Copies of the report including financial statements for the year ended 31 March 2023 may be obtained from the Registered Office of M&G (Lux) Investment Funds 1 at 16, Boulevard Royal L-2449 Luxembourg, Grand Duchy of Luxembourg.

No subscription can be made solely on the basis of financial reports. Subscriptions are only valid if made on the basis of the current Prospectus accompanied by the Key Investor Information Document(s) and the most recently published annual report including audited financial statements, or the most recent unaudited semi-annual report, if published thereafter.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amount originally invested. Because of this, investors are not certain to make a profit on their investments and may lose money.

Management and administration

The Board of Directors of M&G (Lux) Investment Funds 1 (the 'Board' or its 'Directors') presents its Annual Report and audited Financial Statements for the year ended 31 March 2023.

Please note that an explanation of key investment terminology is included in the 'Glossary' at the end of this report.

Fund information

M&G (Lux) Investment Funds 1 (the 'Fund') is an Open-Ended Investment Company incorporated under the laws of Luxembourg as a Société d'Investissement à Capital Variable (SICAV) in accordance with the provision of part 1 of the law dated 17 December 2010 on undertakings for Collective Investment, as amended (the 'UCI Law').

The Fund is authorised and regulated by the Commission de Surveillance du Secteur Financier (CSSF) under the laws of the Grand-Duchy of Luxembourg. The Fund was incorporated on 29 November 2016 and is an Undertaking for Collective Investment in Transferable Securities (UCITS) scheme under part 1 of the UCI Law.

The Fund is an umbrella fund designed to offer investors access to a variety of investment strategies through a range of separate sub-funds. Each sub-fund represents a separate portfolio of assets.

The Fund's principal activity is to carry on business as a SICAV. The Fund is structured as an umbrella fund, and different sub-funds may be established by the Board from time to time with the approval of the CSSF.

Under Luxembourg law, the Fund is itself a legal entity, and the assets and liabilities of each sub-fund are segregated from one another and invested in accordance with the investment objectives and investment policies applicable to each sub-fund. Shareholders are not liable for the debts of the respective sub-fund. A Shareholder is not liable to make any further payment to the respective sub-fund after payment has been made in full for the purchase of shares.

Each sub-fund may offer more than one class of shares. Each share class may have different features with respect to its criteria for subscription (including eligibility requirements), redemption, minimum holding, fee structure, currency, hedging policy and distribution policy (further information on share classes is fully described in the Fund's Prospectus).

Board of Directors

As at the financial year ended 31 March 2023, and up to the date of this report, the following individuals were appointed as Directors of the Fund:

P R Jelfs, L J Mumford, N Wells[ab], S van Dootingh[a], Y Wagner[a]

[a] Independent Directors
[b] Nadya Wells was appointed as an Independent Director on 6 February 2023.

M&G (Lux) Emerging Markets Bond Fund

M&G (Lux) Emerging Markets Hard Currency Bond Fund

M&G (Lux) Euro Corporate Bond Fund

M&G (Lux) Global Convertibles Fund

M&G (Lux) Global Corporate Bond Fund

M&G (Lux) Global Floating Rate High Yield Fund

M&G (Lux) Global High Yield Bond Fund

M&G (Lux) Sustainable Emerging Markets Corporate Bond Fund

M&G (Lux) Sustainable Global High Yield Bond Fund

M&G (Lux) Better Health Solutions Fund has been launched on 2 March 2023.

The events in Ukraine continue to shock and bring widespread condemnation. Western nations responded to Russia's attack which started on 24 February 2022, with sweeping sanctions: the US, the UK and the European Union have imposed sanctions on Russian banks, state-owned enterprises (SOEs) and individuals with close links to President Putin.

From the perspective of financial markets, Russia's attack has sparked considerable volatility. There have been direct impacts, particularly with Russian exposed assets and indirect impacts affecting asset classes globally with commodity prices surging. Given the uncertainty around the continuing conflict, it is likely that financial markets will remain volatile as investors react to developments.

As at the year end date of this report the most recent Visa Stamped Prospectus was approved by the CSSF on 22 February 2023.

The sub-funds below are launched and available for investment:

M&G (Lux) Absolute Return Bond Fund

Directors' Report

Directors of the Fund

Philip Jelfs

Mr Jelfs has been a director of the Fund since inception. He joined M&G in 2006 and now is Global Head of Product. He is responsible for products throughout the product life-cycle. He is also a Director of M&G Securities Limited, a UK based Authorised Corporate Director. Mr Jelfs has an honours degree in Geography & War Studies from Kings College, London University and an MBA.

Laurence Mumford

Mr Mumford has been a director of the Fund since inception and is Chair of the Fund Board. He is Distribution Governance Director and currently Chair of M&G Securities Limited, a UK based Authorised Corporate Director. Mr Mumford is a member of the Investment Association's Investment Funds Committee which aims to facilitate strategic understanding and issue resolutions across the industry. Mr Mumford is a chartered accountant and joined M&G in 2000 having previously worked at PricewaterhouseCoopers.

Susanne van Dootingh – Independent Director

Ms van Dootingh has been an independent non-executive director of the Fund since 12 February 2019. Ms van Dootingh is an independent non-executive director of several Luxembourg domiciled investment funds and management companies. Ms van Dootingh was previously at State Street Global Advisors (SSGA) from 2002 to 2017 with her final position being Senior Managing Director, Head of European Governance and Regulatory Strategy EMEA. Prior to this she held various senior positions at SSGA in Global Product Development and Global Fixed Income Strategy. Before joining SSGA in 2002 she was a fixed income strategist and portfolio manager at Fortis Investment Management, Barclays Global Investors, and ABN AMRO Asset Management.

Yves Wagner – Independent Director

Dr. Wagner has been an independent non-executive director of the Fund since inception. Dr. Wagner started his non-academic career with Banque Générale du Luxembourg where he became Director of Asset Management, before becoming the Chief Executive Officer and Board member of Fortis Investments, Luxembourg. He founded 'The Directors' Office' and is today an independent director for several financial institutions. He has been an advisor to the Luxembourg School of Finance (LSF), a business school of the University of Luxembourg.

Dr. Wagner holds a 'Doctorat ès Sciences Economiques' (PhD) from the University of Aix-Marseille III, France.

Dr. Wagner was for many years the Chairman of the Luxembourg Society of Financial Analysts (ALGAFI) and Board Member of the European Federation of Financial Analysts Societies (EFFAS).

Nadya Wells – Independent Director

Ms Wells has over 25 years' experience as a long-term investor and governance specialist. Latterly she spent 13 years with the Capital Group, as a portfolio manager and investment analyst with a focus on EMEA markets until 2014. Prior to that she was a portfolio manager at Invesco Asset Management investing in Eastern Europe in closed end funds until 1999. She started her career with EY in management consulting. She holds an MBA from INSEAD, an MA from Oxford University and an MSc from the University of Geneva.

Directors' Report

Directors' responsibilities

The Directors are responsible for the overall management and control of the Fund in accordance with the Articles. The Directors are further responsible for the implementation of each sub-fund's investment objective and policies, as well as for oversight of the administration and operations of each sub-fund.

The Directors shall have the broadest powers to act in any circumstances on behalf of the Fund, subject to the powers reserved by law to the Shareholders.

The following persons have been appointed as Directors of the Fund:

Philip Jelfs, Director.

Laurence Mumford, Director.

Susanne van Dootingh, Independent Director.

Yves Wagner, Independent Director.

Nadya Wells, Independent Director*.

* Nadya Wells was appointed as an Independent Director on 6 February 2023.

The Directors may appoint one or more committees, authorised delegates or agents to act on their behalf.

Delegation of functions

Management Company

The Fund has appointed M&G Luxembourg S.A., pursuant to the Management Agreement, to serve as its management company within the meaning of the UCI Law.

The Management Company performs certain functions, subject to the overall supervision of the Directors, for the provision of investment management services, administrative services and marketing services to the Fund.

The Management Company acts as the management company of the Fund under the freedom to provide services organised by the UCITS Directive. In accordance with the relevant provisions of the UCI Law, the Management Company will be required to comply with the CSSF Rules (being the rules of the Management Company's 'home member state' for the purposes of the UCI Law) in relation to the organisation of the Management Company, including its delegation arrangements, risk management procedures, prudential rules and supervision, applicable prudential rules regarding the Management Company's management of UCITS authorised under the UCITS Directive and the Management Company's reporting requirements. The Management Company shall comply with the UCI Law as regards the constitution and functioning of the Fund.

The Fund has appointed the Management Company as its corporate and domiciliary agent. The Management Company will be responsible for the domiciliation of the Fund and will perform, inter alia, the functions as foreseen in the Luxembourg law of 31 May 1999 on the domiciliation of companies, as amended from time to time, and, in particular, allow the Fund to establish its registered office at the registered office of the Management Company, and provide facilities necessary for the meetings of the Fund's Directors, officers and/or of the Shareholders of the Fund.

Distributor

M&G Luxembourg S.A. acts as the distributor of Shares.

Investment manager

The Management Company has appointed M&G Investment Management Limited as investment manager to manage and invest the assets of the sub-funds pursuant to their respective investment objectives and policies.

The Investment Manager was appointed pursuant to the Investment Management Agreement. Under the Investment Management Agreement, the Investment Manager has full discretion, subject to the overall review and control of the Management Company and the Directors, to purchase and sell securities and otherwise to manage the assets of the Fund on a discretionary basis. The Investment Manager is also entitled to delegate investment management under the terms set out in the Investment Management Agreement.

Directors' Report

Registrar and transfer agent

The Management Company has appointed RBC Investor Services Bank S.A. as registrar and transfer agent of the Fund on behalf of the Board of Directors.

Under the Registrar and Transfer Agency Agreement, the registrar and transfer agent is responsible for processing the issue, redemption and transfer of shares, as well as for the keeping of the register of Shareholders, subject to the overall review and control of the Management Company and the Directors.

Administrator

The Management Company has appointed State Street Bank International GmbH, Luxembourg Branch as the Administrator of the Fund on behalf of the Board of Directors. The Administrator will carry out certain administrative duties related to the administration of the Fund, including the calculation of the Net Asset Value of the shares and the provision of accounting services to the Fund, subject to the overall review and control of the Management Company and the Directors.

Hedging services

The Management Company has appointed State Street Europe Limited to undertake certain currency hedging functions in respect of Currency Hedged Share Classes.

Depositary

The Management Company in conjunction with the Board of Directors has appointed State Street Bank International GmbH, Luxembourg Branch as the Depositary.

The Depositary shall perform all of the duties and obligations of a depositary under the UCITS Directive and the Luxembourg implementing laws and regulations with respect to each sub-fund.

The Depositary has been entrusted with the following main functions:

- ensuring that the sale, issue, repurchase, redemption and cancellation of shares are carried out in accordance with applicable law and the Articles;
- ensuring that the value of the shares is calculated in accordance with applicable law and the Articles;
- carrying out the instructions of the Management Company or the Fund (as the case may be), unless such instructions conflict with applicable law or the Articles;
- ensuring that, in transactions involving the assets of the Fund, any consideration is remitted to the Fund within the usual time limits;
- ensuring that the income of the Fund is applied in accordance with applicable law and the Articles;
- monitoring and oversight of the Fund's cash and cashflows in accordance with the UCITS Directive and the Luxembourg implementing laws and regulations; and
- safe-keeping of the Fund's assets, including the safe-keeping of financial instruments that can be held in custody and ownership verification and record-keeping in relation to other assets.

Fair Valuation and liquidity

As described in the important information section, financial markets have been impacted by the military invasion of Ukraine. Within the portfolios a small number of Russian securities are held. These securities were fair valued by the Board of Directors and marked as such in the statement of investments. The holding of these securities has not impacted the liquidity of the sub-funds and has not raised any going concern issues for the Fund.

There have not been any significant difficulties in valuing the portfolio since the year end.

Directors' Report

Directors' statement

This report has been prepared in accordance with the requirements of the UCITS Directive 2009/65/EC of the European Parliament and Council of 13 July 2009.

P R Jelfs, Director
L J Mumford, Director 10 July 2023

Independent Auditor's Report

Independent Auditor's Report to the shareholders of M&G (Lux) Investment Funds 1

Opinion

We have audited the financial statements of M&G (Lux) Investment Funds 1 (the 'Fund') and of each of its sub-funds, which comprise the statement of net assets and the statement of investments as at 31 March 2023, and the statement of operations and changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at 31 March 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the 'Law of 23 July 2016') and with International Standards on Auditing ('ISAs') as adopted for Luxembourg by the 'Commission de Surveillance du Secteur Financier' ('CSSF'). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the 'responsibilities of the 'réviseur d'entreprises agréé' for the audit of the financial statements' section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ('IESBA Code') as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the 'réviseur d'entreprises agréé' thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Independent Auditor's Report

Responsibilities of the 'réviseur d'entreprises agréé' for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the 'réviseur d'entreprises agréé' that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the 'réviseur d'entreprises agréé' to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the 'réviseur d'entreprises agréé'. However, future events or conditions may cause the Fund or any of its sub-funds (except for the sub-fund where a decision or intention to close exists) to cease to continue as a going concern.
- In respect of the sub-fund where a decision or an intention to close exists, we conclude on the appropriateness of the Board of Directors of the Fund's use of the non-going concern basis of accounting. We also evaluate the adequacy of the disclosures describing the non-going basis of accounting and the reasons for its use. Our conclusions are based on the audit evidence obtained up to the date of our report of the 'réviseur d'entreprises agréé'.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Independent Auditor's Report

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Market review

Financial markets experienced considerable volatility during the 12 months under review as investors grappled with a multitude of worries, including Russia's war on Ukraine, sky-rocketing inflation, interest rate rises and a potential global economic recession. In the final month of the period, turmoil in the banking sector revived fears of a repeat of the global financial crisis. Against this backdrop, global stock and bond markets both declined in value.

Inflation was arguably the dominant theme of the period, as supply disruptions and the rebound in economic activity after the COVID-19 pandemic, combined with soaring food and energy prices after Russia's invasion of Ukraine, pushed price rises to multi-year highs around the world.

As inflation proved more persistent than many policymakers had expected – in the US it reached 9.1% year-on-year in June, the highest level in 40 years[a] – major central banks began raising interest rates aggressively to try and control soaring prices.

The US Federal Reserve raised interest rates 4.5 percentage points in the 12-month period, including four 0.75 percentage point hikes in a row[b]. The Bank of England and the European Central Bank also hiked rates sharply, bringing to an end the era of ultra-low interest rates that had been in place since the global financial crisis in 2008/9.

The combination of soaring inflation and steep interest rate rises sparked fears of a slowdown in the global economy that weighed heavily on investor sentiment. However, the US economy remained relatively resilient, supported by a robust labour market and consumer spending.

The mood among investors became more positive towards the end of 2022, driven in part by signs that inflation was falling, which raised investors' hopes that central banks might slow their interest rate hikes. China's sudden relaxation of its zero-COVID-19 policy and optimism about the reopening of its economy also lifted investor confidence.

