## DNCA Invest - Flex Inflation - Class A - EUR

A sub-fund of the SICAV DNCA INVEST - ISIN: LU1694790038

This fund is managed by DNCA FINANCE

### Objectives and Investment Policy

#### Essential management characteristics:

Inflation-Linked Bond Fund

The Sub-Fund seeks to provide, over the recommended investment period of more than three years, a higher performance, net of any fees, than the Bloomberg Barclays World Govt Inflation Linked Bonds Hedged EUR (Bloomberg ticker : BCIW1E Index). Investors' attention is drawn to the fact that the management style is discretionary.

The investment process is made of the combination of several strategies including principally:

- a directional strategy aiming to optimise the performance of the portfolio based on interest rate and inflation expectations;
- an interest rate curve strategy aiming to exploit the variations of the spreads between long-term rates and short-term rates;
- an arbitrage strategy between, fixed-rate bonds and inflation-linked bonds to take advantage of the variations of the differential between the nominal rates and the real rates according to the anticipated growth and inflation outlook;
- an international strategy the aim of which is to take advantage of the opportunities offered by the OECD bond markets with an exposure to interest rates and inflation in these countries.

And secondarily:

- a credit strategy founded on the usage of bonds issued by the private sector.

The modified duration of the Sub-Fund will stay between 0 and 15 years, without any restriction on the modified duration of individual securities in the Sub-Fund.

All investments in this government bonds are subject to an in-depth extra-financial analysis analysis of these dimensions and of a rating that is taken into account in the investment decision.

The Sub-Fund will at all times invest up to 100% of its total assets in floating-rate and/or nominal bonds and/or inflation-linked debt instruments within the following limits: OCDE issuers (up to 100% of its total assets), Public and semi-public sector (up to 100% of its total assets), Private sector (up to 50% of its total assets).

In exceptional market circumstances, the Sub-Fund may invest up to 100% of its total assets in negotiable debt securities, fixed-rate bonds, treasury bills, commercial papers, certificates of deposit and money market instruments.

The Sub-Fund may invest up to 10% of its net assets in units and/or shares of UCITS and/or other UCIs.

The Sub-Fund will use all types of eligible derivatives instruments traded on regulated or OTC markets when these contracts are better suited to the management objective or offer lower trading costs. These instruments may include, but are not restricted to: futures, options, swaps.

The Sub-Fund may invest in securities denominated in any currency. The non-base currency exposure may be hedged back to the the base currency to moderate the currency exchange risks which will not represent more than 10% of the total assets of the Sub-Fund. The Sub-Fund may also use efficient management techniques such as temporary repurchase transactions, reverse repurchase transactions and securities lending.

**Benchmark Information :** The Sub-Fund is actively managed and uses the benchmark for the calculation of the performance fee and performance comparison purposes. This means the Management Company is taking investment decisions with the intention of achieving the Sub-Fund's investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The Management Company is not in any way constrained by the benchmark in its portfolio positioning. The deviation from the benchmark may be complete or significant.

#### Other important information:

Income is accumulated

The redemption of units/shares may be requested each day.

#### Recommended investment period:

This sub-fund may not be appropriate for investors who plan to withdraw their money within 3 years.

### Risk and Reward Profile

The historical data used to calculate the synthetic indicator may not be a reliable indication of the future risk profile of the UCITS. The risk category associated with this sub-fund is not guaranteed and may change over time. The weakest category does not mean no risk. The risk level of this UCITS is due to exposure to fixed income markets. The fund does not benefit from any capital protection or guarantee.

#### Material risks not taken into account in this indicator:

**Credit risk:** in the event that an issuer is downgraded, the value of the bonds in the portfolio may fall, thus decreasing the fund's net asset value.

**Counterparty risk:** the use of OTC derivatives may expose the investor to the risk of default by the counterparty.

**Risk of using derivative products:** the use of derivative instruments may reduce the net asset value in case of exposure in a direction opposite to that of the market trend.

The occurrence of one of these risks may lead to a reduction in the net asset value.
