

# Key Information Document

## Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

## Product

### Fidelity Funds - America Fund A-ACC-Euro (hedged)

FIL Investment Management (Luxembourg) S.A.

ISIN: LU0945775517

<http://www.fidelity.lu>

Call +352 250 4041 for further information.

FIL Investment Management (Luxembourg) S.A. is a member of the Fidelity group of companies

Commission de Surveillance du Secteur Financier (CSSF) is responsible for supervising FIL Investment Management (Luxembourg) S.A. in relation to this key information document.

This PRIIP is authorised in Luxembourg.

FIL Investment Management (Luxembourg) S.A. is authorised in Luxembourg and regulated by Commission de Surveillance du Secteur Financier (CSSF).

**Publication date:** 01/01/2023

## What is this product?

### Type

Shares of a sub-fund of Fidelity Funds SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS).

**SFDR product category:** Article 8 (promotes ESG characteristics).

### Term

This fund is open-ended.

### Objectives

**Objective:** The fund aims to achieve capital growth over time.

**Investment Policy:** The fund invests at least 70% (and normally 75%) of its assets, in equities of companies that are listed, headquartered, or do most of their business in the US. The fund may also invest in money market instruments on an ancillary basis. The fund invests at least 50% of its assets in securities of companies with favourable environmental, social and governance (ESG) characteristics.

**Investment Process:** In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors. The Investment Manager also considers ESG characteristics when assessing investment risks and opportunities. In determining favourable ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies. Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

The fund adheres to the Fidelity Sustainable Investing Framework standards. For more information, see "Sustainable Investing and ESG Integration".

**Derivatives and Techniques:** The fund may use derivatives for

hedging and for efficient portfolio management.

**Benchmark:** S&P500 Index, an index that does not take into account ESG characteristics. Used for: performance comparison only.

**Base Currency:** EUR.

**Risk Management Method:** Commitment.

**Additional Information:** You may sell (redeem) some or all of your Shares on any Valuation Day. As this is a non-distributing share class, dividends are re-invested. This key information document describes a sub-fund of Fidelity Funds. A separate pool of assets is invested and maintained for each sub-fund of Fidelity Funds.

The assets and liabilities of the fund are segregated from those of other sub-funds and there is no cross-liability among the sub-funds. For more information, please consult the prospectus and latest reports and accounts which can be obtained free of charge in English and other main languages from FIL Investment Management (Luxembourg) S.A.

These documents and details of the Remuneration Policy are available via <https://www.fil.com>.

The Net Asset Value of the funds is available at the registered office of FIL Investment Management (Luxembourg) S.A., and at [www.fidelityinternational.com](http://www.fidelityinternational.com).

**Depository:** Brown Brothers Harriman (Luxembourg) S.C.A.

### Intended retail investor

This product may appeal to investors with a basic knowledge of and no or limited experience of investing in funds; who plan to hold their investment for a recommended holding period of at least 4 years; who seek capital growth over the recommended holding period; and who understand the risk of losing some or all the capital invested.

## What are the risks and what could I get in return?

### Risk Indicator

The risk indicator assumes you keep the product for 4 years.  
The actual risk can vary significantly if you cash in at the early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity to pay you.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

Additional risks: See "Risk Descriptions" for more information. Concentration, Counterparty and collateral, Currency, Derivatives, Equities, Hedging, Investment fund, Liquidity, Market, Operational, Sustainable investing

This product does not include any protection from future market performance so you could lose some or all of your investment.

If FIL Investment Management (Luxembourg) S.A. is not able to pay you what is owed, you could lose your entire investment.

### Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

| Recommended holding period: 4 years<br>Example investment : EUR 10,000 |                                                                                       | If you exit after |            |

|                                                                        | Average return each year                                                              | -69,6%            | -27,3%     |
| Unfavourable                                                           | What you might get back after costs                                                   | 7.600 EUR         | 8.770 EUR  |
|                                                                        | Average return each year                                                              | -24,0%            | -3,2%      |
| Moderate                                                               | What you might get back after costs                                                   | 10.590 EUR        | 12.030 EUR |
|                                                                        | Average return each year                                                              | 5,9%              | 4,7%       |
| Favourable                                                             | What you might get back after costs                                                   | 14.820 EUR        | 19.060 EUR |
|                                                                        | Average return each year                                                              | 48,2%             | 17,5%      |

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 03/2016 and 03/2020.

The moderate scenario occurred for an investment between 01/2016 and 01/2020.

The favourable scenario occurred for an investment between 01/2016 and 01/2020.

### What happens if FIL Investment Management (Luxembourg) S.A. is unable to pay out?

The assets and liabilities of this product are segregated from those of FIL Investment Management (Luxembourg) S.A. There is no cross-liability between these entities, and the product would not be liable if FIL Investment Management (Luxembourg) S.A. or any delegated service provider were to fail or default.

Shares of this product are traded on a stock market and settlement of such transactions are not affected by the position of FIL Investment Management (Luxembourg) S.A.

This product does not participate in an investor compensation scheme.

## What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

|                        | If you exit after<br>1 year | If you exit after<br>4 years |
|------------------------|-----------------------------|------------------------------|
| Total costs EUR        | 746 EUR                     | 1.593 EUR                    |
| Annual cost impact (*) | 7,5%                        | 3,9% each year               |

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.3% before costs and 3.4% after costs.

### Composition of Costs

| One-off costs upon entry or exit                            |                                                                                                                                                                                                                              | If you exit after 1 year |
|-------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| Entry costs                                                 | 5.3% of the amount you pay in when entering this investment.                                                                                                                                                                 | 511 EUR                  |
| Exit costs                                                  | We do not charge an exit fee for this product.                                                                                                                                                                               | 0 EUR                    |
| Ongoing costs taken each year                               |                                                                                                                                                                                                                              |                          |
| Management fees and other administrative or operating costs | 1.9% of the value of your investment per year. This is an estimate based on actual costs over the last year.                                                                                                                 | 183 EUR                  |
| Transaction costs                                           | 0.5% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. | 52 EUR                   |
| Incidental costs taken under specific conditions            |                                                                                                                                                                                                                              |                          |
| Performance fees                                            | There is no performance fee for this product.                                                                                                                                                                                | 0 EUR                    |

## How long should I hold it and can I take money out early?

### Recommended holding period: 4 years.

The recommended holding period is based on our assessment of the risk and reward characteristics and costs of the product.

**Order Processing:** Requests to buy, switch or sell fund shares that are received and accepted by the Management Company by 4:00 PM CET (3:00 PM UK time) on any Valuation Day are ordinarily processed at the NAV for that Valuation Day. Settlement occurs within 3 business days after receipt of written instructions, and in case of redemptions no later than 5.

## How can I complain?