Markets remained turbulent right up to the end as the collapse of Silicon Valley Bank in the US and the emergency rescue of Swiss bank Credit Suisse in March raised fears of potential contagion through the global banking sector. The actions of policymakers helped reassure investors, and the crisis had largely eased by the end of the month.

In the 12 months, the MSCI AC World Index of global equities recorded a fall of 7.0% in US dollars. Among developed markets, the US stockmarket was one of the weakest in the review period. In particular, the technology-dominated Nasdaq Composite registered steep declines as investors questioned the valuations of high-growth companies in a high-interest rate environment. In contrast, share prices in Europe performed well, despite concerns about the impact of higher energy prices on economic activity. The UK was relatively resilient too, ending the period up in sterling terms, helped by a high weighting of oil companies and exporters who could benefit from weakness of the pound sterling.

Share prices in Asia ex Japan and emerging markets lagged the broader global index and their developed market counterparts, largely as a result of weakness in China earlier in the period. Stockmarkets in Brazil, South Africa, South Korea and Taiwan were notable laggards. In contrast, share prices in Mexico, Thailand, Turkey outperformed the broader market.

From a sector perspective, energy was the standout performer, buoyed by higher oil prices. Defensive areas (which are generally considered to deliver steady earnings in different economic conditions) were relatively resilient in the market downturn: consumer staples and healthcare stocks outperformed the broader market. Industrials performed well among economically sensitive areas. The weakest sectors included financials, which were hurt by fallout from the banking crisis, communication services and real estate.

The prospect of multiple interest rate increases weighed heavily on government bond markets. UK gilts were the weakest sovereign bonds, hurt by a sharp sell-off following the new government's 'mini-budget',

Market review

which alarmed investors with unfunded tax cuts, in September. US Treasuries fell 4.9% and German bunds ended the period down 11.8%. Investment grade corporate bonds also reflected the weakness, as did riskier high yield debt.

Among commodities, gold made a modest gain. Oil prices fell overall, despite having rallied after the outbreak of the war in Ukraine amid concerns about global supplies. The US dollar appreciated in value against most major currencies, supported by rising interest rates in the US.

Investment review

For the year ended 31 March 2023

Performance review

The sub-fund delivered a negative total return (the combination of capital growth and income) and was behind the 3-month EURIBOR + 2.5% across all its share classes in the period under review.

The 12-month period under review saw heightened volatility across global bond markets as concerns about persistently high inflation and rising interest rates led to a surge in yields (which move in the opposite direction to bond prices). UK government bonds (gilts) came under particular pressure, most notably following the UK government's poorly received mini-budget announcement at the end of September. Other developed market government bonds also came under pressure, with US Treasuries and German bonds both experiencing steep losses. Corporate bonds also performed poorly although they held up somewhat better than government bonds thanks to their lower sensitivity to movements in interest rates. It was also a poor period for emerging market bonds, especially those markets more closely connected to the ongoing Russia-Ukraine conflict.

Markets remained volatile in the first quarter of 2023, driven by changes in expectations for inflation and interest rates and turmoil in the banking sector. The year started positively, with optimism about China's post-COVID-19 reopening and hopes that inflation might be slowing fuelling a stock market rally in January. However, share prices retreated and bonds sold off in February amid concerns that central banks would keep raising interest rates to tackle persistently high inflation. In March, volatility spiked as the collapse of Silicon Valley Bank in the US and the emergency rescue of Credit Suisse in Switzerland raised fears about the health of the banking system globally. However, markets stabilised by the end of the period amid the belief that the banking crisis had been contained.

Against this backdrop, the sub-fund delivered a negative return over the review period, with performance held back by the overall weakness across fixed income markets. Losses were mitigated by the sub-fund's low sensitivity to movements in interest rates (also known as duration, and measured in years) and defensive credit positioning.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

The sub-fund remains cautiously positioned in terms of its duration stance (meaning, it keeps duration relatively short, as generally bonds with longer duration are more sensitive to changes in interest rates), as we think the persistent inflationary backdrop could put further pressure on yields. This is especially the case in the US, where the Federal Reserve has emphasised its commitment to keeping inflation under control through a series of interest rate increases.

Within corporate bonds, we continue to be cautiously positioned with a focus on higher-quality investment grade names. We also maintain a significant allocation to short-dated corporate bonds, which tend to have a low sensitivity to movements in interest rates.

Within currencies, we maintained our 'barbell' approach, consisting on the one hand of defensive 'safe-haven' positions – such as the Japanese yen and the US dollar – and on the other hand, a number of smaller, opportunistic emerging market positions.

Outlook

Financial markets remain very volatile at the time of writing, with concerns over persistent inflation, slowing global growth and the recent turmoil in the banking sector all weighing on sentiment. Investors' appetite for bonds also remains poor given uncertainty over the future direction of central bank policy.

Nevertheless, given the scale of the recent sell-off, we think there are areas of value in fixed income markets, and we believe investors who take a long-term view are being well compensated for taking credit risk. Corporate fundamentals remain generally robust and overall we expect defaults to remain low.

Investment review

However, we maintain our view of not taking on excessive levels of credit risk, particularly given the prospect that interest rates could remain elevated for a number of years. In this environment, we believe that an active and risk-controlled investment approach to the asset class remains crucial.

Investment review

For the year ended 31 March 2023

Performance review

Over the 12-month review period, the sub-fund recorded a negative return with stock selection being the main driver of outperformance.

Stockmarkets in Asia Pacific ex Japan were volatile over the period under review. Initially, growing concerns about the global economy and higher interest rates, to curb inflation, unsettled investors and stockmarkets fell. However, by the fourth quarter of 2022, signs that inflation was slowing raised investors' hopes that central banks might in turn slow their interest rate hikes.

Furthermore, towards the end of 2022, signs that Chinese authorities were prepared to ease COVID-19 quarantine rules were well-received and boosted share prices not only in China and Hong Kong, but elsewhere in the region. Another key driver of the rally, in our view, was the extremely depressed starting point for sentiment and valuations.

Over the 12 months as a whole, stockmarkets in China, Indonesia, Singapore and Thailand outperformed, whereas markets in India, the Philippines, South Korea and Taiwan lagged the regional index.

Key contributors to the sub-fund's outperformance included Miniso, Indonesia's Bank Mandiri and Yangzijiang Shipbuilding.

Miniso is a discount retailer that is growing rapidly both in China and overseas. The company's advanced logistics capability offers a tremendous competitive advantage, in our view, in a sector where operating cost competitiveness is critical to success. Bank Mandiri was a beneficiary of the buoyant Indonesian economy and stockmarket in general.

Towards the end of 2022, Yangzijiang received accreditation to manufacture large-scale LNG (liquefied natural gas) transporting ships and won some large-scale container ship orders, which boosted its share price. We believe the market is materially underestimating the scope for profit growth in 2023 and beyond, as margins rise sharply in response to better priced orders, falling steel prices and a weaker renminbi.

Conversely, holdings in SK Hynix, SK Square and JD.Com held back relative returns. South Korea's SK Hynix and SK Square were caught up in general weakness in the semiconductor sector, while shares in Chinese e-commerce company JD.Com fell back on fears about the strength of consumer spending in China.

Investment activity

We were active throughout the 12-month period, taking advantage of market volatility to trim some positions and add to other holdings, where we felt shares had been unfairly sold off.

We also established several new positions, including Brilliance, which we have followed for more than decade and which owns a stake in BMW's China operations. We invested when the company was re-listed in October 2022 – its shares had been suspended whilst fraud was being investigated and new audit controls were put in place. Unsurprisingly, some investors were keen to exit the stock, but we saw it as an excellent opportunity to invest at an attractive level and Brilliance was a top 10 contributor during the review period.

In financials, we began a holding in Indonesia's Bank Rakyat. Rakyat is a micro-finance focused bank and we feel its operations have many years of profitable growth ahead of them, while at the same time expanding access to formal finance to poorer parts of Indonesia society. We also invested in Samsung Life, whose underlying insurance business we believe is set to benefit from regulatory change, and began a position in Bank of China (Hong Kong). At the same time we closed positions in South Korea's Hana Financial and Shinhan Financial and Taiwan's Yuanta Financial.

Another new holding was Samsung Electro Mechanics (SEMCO). SEMCO is a technology company that we believe has a strong, structural growth runway over the medium term, but whose shares sold off ahead of our investment, on near-term cyclical fears.

Investment review

Other holdings that left the portfolio included telecommunication services holdings, China Unicom, China Mobile and China Telecom, after material outperformance, and Taiwan Cement. Taiwan Cement had significantly outperformed its Chinese peers and we felt an insufficient margin of safety remained, given the risk of structural oversupply.

Outlook

We believe the year ahead will see Asian economies fully reopen from COVID-19 restrictions and that the region, albeit with a lag, should get a boost as China fully opens. However, there is the potential for market volatility as investors weigh near-term Chinese economic weakness versus post-COVID-19 normalisation further out. Ultimately though, our sense is that broader market valuations, reinforced by the bottom-up stock opportunities we see, are offering a sufficient margin of safety to invest on the basis of a regional recovery, gradually gaining momentum through 2023.

Our investment strategy is all about bottom-up, differentiated research on individual stocks within our investment universe. We do not try to forecast the future, rather, we are trying to price risk successfully in names where we have identified a meaningful divergence between the price of a business and what we think is its underlying value.

David Perrett
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

Until 9 November 2022, the sub-fund was categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities. From 10 November 2022, the sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class as at 31 March 2023

	One year 31.03.22 %	Three years 31.03.20 % pa	Five years 31.03.18 % pa	Since launch[a] % pa	Launch date of the OEIC merged share class	Launch date of the sub-fund share class

Class 'C' Accumulation	-0.5	+16.1	+5.8	+8.5	28.11.01	26.10.18
Class 'CI' Accumulation	-0.4	+16.1	+5.8	+8.5	28.11.01	06.11.18
US dollar						
Class 'A' Accumulation	-3.2	+14.9	+2.4	+8.3	19.12.08	26.10.18
Class 'C' Accumulation	-2.4	+15.8	+3.2	+9.1	19.12.08	26.10.18

[a] Sub-fund performance before the launch of the sub-fund on 26 October 2018 is that of the relevant Merged Share Class of the M&G Asian Fund, which includes UK taxes but excludes entry and exit charges. The M&G Asian Fund is a UK authorised sub-fund which launched on 14 September 1973 and its non-Sterling share classes merged into M&G (Lux) Asian Fund on 26 October 2018.

Financial highlights

Investment review

For the period from 2 March 2023 (launch date of the sub-fund) to 31 March 2023

Performance review

The M&G (Lux) Better Health Solutions Fund is a concentrated portfolio of global stocks, investing over the long term in companies that are delivering solutions to address better health and well-being alongside a financial return, using a disciplined stock selection process. The sub-fund launched on 2 March 2023.

The sub-fund holds around 30-40 stocks from around the world, across three clear categories: 'pioneers', 'enablers' and 'leaders', which help to provide additional diversification across industries, end-markets, and maturity of business models.

From an impact perspective, slightly over half of the portfolio is invested in companies promoting better health. As a result, nearly 70% of the portfolio is invested in healthcare stocks, and this includes leading Danish pharmaceutical company Novo Nordisk, which has strong expertise across diabetes, obesity, growth disorders and haemophilia. The sub-fund also has significant positions in Quest Diagnostics, an innovative provider of diagnostic testing, and Thermo Fisher Scientific, a provider of products and services for scientific research, diagnostics, and therapeutics.

The balance of the portfolio is invested in companies that support either better lifestyle or better hygiene and safety. This includes The Gym Group, which offers affordable and accessible gym memberships. This service reduces premature mortality, and promotes mental health and physical well-being.

The sub-fund embraces the UN Sustainable Development Goals (SDGs) framework. Over 85% of the portfolio is invested in companies that support SDG3: Good Health and Well-being. An example of this is eye care specialist Alcon. By preventing and treating non-communicable eye disease, Alcon contributes to the achievement of SDG3 – ensuring healthy lives and promoting well-being for all. Similarly, Alihealth, a Chinese online retailer of medical prescriptions, widens access to safe and quality affordable medicines and therefore supports SDG3.

Outlook

While there are signs of weakening inflation, particularly in the US, tight job markets suggest inflationary pressures remain, with slowing global growth leading to expectations of recession and uncertainty around what central bank rate decisions might be. It looks likely to be a case of not 'if' there will be a recession, but how deep and long the global slowdown is likely to last.

These conditions may make equities look risky, but our sub-fund remains balanced and diversified, with a focus on being prepared for volatility ahead. Strong stock selection underpins our sub-fund giving us confidence they can weather a downturn. We continue to invest in quality companies that are well-positioned to survive and thrive in the long term. We continue to hunt for companies where we can find value.

Looking at the current portfolio, we remain confident in the quality of the companies we invest in, and we continue to be optimistic about their ability to generate long-term value, while also delivering solutions to the challenge of better health and well-being.

Jasveet Brar
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Investment review

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 9 fund under SFDR. Information related to the sustainable investments of the sub-fund required to be disclosed under SFDR is available in Annex 1.

Investment review

For the year ended 31 March 2023

Performance review

Global stockmarkets fell over the review period as central banks hiked interest rates in a bid to cool inflation. The pace of price increases hit multi-decade highs as the war in Ukraine led to a surge in commodity costs. Manufacturers also struggled to revive supply chains after COVID-19-related disruptions.

The sub-fund delivered a negative return. Stock selection in technology contributed positively as did the underweight in consumer discretionary. The sub-fund's lack of exposure to communication services also helped. Utilities and consumer staples were the biggest drags on the sub-fund's performance, mainly because of stockpicking. A lack of exposure to energy also weighed on returns.

The biggest positive contributor was onsemi (formerly ON Semiconductor). The chipmaker surpassed earnings expectations and has been a beneficiary of US efforts to boost domestic production of semiconductors. An off-benchmark position in industrial-gas maker Linde was also positive, along with the sub-fund's holding in Brambles. The pallet-pool operator surpassed its annual results guidance.

Drinks-can maker Ball Corporation led negative contributors to the sub-fund's relative performance. The company faced rising costs, including energy. Demand also cooled as the cost-of-living crisis dented consumer spending. Darling Ingredients, which makes renewable diesel and agro-food products, was another drag after missing earnings expectations. Wind-farm operator Orsted weighed on performance amid rising materials costs.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

The sub-fund maintains a concentrated portfolio of usually fewer than 40 sustainable and impactful businesses. The past year saw companies both enter and leave the list of holdings as volatile equity markets created opportunities.

We added five new investments to the portfolio over the reporting period. The additions included Tomra Systems, a maker of reverse vending machines used to collect and sort materials for recycling. We also opened a position in online marketplace eBay, which supports the circular economy, and Enphase Energy, a producer of solar-power equipment for residential and commercial properties.

