What is this product?

TYPE

This Product is a sub-fund of DNCA Invest SICAV, an investment company with variable capital regulated by Luxembourg law and qualifying as UCITS pursuant to Directive 2009/65/CE.

TERM

The Product is established for an unlimited duration and liquidation must be decided upon by the Board of Directors.

OBJECTIVES

The Product seeks to provide, throughout the recommended investment period of more than three years, a higher performance, net of any fees, than the €STR index plus 2%. This performance objective is sought by associating it to a lower annual volatility than 5% in normal market conditions. Investors' attention is drawn to the fact that the management style is discretionary and integrates environmental, social / societal and governance (ESG) criteria.

For private issuers, the initial investment universe is composed of Government bonds issued by the countries of the United Nation which integrate the 17 Sustainable Development Goals. This universe also includes corporate bonds and related securities from issuers having their registered office in OECD countries securities having a rating of at least B- by Standard & Poor's or being considered as equivalent, and supranational agencies. From this initial investment universe, are excluded issuers with controversies or in severe breach to UN Global Compact Principles (example: human rights or fight against corruption) based on the internal approach. Moreover, a strict controversial weapons exclusion and sectorial exclusion policy is implemented and is available on the DNCA website. The investment process and resulting stock and bond picking take into account internal scoring with respect to both corporate responsibility of companies based on an extra-financial analysis through a proprietary rating model (ABA, Above & Beyond Analysis) developed internally by DNCA. This model is centered on following pillars as corporate responsibility, controversies, dialogue and engagement with issuers. The risk exists that the models used to make these investment decisions do not perform the tasks they were designed to. The use of the proprietary tool relies on the experience, relationships and expertise of DNCA with the "best in universe" method. There may be a sector bias. The Product will proceed to the extra-financial analysis on at least 90% of its securities, excluding cash, cash equivalents, derivatives and money market funds while excluding 20% of the worst issuers from its investment universe.

The investment process is made of the combination of strategies including a long/short directional strategy aiming to optimize the performance of the portfolio based on interest rate and inflation expectations; an interest rate curve strategy aiming to exploit the variations of the spreads between long-term rates and short-term rates; an arbitrage strategy aimed at seeking the relative value on various bond asset classes; a credit strategy founded on the usage of bonds issued by the private sector.

The modified duration of the Product will stay between -3 and +7, without any restriction on the modified duration of individual securities in the Product.

The Product will at all times invest no more than 25% of its total assets in bonds in any currency from non-OECD issuers. The Product will be solely invest in securities having a rating of at least B- by Standard & Poor's or being considered as equivalent, at the time of purchase. Fixed Income securities which may be downgraded during their lifetime under B- grade may not exceed 10% of its total assets.

The Product mainly invests in fixed rate, floating rate or inflation-indexed debt securities and negotiable debt within the following limits: convertible or exchangeable bonds: up to 100% of its total assets and Contingent convertible bonds (Coco Bonds): at most 20% of its total assets, equities (through exposure from convertible bonds, synthetic convertibles bonds or options on future equity market): up to 10% of the Product's asset may be exposed to the stock market.

The Product may invest up to 10% of its net assets in units and/or shares of UCITS and/or other UCIs.

The Product will use all types of eligible derivatives instruments traded on regulated or OTC markets when these contracts are better suited to the management objective or offer lower trading costs. These instruments may include, but are not restricted to: futures, options, swaps, CDS on indices, CDS. The Product may invest in securities denominated in any currency. The non-base currency exposure may be hedged back to the base currency to moderate the currency exchange risks which will not represent more than 30% of the total assets of the Product.

This is an accumulation share.

INTENDED RETAIL INVESTORS

The Product is intended for retail investors who have no financial knowledge or experience of the financial sector. The Product is intended for investors who can withstand capital losses and who do not require a capital guarantee.

The NAV is available on the website: www.dnca-investments.com.

What are the risks and what could I get in return?

RISK INDICATOR

Lower risk

The risk indicator assumes you keep the product for 3 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the Product lie in the possibility of depreciation of the securities in which the Product is invested.

