## WHAT IS THIS PRODUCT?

### TYPE

Carmignac Portfolio Inflation Solution is a segregated sub-fund of Carmignac Portfolio SICAV, an investment company with variable capital regulated by Luxembourg law and qualifying as UCITS pursuant to Directive 2009/65/CE.

### TERM

The SICAV was launched on 30/06/1999 for unlimited period. The sub-fund was launched on 15/12/2023.

### OBJECTIVE

The fund seeks to achieve total return, targeted to be above Eurozone inflation over the recommended investment period of more than five (5) years, through capital growth, income and relative-value trades.

The Sub-Fund applies a multi-asset strategy which seeks to achieve its investment objective by investing, and taking exposure in a wide range of traditional assets (e.g. equities, bonds, money markets and currencies) and in some inflation-sensitive securities such as commodities (e.g. precious metals, industrial metals and energy such as gold, copper and crude oil) and inflation-linked securities (e.g. inflation swaps and inflation-linked bonds). The investment process is the result of combining several strategy components, including: (i) A core allocation of traditional asset classes and commodities aimed to deliver capital growth and income; (ii) An inflation-linked strategy composed of inflation swaps and inflation-linked bonds aimed to help mitigate the inflation surprises; and (iii) A tactical strategy aimed (1) to manage (or hedge) the global exposures of the portfolio and (2) to take advantage of some potential opportunities offered by markets through directional or relative value trades. To implement this approach, the Sub-Fund will take directional and non-directional (or hedged) positions, long and/or short, in a range of securities, instruments and asset classes. The Sub-Fund may implement these positions either with derivatives or by purchasing direct securities or funds.

Through direct investments in securities and funds or use of derivatives, from -20% to 100% of the Sub-Fund's net assets are exposed to international and/or Eurozone equity markets. Up to 25% of the Sub-Fund's net assets may be exposed to emerging market equities, with a maximum of 10% in the Chinese domestic market (common investment limit for both equities, debt instruments and monetary instruments). The Sub-Fund invests in stocks of any capitalization from any sector. Up to 100% of the Sub-Fund's net assets can be invested in negotiable debt securities, money market instruments, and fixed or floating rate, covered or uncovered bonds, which may be linked to inflation in the Eurozone and/or international markets. Investments in emerging market debt may not exceed 25% of the net assets, with a maximum of 10% in the Chinese domestic market. The portfolio's total modified duration, defined as the change in portfolio capital (as %) for a change in interest rates of 100 basis points

may vary from -4 to +7. The investment strategy involves the Sub-Fund investing in fixed and/or floating rate corporate bonds, corporate inflation-linked bonds, as well as money market instruments. The Sub-Fund may invest up to 20% of its net assets in securities rated below investment grade. In order to achieve its investment objective, the Sub-Fund will invest in derivatives traded on Eurozone and international regulated, organised or over-the-counter markets for exposure, relative value or hedging purposes. The Sub-Fund may use total return swaps for exposure or hedging purposes. The exposure to total return swaps is expected to be 10% of the net assets of the Sub-Fund.

This Sub-Fund is an actively managed UCITS. The investment manager has discretion over the composition of its portfolio, subject to the stated investment objectives and policy. The Sub-Fund's investment universe is totally independent from the reference indicator in terms of allocation by region, sector or market capitalisation. The Sub-Fund's investment strategy is not dependent on the reference indicator; therefore, the Sub-Fund's holdings and the weightings will commonly substantially deviate from the composition of the reference indicator. There is no limit set on the level of such deviation.

This sub-fund does neither have sustainable investment as its objective in accordance with article 9(1) of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector ("SFDR"), nor does it promote environmental or social characteristics in accordance with article 8(1) SFDR.

### INTENDED RETAIL INVESTOR

This sub-fund is intended for private and institutional investors wishing to diversify their investments while benefiting from market opportunities through reactive asset management over a recommended investment period of more than 5 years.

The appropriate amount to invest in this fund depends on the personal situation of the investor, their knowledge of investment products and experience, their personal wealth, their cash requirements now and in the future, and their degree of risk aversion.