The other new additions over the period were Alfen and Befesa. Alfen makes equipment for smart power grids, such as transformer stations and electric-vehicle charging points. Befesa runs plants that process and recycle hazardous waste. It has operations across Europe, Asia and North America.

We closed positions in six companies during the reporting period. Green hydrogen company ITM Power and clean-energy solutions provider AES Brasil were among the exits, along with Austrian power generator Verbund. We also sold out from recycling technology company Umicore, rail-equipment supplier Wabtec, and Linde.

Engagement activity

ESG engagements are a key focus for the sub-fund in order to help investment companies improve their impact and sustainability standards. A key engagement in the reporting period was encouraging stone-wool insulation maker Rockwool to provide greater clarity on how a proposed company donation for reconstruction in Ukraine would be used. We also asked it to upgrade its current 'human rights commitment' to a more detailed human rights policy, to ensure it was taking account of all appropriate human rights-related risks.

We also met with US engineering simulation software developer Ansys to encourage it to establish emission reduction targets and commit to the Science Based Targets initiative (SBTi), to disclose the drivers of its scope 1 and 2 footprint and provide a timeframe for scope 3 disclosures. We also asked for disclosure of the

Investment review

company's 'scope 4' (avoided) emissions, to better allow us to quantify the real world impacts it was delivering.

Similarly, we engaged with Ball Corporation to discuss their decarbonisation plans and push for increased ambition around scope 3 emissions. The company is currently working to align its scope 3 emission reduction target with a temperature increase of no more than 1.5°C above pre-industrial times (rather than 2°C).

We held meetings with US waste specialist Republic Services to encourage the company's recycling efforts, including a request for more granular recycling data. We also asked the company to engage with ESG data providers, particularly in light of its acquisition of hazardous waste company US Ecology.

Outlook

Global stockmarkets face a rapidly evolving economic environment. The outlook for interest rates is uncertain as inflation starts to cool, while remaining near historically high levels. The collapse of Silicon Valley Bank in the US is also evidence that higher rates maintain the capacity to produce market shocks even after a year-long cycle of rate increases.

The decarbonisation of the energy sector is a key global challenge, and it has gained new impetus in the past year. The war in Ukraine has boosted interest in alternatives to fossil fuels because the conflict has driven up energy prices, sparked a cost-of-living crisis and stoked concerns about energy security. There also remain plenty of opportunities for climate solutions across numerous other sectors, in our view, including low-carbon buildings, clean transportation, sustainable forestry and recycling.

Investment review

For the period ended 21 October 2022

Performance review

The period under review was a poor one for global stocks and bonds due to surging inflation, economic concerns and rising interest rates. Inflation took off because of a spike in commodity prices stemming from the war in Ukraine. Manufacturers also struggled to revive supply chains following COVID-19-related disruptions.

Higher borrowing costs weighed on markets, as they followed years of rock-bottom interest rates. These pressures were seen last year as early as the quarter ended June, and brief July optimism was soon deflated by the Federal Reserve, European Central Bank and Bank of England all hiking rates.

Stocks made gains in the three months through December helped by China announcing the easing of COVID-19 restrictions and European advances. Government bonds fell as central banks reiterated tightening plans even as inflation started ebbing.

From the 1 April 2022 until 21 October 2022 when the sub-fund merged with the M&G (Lux) Sustainable Allocation Fund, the sub-fund posted a negative total return (the combination of capital growth and income).

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

The sub-fund boosted its equity exposure in May following a decline in prices, buying stocks, particularly in the UK and Germany, and trimming a short position in the US. The sub-fund also added 10-year US Treasuries due to higher yields. The following month, the sub-fund returned to a neutral position on equities by increasing a short position on the S&P 500.

In September, the sub-fund took advantage of turmoil in the UK bond market to buy 30-year gilts. These were sold at a profit the following month amid Bank of England market intervention.

On 21 October 2022 the sub-fund merged with the M&G (Lux) Sustainable Allocation Fund.

If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class up to merger date 21 October 2022

Investment review

For the year ended 31 March 2023

Performance review

Global stockmarkets fell in the 12 months under review, as investors juggled concerns about rising inflation, tightening central bank policy, and a short-lived banking crisis which began in the US and spread to Europe.

The sub-fund's security selection within the financials and industrials sectors was the biggest driver of relative outperformance. In contrast, the sub-fund's weaker stock selection in the healthcare and communication services sectors was the biggest drag on returns on a relative basis.

Looking at individual companies, banks dominated the top contributors and included AIB Group, Bank of Georgia and HDFC Bank, as their operating models benefited from a rising interest rate environment. Consumer goods giant Unilever performed well as investors placed a premium on its defensive qualities. The sub-fund's lack of exposure to Amazon boosted relative returns during what was a largely challenging period for large-cap US tech stocks.

Among the biggest detractors was US genetic sequencing firm Illumina, which fell on the back of disappointing earnings and the infringement of a rival's DNA-sequencing patents. It was also a challenging period for childcare provider Bright Horizons Family Solutions and telecoms group Safaricom.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Engagement activity

Over the review period we engaged with several companies within the sub-fund. Bank of Georgia provides financial services, aiding financial inclusion in a society left with little infrastructure following the end of communism. We asked the Georgian financial institution to provide increased disclosure on the nature and number of underserved or unbanked people that it is currently reaching, to improve our ability to measure its impact. Management agreed that the company needed to improve visibility, and while it is still in the early days of developing how it measures this aspect, it was fully willing to do this and communicate those measures more meaningfully.

We reviewed and provided input to the sustainability objectives of UK-listed African tower communication company Helios Towers. Helios respects M&G as an impact investor and wanted our opinion on its sustainability materiality matrix before this was delivered to a wider audience.

We also asked US-listed safety equipment maker MSA Safety for a more tangible impact measurement data point, to be better able to measure and track the company's impact on safety outcomes. The company is exploring ways to provide a measurable overview of how its equipment was providing a material positive impact.

Investment activities

During the period under review, the sub-fund opened positions in UK-based retailer Pets At Home and publishing group Pearson.

The sub-fund also exited its position in luxury brand group Kering and reduced holdings in Bright Horizons.

Outlook

We continue to invest in quality companies that are competitively advantaged. These are solid, well-positioned companies – a segment of the market that we believe is well set-up to surprise positively in 2023. Even for portfolios with limited turnover like ours, the recent market volatility has offered opportunities to initiate new positions in attractive impactful companies.

Looking at the current portfolio, we remain confident in the quality of the companies we invest in, and we continue to be optimistic about their ability to generate long-term value, while also investing in companies that have demonstrable gender and/or ethnic diversity, or which provide solutions empowering social equality.

M&G (Lux) Diversity And Inclusion Fund

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

Long-term performance by share class as at 31 March 2023

	One year 31.03.22 %	Three years 31.03.20 % pa	Five years 31.03.18 % pa	Since launch % pa	Launch date of the sub-fund share class

Investment review

For the year ended 31 March 2023

Performance review

The period under review was a poor one for global stocks and bonds due to surging inflation, economic concerns and rising interest rates. Inflation took off because of a spike in commodity prices stemming from the war in Ukraine. Manufacturers also struggled to revive supply chains following COVID-19-related disruptions.

Higher borrowing costs weighed on markets, as they followed years of rock-bottom interest rates. These pressures were seen last year as early as the quarter ended June, and brief July optimism was soon deflated by the Federal Reserve, European Central Bank and Bank of England all hiking rates.

Stocks made gains in the three months through December helped by China announcing the easing of COVID-19 restrictions and European advances. Government bonds fell as central banks reiterated tightening plans even as inflation started ebbing. Equities also rose in the final three months of the reporting period as easing economic concerns outweighed turmoil in the banking sector. Government bond yields fell (as prices roses).

The sub-fund posted a positive total return (the combination of capital growth and income) in the reporting period. Equities drove the positive performance, led by holdings in Europe, the US and Japan. Shares in miners, banks and companies in Asia ex Japan weighed on performance.

Holdings in government bonds were also profitable, helped by gains on UK government debt amid market turmoil following the September budget. Emerging market government bonds also boosted performance, particularly those from Mexico and Chile. US Treasuries were a drag on returns.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

The sub-fund's allocation to equities rose over the 12 months from 34.5% to almost 42%, while government bond holdings rose from just under 19% to just under 24%. Corporate bonds fell from just over 10% to just under 10%.

The sub-fund boosted its equity exposure in May following a decline in prices, buying stocks, particularly in the UK and Germany, and trimming a short position in the US. The sub-fund also added 10-year US Treasuries due to higher yields. The following month, the sub-fund returned to a neutral position on equities by increasing a short position on the S&P 500.

In September, the sub-fund took advantage of turmoil in the UK bond market to buy 30-year gilts. These were sold at a profit the following month amid Bank of England market intervention. Also in October, the sub-fund switched its 10-year US Treasuries for 30-year issues. Holdings of long-dated Treasuries were trimmed in November.

The sub-fund cut its overweight position in European, US and UK banks in January, as well as paring a short position in US equities. In February, the sub-fund opened a foreign-currency carry trade, raising exposure to the Brazilian real, South African rand, Indonesian rupiah and Mexican peso while trimming exposure to the dollar, sterling and yen. The healthcare basket was adjusted following underperformance by managed healthcare companies.

As at the end of March, we maintain a slightly underweight position to government bonds and duration, with a preference for US Treasuries, particularly longer-dated.

We remain underweight credit but have been increasing our exposure since the end of last year. Investment grade bonds are our preferred asset class within corporate bonds, with the potential for better yields, and, in our opinion, lower default risk in most developed markets.

From 15 February 2023, the sub-fund's objective, investment policy and its strategy were updated to

Investment review

introduce a set of environmental, social and governance (ESG) exclusions. The new strategy was updated to reflect the role of ESG considerations in the sub-funds' investment process.

Outlook

The delayed effects of a year-long cycle of interest-rates hikes are starting to emerge, which poses a risk to equities. Valuations are also high, so we will remain selective, and focus on markets offering better pricing, such as Europe, Japan and Asia. We also still favour large banks, despite recent volatility, along with technology. Furthermore, as we believe volatility is likely to persist, we will maintain high cash levels to pursue short-term opportunities.

Craig Moran and Steven Andrew
Co-sub-fund managers

Investment review information as at 31 March 2023.

Employees of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

Until 15 February 2023, the sub-fund was categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities. From 16 February 2023, the sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

[a] Sub-fund performance before the launch of the sub-fund on 16 January 2018 is that of the relevant Merged Share Class of the M&G Dynamic Allocation Fund, which includes UK taxes but excludes entry and exit charges. The M&G Dynamic Allocation Fund is a UK authorised sub-fund which launched on 3 December 2009 and its non-Sterling share classes merged into M&G (Lux) Dynamic Allocation Fund on 16 March 2018.

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Investment review

For the year ended 31 March 2023

Performance review

In the first half of the review period, the outlook for emerging market debt continued to worsen due to sharp rises in interest rates. Furthermore, higher food and energy prices in developing countries pushed up inflation expectations, causing a spill-over into other goods and services. A strong US dollar exacerbated the situation, resulting in a flight of capital from emerging markets.

However, emerging market bonds rebounded strongly in the fourth quarter of 2022. This strong performance continued into the new year amid optimism about the reopening Chinese economy post-COVID-19 and expectations that major central banks would end their interest-rate hiking cycle in 2023. Major emerging market currencies such as the Mexican peso and Brazilian real rallied against the US dollar. Nonetheless, the US banking crisis in March created heightened volatility among lower-rated financial issuers. Emerging market debt registered negative returns over the review period, with local currency sovereign debt outperforming hard currency sovereign bonds.

Against this challenging backdrop, the sub-fund delivered a negative return and some of its share classes underperformed its benchmark.

Sub-fund outperformance was driven largely by country allocation decisions. Our remaining sovereign bond exposure to Russia contributed positively following strong price movements later in the review period. The sub-fund's overweight to Uruguay was another notable contributor. However, our positioning in Ghana and Sri Lanka detracted from relative returns after both countries failed to meet payments on their external debt in 2022.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

There were no major changes in the sub-fund's positioning, with hard currency assets continuing to make up the bulk of our exposure. Nevertheless, we maintained our overweight position (relative to the benchmark index) in local currency assets.

In May, we closed our position in Costa Rican sovereign bonds on valuation grounds and due to rising political uncertainty in the country. In July, we reduced our position in Armenia due to concerns over the country's fundamentals. Other sovereign bond holdings trimmed during the period included Bahrain, Bolivia and Romania.

We increased our exposure to larger economies in Latin America and Eastern Europe. Despite a lacklustre primary market, we managed to participate in new sovereign issues from Bulgaria and Romania in September. In the secondary market, we added dollar sovereign bonds from Panama, Colombia and Poland in November.

In January and February, we were once again active in the primary market, participating in new dollar issuances from a number of countries such as Mexico, Hungary, Poland and the United Arab Emirates. In the secondary market, we added sovereign bonds from Jamaica but trimmed exposures to Peru, Uruguay and Nigeria on valuation concerns.

Within corporates, we trimmed our exposure to Enfragen Energia (Colombia), VTR (Chile) and KOS (Ghana) in August. Later we reduced our holdings in Brazilian car rental operator Simpar and investment management company XP. Towards the end of the review period, we bought a few names including Bharti Airtel, Natura and Hunt Oil, as these bonds were trading at attractive valuations.

Outlook

Overall, we believe the macroeconomic backdrop is favourable for emerging market bonds in 2023. An environment of modest economic growth and cooling inflation should be supportive. Inflation has started to moderate in many emerging economies due to the recent fall in food and energy prices. Food accounts for 30-45% of the consumer price index in poorer emerging markets. Meanwhile, we believe that

Investment review

fundamentals remain generally robust at both a corporate and a sovereign level.

We also feel that emerging market bonds appear compelling from a valuation perspective, offering higher real yields when compared to developed market bonds. As inflation moderates and central banks slow the pace of interest rate hikes, current yields may look especially appealing, most notably within local currency bonds.

As for hard currency bonds, we favour high yield bonds over investment grade on valuation grounds, especially in Latin America and the Middle East. We continue to be selective and carry out detailed credit analysis to unearth interesting opportunities in the high yield segment.

Claudia Calich
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

[a] Fair valued.
[b] Illiquid.

All securities are on an official stock exchange listing except where referenced.
Interest rates represent either the stated coupon rate or, for floating rate securities, the current reset rate which is based upon interest rates indices.
Maturity dates represent either the stated date on the security, or the next interest reset date for floating rate securities or the prerefunded date for those types of securities.
Variable and floating coupon rates are those quoted as of 31 March 2023.

Counterparty exposure

Counterparty exposure

Counterparty	Derivative exposures	
	Forward currency contracts US$'000	Collateral held as cash US$'000
Citigroup Global Markets Limited	30,178	0
HSBC Bank Plc	319,378	0
JP Morgan London	593,064	5,538
Merrill Lynch Pierce Fenner + Smith Inc	31,443	0
State Street Bank and Trust Company	741,153	0
State Street Bank and Trust Company, London Branch	34,097	0

Exposure represents the sub-fund's exposure to that counterparty.