Higher risk

We have classified this Product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Other risks materially relevant to the Product and which could lead to a fall in the net asset value to which the indicator gives too little consideration: counterparty risk and operational risk.

This Product does not include any protection from future market performance, so you could lose some or all of your investment.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances. What you get will depend on market trends and how long you keep the Product.

Recommended holding period:
Example investment

3 years
EUR 10 000

If you exit after
1 year

If you exit after
3 years

SCENARIOS

Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs Average return each year	EUR 9180 -8.2%	EUR 8650 -4.7%
Unfavourable	What you might get back after costs Average return each year	EUR 9340 -6.6%	EUR 9650 -1.2%
Moderate	What you might get back after costs Average return each year	EUR 10350 3.5%	EUR 10800 2.6%
Favourable	What you might get back after costs Average return each year	EUR 10950 9.5%	EUR 12480 7.7%

- The unfavourable scenario occurred for an investment in the proxy then the Product between March 2017 and March 2020.
- The moderate scenario occurred for an investment in the Product between June 2019 and June 2022.
- The favourable scenario occurred for an investment in the Product between March 2020 and March 2023.

What happens if DNCA Finance is unable to pay out?

The Product is a co-ownership of financial instruments and deposits separate from DNCA Finance. In the event of the default of DNCA Finance, the assets of the Product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss of the Product is mitigated due to the legal segregation of the depositary's assets from those of the Product.

What are the costs?

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product and how well the Product does.

The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario.
- EUR 10 000 is invested.

Investment of EUR 10 000

If you exit after 1 year

If you exit after 3 years

Total costs	EUR 225	EUR 510
Annual cost impact (*)	2.2%	1.6% each year

* The annual cost impact illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 4.2% before costs and 2.6% after costs.

We may share part of costs with the person selling you the Product to cover the services they provide to you. These figures include the maximum distribution fee and which amount of 100% of costs. This person will inform you of the actual distribution fee.

COMPOSITION OF COSTS

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	Up to 1.00% of the amount you pay in when entering this Investment. This is the most you will be charged. The person selling you the Product will inform you of the actual charge.	Up to EUR 100
Exit costs	We do not charge an exit fee for this Product.	None
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.66% of the value of your investment per year. This is an estimate based on actual costs over the last year.	EUR 66
Transaction costs	0.21% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the Product. The actual amount will vary depending on how much we buy and sell.	EUR 21
Incidental costs taken under specific conditions		
Performance fees	20.00% of the positive performance net of any fees above the €STER + 2% with High Water Mark. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	EUR 38

How long should I hold it and can I take my money out early?

Recommended holding period: 3 years.

Shareholders may redeem shares on demand and executed on each NAV calculation and publication day before 12.00 noon (Luxembourg time).

The recommended holding period was chosen depending on the asset class, investment strategy and risk profile of the Product, to enable it to achieve its investment objective while minimizing the risk of loss.

You can redeem all or part of your investment at any time before the end of the recommended holding period, or hold it longer. There are no penalties for early divestment. However, if you request redemption before the end of the recommended holding period, you may receive less than expected.

The Product has a redemption capping system known as « Gates » described in the prospectus.

How can I complain?

If you have any complaints about the Product, you can send a written request with a description of the problem either by e-mail dnca@dnca-investments.com or to the following address: DNCA Finance, 19 Place Vendôme, 75001 Paris.

Other relevant information

The Product promotes environmental or social and governance (ESG) criteria within the meaning of Article 8 of Regulation (EU) 2019/2088 on sustainability reporting in the financial services sector ("SFDR Regulation").

The Product's prospectus and the latest key information document, as well as the latest annual report and information on past performance, can be obtained free of charge from the website of the manufacturer: www.dnca-investments.com.

When this Product is used as a unit-linked carrier in a life insurance or capitalization contract, additional information on this contract, such as the costs of the contract, which are not included in the costs indicated in this document, the contract in the event of a claim and what happens in the event of default by the insurance company, are presented in the key information document for this contract, which must be provided by your insurer or broker or any other insurance intermediary in accordance with its legal obligation.
