This Product is authorised in Luxembourg and in accordance with the UCITS Directive.

Date of Production of the KID: 23/06/2023

You are about to purchase a Product that is not simple and may be difficult to understand

What is this product?

Type

The Product is a share class of the Sub-Fund "AXA World Funds - ACT Clean Economy" (the Sub-Fund) which is part of the SICAV "AXA World Funds" (the "Company").

Term

This product has no maturity date, although it has been created for 99 years and could be liquidated under the conditions laid down in the articles of incorporation of the company.

Objectives

Investment Objective

The Sub-Fund seeks both long-term growth of your investment, in USD, from an actively managed listed equity and equity-related securities portfolio, and a sustainable investment objective to advance the United Nations Sustainable Development Goals (SDGs) by investing into companies whose business models and/or operational practices are aligned with targets defined by one or more SDGs with a focus on environmental themes, by applying an impact approach.

Investment Policy

The Sub-Fund is actively managed and references MSCI AC World Total Return Net (the "Benchmark") for comparative purposes only. The Investment Manager has full discretion over the composition of the portfolio of the Sub-Fund and can take exposure to companies, countries or sectors not included in the Benchmark. There are no restrictions on the extent to which the Sub-Fund's portfolio and performance may deviate from the ones of the Benchmark.

The Sub-Fund invests in equities of worldwide companies of any market capitalization.

Specifically, the Sub-Fund invests at least two thirds of net assets in equities and equity-related securities of worldwide companies that seek to offer growth potential and are active in areas such as the sustainable transport, renewable energies, responsible agriculture, food and water production and supplies and also recycling and waste reduction.

The Sub-Fund may also invest in money market instruments.

The Sub-Fund may invest up to 10% of net assets in UCITS and/or UCIs.

Within a limit of 200% of the Sub-Fund's net assets, the investment strategy may be achieved by direct investments and/or through derivatives. Derivatives may be used only for efficient portfolio management and hedging purposes.

The Sub-Fund aims to support on the long run the SDGs established by the United Nations with a focus on the environmental themes. It applies AXA IM's Impact approach

(<https://www.axa-im.com/who-we-are/impact-investing>) according to which 5 key pillars are considered: intentionality, materiality, additionality, negative consideration and measurability.

The Sub-Fund bindingly commits to have at all times at least 70% of assets invested in companies which have been assessed internally through the above-mentioned impact assessment approach.

Firstly, the Sub-Fund bindingly applies at all times AXA IM's Sectorial Exclusion and ESG Standards Policies (<https://www.axa-im.com/our-policies>) and a "Best-in-universe" (type of ESG selection consisting of giving priority to the issuers in the investable universe best rated from a non-financial viewpoint, irrespective of their sector of activity, and accepting sector biases, because the sectors which are considered more virtuous on the whole will be more heavily represented) selectivity approach consisting in reducing the investable universe, by excluding

issuers based notably on their environmental scores, as further described in the SFDR annex of the Sub-Fund. Secondly, the investment manager uses a combination of macroeconomic sector and company specific analysis which relies on a rigorous analysis of the companies' business model, management quality, growth prospects and risk/return profile, with a focus on medium to long-term benefits from companies that fill the social, environmental and governance criteria and respect the principles defined in the United Nations Global Compact Initiative. As an example, the ESG criteria may be water intensity for the environmental aspect, management of human resources and gender equality for the social aspect, or remuneration policy for the governance aspect.

The ESG data used are based on methodologies relying in part on third party data and in some cases are internally developed, are subjective and may change over time. The lack of harmonised definitions can make ESG criteria heterogeneous. As such, the different strategies using ESG criteria and ESG reporting are difficult to compare with each other. Strategies incorporating ESG criteria and those incorporating sustainable development criteria may use data that appear similar but which should be distinguished because their calculation method may be different. AXA IM's ESG different methodologies described herein may evolve in the future to take into account any improvements in data availability and reliability, or any developments of regulations or other external frameworks or initiatives -among others.

The Sub-Fund is a financial product aiming to achieve a sustainable investment objective within the meaning of article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

The Share Class aims at hedging the foreign exchange risk resulting from the divergence between the reference currency of the Sub-Fund and the currency of this Share Class by using derivatives instruments whilst retaining the exposure to Investment Policy of the Sub-Fund.

Income

For Capitalisation share classes (Cap), the dividend is reinvested.

Investment Horizon

The risk and the reward of the product may vary depending on the expected holding period. We recommend holding this product at least for 5 years.