The accompanying notes to the financial statements are an integral part of these financial statements.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

[a] Sub-fund performance before the launch of the sub-fund on 17 September 2018 is that of the relevant Merged Share Class of the M&G Emerging Markets Bond Fund, which includes UK taxes but excludes entry and exit charges. The M&G Emerging Markets Bond Fund is a UK authorised sub-fund which launched on 15 October 1999 and its non-Sterling share classes merged into M&G (Lux) Emerging Markets Bond Fund on 7 December 2018.

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Investment review

For the year ended 31 March 2023

Performance review

In the first half of the review period, the outlook for emerging market debt continued to worsen due to sharp rises in interest rates. Furthermore, higher food and energy prices in developing countries pushed up inflation expectations, causing a spill-over into other goods and services. A strong US dollar exacerbated the situation, resulting in a flight of capital from emerging markets.

However, emerging market bonds rebounded strongly in the fourth quarter of 2022. This strong performance continued into the new year amid optimism about the reopening Chinese economy post-COVID-19 and expectations that major central banks would end their interest-rate hiking cycle in 2023. Nonetheless, the US banking crisis in March created heightened volatility among lower-rated financial issuers.

Against this challenging backdrop, the sub-fund delivered a negative return over the period and underperformed its benchmark. The sub-fund's underperformance was driven largely by unfavourable country allocation, particularly our exposure to Ghana and Sri Lanka. Our yield curve positioning also detracted from relative performance, while security selection added significant value.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

There were no major changes to the sub-fund's positioning during the period, with hard currency bonds making up around 95% of assets. We also maintained an overweight exposure (relative to the benchmark) to the high yield market.

In hard currency sovereigns, we switched between euro and dollar-denominated bonds from Ukraine and added a new 10-year Bermuda sovereign. Elsewhere, we added longer-term bonds from South African state-owned utility company Eskom. In the autumn, following concerns over valuation, we reduced bonds from Bahrain, Bolivia, Jamaica and state-run oil and gas firm KazMunayGas, but added Kazakhstan sovereign bonds.

In October, we added off-benchmark bonds from Peru but reduced our holdings of euro-denominated Romanian bonds from overweight to neutral position. Later, we added a new 10-year dollar bond from Colombia.

In January, we were active in the primary market. We participated in new dollar issuances from higher-quality issuers Mexico, Hungary, Romania and others such as Mongolia, Turkey and Colombia. Elsewhere, we added 30-year euro bond issues from Poland and Slovakia and a new sustainable issue from the United Arab Emirates.

Towards the end of the review period, we added a new dollar issue from Costa Rica, but trimmed our positions in Turkish sovereign debt and state-owned companies Eskom (South Africa), Pemex (Mexico) and YPF (Argentina). In local-currency sovereigns, we added a Brazilian 10-year bond.

Within corporates, we added Colombian financial services firm Aval and Brazilian hospital chain Rede D'Ór. However, we sold Brazilian car rental operator Simpar over valuation concerns.

Outlook

Although 2022 was a challenging year for emerging market bonds, we believe easing inflation and a modest economic growth should provide a more supportive backdrop in 2023. We still expect emerging market fundamentals to remain robust, benefiting from the reopening of China.

In terms of hard currency markets, we favour high yield bonds over investment grade on valuation grounds. While we expect high yield default rates to rise, we believe this is likely to be concentrated in specific sectors and countries, such as the Chinese property market and Russia.

In contrast, we see much stronger fundamentals in certain regions, such as Latin America and the Middle East. We believe there is significant value to be found in emerging market high yield, though it is imperative to

Investment review

be selective and carry out detailed credit analysis to identify those opportunities.

Claudia Calich
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Investment review

For the period ended 6 May 2022

Performance review

Between 1 April 2022 and 6 May 2022, when it merged into the M&G (Lux) Income Allocation Fund, the sub-fund delivered a negative total return (the combination of income and capital growth) across all its share classes.

Both equities and bonds fell in most markets over the review period, reflecting the challenges that a rising interest rate environment can have for investors. Inflation data around the world continued to suggest a need for higher interest rates, and this was reflected in the language of both the US Federal Reserve and the European Central Bank. Within emerging stockmarkets, China and Brazil registered notable declines.

Against this backdrop, the allocation to equities (company shares) was the main driver of the sub-fund's negative return, although falls in the value of corporate bonds also hurt performance.

Within equities, several of the sub-fund's financial holdings detracted from performance as concerns about the economic outlook increased. Singapore's DBS, Brazilian lender Banco Bradesco, South Korea's Samsung Fire and Marine and Hana Financial, China's Ping An Insurance and Absa from South Africa were all notable detractors. Macroeconomic worries weighed on South Korean technology firm Samsung Electronics too and the sub-fund's holding in South African mining firm Sibanye-Stillwater also fell.

There were some bright spots, however, and equity holdings in Turkey's conglomerate Haci Omer Sabanci and Brazilian electricity utility company Eletrobras aided performance.

Among corporate bonds, holdings in Cemex Mexico, EIG Pearl, Petroleos Mexicanos and Oriflame cost some performance.

Investment activity

The composition of the portfolio reflects where the sub-fund manager sees the most attractive opportunities at any particular time. As at 1 April 2022, the sub-fund held about two-fifths in equities, a quarter in corporate bonds and the rest in cash and corporate bonds. Ahead of the merger with the M&G (Lux) Income Allocation Fund, these holdings were sold and held as cash.

Outlook

The sub-fund merged into the M&G (Lux) Income Allocation Fund on 6 May 2022.

Michael Bourke and Charles de Quinsonas
Co-sub-fund managers

Investment review information as at 31 March 2023.

Employees of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Investment review

For the year ended 31 March 2023

Performance review

The period under review was characterised by correlated weakness in global stock ('equity') and bond markets, albeit with a notable recovery since October 2022. Over the period as a whole, a key driver of markets was the waxing and waning of interest rate expectations in the face of inflationary pressures.

The sub-fund delivered a positive return in this environment, with contributions in the first six months coming primarily from short exposures to US government bonds ('Treasuries') and US equity markets. Currency returns were also positive over the period as a whole.

In the second half of the period, positive returns came from the decision to open long exposure to US Treasuries and add to long positions in global equities following the episode in September and October 2022. We call 'episodes' phases of excess volatility in markets, which create opportunities for the strategy to buy into panic or sell into complacency.

Over the period under review, the single largest sources of gain were short positions in US Treasuries and the US equity markets, as well as short exposure to the euro and sterling versus a basket of high carry currencies. (High carry currencies are those that offer relatively higher returns because interest rates in the countries that issue them are higher. 'Carry' is often used in the markets to describe an investment strategy seeking to take advantage of both the exchange rate and the interest rate differentials between currencies.) The largest detractors were long positions in the equity markets of Brazil, Korea, and the US banking sector and in the South African rand.

Investment activity

The sub-fund began the period with short exposure to the government bonds of the US and Germany, alongside short exposure to the US equity market, long exposure to diversified equity markets from around the world, and a preference for emerging versus developed market currencies.

Following some rapid increases in yield in April, short government bond positions and US equity positions were briefly removed, before being reintroduced in late May.

In June and July optimistic hopes for a 'pivot' to easier policy from central banks resulted in gains from bonds and US equity markets. This drove a negative portfolio return in July, but ultimately created the opportunity to increase exposure to these themes by August.

This change helped drive strong return between August and September. As the market shifted from what the manager had seen as complacent sentiment to an increasingly negative stance, the sub-fund removed all positions (moving to 100% cash) at the end of September.

Phases of holding no positions in the portfolio are rare in the life of our strategy, and frequently short-lived. This proved to be the case in 2022, as increasingly negative sentiment and the more attractive valuations prompted us to engage with equities and Treasuries on the long side, as well as opening a rebalanced currency basket (with the notable additions of the Hungarian forint and Polish zloty) at the end of October.

Since October there has been a strong recovery in many assets, and a reduction in capital exposed to major themes as a result. Most notably, long exposures were reduced significantly in November, and a short US equity position reintroduced in February. The sub-fund ended the period with modest net short exposure to equity markets, a small long position in US long-dated Treasuries, and exposure to the currency carry theme.

Outlook

The environment is one in which market participants acknowledge a wide range of possible outcomes. Plausible arguments can be made for inflation and policy to remain more stubborn, or for inflation to drop. Similarly, one can make a positive case for assets considered riskier – such as equity – based on the potential for easing pressure on interest rates and the reopening of the Chinese economy, or have a far more bearish disposition, driven by the type of systemic challenge of which the collapse of Silicon Valley Bank is

Investment review

merely a symptom, and the lagged impact of interest rake hikes already implemented.

Given prevailing valuations, the rewards on offer to betting on any one of these scenarios seem limited. Rather, the episode approach is to wait for market overconfidence in any one outcome. The sub-fund is therefore patiently positioned at present, awaiting the next bout of episodic volatility to provide a tactical opportunity.

David Fishwick
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

UBS AG London	62,521	0	0

Exposure represents the sub-fund's exposure to that counterparty.

The accompanying notes to the financial statements are an integral part of these financial statements.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class as at 31 March 2023

[a] Sub-fund performance before the launch of the sub-fund on 26 October 2018 is that of the relevant Merged Share Class of the M&G Episode Macro Fund, which includes UK taxes but excludes entry and exit charges. The M&G Episode Macro Fund is a UK authorised sub-fund which launched on 3 June 2010 and its non-Sterling share classes merged into M&G (Lux) Episode Macro Fund on 26 October 2018.

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Investment review

For the year ended 31 March 2023

Performance review

The period under review proved volatile for fixed income markets in Europe and beyond, with the majority posting negative returns. The ongoing war in Ukraine exacerbated high food and energy prices, and central banks repeatedly hiked interest rates in efforts to curb inflation.

High interest rates make the fixed payments offered by bonds look less competitive. This causes bond yields to rise and their prices to fall. The impact is greater for long-dated bonds, and government bonds with maturity dates of 15 years or more were particularly weak.

Markets rallied early in 2023 in anticipation that interest rates may be nearing a peak, with China's post-COVID-19 reopening also raising hopes of a return to growth. However, central banks soon turned more hawkish, dampening sentiment, and the collapse of Silicon Valley Bank in the US and the UBS acquisition of Credit Suisse in Europe in March brought turmoil to the banking sector.

Over the review period, the sub-fund primarily held investment grade corporate bonds (86% of the sub-fund at the end of the period), which outperformed government bonds (2.5% of the sub-fund). While European (ex UK) corporate bonds (which comprised over half of the portfolio) were weaker than their US counterparts over the period, these broadly outperformed the UK market, where fears of a prolonged recession persisted. High yield corporate bonds brought greater returns than their investment grade counterparts, but we slightly reduced exposure to these due to the higher risk of default.

Banks, which typically perform well in a high-interest environment, make up a significant proportion of the sub-fund's investments, followed by utilities: the largest individual issuers are French banks Crédit Agricole, BPCE and Banque Federative du Crédit Mutuel. The allocation to real estate detracted. The average credit rating of bonds held by the sub-fund was A- at the end of the period.

The sub-fund delivered negative returns across all share classes for the period under review and underperformed the ICE BoAML Euro Corporate Index. For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

The sub-fund follows a dynamic, diversified investment approach, considering macroeconomic, asset, sector, geographic and stock-level factors. From 15 February 2023, the sub-fund's objective, investment policy and strategy were updated to introduce a set of environmental, social and governance (ESG) exclusions.

We continue to monitor and adjust the sub-fund's duration (a measure of its sensitivity to interest rates): at the end of the period, the sub-fund's duration was marginally shorter than the benchmark, therefore slightly less sensitive.

We remained defensive on credit risk, seeking out value and selecting bonds from reputable companies at low risk of default. We added mainly banks (including BNP, Deutsche Bank, Swedbank, Lloyds and Morgan Stanley), utilities (EDF and E.ON) and insurers (Hannover Re and MetLife). Consistent with the sub-fund's ESG commitments, in March, we purchased a new green bond from Australian broadband provider NBN. We sold some telecommunications (Orange and Vodafone) and trimmed exposure to autos over the period. We also sold some Credit Suisse senior bonds following the UBS takeover announcement.

Outlook

Looking ahead, we believe expectations around inflation and recession risk will drive market performance. March's banking sector worries seem to be easing and inflation is currently heading in the right direction, which is positive for bonds. However, recession is still possible given that core prices – and central bank rates – remain elevated. In this uncertain environment, we will maintain a balanced and diversified approach, continuing to focus on investment grade bonds where we see good value and solid yields.

M&G (Lux) Euro Corporate Bond Fund

Investment review

Stefan Isaacs and Gareth Jandrell
Co-sub-fund managers

Investment review information as at 31 March 2023.

Employees of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

Until 15 February 2023, the sub-fund was categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities. From 16 February 2023, the sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class as at 31 March 2023

Investment review

For the year ended 31 March 2023

Performance review

The period under review proved volatile for bond markets in Europe and beyond. The ongoing war in Ukraine exacerbated high food and energy prices, and central banks repeatedly hiked interest rates in efforts to curb inflation.

High interest rates make the fixed payments offered by bonds look less competitive. This causes bond yields to rise and their prices to fall. The impact is greater for long-dated bonds, and government bonds with maturity dates of 15 years or more were particularly weak.

After a largely volatile period in 2022, with a deep dip in October, markets rallied early in 2023 in anticipation that interest rates may be nearing a peak, with China's post-COVID-19 reopening also raising hopes of a return to growth. This was a brief rally, as central banks soon turned more hawkish, dampening sentiment, and the collapse of Silicon Valley Bank in the US and the UBS acquisition of Credit Suisse in Europe in March brought turmoil to the banking sector, although fears of contagion eased.

The sub-fund delivered a positive return but was behind European inflation, as measured by the Eurostat Eurozone Harmonised Index of Consumer Prices over the period under review. Over the 12 months, the sub-fund primarily held a range of fixed interest securities whose returns behave in a similar way to inflation; these securities are typically denominated in euros or are hedged back to euros. Just over half the sub-fund is made up of inflation linked bonds. In asset terms, investment grade bonds were the strongest performers and as we are heavily weighted here, these contributed positively. Mortgage-backed securities also contributed. Our yield curve exposure, however, detracted.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

We remained active within credit, particularly using credit default swap (CDS) indices to take advantage of sharp reprices and with a continued focus on higher quality investment grade names which we believe are unlikely to default even if a recession occurs. Towards the end of the period, we reduced credit risk as spreads tightened during more volatile periods and bought covered bonds in the primary market (new issue bonds), before moving into some high yield (lower quality) bonds as volatility spiked.

However, we added risk as volatility increased to make the most of opportunities, including new issues from Ford and AT&T. Additionally, have looked for positions in good quality banks, where we believe valuations are much more attractive now than they were pre-2008.

From 15 February 2023, the sub-fund's objective, investment policy and its strategy were updated to introduce a set of environmental, social and governance (ESG) exclusions. The new strategy was updated to reflect the role of ESG considerations in the sub-fund's investment process.

