WHAT IS THIS PRODUCT?

Type of product

The product is a Sub-Fund of Ruffer SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

Term

The Sub-Fund is established for an unlimited duration. However, the board of directors may also propose to dissolve a Compartment at a General Meeting of that Compartment.

Objectives

The investment objective of the Sub-Fund is to achieve low volatility and positive returns from an actively managed portfolio. The Sub-Fund may have exposure to the following asset classes: cash, debt securities of any type (including government and corporate debt), equities and equity-related securities and commodities (including precious metals). Overriding this objective is a fundamental philosophy of capital preservation.

Investors should note that there can be no assurance that the investment objective will be achieved.

The Sub-Fund is not a tracker fund and is actively managed. The Sub-Fund is managed in reference to a benchmark as its performance is measured against the FTSE All-Share Index Total Return, Bloomberg Global – Aggregate Total Return and HFRI Fund of Funds Composite.

The return of the product is determined using the Net Asset Value (the 'NAV') calculated by the Central Administration.

This return depends mainly on the market value fluctuations of the underlying investments as described below.

The Sub-Fund will mainly invest

- directly in the above-mentioned asset classes (except for commodities and precious metals) and in the share capital of listed companies whose business is related to these asset classes and/or
- in undertakings for collective investment including other Sub-Funds of Ruffer SICAV, up to a limit of 10% of the Sub-Fund's net assets and/or
- in any transferable securities (such as structured products) linked or offering an exposure to the performance of the above-mentioned securities/asset classes.

The choice of investments will neither be limited by geographical area (including emerging markets), economic sector nor in terms of currencies in which investments will be denominated. However, depending on financial market conditions, a particular focus can be placed in a single country (or some countries) and/or in a single currency and/or in a single economic sector. Furthermore, there will be no particular or predetermined weight placed on any of the aforementioned types of asset classes.

Derivatives are used for investment purposes and to manage the risk profile of the Sub-Fund.

The Sub-Fund's assets are held with Pictet & Cie (Europe) S.A. and are segregated from the assets of other Sub-Funds of the Fund. The assets of the Sub-Fund cannot be used to pay the debts of other Sub-Funds.

The recommended holding period of this product is determined to allow sufficient time for this product to reach its objectives and avoiding short term market fluctuations.

This Class accumulates income. Dividend distributions are not planned.

Intended retail investors

The product is suitable for retail investors with limited knowledge of the underlying financial instruments and no financial industry experience. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 5 years.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if your cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested

INVESTMENT OF EUR 10,000	IF YOU EXIT AFTER 1 YEAR	IF YOU EXIT AFTER 5 YEARS
Total costs	EUR 710	EUR 1,891
Annual cost impact (*)	7.1%	3.2%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.0% before costs and 2.8% after costs.

Composition of costs