Processing of subscription and redemption orders

The subscription, conversion or redemption orders must be received by the Registrar and Transfer Agent on any Valuation Day no later than 3 p.m. Luxembourg time. Orders will be processed at the Net Asset Value applicable to such Valuation Day. The investor's attention is drawn to the existence of potential additional processing time due to the possible involvement of intermediaries such as Financial Advisers or distributors.

The Net Asset Value of this Sub-Fund is calculated on a daily basis.

Intended retail investor

The sub-fund is designed for retail investors who have neither financial expertise nor any specific knowledge to understand the sub-fund but nevertheless may bear total capital loss. It is suitable for clients who seek growth of capital and ESG. Potential investors should have an investment horizon of at least 5 years.

Depository

What are the risks and what could I get in return?

Risk Indicator

We have classified this product as 5 out of 7 which is the a medium-high risk class. This rates the potential losses from future performance at a medium-high level. The risk category associated to this product was determined based on past observations, it is not guaranteed and can evolve in the future.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks not included in the Summary risk indicator can be materially relevant, such as counterparty risk, derivatives risk. For further information, please refer to the prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor . The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product and the suitable benchmark over the last 10 years. Markets could develop very differently in the future.

| Recommended holding period: | | 5 years | |
|-----------------------------|--|--------------------------|---------------------------|
| Example Investment: | | €10 000 | |
| | | If you exit after 1 year | If you exit after 5 years |
| Scenarios | | | |
| Minimum | There is no minimum guaranteed return. You could lose some or all of your investment | | |
| Stress | What you might get back after costs | €2 310 | €2 630 |
| | Average return each year | -76.90% | -23.44% |
| Unfavourable | What you might get back after costs | €6 410 | €6 690 |
| | Average return each year | -35.90% | -7.72% |
| Moderate | What you might get back after costs | €9 980 | €13 200 |
| | Average return each year | -0.20% | 5.71% |
| Favourable | What you might get back after costs | €17 060 | €20 840 |
| | Average return each year | 70.60% | 15.82% |

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable Scenario: This type of scenario occurred for an investment between 10 2021 and 02 2023.

Moderate Scenario : This type of scenario occurred for an investment between 07 2015 and 07 2020.

Favourable Scenario : This type of scenario occurred for an investment between 01 2016 and 01 2021.

An appropriate benchmark of the Product was used to calculate the performance.

What happens if AXA INVESTMENT MANAGERS PARIS S.A. is unable to pay out?

The product is constituted as a separate entity from AXA Investment Managers Paris S.A. In case of default of AXA Investment Managers Paris S.A., the assets of the product kept by the custodian will not be affected. In case of default of the custodian, the risk of financial loss of the product is mitigated because of the legal segregation of the assets of the custodian from those of the product.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested

| | If you exit after 1 year | If you exit after 5 years |
|------------------------|--------------------------|---------------------------|
| Total costs | €743 | €1 957 |
| Annual cost impact (*) | 7.5% | 3.4% each year |

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.1 % before costs and 5.7 % after costs.

We may share part of the costs with the person selling you the Product to cover the services they provide to you. They will inform you of the amount.

Composition of Costs

| One-off costs upon entry or exit | | If you exit after 1 year |
|---|---|--------------------------|
| Entry costs | 5.5 % of the amount that you pay when you enter the investment. This includes distribution costs of 5.5 % of the amount invested. This is the maximum amount you will pay. The person who sold you the product will inform you of the actual costs. | Up to €550 |
| Exit costs | We do not charge an exit fee for this Product. | €0 |
| Ongoing costs taken each year | | |
| Management fees and other administrative or operating costs | 1.8% of the value of your investment per year. This percentage is based on actual costs over the last year. | €171 |
| Transaction costs | 0.2 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. | €22 |
| Incidental costs taken under specific conditions | | |
| Performance fees (and carried interest) | There is no performance fee for this Product. | €0 |

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

This Product has no minimum required holding period, the 5 years has been calculated to be in line with the time frame which the Product may need in order to achieve its investment objectives.

You may sell your investment before the end of the recommended holding period without penalty. The performance or risk of your investment may be negatively impacted. The section "What are the costs?" provides information on the impact of costs over time.

Please refer to the "What is this product" section for the redemption procedure.

How can I complain?

Complaints shall be addressed to the Complaint Handling Officer with the complainant' details (name, role, contact details, involved account numbers and any other relevant document) to the following address AXA World Funds 49, avenue J.F. Kennedy L-1855 Luxembourg Grand Duchy of Luxembourg or to compliancelux2@axa-im.com.