Outlook

At the end of the review period, bond market volatility was at its highest level since the banking crisis of 2008. We maintain our view that inflation looks set to stay higher for longer in the UK and eurozone, compared with the US. We believe expectations around inflation and recession risk will drive market performance. Although March's banking sector worries have eased and inflation is currently heading in the right direction, which is positive for bonds, recession is still possible given that core prices – and central bank rates – remain elevated. In this uncertain environment, we will maintain a balanced and diversified approach, continuing to focus on investment grade bonds where we see good value and solid yields.

Investment review

Matthew Russell
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

Until 15 February 2023, the sub-fund was categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities. From 16 February 2023, the sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

All securities are on an official stock exchange listing except where referenced.
Interest rates represent either the stated coupon rate or, for floating rate securities, the current reset rate which is based upon interest rates indices.
Maturity dates represent either the stated date on the security, or the next interest reset date for floating rate securities or the prerefunded date for those types of securities.
Variable and floating coupon rates are those quoted as of 31 March 2023.

The accompanying notes to the financial statements are an integral part of these financial statements.

Counterparty exposure

Counterparty exposure

Counterparty	Derivative exposures			
	Swaps €'000	Forward currency contracts €'000	Futures €'000	Collateral held as cash €'000
Bank of America Merrill Lynch	0	0	154	0
Barclays Bank London	56,150	0	0	2,577
BNP Paribas	2,460	0	0	0
Deutsche Bank AG	0	73	0	0
Goldman Sachs International	2,250	0	0	0
HSBC Bank Plc	0	26,083	0	0

State Street Bank and Trust Company	0	233	0	0
State Street Bank and Trust Company, London Branch	0	53,951	0	0

Exposure represents the sub-fund's exposure to that counterparty.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class as at 31 March 2023

	One year 31.03.22 %	Three years 31.03.20 % pa	Five years 31.03.18 % pa	Since launch[a] % pa	Launch date of the OEIC merged share class	Launch date of the sub-fund share class
Euro						
Class 'A' Accumulation	+0.7	+3.9	+1.2	+1.4	16.09.10	16.03.18
Class 'C' Accumulation	+1.0	+4.4	+1.7	+1.9	16.09.10	16.03.18
Class 'CI' Accumulation	+1.1	+4.4	+1.8	+1.9	16.09.10	16.03.18
Swiss franc						
Class 'A-H' Accumulation	0.0	+3.4	+0.8	+0.3	28.09.12	16.03.18
Class 'C-H' Accumulation	+0.2	+3.9	+1.3	+0.9	28.09.12	16.03.18

[a] Sub-fund performance before the launch of the sub-fund on 16 March 2018 is that of the relevant Merged Share Class of the M&G European Inflation Linked Corporate Bond Fund, which includes UK taxes but excludes entry and exit charges. The M&G European Inflation Linked Corporate Bond Fund is a UK authorised sub-fund which launched on 16 September 2010 and its non-Sterling share classes merged into M&G (Lux) European Inflation Linked Corporate Bond Fund on 16 March 2018.

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Investment review

For the year ended 31 March 2023

Performance review

European shares made gains in the review period, compared with losses for global and US stocks, as a strong second half more than offset a weak April to September period. Rising interest rates and economic risks drove first-half losses, as inflation surged to multi-decade highs following Russia's invasion of Ukraine. Shares rebounded from late 2022 onwards as some signs of slowing inflation spurred optimism that rates wouldn't climb as high as previously feared. Concerns about a recession also faded as falling power prices eased pressure on consumer spending.

Value stocks outperformed the broader European market during the year, as rising interest rates boosted the appeal of profitable companies making steady dividend payments today. By contrast, higher borrowing costs dented the appeal of growth stocks, which promise rewards in the future.

All of the sub-fund's share classes outperformed the benchmark MSCI Europe Net Return Index, which posted full-year gains of 3.8%. Exposure to the energy sector drove the outperformance, aided by both an overweight allocation and stockpicking. Share choices in the financials and materials sectors were also beneficial. Consumer discretionary was the biggest drag followed by information technology and healthcare.

Oil giant BP was amongst the largest contributors to the sub-fund's outperformance in relative terms, with TotalEnergies also near the top of the list. This reflected the sub-fund's overweight position in energy and high crude prices. Bank of Ireland was the largest relative positive contributor to sub-fund performance in a rising interest rate environment.

Coach and bus operator National Express was the sub-fund's largest detractor from relative performance, as it contends with wage inflation in the US and concerns about the UK economy. The company also said that maintaining low fares would constrain post-pandemic margin recovery. German home-improvement chain Hornbach and telecom infrastructure maker Ericsson also detracted in relative terms.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

We added a number of new positions during the year, reflecting opportunities across different industries and countries. These additions included French lighter and razor maker BIC, because of its robust sales, high margins and attractive valuation. We also opened a position in power-equipment maker Siemens Energy and its affiliate Siemens, the engineering giant. Other notable additions were French construction company Saint-Gobain's glass bottling brand Verallia and German chemical maker BASF. Furthermore, we increased existing positions in UK supermarket operator Tesco, Dutch bank ING and drugmaker Roche.

Exits for the sub-fund began with the April sale of Nokian Tyres. The stake was sold at a small profit after being purchased amid a March sell-off tied to the war in Ukraine. Other closed positions included carmaker BMW, UK drinksmaker Britvic, Spanish IT services firm Indra Sistemas and tobacco firm Imperial Brands. We also exited three financial services companies – banks Credit Suisse and Société Générale, and Spanish insurer Mapfre. We took profits by selling shares in German defence contractor Rheinmetall and oil-tanker company Euronav.

Outlook

Markets remain volatile because of uncertainty about the future path of inflation and interest rates. Energy costs and the war in Ukraine also hang over the European economy, along with lingering concerns about liquidity following transatlantic banking turmoil in March. This environment is likely favourable to value stocks, in our view, even if inflation has peaked, and there are many areas of opportunity amid low valuations. The uncertainty also heightens the importance of having a very balanced portfolio, particularly given the risk of further unexpected surprises.

M&G (Lux) European Strategic Value Fund

Investment review

Richard Halle
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

Until 21 December 2022, the sub-fund was categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities. From 22 December 2022, the sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class as at 31 March 2023

Investment review

For the year ended 31 March 2023

Performance review

The 12-month period under review was a highly volatile one for financial markets. Russia's invasion of Ukraine and continued COVID-19 restrictions in China led to further supply chain dislocations and inflation at multi-decade highs. The Federal Reserve and most other major central banks hiked interest rates aggressively in response, which put immense pressure on asset valuations and stoked fears of a recession. Later in the period, sentiment improved as China eased its zero-COVID-19 policy and cooling inflation data sparked hopes of a pause or reversal in interest rate hikes. There was severe volatility in March, however, as the collapse of two US banks led to fears of potential contagion.

Within equities (company shares), energy stocks performed best as higher oil prices fed through to strong company earnings. By contrast, real estate shares were especially weak as rising interest rates weighed on property, and March's banking crisis led to concerns over a liquidity crunch. For much of the period, high-growth sectors such as technology were weak, as higher interest rates compressed valuations and recession fears ate into growth forecasts. However, this dynamic reversed in early 2023 as investors anticipated a near-term peak in interest rates.

Government bonds fell sharply as yields (which move inversely to bond prices) rose in response to high inflation and rising interest rates. Investment grade corporate bonds reflected this weakness, as did riskier high yield and emerging market bonds. In foreign exchange, the period was defined by a strong US dollar. The dollar rose against most other currencies as the Federal Reserve delivered a series of interest rate hikes and recession fears pushed investors to seek safe havens.

Convertibles were weak over the period, reflecting the weakness in both equity and bond markets. Higher interest rates weighed on the bond floor of convertible assets. The asset class's relatively high exposure to growth sectors and low exposure to the period's stronger sectors such as energy was another headwind. In addition, many convertibles issued in 2021 were priced high and have performed especially poorly after the era of ultra-low interest rates came to an abrupt end.

The sub-fund declined over the period but finished ahead of its benchmark. In absolute terms, the best performers were convertibles in the energy and utilities sectors. By contrast, holdings in financials, basic materials and technology detracted most. In terms of regions, the sub-fund's holdings in Asia ex Japan held up best, while holdings in the US, Europe and Japan all declined.

In terms of individual holdings, top detractors in absolute terms included a convertible from MP Materials. Shares in the fast-growing rare earths miner fell as interest rates rose and rare earth prices weakened. Cryptocurrency platform Coinbase also detracted after crypto prices fell sharply following the collapse of FTX, another exchange provider, in November. Akamai Technologies also underperformed. Akamai shares fell sharply in May 2022 after the company reported lower first-quarter earnings, and again in February when the firm announced a further shift into the cloud computing space.

Many of the sub-fund's top contributors were due to acquisition activity and corporate actions. These included convertibles from French electricity generator EDF, which was nationalised by the French government, and Twitter, which was bought by Elon Musk. The position in Chinese hotels group H World (formerly Huazhu) also outperformed after China loosened its zero-COVID-19 policy and investors anticipated a recovery in domestic and outbound travel.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment Activities

We were active in adjusting the positioning of the portfolio over the period. The market's general weakness provided opportunities to establish positions in what we considered to be interesting companies at compelling prices and reinvest in positions that we had

Investment review

previously sold on valuation grounds. Among the portfolio's largest additions were convertibles from banking group BNP Paribas, Chinese delivery firm ZTO Express, ride hailing and food delivery group Uber, ticketing company Live Nation, Chinese online shopping platform Meituan, Southwest Airlines and accommodation platform Airbnb (in which we also bought an equity stake).

To make room for the additions, we sold convertibles that we thought had little chance of generating a decent return, or no longer satisfied our selection criteria. This included companies such as Voya, Etsy, Lenovo and Siemens, though we used subsequent price weakness to rebuild a position in Siemens. Concerns about deteriorating credit quality led us to dispose of convertibles from Dish Networks and Coinbase. We also sold our holding of a convertible from Booking Holdings to make room for our investment in Airbnb.

As previously mentioned, EDF and Twitter left the sub-fund after the companies were acquired. Elsewhere, we accepted the option to sell our holdings of convertibles from Yandex and software firm Coupa back to the issuers.

Outlook

As investors in convertibles, we can deal with the uncertainties ahead by tweaking three main levers: credit quality, option structure, and equity. Overall, we remain more constructive on credit valuations than on equities in the current environment.

Credit currently offers a rich vein of investment opportunities. In the US and Europe, credit spreads (which represent a measure of how risky investors perceive markets to be) have normalised into our fair range of 400-500 basis points. These spreads, coupled with higher interest rates, provide what we consider to be attractive yields. In Asia, high yield credit spreads have widened substantially during this past quarter, providing cheap valuations. We are also finding convertible-implied spreads that are cheaper than equivalent straight bonds.

For equities, we are less confident on valuations given the macroeconomic and earnings risks ahead. To us, US equities still seem richly valued while European and Asian valuations are cheaper overall, even after considering sector and growth differentials.

The events in the banking sector in March are a reminder of the need to be prepared for what we do not know is coming. For us, this means being highly discerning when choosing our investments. Our game plan involves buying the right convertible structure, not just the right stock name. We continue to look for convertibles with good credit quality and a low distance to the bond floor, which could potentially hold up relatively well in a market downturn. We are also looking for opportunities with enough delta (sensitivity to the movement in the price of the underlying stock) to provide equity upside should the underlying stocks go up in price, but which fall by a lesser degree if the underlying stocks go down. In addition, we remain focused on companies with better business models and proven free cashflow-generation capabilities.

Léonard Vinville
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Investment review

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

Until 9 November 2022, the sub-fund was categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities. From 10 November 2022, the sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

M&G (Lux) Global Convertibles Fund

Counterparty exposure

Counterparty exposure

Counterparty	Derivative exposures Forward currency contracts US$'000
Merrill Lynch Pierce Fenner + Smith Inc	20,696
State Street Bank and Trust Company	285,322

Exposure represents the sub-fund's exposure to that counterparty.

The accompanying notes to the financial statements are an integral part of these financial statements.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class as at 31 March 2023

	One year 31.03.22 %	Three years 31.03.20 % pa	Five years 31.03.18 % pa	Since launch[a] % pa	Launch date of the OEIC merged share class	Launch date of the sub-fund share class

[a] Sub-fund performance before the launch of the sub-fund on 9 November 2018 is that of the relevant Merged Share Class of the M&G Global Convertibles Fund, which includes UK taxes but excludes entry and exit charges. The M&G Global Convertibles Fund is a UK authorised sub-fund which launched on 13 July 2007 and its non-Sterling share classes merged into M&G (Lux) Global Convertibles Fund on 7 December 2018.

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Investment review

For the year ended 31 March 2023

Performance review

The period under review proved volatile for global fixed income markets, with the majority posting negative returns. The ongoing war in Ukraine exacerbated high food and energy prices, and central banks repeatedly hiked interest rates in efforts to curb inflation.

High interest rates make the fixed payments offered by government and investment grade corporate bonds less competitive. This causes bond yields to rise and their prices to fall. The impact is greater for long-dated bonds, and UK and US government bonds with maturity dates of 15 years or more were particularly weak. Investment grade corporate bonds performed better, but the best returns came from lower-quality, high yield bonds, which offer higher income potential to compensate for greater default risks.

Markets rallied early in 2023 in anticipation that interest rates may be nearing a peak, with China's post-COVID-19 reopening also raising hopes of a return to growth. However, central banks soon turned more hawkish, dampening sentiment, and the collapse of Silicon Valley Bank in the US and the UBS acquisition of Credit Suisse in Europe in March brought turmoil to the banking sector.

Over the review period, the sub-fund primarily held investment grade corporate bonds (85% of the sub-fund at the end of the period). While most paid fixed rates, the sub-fund had a small exposure to floating rate corporate bonds, which performed better as their interest rates can fluctuate depending on market conditions, mitigating the effects of inflation. At period end, 9.5% of the sub-fund was held in government bonds.

The sub-fund is diversified across sectors and geographies, favouring quality banking and utilities companies based in the US, eurozone and UK, with an average credit rating of A-. The largest individual issuers include Morgan Stanley, Bank of America, Tesco and General Electric.

With corporate bonds struggling, the sub-fund delivered negative returns for all share classes over the review period.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

The sub-fund follows a dynamic, diversified investment approach, looking at macroeconomic factors while closely analysing individual bonds and issuers. Given the uncertain economic outlook, we remained defensively positioned, keeping duration slightly shorter than the benchmark. (Duration is a measure of a sub-fund's sensitivity to interest rate changes – the longer the duration, the more sensitive it is.)

We continued to add banks, where we see good value: primary activity (new bond issues) included purchases of Banque Fédérative du Crédit Mutuel, Barclays and US Bancorp. Other additions included chemicals group Celanese and American insurer Metlife. With utilities also offering solid cashflow, we added some defensive credit in companies including American Water.

