency, including investment in warrants.

The Sub-Fund may invest up to 100% of its assets in debt securities rated sub-investment grade or unrated (i.e. neither the security itself nor its issuer has a credit rating).

The total assets of the Sub-Fund may be invested in or exposed to callable bonds.

The Sub-Fund may, up to 10%, hold distressed and defaulted securities as a result securities of their rating downgrade, if they are considered to be consistent with the Sub-Fund's objective. These securities are expected to be sold within 6 months unless specific events prevent the Investment Manager from sourcing their liquidity.

The Sub-Fund may invest up to 100% in sovereign debt securities but it is not the current intention that the Sub-Fund will invest more than 10% of its assets in sub-investment grade securities issued or guaranteed by any single country (including its government, public or local authority of that country). The selection of credit instruments is not exclusively and mechanically based on their publicly available credit ratings but also on an internal credit or market risk analysis. The decision to buy or sell assets is also based on other analysis criteria of the Investment Manager.

The Sub-Fund may invest up to one-third of its assets in money market instruments and up to 49% of its assets in anticipation of or during unfavourable market conditions.

The Sub-Fund will not invest in equity and equity related instruments.

The Investment Manager anticipates that the average duration of the Sub-Fund's investments will generally be three years or less.

The Sub-Fund may invest up to 5% of net assets in contingent convertible bonds (CoCos). Within the limit of 200% of the Sub-Fund's net assets, the investment strategy may be achieved by direct investments and/or through derivatives, including Credit Default Swaps. Derivatives may also be used for hedging purposes. The use of derivatives for investment purposes is limited to 50% of the Sub-Fund's net assets.

The Sub-Fund promotes environmental and/or social characteristics by investing in securities that have implemented good practices in terms of managing their ESG practices. The investment manager bindingly uses at all times an ESG 'extra-financial indicator improvement' approach, as further described in the SFDR annex of the Sub-Fund.

Firstly, the investment manager analyses carbon intensity and water intensity

data to ensure that the average of KPI carbon intensity and water intensity calculated at Sub-Fund's level is at least 30% better than that calculated for the Benchmark, followed by the application of a second exclusion filter, described in AXA IM's Sectorial Exclusion and ESG Standards Policies (<https://www.axa-im.com/our-policies>). Secondly, investment decisions are undertaken after comprehensive macro and microeconomic analysis of the market:

- geographical allocation
- duration positioning (duration measures, in number of years, the portfolio's sensitivity to interest rate variations)
- yield curve positioning (the yield curve illustrates the relationship between investment term and bond yield)
- issuer selection.

The Sub-Fund excludes from its investment universe the securities of all issuers exceeding 800 CO₂s tons/mn\$ revenue and non-green steel and oil sovereign owned entities. The Sub-Fund aims at excluding securities within the most carbon-intensive sectors including utilities and basic industries (e.g. metals and protein producers) and has the opportunity to invest in issuers who are transitioning to a more carbon sustainable path in sectors such as renewable energy and basic industry issuers who are focusing on de-carbonising their process and supply-chain.

The ESG data used in the investment process are based on ESG methodologies relying in part on third-party data, and in some cases are internally developed, are subjective and may change over time. The lack of harmonised definitions can make ESG criteria heterogeneous. As such, the different investment strategies that use ESG criteria and ESG reporting are difficult to compare with each other. Strategies incorporating ESG criteria and those incorporating sustainable development criteria may use ESG data that appear similar, but which should be distinguished because their calculation method may be different. AXA IM's ESG different methodologies described herein may evolve in the future to take into account any improvements in data availability and reliability, or any developments of regulations or other external frameworks or initiatives - among others.

The Fund is a financial product that promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

The Share Class aims at hedging the foreign exchange risk resulting from the divergence between the reference currency of the Sub-Fund and the currency of this Share Class by using derivatives instruments whilst retaining the exposure to Investment Policy of the Sub-Fund.

Income

For Capitalisation share classes (Cap), the dividend is reinvested.

Investment Horizon

The risk and the reward of the product may vary depending on the expected holding period. We recommend holding this product at least for 3 years.

Processing of subscription and redemption orders

The subscription, conversion or redemption orders must be received by the Registrar and Transfer Agent on any Valuation Day no later than 3 p.m. Luxembourg time. Orders will be processed at the Net Asset Value applicable to such Valuation Day. The investor's attention is drawn to the existence of potential additional processing time due to the possible involvement of intermediaries such as Financial Advisers or distributors.

The Net Asset Value of this Sub-Fund is calculated on a daily basis.

Intended retail Investor

The sub-fund is designed for retail investors who have neither financial expertise nor any specific knowledge to understand the sub-fund but nevertheless may bear total capital loss. It is suitable for clients who seek growth of capital. Potential investors should have an investment horizon of at least 3 years.

Depository

State Street Bank International GmbH (Luxembourg Branch)

Further Information

Please refer to the 'Other relevant information' section below.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 3 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7 which is the a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the return of the product.

Be aware of currency risk. If your local currency is different from the Product currency, you will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks not included in the SRI can be materially relevant, such as counterparty risk, derivatives risk. For further information, please refer to the prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor . The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product and the suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		3 years	
Example Investment:		10000 CHF	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment		
Stress	What you might get back after costs	7350 CHF	7620 CHF
	Average return each year	-26.50%	-8.66%
Unfavourable	What you might get back after costs	7810 CHF	7620 CHF
	Average return each year	-21.90%	-8.66%
Moderate	What you might get back after costs	9760 CHF	9910 CHF
	Average return each year	-2.40%	-0.30%
Favourable	What you might get back after costs	11150 CHF	10320 CHF
	Average return each year	11.50%	1.06%

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: this type of scenario occurred for an investment between 2020 and 2022.

Moderate scenario: this type of scenario occurred for an investment between 2018 and 2021.

Favourable scenario: this type of scenario occurred for an investment 2013 and 2016.

An appropriate benchmark of the Product was used to calculate the performance.

What happens if AXA Funds Management S.A. is unable to pay out?

The product's underlying assets are held separately by the depositary. If we encounter financial difficulties, these assets will not be affected. If the Product suffers a loss due to the depositary default you may lose the whole or part of your investments. There is no compensation or guarantee scheme protecting you from a default of the Product's depositary.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- CHF 10 000 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	459 CHF	797 CHF
Annual cost impact (*)	4.6%	2.7% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.4 % before costs and -0.3 % after costs.

We may share part of the costs with the person selling you the Product to cover the services they provide to you. They will inform you of the amount when required by the applicable laws.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	3.0 % of the amount that you pay when you enter the investment. This includes distribution costs of 3.0 % of the amount invested. This is the maximum amount you will pay. The person who sold you the product will inform you of the actual costs.	Up to 300 CHF
Exit costs	We do not charge an exit fee for this Product.	0 CHF
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.3% of the value of your investment per year. This percentage is based on actual costs over the last year.	125 CHF
Transaction costs	0.4 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	34 CHF
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this Product.	0 CHF

How long should I hold it and can I take money out early?

Recommended holding period: 3 years

This Product has no minimum required holding period, the 3 years has been calculated to be in line with the time frame which the Product may need in order to achieve its investment objectives.

You may sell your investment before the end of the recommended holding period without penalty. The performance or risk of your investment may be negatively impacted. The section "What are the costs?" provides information on the impact of costs over time.

How can I complain?

Complaints shall be addressed to the Complaint Handling Officer with the complainant's details (name, role, contact details, involved account numbers and any other relevant document) to the following address AXA Funds Management S.A. 49, avenue J.F. Kennedy L-1855 Luxembourg Grand Duchy of Luxembourg.
