What is this product?

Type:

The Fund is a sub-fund of M&G (Lux) Investment Funds 1, a société d'investissement à capital variable (SICAV), organised as an umbrella fund with segregated liability between sub-funds. Governed and established under Luxembourg Law as an Undertaking for Collective Investment in Transferable Securities (UCITS).

Objectives:

The Fund aims to provide a combination of capital growth and income to deliver a return that is higher than that of the Asia Pacific (excluding Japan) equities market over any five-year period while applying ESG Criteria.

Core investment: at least 80% of the Fund is invested in the shares of companies that are based, or do most of their business, in the Asia Pacific (excluding Japan) region. The Fund may invest in China A- Shares via the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect. The Fund invests in securities that meet the ESG Criteria, applying an Exclusionary Approach and Positive ESG Tilt as described in the precontractual annex.

Other investments: other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

Derivatives usage: to reduce risks and costs.

Strategy in brief:

- Investment approach: the Fund invests in the shares of companies whose long-term prospects are considered to be undervalued. Stock selection is driven by in-depth analysis of individual companies, with a specific focus on their level of profitability, their corporate governance practices and the valuation of the shares. The investment manager selects stocks with distinct profitability profiles to build a fund that has the potential to cope in a variety of market conditions.
- Investment manager's ESG classification: Planet+ / ESG Enhanced, as defined in the Fund's Prospectus.

Benchmark: MSCI AC Asia Pacific ex Japan Net Return Index

The benchmark is a comparator used solely to measure the Fund's performance and reflects the financial aspects of the Fund's investment policy but does not constrain portfolio construction. The Fund is actively managed. The Fund's holdings may deviate significantly from the benchmark's constituents, and as a result the Fund's performance may deviate materially from the benchmark. For unhedged and currency hedged share classes, the benchmark is shown in the share class currency.

Intended Retail Investor:

The Fund is for retail and institutional investors who want long term capital growth and income through investment in Asian securities. The Fund is appropriate for investors with sustainability preferences. The return on your Fund is directly related to the value of its underlying assets, which is determined by the market's view on how well each company is performing, as well as reflecting broader economic and political themes. As an investor your capital is at risk. The value of your portfolio, and any income you may receive from it, can go down as well as up. You may get back less than you originally invested.

Any income from the Fund will be rolled up into the value of your investment.

Product Term: The Fund has no set maturity date but is designed to be held for a minimum of 5 years. However, it is possible for the Directors of the company to terminate the Fund, without the prior consent of the shareholders, where it is deemed to be uneconomic to run or in the best interests of shareholders. Refer to the Prospectus for more information.

What are the risks & what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The risk indicator assumes you keep the product for 5 year(s). This product has no maturity date.

We have classified this product as 4 out of 7, which is a medium risk class.

Performance Scenarios

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the fund over the last 10 years. Markets could develop very differently in the future.

WHAT HAPPENS IF M&G Luxembourg S.A. IS UNABLE TO PAY OUT?

The assets of the Fund are held in safekeeping by the Depositary detailed in the prospectus. In the event of the insolvency of the Manager, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations). The Depositary is required by Luxembourg law to be member of the Fonds de Garantie des Dépôts Luxembourg (FGDL, the Luxembourg Deposit Guarantee Fund) <https://www.cssf.lu/en/protection-of-depositors-and-investors/>

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario and the investment is € 10.000,00.

Table 1: Costs over time (Based on an investment of € 10.000,00)

Scenarios	1 year	If you exit after: 5 years*
Total costs	€704,00	€2.241,00
Impact on return (RIY) per year	7,00%	3,30%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9,69% before costs and 6,39% after costs. These figures include the maximum distribution fee that the person selling you the product may charge. This person will inform you of the actual distribution fee.

Table 2: Composition of costs