We sold some riskier cyclical names, preferring companies that we feel can better weather a downturn. In October, we sold some floating rate notes at a high price, freeing up cash. In November, we bought Meta, Facebook's owner, for the first time and this contributed strongly in the final quarter. We kept a close eye on inflation and recession risk throughout, adjusting our exposure to inflation-linked investments as necessary.

Outlook

Looking ahead, we believe expectations around inflation and recession risk will drive market performance. March's banking sector worries seem to be easing and inflation is currently heading in the right direction, which is positive for bonds. However, recession is still possible given that core prices – and central bank rates – remain elevated. In this uncertain environment, we will maintain a balanced and

Investment review

diversified approach, continuing to focus on investment grade bonds where we see good value and solid yields.

Ben Lord
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

All securities are on an official stock exchange listing except where referenced.
Interest rates represent either the stated coupon rate or, for floating rate securities, the current reset rate which is based upon interest rates indices.
Maturity dates represent either the stated date on the security, or the next interest reset date for floating rate securities or the prerefunded date for those types of securities.
Variable and floating coupon rates are those quoted as of 31 March 2023.

The accompanying notes to the financial statements are an integral part of these financial statements.

Exposure represents the sub-fund's exposure to that counterparty.

The accompanying notes to the financial statements are an integral part of these financial statements.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class as at 31 March 2023

[a] Sub-fund performance before the launch of the sub-fund on 7 December 2018 is that of the relevant Merged Share Class of the M&G Global Corporate Bond Fund, which includes UK taxes but excludes entry and exit charges. The M&G Global Corporate Bond Fund is a UK authorised sub-fund which launched on 5 September 2013 and its non-Sterling share classes merged into M&G (Lux) Global Corporate Bond Fund on 7 December 2018.

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Investment review

For the year ended 31 March 2023

Performance review

The sub-fund outperformed the MSCI ACWI Net Return Index. Stock selection was the key driver of excess return, with the strongest contribution from technology and consumer staples. Sector allocation benefited from overweight positions relative to the benchmark in energy and consumer staples.

Analog Devices led the gains in technology as the semiconductor company reported better-than-expected results. Broadcom and KLA Corp also outperformed in semiconductors, backed by solid fundamentals.

Imperial Brands made the biggest positive contribution to sub-fund performance as defensive characteristics were highly prized in an environment of extreme uncertainty. Takeda Pharmaceutical rose in healthcare.

Trinseo provided the biggest drag on sub-fund performance after the specialist in plastics and latex binders reduced its guidance. The operating environment is clearly challenging, but the share price reflects a lot of bad news, in our view. We continue to believe that the shares are significantly undervalued.

Methanex, by contrast, underperformed due to the weakness of the shares in the first half of the review period. Concerns about a recession weighed heavily on economically sensitive stocks at the time, but the shares rallied strongly in the second half, backed by solid operating results. We remain optimistic about the methanol producer and its prospects for cash generation in the current environment.

VF Corp and Adidas fell as the consumer discretionary stocks bore the brunt of tough trading conditions.

Investment activities

We made six new purchases and six complete sales during the 12 months under review. The new holdings were dominated by high-yield opportunities which were presented by the market downturn – opportunities for quality businesses which are market leaders in their field.

Kone, a world leader in elevators and escalators, was purchased on a starting yield of 4.2%, which is attractive, in our view, given the high proportion of recurring service revenue. JPMorgan Chase, the US bank with a robust balance sheet, and Roche, the Swiss pharmaceutical company, were purchased on similar yields.

We bought DBS Group in March following the turmoil in the banking industry. The Singaporean bank is conservatively managed and the valuation was compelling across a variety of measures, including a 5% dividend yield. The sub-fund remains underweight relative to the benchmark in banks.

Richemont, the luxury goods company, was added to the portfolio after a sharp selloff in the consumer discretionary sector. Richemont's financial strength is unrivalled with net cash on the balance sheet, and the business remains well placed for a resumption in Chinese travel.

Volvo was the final purchase during the review period. The world leader in trucks and electric trucks benefits from the stability of service and maintenance revenue, as well as a strong balance sheet with a net cash position. The stock was purchased on a starting yield of 3.4%.

In addition we gained a new holding in Accelleron Industries following its spin off from ABB. We bought more stock to build a full position.

We took advantage of the weakness in the technology sector to add to our semiconductor holdings including Broadcom and ASML. The sub-fund's technology weighting increased from 15% to 18%. We reduced Methanex into strength in the second half of the review period and trimmed KLA Corp to manage the position size.

S&P Global (financials), AstraZeneca (healthcare), Automatic Data Processing (technology), Charles Schwab (financials) and Walmart (consumer staples) were sold as a source of cash given the better valuation opportunities we saw elsewhere.

Investment review

We completed the sale of Imperial Brands (consumer staples) in November, having taken steps to exit the position because of sustainability considerations. The tobacco stock's impressive gains in 2022 presented the ideal opportunity.

Outlook

We remain resolutely focused on dividend growth as a compelling strategy over the long term, without losing sight of the reality that the global economy faces challenging times ahead. Dividend cuts will be inevitable for companies not equipped with the financial armoury to withstand a cyclical downturn. Balance sheet strength is a key consideration in our company research to ensure that dividends are sustainable in the current climate. We take comfort from the fact that many of our holdings are carrying net cash.

Despite the difficult macroeconomic backdrop, valuations in some areas of the stockmarket are looking attractive. Fears of a recession, which have been exacerbated by recent concerns about the stability of the banking system, have led to indiscriminate selling. The severity of the declines is creating favourable entry points, in our view, for some world class companies with rock-solid balance sheets and excellent long-term growth potential. Being selective will be paramount. Capitalising on what we believe to be exceptional opportunities will ultimately determine sub-fund performance in the years to come and we remain optimistic about the future.

Stuart Rhodes
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

Until 22 December 2022, the sub-fund was categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities. From 22 December 2022, the sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

[a] Sub-fund performance before the launch of the sub-fund on 18 September 2018 is that of the relevant Merged Share Class of the M&G Global Dividend Fund, which includes UK taxes but excludes entry and exit charges. The M&G Global Dividend Fund is a UK authorised sub-fund which launched on 18 July 2008 and its non-Sterling share classes merged into M&G (Lux) Global Dividend Fund on 7 December 2018.

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Investment review

For the year ended 31 March 2023

Performance review

Over the 12-month review period, sub-fund performance was broadly flat.

The review period was characterised by volatility across global financial markets, resulting in a material negative return for emerging markets. Russia's invasion of Ukraine in February 2022 (just before the start of the review period), led to higher commodity prices and an energy supply-chain crisis in Europe and compounded the woes of a global economy still struggling to recover from the effects of the pandemic. Major central banks around the world were forced to increase their interest rates aggressively in order to curb raging inflation. Amid an uncertain global economic outlook, there was a flight of capital from emerging markets which was exacerbated by a stronger US dollar.

The period ended on a more positive note, as emerging markets equities began to recover in late 2022, supported by optimism around China's relaxation of its zero-COVID-19 policy. January 2023 was a strong month for the asset class, amid signs of moderating inflation and optimism that central banks were nearing the end of their rate hiking cycle.

Gains from stock selection in financials, technology and consumer discretionary contributed to relative performance. Security selection in China also proved beneficial.

Our position in South Africa-based Naspers was a key contributor as was Mexican real-estate firm Fibra Uno (Mexico was one of the better performing stockmarkets over the period). China's Trip.Com and Chinese biotechnology company Beigene benefited from optimism about China's re-opening and China's HollySys Automation Technologies gained on renewed takeover speculation.

Our holding in Raizen, Brazil's largest sugar and ethanol producer, was also among the notable detractors. In early 2023, a significant investor in Raizen decided to offload its stake, which depressed the company's share price. Other holdings that held back performance included Sibanye Stillwater (a position we have now closed) and SK Hynix, which was caught up in general weakness in the semiconductor sector. Not holding Tencent which reported good results also detracted.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activity

As value-oriented investors, we took advantage of the volatility during the period and the resulting mispricing in stocks to adjust our portfolio. As such, we were able to exit stocks and markets trading at expensive multiples, while reinvesting the proceeds in high-quality companies at attractive valuations.

In financials, we started new positions in UK-listed life insurer Prudential (which we believe is well placed to meet growing demand for insurance in Asia and Africa), South Korea's Samsung Life and Hong Kong-listed life insurer AIA. The latter re-joined the portfolio. The company has had a tough time with the closure of the China-Hong Kong border, but we think it is a quality business with attractive long-term prospects.

We also invested in Colombian banks Davivienda and Bancolombia, as we believe that despite Colombia's political and economic challenges, the banking system is reasonably solid and valuations are attractive, and Egyptian bank Commercial International Bank, which we have owned before. Concerns about Egypt's macroeconomic situation have weighed on the stock, but we think the lender's prospects are being underappreciated.

We sold our entire stakes in Turkish bank Haci Omer Sabanci, Chinese insurer PICC Property and Casualty, and South African financial services group Sanlam.

In telecommunications and technology, we closed our position in China Mobile after the telecommunications firm was placed on a US sanctions list. Later in the year, we began new positions in China Communication Services and South Korean IT security business SK

Investment review

Square and added to our existing position in semiconductor firm Taiwan Semiconductor Manufacturing.

In the real estate sector, we closed a position in China Overseas Land and initiated holdings in Ciputra and KE Holdings. We believe Indonesian real estate developer Ciputra Development will be a beneficiary of the urbanisation of Indonesia and the country's economic growth in general. KE Holdings is a real estate selling platform that has performed poorly since its listing in 2021 and is undervalued in our view. The company has a profitable renovation/home improvement division which we think has a great growth runway over the next two to three years.

Outlook

After their worst year since the global financial crisis, we believe emerging markets may see some overdue outperformance in 2023. As US interest rates peak, we should see a reversal of the capital flight experienced by emerging markets in 2022. While developed countries continue to grapple with high inflation rates, emerging market economies are starting to see prices falling (albeit from a high base) as supply-chain and commodities shocks wane.

Overall, emerging market valuations remain attractive compared to historical levels and are cheaper relative to developed markets. Furthermore, despite the uncertain global economic backdrop, the long-term drivers for emerging markets economic growth remain intact.

We maintain our bottom-up ethos and expect a further rise in stock dispersion this year. As value-oriented investors, we will continue to drill down beyond macroeconomic and geopolitical situations to focus on individual stock opportunities.

Michael Bourke
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

Until 9 November 2022, the sub-fund was categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities. From 10 November 2022, the sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class as at 31 March 2023

	One year 31.03.22 %	Three years 31.03.20 % pa	Five years 31.03.18 % pa	Since launch[a] % pa	Launch date of the OEIC merged share class	Launch date of the sub-fund share class

[a] Sub-fund performance before the launch of the sub-fund on 26 October 2018 is that of the relevant Merged Share Class of the M&G Global Emerging Markets Fund, which includes UK taxes but excludes entry and exit charges. The M&G Global Emerging Markets Fund is a UK authorised sub-fund which launched on 5 February 2009 and its non-Sterling share classes merged into M&G (Lux) Global Emerging Markets Fund on 26 October 2018.

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Investment review

For the year ended 31 March 2023

Performance review

Stockmarkets around the world were volatile over the period under review and for the 12 months as a whole, recorded a negative return in euro terms.

Initially, growing concerns about the global economy and higher interest rates, to curb inflation, unsettled investors. However, by the fourth quarter of 2022, signs that inflation was slowing raised investors' hopes that central banks might in turn slow their interest rate hikes. Stockmarkets responded by rallying sharply, particularly in October.

Further gains were made at the start of 2023, as investor confidence remained intact. However, it was not long before concerns over persistently high inflation led to falls in share prices. Then in March, confidence in the banking sector was eroded by the collapse of Silicon Valley Bank in the US and the emergency rescue of Credit Suisse in Switzerland. However, as the period drew to a close, stockmarkets again were on an upward trajectory.

Against this background, the sub-fund delivered a negative total return (the combination of capital growth and income) across all its share classes, but was ahead of its benchmark the MSCI ACWI Net Return Index.

All the underlying factors that the sub-fund targets outperformed the benchmark over the period, providing a tailwind for the sub-fund's performance. Within these, active exposures to cheap value, small size and low volatility factors were the main drivers of outperformance (see section below for an explanation of factor investing).

Investment activity

The M&G (Lux) Global Enhanced Equity Premia Fund is an active equity (company shares) sub-fund, using a dynamic multi-factor equity approach. Factor investing is based on the premise that a significant portion of returns over time can be explained by the excess return generated by stocks that reflect certain characteristics, or risk factors.

We apply a systematic investment approach to select stocks we expect to outperform other companies in the global equity market. From the sub-fund's investible universe, the MSCI ACWI Index, each stock is ranked on five key criteria, or factors: value, quality, momentum, volatility and size. Based on analysis of simulated past returns, stocks with exposure to these factors (attractive valuation, high quality, positive momentum, low volatility and small company size) have historically tended to deliver superior risk-adjusted returns.

These rankings are then combined to provide a single 'score' for each stock. Stocks with high scores are candidates for inclusion in the sub-fund.

The weighting we allocate to each factor in the process of arriving at the single score reflects our view of the prevailing market conditions. The potential returns of individual factors might vary depending on their valuation and price action, as well as general market conditions. For example, if in our view a risk factor is attractively valued, it will have a greater weighting in the score than if we regard it as unattractively valued. Typically, each risk factor will have an equal weighting (ie 20%). No factor can have a weighting of less than 0% or greater than 50%.

As part of the portfolio construction process, differences between the sub-fund's characteristics and the index (such as stock, sector, country or risk factor weightings) may be constrained. Managing the sub-fund in this way limits the magnitude by which the sub-fund is expected to deviate from the benchmark.

By combining factors, we mitigate the risk of any single factor being out of favour at a given time. Factors generally have low levels of correlation – they often do not move in the same direction as the market or as each other. In some cases in the past, factors have even displayed negative correlation, moving in opposite directions to the markets and/or each other.

Throughout the review period, the sub-fund maintained an elevated exposure to the value and momentum factors (ie above the 'typical' 20% weighting). Both factors contributed to active returns over the review period.

Investment review

Outlook

Concerns about the stability of the banking system have added to an already uncertain macroeconomic environment, but central banks remain committed to their task of fighting inflation, with a clear steer that the current cycle of higher interest rate hikes has further to go.

Rather than second-guess the course of interest rates and economies, we prefer to focus our attention on our systematic investment approach to select stocks.

Up until recently, the era after the global financial crisis had been characterised by a regime of lower interest rates, benign inflation outcomes and the growth factor outperforming value for most of the time.

The monetary and fiscal policy responses by developed economies, especially the US, to the rise in inflation after the COVID-19 pandemic and Russia's attack of Ukraine have caused market participants to question whether we are at the start of a new regime for asset markets. The rise in longer-term interest rates appears to reflect this view.