### OTHER INFORMATION

Investments may be redeemed each business day on request. Subscription, redemption or conversion requests are centralised on each NAV calculation and publication day before 18:00 CET/ CEST and are executed on the next business day using the previous day's NAV.

The Depositary of the sub-fund is BNP Paribas, Luxembourg branch.

The fund prospectus and latest key information document, as well as the latest annual report are available on the website [www.carmignac.com](http://www.carmignac.com), directly from the manufacturer or on the website [www.fundinfo.com](http://www.fundinfo.com).

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator : the summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Risks to which the sub-fund may be exposed and which could lead to a fall in the net asset value to which the indicator gives too little consideration:

- Counterparty risk: the sub-fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations, especially in the case of derivatives traded OTC
- Liquidity risk: the markets in which the sub-fund participates may be subject to temporary illiquidity. These market distortions could have an impact on the pricing conditions under which the sub-fund may have to liquidate, initiate or modify its positions.

## PERFORMANCE SCENARIOS

The unfavourable, moderate and favourable scenarios shown represent examples using the best and worst performance, as well as the average performance of the product over the last ten years. Markets may develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

<b>Recommended holding period:</b>		<b>5 years</b>	
<b>Example Investment:</b>		<b>10 000 EUR</b>	
		<b>If you exit after 1 year</b>	<b>If you exit after 5 years</b>
<b>Scenarios</b>			
<b>Minimum</b>	There is no minimum guaranteed return. You could lose some or all of your investment.		
<b>Stress</b>	<b>What you might get back after costs</b>	4 320 EUR	4 620 EUR
	<b>Average return each year</b>	-56.80%	-14.31%
<b>Unfavourable</b>	<b>What you might get back after costs</b>	9 200 EUR	10 210 EUR
	<b>Average return each year</b>	-8.00%	0.42%

	<b>Average return each year</b>	2.80%	1.70%
<b>Favourable</b>	<b>What you might get back after costs</b>	11 260 EUR	12 320 EUR
	<b>Average return each year</b>	12.60%	4.26%

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The figures shown include all costs of the product itself, but not necessarily all charges due to your advisor or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you receive.

- The unfavourable scenario occurred for an investment between May 2015 and May 2020.
- The moderate scenario occurred for an investment between March 2018 and March 2023.
- The favourable scenario occurred for an investment between March 2020 and March 2025.

## WHAT HAPPENS IF CARMIGNAC GESTION LUXEMBOURG IS UNABLE TO PAY OUT?

For your protection, the assets of the fund are held with a separate entity, the custodian, so that the fund's ability to pay would not be affected by the insolvency of the management company. In the event of failure of the latter, the assets of the product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss of the product is mitigated due to the legal segregation of the assets of the depositary from those of the product.

## WHAT ARE THE COSTS?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that these costs will have on your investment.

### Cost over time

The amounts shown here are the cumulative costs of the product itself, for two different holding periods. They include potential early exit penalties. The figures assume you invest 10 000,00 EUR. The figures are estimates and may change in the future.

	<b>If you exit after 1 year</b>	<b>If you exit after 5 years</b>
Total costs	123 EUR	687 EUR
Annual cost impact (*)	1.2%	1.3% each year

\*The Reduction in Yield (RIY) illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3,0% before costs and 1,7% after costs. The total costs take into account one-off, ongoing and incidental costs.

## Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	0 EUR
Exit costs	We do not charge an exit fee for this product.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1,17% of the value of your investment per year. This estimate is based on actual costs over the past year.	117 EUR
Transaction costs	0,07% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on the quantity we buy and sell.	7 EUR
Incidental costs taken under specific conditions		
Performance fees	20,00% when the share class has positive performance, and it outperforms the Reference indicator during the performance period. Underperformance is clawed back for 5 years. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years, or since the product creation if it is less than 5 years.	0 EUR

## HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Due to the sub-fund's diversified exposure to the equities, fixed income, commodities and inflation sensitive securities the recommended investment period is 5 years

However, you can redeem your investment without incurring any penalties at any point during this period, or stay invested for longer.

Redemptions are possible each business day. In exceptional circumstances, your right to request the redemption of your investment may be suspended.
