# AXA World Funds - Euro Buy and Maintain Sustainable Credit

A Sub-Fund of AXA World Funds SICAV

Share class: AXA World Funds - Euro Buy and Maintain Sustainable Credit A Capitalisation EUR (ISIN : LU1670744215)

This Sub-Fund is managed by AXA Funds Management S.A., part of the AXA IM Group

## Objective and Investment Policy

### Investment Objective

The Sub-Fund seeks both income and growth of your investment, in EUR, and a sustainable investment objective, from an actively managed bond portfolio, in line with a socially responsible investment (SRI) approach.

### Investment Policy

The Sub-Fund is actively managed in order to capture the credit premium offered by the corporate credit market in an economical manner, by investing at minimum one third of its net assets in securities that are part of the BofA Merrill Lynch Emu Corporate benchmark index (the "Benchmark") universe. As part of the investment process, the Investment Manager has broad discretion over the composition of the Sub-Fund's portfolio and can take, based on its investment convictions, exposure to companies, countries or sectors not included in the Benchmark or take different positioning in terms of duration, geographical allocation and/or sector or issuer selection compared to the Benchmark, even though the Benchmark constituents are generally representative of the Sub-Fund's portfolio. Thus, the deviation from the Benchmark is likely to be significant.

The Sub-Fund uses a SRI approach by investing in sustainable securities that have implemented good practices in terms of environmental impacts, governance and social (ESG) practices. Firstly, the Sub-Fund bindingly applies at all times AXA IM's Sectorial Exclusion and ESG Standards Policies except for derivatives and underlying UCIs

([www.axa-im.com/responsible-investing/sector-investment-guidelines](http://www.axa-im.com/responsible-investing/sector-investment-guidelines)) and a "Best-in-class" selectivity approach which consists in selecting the best issuers in the investable universe based on their extra-financial ratings (ESG scores), as described in the prospectus. Secondly, the investment manager selects the investments based on a number of factors, including macro- and microeconomic analysis and credit analysis of issuers and on a rigorous analysis of the companies' business model, management quality, growth prospects, whether the company meets Responsible Investment criteria and risk/return profile. The investment manager also manages the credit curve positioning and the exposure to different geographical areas, sectors and types of instruments. As an example, the ESG criteria may be carbon footprint for the environmental aspect, management of human resources and gender equality for the social aspect, or remuneration policy for the governance aspect.

The ESG data used are based on methodologies relying in part on third party data and in some cases are internally developed, are subjective and may change over time. The lack of harmonised definitions can make ESG criteria heterogeneous. As such, the different strategies using ESG criteria and ESG reporting are difficult to compare with each other. Strategies incorporating ESG criteria and those incorporating sustainable development criteria may use data that appear similar but which should be distinguished because their calculation method may be different.

The Sub-Fund invests:

- essentially in corporate or government bonds rated investment grade at the time of purchase (the arithmetic average of available ratings from Standard & Poor's, Moody's, or Fitch will be considered) issued worldwide, mainly denominated in Euro

- in the case of a downgrade of securities in portfolio, up to 5% of its net assets in sub-investment grade securities rated between BB+ and B- (the arithmetic average of available ratings from Standard & Poor's, Moody's and Fitch will be considered) or if unrated then deemed to be so by the Investment Manager in the best interest of the Sub-Fund's shareholders. The Sub-Fund will not invest in securities rated CCC+ or below by Standard & Poor's or equivalent rating by Moody's or Fitch (the lowest rating will be considered) or if unrated then deemed to be so by the Investment Manager in the best interest of the Sub-Fund's Shareholders. In case of downgrade below B- by Standard & Poor's or equivalent rating by Moody's or Fitch (the lowest rating will be considered) or if unrated then deemed to be so by the Investment

Manager in the best interest of the Sub-Fund's Shareholders, securities will be sold within 6 months

The Sub-Fund may invest in Money Market Instruments. The selection of credit instruments is not exclusively and mechanically based on their publicly available credit ratings but also on an internal credit or market risk analysis. The decision to buy or sell assets is also based on other analysis criteria of the Investment Manager.