Should such a reflationary regime continue, we would expect the environment to be supportive of the multi-factor approach used in the sub-fund, which currently has a heavy value tilt.

Gautam Samarth
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

Long-term performance by share class as at 31 March 2023

	One year 31.03.22 %	Three years 31.03.20 % pa	Five years 31.03.18 % pa	Since launch % pa	Launch date of the sub-fund share class

Investment review

For the year ended 31 March 2023

Performance review

The sub-fund delivered a positive return during the period under review. Government and investment grade corporate bonds struggled throughout the period, as central banks repeatedly hiked interest rates to combat high inflation (exacerbated by the war in Ukraine).

After initial success in slowing down inflation, there was speculation regarding a Fed pivot away from aggressive rate hikes, which led to bond market rallies in October and November. Markets retreated in December as high inflation proved to be very persistent. After rebounding strongly in January, bond markets were subjected to more volatility in February and March, caused by inflation concerns and a banking panic.

These conditions made traditional fixed income investments less competitive, and investors turned to floating rate notes (FRNs) – which pay variable interest rates – for protection. High yield floating rate notes (HY FRNs), which offer higher income potential to compensate for greater default risks, outperformed as investors tried to avoid the effects of inflation.

The sub-fund underperformed its benchmark over the period, when security selection, in particular in financials and retail, as well as our currency exposure, detracted. Our lack of exposure to the more inflation-sensitive real estate and banking sectors and slight underweight in basic industry were beneficial for relative returns. Our exposure to credit default swaps (CDS) also added value.

The sub-fund's more defensive positioning than the index (that is, less exposed to potentially risky names) contributed to performance – for example in avoiding Novafives, an auto-part manufacturer with exposure to Russia. We also benefited from holding logistics provider Worldwide Flight Services, which was acquired by stronger rival SATS.

Our largest issuers at period end were Netherlands-based telecommunications provider United Group, Italian software company TeamSystem and Paganini Bidco, the holding company of Italian online university platform Multiversity.

In relative terms, an overweight US Treasury position contributed positively, as did our holdings in UK housebuilder Castle and Sherwood Financing. Notable detractors included the positions in PrestigeBidco (the holding company for German retailer Schustermann and Borenstein) and Fiber Bidco (owner of paper company Fedrigoni).

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

We maintained our careful approach, focusing on physical, corporate HY FRNs (as opposed to instruments like interest-rate swaps) and avoiding the most distressed names: the sub-fund has an average credit rating of B+.

As such, we remained selective in terms of primary market activity, buying new issues from UK-based Miller Homes, Italian pharmaceutical company Kepler and UK gaming company 888. We also participated in deals from Fedrigoni, Italmatch chemicals and debt collectors Encore Capital, Arrow and iQuera.

Outlook

We see good value in HY FRNs because of the prospect of further interest rate increases, ample credit premiums and the notes' elevated income streams.

We believe FRNs' mitigation of interest-rate risk will be beneficial as central banks' ongoing struggle to cool inflation is likely to lead to higher benchmark borrowing costs, particularly in Europe and the UK. Furthermore, floaters remove duration risk should the Federal Reserve pivot to cuts.

We believe holders of HY FRNs are well-compensated for credit risks as markets have priced in an overly pessimistic outlook for defaults. Spreads remain significantly wider than the long-term average, offering the prospect of gains from compression. By contrast, conventional HY spreads have already tightened. Any

Investment review

HY FRN defaults will also likely be concentrated in specific sectors, boosting the importance of active selection.

James Tomlins
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

[a] Defaulted Bond.

All securities are on an official stock exchange listing except where referenced.
Interest rates represent either the stated coupon rate or, for floating rate securities, the current reset rate which is based upon interest rates indices.
Maturity dates represent either the stated date on the security, or the next interest reset date for floating rate securities or the prerefunded date for those types of securities.
Variable and floating coupon rates are those quoted as of 31 March 2023.

The accompanying notes to the financial statements are an integral part of these financial statements.

Exposure represents the sub-fund's exposure to that counterparty.

The accompanying notes to the financial statements are an integral part of these financial statements.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class as at 31 March 2023

[a] Sub-fund performance before the launch of the sub-fund on 13 September 2018 is that of the relevant Merged Share Class of the M&G Global Floating Rate High Yield Fund, which includes UK taxes but excludes entry and exit charges. The M&G Global Floating Rate High Yield Fund is a UK authorised sub-fund which launched on 11 September 2014 and its non-Sterling share classes merged into M&G (Lux) Global Floating Rate High Yield Fund on 7 December 2018.

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Investment review

For the year ended 31 March 2023

Performance review

The review period began with high yield bond credit spreads widening. Higher US Treasury yields, an increasingly pessimistic (and inflation-fuelled) global growth outlook and COVID-19 lockdowns in China all hurt investor sentiment.

Following rapid interest rate hikes by central banks, government bond yields rose sharply in the first half of the review period. However, bond yields tapered to lower levels after autumn. Credit spreads (the difference between the yield of a corporate bond and a government bond of the same maturity) had followed suit with European high yield spreads tightening considerably against the US since October 2022.

Despite turmoil in the banking sector sparking fears of a broader contagion across the financial system in March, global high yield spreads recovered by the end of the review period.

Against this challenging background, the sub-fund delivered a negative return and underperformed the global high yield bond markets as represented by the ICE BofAML Global HY Index USD hedged. On the whole, our credit positioning contributed positively with good security selection, notably in North America. Credit selection in the media, leisure and financial services sectors added value. However, our security selection in real estate, energy and healthcare weighed on performance.

The sub-fund's top contributors over the review period included German lender Deutsche Bank and Italian state-owned bank Monte dei Paschi di Siena. French retailer Casino Guichard Perrachon and European commercial property operator CPI Property Group were notable detractors.

At the country level, our overweight exposure to European bonds contributed positively while underweight positions in Asian and North American bonds also added value. Our Middle East and Latin American bonds detracted.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

We made modest adjustments as we increased our cash position over the period. At the country level, we trimmed our European assets and increased US exposure following the strong rally in European assets in the latter part of the review period.

The heightened credit spreads volatility provided opportunities to make modest adjustments to our tactical positioning. We reduced our cyclical risk by selling outperforming issuers such as Dufry, Macy's, Sally Beauty and Olin. We favoured issuers in non-cyclical areas and purchased aerospace firm Spirit AeroSystems and added to an existing position in Thyssenkrupp Elevator. Other secondary trades included purchasing Viking, Spirit Airlines and Calpine.

At the start of 2023, we increased our US exposure and bought new issues in the primary (new issue) market. We also added US energy issuers in the secondary market. Our bottom-up analysis (analysing issues based on the attractiveness of fundamental characteristics of companies) helped us to reduce Total Play, Belden and iQera. We also reduced Société Générale's AT1s and sold positions in US issuers such as Townsquare Media, Zayo, Endo and Simmons Foods. Additional-tier 1 (AT1s) bonds are a form of convertible bond issued by banks that are a hybrid of bank equity and debt.

The primary market remained relatively quiet for most of the review period as high interest rates discouraged issuers. Nevertheless, we participated in several new deals mainly from the US. These included Ford Motor Credit, Royal Caribbean, Dish, Spirit AeroSystems, Spirit Airlines, Clean Harbors, Sealed Air, Mauser Packaging, Atlas Air and Frontier. Elsewhere, we bought Verisure, Ecopetrol, Eurobank, ZF Group and Nexans in the primary market.

Outlook

We remain generally neutral on valuations as we believe technical elements (supply/demand imbalance,

Investment review

attractive all-in yields) remain supportive of the high yield asset class, thereby will help to contain credit spreads. Fundamentals are generally supportive for the moment, in our opinion, although we need to focus on credit analysis to avoid issuer-specific risk.

We expect a shallower default cycle compared to what is currently being priced in by financial markets. Moving forward, we are generally concentrating on higher-quality issuers and non-cyclical sectors, such as healthcare and technology, media and telecommunications.

Stefan Isaacs and James Tomlins
Co-sub-fund managers

Investment review information as at 31 March 2023.

Employees of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

[a] Fair valued.

All securities are on an official stock exchange listing except where referenced.
Interest rates represent either the stated coupon rate or, for floating rate securities, the current reset rate which is based upon interest rates indices.
Maturity dates represent either the stated date on the security, or the next interest reset date for floating rate securities or the prerefunded date for those types of securities.
Variable and floating coupon rates are those quoted as of 31 March 2023.

The accompanying notes to the financial statements are an integral part of these financial statements.

Counterparty exposure

Counterparty exposure

Counterparty	Derivative exposures		
	Swaps US$'000	Forward currency contracts US$'000	Futures US$'000

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class as at 31 March 2023

[a] Sub-fund performance before the launch of the sub-fund on 9 November 2018 is that of the relevant Merged Share Class of the M&G Global High Yield Bond Fund, which includes UK taxes but excludes entry and exit charges. The M&G Global High Yield Bond Fund is a UK authorised sub-fund which launched on 16 October 1998 and its non-Sterling share classes merged into M&G (Lux) Global High Yield Bond Fund on 9 November 2018.

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Investment review

For the year ended 31 March 2023

Performance review

The sub-fund underperformed the MSCI ACWI Net Return Index. Infrastructure companies structured as real estate investment trusts (REITs) featured prominently among the detractors as investors shunned the real estate sector in an environment of rising interest rates. We strongly believe that our REIT holdings should not be treated as bond proxies, owing to the long-term growth credentials of our selected companies.

Crown Castle, the communications towers company, is a beneficiary of the structural growth in digital infrastructure driven by rising mobile penetration and data usage globally. The new holding in Segro provides exposure to long-term growth by way of e-commerce infrastructure. For us, the long-term investment case for both companies remains intact.

Home REIT provided the biggest drag on sub-fund performance after the UK company, which provides accommodation for the homeless, came under pressure from a short seller. We are engaging with the company's management and board of directors to assess the situation fully and the holding is under review.

Ørsted, Xinyi Energy and NextEra Energy Partners underperformed in utilities. We continue to believe that these renewables companies have a crucial role in the energy transition and they remain core holdings.

Stock selection in utilities made a positive contribution overall, helped by ContourGlobal, whose shares jumped more than 30% after the UK company received a takeover approach. E.ON led the gains in European utilities, while AES Corp and Edison International outperformed in the US.

Infrastrutture Wireless Italiane (INWIT) added value in communications infrastructure after the shares climbed to an all-time high following takeover speculation. The gains were backed by strong fundamentals as the company reported solid results for the fourth quarter and provided a positive outlook for the year ahead.

PrairieSky Royalty made the biggest contribution to sub-fund performance in a buoyant energy sector. We continue to believe that the Canadian company, which receives royalties from oil & gas bearing lands, remains well placed for long-term growth, and that the cashflows running into perpetuity with minimal operating costs, capital commitment or environmental liabilities present a compelling opportunity for long-term investors, with the added benefit of industry-leading credentials for ESG and sustainability.

Investment activities

We made two new purchases and three complete sales during the period under review. The number of holdings declined to 45.

We invested in Segro, which diversifies our data centre exposure and represents our first foray into e-commerce infrastructure with its portfolio of strategically located warehouses and fulfilment sites. The company is listed in the UK, but has a presence across Europe and a broad tenant base, including new economy businesses such as Amazon and Hello Fresh.

Alexandria Real Estate was our second new purchase during the review period. The US REIT provides exposure to life science infrastructure – the critical assets behind the research and development of drugs to address society's ongoing medical needs – and is now the biggest holding in the sub-fund's 'social' segment of infrastructure.

We divested ContourGlobal and Vantage Towers after the shares rose on takeover activity. We also exited China Gas Holdings as the shares rallied from their lows. We originally invested in the gas distributor as a beneficiary of a long-term structural trend, namely China's shift away from coal towards gas in its attempts to combat climate change. While our view on this multi-decade theme remains unchanged, the investment thesis has been overshadowed by corporate governance issues and operational shortcomings specific to the company. We divested the holding as a source of cash for new ideas where we have greater conviction.

Investment review

Outlook

We are under no illusion about the tougher economic times ahead, but we remain as optimistic as ever about the long-term growth prospects in listed infrastructure. The asset class offers defensive qualities, combined with the ability to offer inflation protection by way of index-linked revenue, in our opinion. We also think the attractions of its reliable and growing cashflows have considerable appeal beyond the current environment. Listed infrastructure is a beneficiary of long-term structural trends, such as renewable energy, digital connectivity and demographics – powerful themes, which we believe will endure for many decades to come.

From an investment standpoint, we take comfort from the abundance of attractive ideas from a bottom-up perspective. Being selective will be paramount in these volatile times. Valuation is a key consideration in the stock selection process, and we see plenty of opportunities for structural growth without having to overpay for the privilege.

The attractions of infrastructure, particularly in the listed sphere, have not gone unnoticed. We have seen increasing corporate activity across the asset class, the most recent example being the pending takeover of Vantage Towers. We believe that these symbolic events provide a clear indication that the reliable and growing cashflows from infrastructure assets are going cheap in the stockmarket. Investors with a long-term time horizon, such as those in the private sphere, are starting to take notice and act on their convictions. We remain optimistic about the asset class.

Alex Araujo
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Investment review

For the year ended 31 March 2023

Performance review

The 12-month period under review saw continued volatility across global bond markets, with the majority of fixed income assets delivering negative returns. This slump was more pronounced during the second and third quarters of 2022. As economies began to open back up after the worst of COVID-19 had passed, new problems, such as the continuing war in Ukraine and persistent supply-chain shortages resulted in rising food and energy prices. Policymakers around the globe implemented interest rate hikes in earnest, to combat the rising inflation.

Against the backdrop of global interest rate hikes, bonds delivered widespread negative returns as bond demand suffered in the rising rate environment. The impact was felt far and wide as government, corporate and emerging market bonds experienced negative returns.

After initial success in slowing down inflation, there was speculation regarding a US Federal Reserve (Fed) pivot away from aggressive rate hikes, which led to bond market rallies in October and November. They fell in December as high inflation proved to be very persistent. After rebounding strongly in January, bond markets were subjected to more volatility in February and March, caused by inflation concerns and a banking panic.

Some of the sub-fund's euro-denominated share classes underperformed its benchmark, the Bloomberg Global Aggregate Index, while others, including US dollar-denominated ones, outperformed. Overall weakness across fixed income markets dimmed performance but losses continued to be mitigated by actively managing the sub-fund's sensitivity to movements in interest rates (also known as duration, and measured in years) and exercising diligence in credit positioning (meaning, having less exposure to the risk that bond issuers will not pay their interest and debt in full). Our currency exposure was negative for relative returns.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activity

From 15 February 2023, the sub-fund's objective, investment policy and its strategy were updated to introduce a set of environmental, social and governance (ESG) exclusions. The new strategy was updated to reflect the role of ESG considerations in the sub-funds' investment process.

