What is this product?

Type

The Product is a share class of the Sub-Fund "AXA World Funds - Global Short Duration Bonds" (the Sub-Fund) which is part of the SICAV "AXA World Funds" (the "Company").

Term

This product has no maturity date, although it has been created for 99 years and could be liquidated under the conditions laid down in the articles of incorporation of the company.

Objectives

Investment Objective

To seek to generate income, in EUR, through dynamic exposure to the global short duration fixed income universe.

Investment Policy

The Sub-Fund is actively managed without reference to any benchmark.

The Investment Manager will seek to achieve the objective of the Sub-Fund by investing in a diversified portfolio of short duration transferable securities (rated investment grade or non-investment grade) including inflation-linked bonds, issued by governments, corporations or institutions located anywhere in the world, including emerging markets countries, denominated in hard currency (globally traded major currencies) and money market instruments.

The total assets of the Sub-Fund may be invested in callable bonds.

The Sub-Fund may invest up to 60% of its net assets in non-investment grade debt securities (i.e., rated lower than BBB- by Standard & Poor's or Fitch or lower than Baa3 by Moody's or, if unrated, then deemed to be so by the Investment Manager). However, at all times, the Sub-Fund will have an average investment grade rating.

The Sub-Fund may also invest up to 25% of net assets in subordinated debts issued by banks, insurance companies and non-financial corporates.

The Sub-Fund may, up to 10%, hold distressed and defaulted securities as a result of their rating downgrade, if they are considered to be consistent with the Sub-Fund's objective. These securities are expected to be sold within 6 months unless specific events prevent the Investment Manager from sourcing their liquidity. The Sub-Fund may invest up to 10% of its net assets in assets issued by securitization vehicles or equivalent (such as assets backed securities (ABS), Collateralized Debt Obligations (CDO), Collateralized Loan Obligations (CLO) or any similar assets).

The Sub-Fund may invest its net assets in 144A securities, in a substantial way depending on the opportunity.

The asset allocation of the Sub-Fund will be driven by the AXA Fixed Income

global investment process in order to create a diversified portfolio of short duration fixed income securities.

The selection of debt securities is not exclusively and mechanically based on their publicly available credit ratings but also on an internal credit and market risk analysis. The decision to buy or sell securities is also based on other analysis criteria of the investment manager.

There is no formal restriction on the proportion of the Sub-Fund's assets that can be invested and/or exposed to any particular fixed income securities with the exception of the exposure to non-investment grade debt securities. For efficient portfolio management and for hedging purposes, the Sub-Fund may use derivatives, including Credit Default Swaps, within the limit of 200% of the Sub-Fund's net assets.

The Sub-Fund may invest up to 5% of net assets in contingent convertible bonds (CoCos).

The Sub-Fund is a financial product that promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

Income

For Capitalisation share classes (Cap), the dividend is reinvested.

Investment Horizon

The risk and the reward of the product may vary depending on the expected holding period. We recommend holding this product at least for 2 years.

Processing of subscription and redemption orders

The subscription, conversion or redemption orders must be received by the Registrar and Transfer Agent on any Valuation Day no later than 3 p.m. Luxembourg time. Orders will be processed at the Net Asset Value applicable to such Valuation Day. The investor's attention is drawn to the existence of potential additional processing time due to the possible involvement of intermediaries such as Financial Advisers or distributors.

The Net Asset Value of this Sub-Fund is calculated on a daily basis.

Intended retail investor

The sub-fund is designed for retail investors who have neither financial expertise nor any specific knowledge to understand the sub-fund but nevertheless may bear total capital loss. It is suitable for clients who seek growth of capital. Potential investors should have an investment horizon of at least 2 years.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 2 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

We have classified this product as 2 out of 7 which is a low risk class. This rates the potential losses from future performance at a low level. The risk category associated to this product was determined based on past observations, it is not guaranteed and can evolve in the future.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks not included in the Summary risk indicator can be materially relevant, such as counterparty risk. For further information, please refer to the prospectus. This product does not include any protection from future market performance so you could lose some or all of your investment.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product and the suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:	2 years		
Example Investment:	€10 000		
	If you exit after 1 year	If you exit after 2 years	
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment		
Stress	What you might get back after costs	€8 620	€8 900
	Average return each year	-13.80%	-5.66%

An appropriate benchmark of the Product was used to calculate the performance.

What happens if BNP PARIBAS ASSET MANAGEMENT EUROPE SAS is unable to pay out?

The product is constituted as a separate entity from BNPP AM. In case of default of BNPP AM, the assets of the product kept by the custodian will not be affected. In case of default of the custodian, the risk of financial loss of the product is mitigated because of the legal segregation of the assets of the custodian from those of the product.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested

	If you exit after 1 year	If you exit after 2 years
Total costs	€383	€468
Annual cost impact (*)	3.9%	2.4% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.12 % before costs and -1.26 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	3.00 % of the amount that you pay when you enter the investment. This includes distribution costs of 3.00 % of the amount invested. This is the maximum amount you will pay. The person who sold you the product will inform you of the actual costs.	Up to €300
Exit costs	We do not charge an exit fee for this product.	€0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.79% of the value of your investment per year. This percentage is based on actual costs over the last year.	€77
Transaction costs	0.07 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	€7
Incidental costs taken under specific conditions		
Performance fees (and carried interest)	There is no performance fee for this product.	€0

How long should I hold it and can I take money out early?