The Sub-Fund may invest up to 5% of net assets in contingent convertible bonds (CoCos).

Within a limit of 200% of the Sub-Fund's net assets, the investment strategy may be achieved by direct investments and/or through derivatives. Derivatives may be used for hedging purposes.

The Fund is a financial product aiming to achieve a sustainable investment objective within the meaning of article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

### Income

For Capitalisation share classes (Cap), the dividend is reinvested.

### Sub-Fund Currency

The reference currency of the Sub-Fund is EUR.

### Investment Horizon

This Sub-Fund may not be suitable for investors who plan to withdraw their contribution within 3 years.

### Processing of subscription and redemption orders

The subscription, conversion or redemption orders must be received by the Registrar and Transfer Agent on any Valuation Day no later than 3 p.m. Luxembourg time. Orders will be processed at the Net Asset Value applicable to such Valuation Day. The investor's attention is drawn to the existence of potential additional processing time due to the possible involvement of intermediaries such as Financial Advisers or distributors.

The Net Asset Value of this Sub-Fund is calculated on a daily basis.

## Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Sub-Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean risk free.

### Why is this Sub-Fund in this category?

The capital of the Sub-Fund is not guaranteed. The Sub-Fund is invested in financial markets and uses techniques and instruments which are subject to some levels of variation, which may result in gains or losses.

### Additional Risks (risks materially relevant to the fund which are not adequately captured by the indicator)

Counterparty Risk: Risk of bankruptcy, insolvency, or payment or delivery failure of any of the Sub-Fund's counterparties, leading to a payment or delivery default.

Liquidity Risk: risk of low liquidity level in certain market conditions that might lead the Sub-Fund to face difficulties valuing, purchasing or selling all/part of its assets and resulting in potential impact on its net asset value.

Credit Risk: Risk that issuers of debt securities held in the Sub-Fund may default on their obligations or have their credit rating downgraded, resulting in a decrease in the Net Asset Value.

Impact of any techniques such as derivatives: Certain management strategies involve specific risks, such as liquidity risk, credit risk, counterparty risk, legal risk, valuation risk, operational risk and risks related to the underlying assets.

The use of such strategies may also involve leverage, which may increase the effect of market movements on the Sub-Fund and may result in significant risk of losses.

## Charges

The charges you pay are used to pay the cost of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry Charge	3.00%
Exit Charge	none

This is the maximum that might be taken out of your money before it is invested.

### Charges taken from the fund over a year

Ongoing charge	0.57%
----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fees	none
------------------	------

The entry and exit charges shown are maximum figures. In some cases, you might pay less - you can find this out from your Financial Adviser.

The percentage of ongoing charges is an estimate. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Sub-Fund when buying or selling units in another collective investment undertaking

For more information about charges, please refer to the Fees and Expenses section of the prospectus which is available at [www.axa-im.com](http://www.axa-im.com).

## Past Performance

- AXA WF Euro Buy and Maintain Sustainable Credit A Capitalisation EUR (ISIN : LU1670744215)
- 100% ICE BofAML Euro Corporate

Past performance is not a reliable indicator of future results.

Past performance is shown after the deduction of ongoing charges. Any entry/exit fees are excluded from the calculation.

The Sub-Fund was launched on 08/01/2015 and the share class in 2018. Past performance has been calculated in EUR and is expressed as a percentage change of the Sub-Fund's Net Asset Value at each year end.

The performance of the Sub-Fund is not tracking the benchmark index. For the different shareclasses of the Sub-Fund, the performance of the benchmark is displayed in the "Past Performance" section either as converted to the currency of the relevant shareclass or hedged against the reference currency of the Sub-fund in the case of hedged shareclasses ("hedged benchmark"). For some cases where the hedged benchmark is not available, the benchmark is displayed in the reference currency of the Sub-Fund, thus the performance of the displayed benchmark may deviate from the one of the relevant shareclass due to the performance differential inherent within the currency hedging activity not reflected in the benchmark.
