WHAT IS THIS PRODUCT?

Type

This Product is an undertaking for collective investment in transferable securities (UCITS). It is a sub-fund of THEAM QUANT-, an open-ended investment company (société d'investissement à capital variable "SICAV") governed by the provisions of Part I of the Luxembourg Law of 17 December 2010 (the "2010 Law") relating to undertakings for collective investment as well as by UCITS Directive 2009/65.

Term

This Product has no maturity date.

BNPP AM is not entitled to terminate the Product unilaterally. The board of directors has the authority to decide on the merger, split, liquidation or the closure of the sub-fund. Furthermore, the SICAV may be wound up by decision of an extraordinary general meeting of shareholders.

Objectives

The Sub-Fund seeks to increase the value of its assets over the medium term by being exposed to a dynamic basket of European equities, the components of which are chosen using a systematic selection method based on a fundamental analysis of companies while taking into account Environmental, Social and Governance (ESG) criteria.

In order to achieve its investment objective, the Sub-fund implements a quantitative investment strategy (the Strategy) that consists of the following steps:

- (a) definition of the investment universe composed of Europe's largest stock market capitalisations offering satisfactory liquidity conditions and meeting minimum ESG requirements following a best-in-class approach. Are in particular excluded, companies involved in sectors with potentially high negative ESG impact, those subject to significant violations of the principles of the United Nations Global Compact and those that have been involved in serious controversies related to ESG.
- (b) selection of stocks using a fundamental approach. The objective is to examine the investment universe in order to identify the stocks benefiting from a sustainable business model, favourable outlook and attractive valuation.
- (c) ensuring minimum ESG and carbon objectives, consisting of a lower carbon footprint and of a better ESG score of the Strategy final portfolio compared to a reference market investment universe.

An extra-financial strategy may comprise methodological limitations such as the Risk related to ESG investment or the Risk related to a systematic allocation incorporating extra-financial criteria.

The Strategy is implemented via the use of the BNP Paribas GURU® Europe ESG NTR EUR Index (the Strategy Index) financial index. It is based on a quantitative model developed by BNP Paribas and is rebalanced every month using a specific algorithm. The rebalancing of the Strategy Index does not involve any cost for the Strategy Index. The complete breakdown of the Strategy Index is available on the website: <https://indx.bnpparibas.com>. The index calculation method is available directly at: <https://indx.bnpparibas.com/nr/BNPIGEU.pdf>.

The Strategy of the Sub-fund is deemed active. The Sub-fund benchmark is the Stoxx Europe 600 (EUR) NR with no objective to replicate it.

The Strategy will be implemented either according to a Synthetic Replication Policy, through the conclusion of OTC Derivatives or in cash by investing directly in the basket of equities that make up the Strategy. The Synthetic Replication Policy implies that the Sub-Fund does not actually hold the underlying securities of the Strategy, but instead relies on OTC Derivatives to deliver the performance of the Strategy. The Sub-fund invests at all times at least 75% of its net assets in equities issued by companies that have their registered office in a Member State of the European Economic Area.

Investors are able to subscribe or redeem any day which stock exchanges are open during the whole day in France, United Kingdom, Germany, Sweden, Italy, Swiss, Norway and Denmark (excluding Saturdays and Sundays and Luxembourg and French public holidays).

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this Product compared to other Products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Product as 4 out of 7, which is a medium risk class. The risk category is justified by the investment mainly in stocks and shares, the value of which can fluctuate considerably. These fluctuations are often amplified in the short term.

Be aware of currency risk. If the currency of your account is different from the currency of this Product, the payments you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the Product not included in the summary risk indicator:

- Counterparty Risk: this risk is associated with the ability of a counterparty in an Over The Counter financial transaction to fulfil its commitments like payment, delivery and reimbursement.

- Risk linked to the use of financial derivative instruments: these instruments may involve a range of risks that may affect the net asset value.

For additional details regarding the risks, please refer to the prospectus.

This Product does not include any protection from future market performance so you could lose some or all of your investment.

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate and favourable scenarios presented represent examples using the best and worst performance, as well as the average performance of the Product and/or appropriate benchmark over the last 10 years. WHAT HAPPENS IF BNPP AM IS UNABLE TO PAY OUT?

The SICAV is incorporated as a separate entity distinct from BNPP AM.

In the event BNPP AM would default, the assets of the SICAV, held by a depositary, would not be affected by this default.

In case of the default of the depositary, the risk of financial loss of the SICAV is mitigated by the legal segregation of the assets of the depositary from those of the Product/SICAV.
