The Jupiter Global Fund - Jupiter Flexible Income (the 'Fund'), a sub-fund of The Jupiter Global Fund (the 'Company')

Class L EUR Acc (ISIN - LU1846714258)

The management company is Jupiter Asset Management International S.A. ("the Management Company").

Objectives and investment policy

The Fund objective is to provide regular income together with the prospect of capital growth over the long term (three to five years).

The Fund will invest at least 70% of its value in bonds and shares and share-related securities which may be issued by issuers located in any country, including emerging markets, and financial derivative instruments. A derivative derives its value from an underlying asset (e.g. shares, bonds, currencies, interest rates and market indices) allowing the Fund Manager to track its price changes without owning it.

The Fund may be concentrated (i.e. more than 50% of its value may be held) in any one or a combination of the types of assets.

The Fund may also invest up to 30% of its value in other transferable securities, money market instruments, cash or near cash instruments, deposits and units in other collective investment schemes.

The Fund may invest up to 80% of its value in high yield bonds and up to 20% in bonds which are not rated by a credit ratings agency. It may also invest up to 20% of its value in asset and/or mortgage backed securities (ABS/MBS). These are bonds whose payments are funded by the cashflow of a pool of assets e.g. repayments on car loans or home loans. The Fund may also invest up to 10% of its assets in Contingent Convertible Securities (bonds typically issued by banks, which can, upon the occurrence of a predetermined negative event, be converted into shares).

Benchmark Information

The Fund is actively managed. The Fund is not managed by reference to a benchmark and does not use a benchmark for performance comparison purposes. This means the Investment Manager is taking investment decisions with the intention of achieving the Fund's investment objective without reference to a benchmark. The Investment Manager is not in any way constrained by a benchmark in its portfolio positioning.

Any income arising in relation to this share class will be accumulated (i.e. automatically reinvested and reflected in the price of the shares).

Investors are able to buy and sell shares during any business day. If you tell us to buy or sell shares before 1pm (Luxembourg time) on any business day we will make the transaction on the same day. If you tell us to buy or sell shares after 1pm (Luxembourg time) we will make the transaction on the following business day.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall
 as well as rise, and you may get back less than originally invested, even if the share
 class is hedged against the main currency of the Fund.
- Bonds are very sensitive to interest rate changes and it is possible that issuers of bonds will not pay interest or return the capital promised. Bonds may also be downgraded by rating agencies. These events can reduce the value of bonds and have a negative impact on performance.
- The Fund can invest a significant portion of the portfolio in high yield bonds and bonds which are not rated by a credit rating agency. While such bonds may offer a higher income, the interest paid on them and their capital value is at greater risk of not being repaid, particularly during periods of changing market conditions.
- The Fund uses derivatives for investment purposes which under certain market conditions may cause the fund to significantly fall invalue. Investments in financial derivative instruments can introduce leverage risks which can amplify gains or losses in the fund.
- Investment in emerging markets carries greater risk than investment in more traditional western markets. This may result in large falls in the Fund's value over short periods of time.
- There is a risk that any company providing services such as safe keeping of assets
 or acting as counterparty to derivatives may become insolvent, which may cause
 losses to the Fund.
- All the share class charges are taken from capital. Should there not be sufficient capital growth in the Fund this may cause capital erosion.

Charges

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

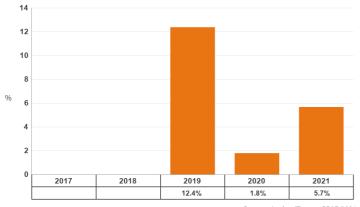

Ongoing charges	1.57%

Charges taken from the Fund under specific conditions

NONE Performance fee

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- The entry and exit charges shown are maximum figures.
- The ongoing charges figure is based on the annual charges as detailed in the prospectus. Where the Fund invests in other underlying funds, which may include closed-ended funds such as investment trusts, the ongoing charges figure will include the ongoing charges for those funds, and will therefore vary from year to year. The ongoing charges figure excludes portfolio transaction costs, except in the case of an entry/ exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.
- Conversion fee of up to 1.00% of the gross amount being converted may be applied for conversions between classes of the same sub-fund and from one sub-fund to another sub-fund.
- For detailed information about charges, please refer to the Company's prospectus, section "General Information".