In terms of duration positioning, the sub-fund was cautiously positioned throughout most of the period. Assets held of between 0-5 years in maturity were increased and those of 5-15 years in maturity were reduced during the period. The sub-fund increased holdings of government bonds and decreased holdings of investment grade corporate, high yield corporate and emerging market bonds during the period, seeking to take advantage of opportunities to enhance portfolio credit quality along the way. The portfolio ended the period with higher allocations to US and German issuers and lower allocations to UK and Japanese issuers.

Over the review period, we decreased allocations to both the US and Canadian dollar currencies, and increased allocations to the euro and the Japanese yen. Later in the period, we took down some of our Latin American currency positions, as they had done well, and sold some of our index-linked holdings.

Outlook

Looking ahead, we believe expectations regarding inflation and recession will continue as primary drivers of the global economy. Monetary policy lag times and the manner in which our current bout of inflation continues to evolve will determine the extent to which a 2023 recession can be mitigated.

In this environment, we are adopting a balanced and diversified approach across duration and credit. As yields available from investment grade bonds remain elevated, investors are provided with a good overall cushion to further absorb any future volatility.

M&G (Lux) Global Macro Bond Fund

Investment review

Jim Leaviss
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

Until 15 February 2023, the sub-fund was categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities. From 16 February 2023, the sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

[a] Fair valued.

All securities are on an official stock exchange listing except where referenced.
Interest rates represent either the stated coupon rate or, for floating rate securities, the current reset rate which is based upon interest rates indices.
Maturity dates represent either the stated date on the security, or the next interest reset date for floating rate securities or the prerefunded date for those types of securities.
Variable and floating coupon rates are those quoted as of 31 March 2023.

The accompanying notes to the financial statements are an integral part of these financial statements.

Exposure represents the sub-fund's exposure to that counterparty.

The accompanying notes to the financial statements are an integral part of these financial statements.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

M&G (Lux) Global Macro Bond Fund

[a] Sub-fund performance before the launch of the sub-fund on 26 October 2018 is that of the relevant Merged Share Class of the M&G Global Macro Bond Fund, which includes UK taxes but excludes entry and exit charges. The M&G Global Macro Bond Fund is a UK authorised sub-fund which launched on 15 October 1999 and its non-Sterling share classes merged into M&G (Lux) Global Macro Bond Fund on 26 October 2018.

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Investment review

For the year ended 31 March 2023

Performance review

The M&G (Lux) Global Maxima Fund delivered a negative total return (the combination of capital growth and income) across all its share classes.

The sub-fund is an active, long-only equity sub-fund, which uses machine-learning models to select stocks. Machine learning is a type of artificial intelligence. Oversight of stock selections is provided by the sub-fund management team.

The term 'artificial intelligence' refers to the broad study of developing algorithms to imitate human cognitive functions (such as pattern recognition). Machine learning is a subset of artificial intelligence that does not rely on a pre-defined set of rules developed by humans in order to make decisions or predictions. Rather, machine learning techniques 'learn' these rules from historic data and apply these learned rules to the real world to assist decision-making.

Over time, the success of our machine-learning models is determined by the percentage of stocks they pick that outperform (hit rate), along with the magnitude of the outperformance (skew). The skew is measured as the difference between the average outperformance of the winning stock bets and the average underperformance of the losing stock bets.

While the sub-fund's hit rate was in line with expectations at around 52%, this was offset by negative skew, resulting in underperformance over the review period. While the sub-fund is constrained to limit active industry and country exposures, style exposure can vary over time and have an impact on returns. Over the course of the review period, the sub-fund's style exposure was also a drag on returns, with exposure to high residual volatility (a stock's volatility not due to market volatility) being the main detractor.

Stockmarkets around the world were volatile over the period under review, and for the 12 months as a whole, recorded a negative return in euro terms.

Initially, growing concerns about the global economy curbed investor risk appetite. In particular, investors struggled to assess the impact of moving from a low to a high inflation regime. Many of the world's central banks – led by the US Federal Reserve – raised interest rates substantially in response, in an attempt to combat rising prices and this led to a sharp fall in share prices.

However, by the fourth quarter of 2022, signs that inflation was falling raised investors' hopes that central banks might slow their interest rate hikes. Stockmarkets responded by rallying sharply, particularly in October. Further gains were made at the start of 2023, as investor confidence remained intact.

It was not long before concerns over persistently high inflation and the need to tame it by further interest rate rises, resurfaced, which led to falls in share prices. Then in March, confidence in the banking sector was eroded by the collapse of Silicon Valley Bank in the US and the emergency rescue of Credit Suisse in Switzerland. However, as the period drew to a close, stockmarkets again were on an upward trajectory.

Investment activity

We apply a systematic bottom-up stockpicking approach, driven by quantitative analysis of individual companies. We use a proprietary database and proprietary machine-learning models to help identify stocks that we expect to outperform the global equities market. The sub-fund management team has experience of managing quantitative equity strategies and is supported by a team of data scientists.

The methodology uses vast amounts of data about companies to establish whether there is an identifiable pattern to outperforming stocks. Rather than relying on individuals to discover investment opportunities, the approach relies on machine learning for idea generation.

From the sub-fund's investable universe of global equities, each stock is assessed on its likelihood of outperforming the global equity market. We then use our judgement, along with feedback from our in-house team of research analysts, to determine which stocks to

Investment review

include in the sub-fund. The result is a high-conviction portfolio of between 50 and 100 stocks.

As part of the portfolio construction process, differences between the sub-fund's country and industry weightings compared to those of the index are constrained.

There were no material changes to the portfolio from a country or industry exposure perspective over the review period. The portfolio has a positive exposure to smaller size, high volatility and cheap value styles, while maintaining relatively neutral exposures to the growth and momentum styles.

Outlook

Concerns about the stability of the banking system have added to an already uncertain macroeconomic environment, but central banks remain committed to their task of fighting inflation, with a clear steer that the current cycle of higher interest rates has further to go.

Rather than second-guess the course of interest rates and economies, we prefer to focus our attention on our systematic investment approach to select stocks.

Up until recently, the era after the global financial crisis had been characterised by a regime of lower interest rates, benign inflation outcomes and the growth factor outperforming value for most of the time.

The monetary and fiscal policy responses by developed economies, especially the US, to the rise in inflation after the COVID-19 pandemic and Russia's attack of Ukraine have caused market participants to question whether we are at the start of a new regime for asset markets. The rise in longer-term interest rates, appears to reflect this view.

Should such a reflationary regime continue, we would expect the environment to be supportive of the multi-factor approach used in the sub-fund, which currently has a heavy value tilt.

Gautam Samarth
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class as at 31 March 2023

	One year 31.03.22 %	Three years 31.03.20 % pa	Five years 31.03.18 % pa	Since launch % pa	Launch date of the sub-fund share class

Investment review

For the year ended 31 March 2023

Portfolio review

Global stockmarkets fell in the 12 months under review, as investors juggled concerns about rising inflation, tightening central bank policy, and a short-lived banking crisis which began in the US and spread to Europe.

The sub-fund itself fell in the period, although it outperformed its benchmark, the MSCI World Net Return Index. The sub-fund's security selection within the healthcare sector was the biggest driver of relative outperformance. In contrast, the sub-fund's lack of exposure to the energy sector was the main drag on returns versus the benchmark.

Looking at individual companies, the biggest detractor to relative performance was Ball Corporation, as the company revealed that it had stopped production at several of its less efficient US facilities in the face of slowing demand. The sub-fund also suffered from its overweight position in Alphabet (Google's parent company) as the market re-evaluated technology stocks in a higher interest rate environment.

On the positive side, the sub-fund's relative performance benefited from strong stock selection, particularly within healthcare, financials and technology. The biggest individual contributor was Novo Nordisk, as the Danish pharmaceuticals company continued its upward trajectory, after raising its full-year earnings expectations in November. Manhattan Associates was also a positive contributor as the supply-chain software specialist's share price rose strongly after reporting record results for the fourth quarter and full-year 2022. The sub-fund's lack of exposure to Amazon boosted relative returns during what was a challenging period for large-cap US tech stocks.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Engagement activity

We engaged with several companies over the period. We met with industrial gas producer Linde, which we encouraged to increase female representation at board level. The company confirmed that it was in the process of recruiting a new board member, with several highly-qualified women as potential candidates, and that maintaining board diversity was something the company was actively working on.

We also engaged with UnitedHealth Group on a number of topics, including setting 'science-based' emission reduction targets, assessing its Scope 3 emissions, and improving disclosure of governance and incentives in the next sustainability report. We were encouraged to see that UnitedHealth has now committed to validating their emission reduction targets with the Science Based Targets initiative, and aims to finish its Scope 3 emissions inventory by the end of 2022. The company also said it will take our suggestions on board for the 2023 sustainability report.

Similarly, we engaged with Ball Corporation to discuss their decarbonisation plans and push for increased ambition around Scope 3 emissions. The company is currently working to align its Scope 3 emission reduction target with a temperature increase of no more than 1.5°C above pre-industrial times (rather than 2°C).

We met with WH Smith to discuss staff remuneration, including the number of staff receiving a 'real living wage' amidst the cost of living crisis. This is a wage considered to be proportionate to the true cost of living, after the effects of inflation.

We met with the chief sustainability officer and members of the investor relations team at online marketplace eBay. We asked for greater clarity on the split between new, used and non-new/non-used goods sold, and what the carbon avoidance and landfill avoidance calculations were on those categories. We asked for timeframes for expanding carbon-emissions saving analysis to product categories beyond those already analysed. We also encouraged the company to consider how customers could be incentivised towards more sustainable products. The company was receptive to our suggestions, and would consider some of the points we had raised.

Investment review

We also met with Danish pharma company Novo Nordisk to determine if it had appropriate processes, procedures and checks in place to avoid the misuse of its obesity drug Wegovy.

Novo Nordisk has little control over what physicians are prescribing. The company has to focus on its first-line framework and believes it has good systemic processes in place, such as sales rep training. Novo must educate healthcare professionals on the nature of obesity and available treatments, as thinking around obesity has changed dramatically since many were in medical school. On the other side, Novo needs to educate obese patients that a therapy is available. The company must do all of this without appearing to have a conflict of interest. The company said it would be more proactive talking to authorities and that it could monitor prescriptions in the US down to the physician, meaning it had some capability to look for potential misuse of the drug.

Investment activities

In the final quarter of 2022, we opened small positions in technology companies eBay and Adobe. We sold our holdings in US bank M&T and video game specialist Electronic Arts.

The sub-fund sold its small position in JD.com, which it received in January after investee company Tencent distributed its stake in JD.com to shareholders.

Outlook

While there are signs of weakening inflation, particularly in the US, tight job markets suggest inflationary pressures remain with slowing global growth leading to expectations of recession and uncertainty around what central bank rate decisions might be. It looks likely to be a case of not 'if' there will be a recession, but how deep and long the global slowdown is likely to last.

These conditions may make equities look risky, but our sub-fund remains balanced and diversified, with a focus on being prepared for volatility ahead. Strong stock selection underpins our sub-fund, and we assess companies' quality, financial strength and ability to deal with external shocks, giving us confidence they can weather a downturn. We seek to invest in quality companies that are well-positioned to survive and thrive in the long term.

Looking at the current portfolio, we remain confident in the quality of the companies we invest in, and we continue to be optimistic about their ability to generate long-term value, while also contributing towards the goals of the Paris Agreement on climate change.

John William Olsen
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 9 fund under SFDR. Information related to the sustainable investments of the sub-fund required to be disclosed under SFDR is available in Annex 1.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class as at 31 March 2023

[a] Sub-fund performance before the launch of the sub-fund on 9 November 2018 is that of the relevant Merged Share Class of the M&G Global Sustain Paris Aligned Fund, which includes UK taxes but excludes entry and exit charges. The M&G Global Sustain Paris Aligned Fund is a UK authorised sub-fund which launched on 19 December 1967 and its non-Sterling share classes merged into M&G (Lux) Global Sustain Paris Aligned Fund on 9 November 2018.

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Investment review

For the year ended 31 March 2023

Performance review

The period under review saw both equity (company shares) and bond (debt) markets deliver negative returns. Investor sentiment turned negative during the period as surging inflation rates and concerns about weakening economic growth affected countries around the world. Markets experienced volatility as most major central banks raised interest rates to combat fast rises in consumer prices. The combination of high interest rates and high inflation weighed heavily on riskier assets. This negative sentiment was compounded by a short-lived banking crisis that started in the US and spread to Europe.

Against this difficult investment climate, the sub-fund delivered a positive return over the review period, driven by our investment strategy of adjusting the portfolio in response to a volatile investment environment. We also benefited from our portfolio's allocation to a broad range of asset classes. The sub-fund successfully outperformed its benchmark during the period.

Investment activities

We continued to position our portfolio defensively during the review period by maintaining a higher allocation to cash and short-term government bonds. At the same time, we scaled down our equity exposure at times during this period, relying more on the futures markets to participate in market volatility. We started adding back to the equity position at the end of the period under review, seeking to take advantage of what we see as attractive opportunities.

Between mid-August and the end of September, we added various short positions in the S&P 500 Index seeking to capitalise on the weaknesses in the US stockmarket, as we felt the market was vulnerable to persistent concerns over inflation and higher interest rates.

At the beginning of October, we also added equity exposure to East Asian stockmarkets, especially in Hong Kong. After falling steeply in 2022, we felt that these markets had potentially attractive relative value compared to other regions.

In government bonds, we reduced our exposure to some emerging market bonds by closing our positions in Indonesia and scaling down our holdings in Mexico and Brazil. However, we added a small position in Poland.

Elsewhere, we were bearish towards developed market government bonds, especially in the US and Germany. This reflected our view that the market was potentially underestimating the extent of future interest rate increases that might be carried out by the Federal Reserve and European Central Bank. Short positions in 5-year US Treasuries and 2-year German government bonds benefited from a period of rising interest rates.

We were active in managing our exposure to the UK yield curve during the review period. Following the 'mini budget' of the new UK government led by Prime Minister Truss in late September, we took advantage of the higher yields available by buying long-dated UK government bonds and also receiving exposure to UK swap rates at a 3-year maturity. Both of these positions were closed during October after strong gains.

Outlook

Overall, recent portfolio changes are designed to strike a prudent balance between seeking opportunities to increase the value of the portfolio, while also providing diversification and offering the potential to protect capital in adverse scenarios. Given the portfolio's currently broad diversification across asset classes and against a variety of potential future scenarios, which remain uncertain, we believe we are well-positioned to navigate and, importantly, respond to any further developments in the period ahead.

The currently volatile backdrop provides opportunities for active investors, although given the degree of prevailing uncertainty we believe it is prudent to be highly tactical.

Moreover, the flexibility of the sub-fund in being able to take short positions in assets provides scope to generate returns in falling markets should we assess

Investment review

(correctly) that certain asset prices are vulnerable to economic and market developments.

Alongside these two factors, we believe that our ability to invest in an array of asset classes and geographies makes us well-placed to navigate and respond to future developments in the current investment environment.

Tristan Hanson
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Investment review

For the year ended 31 March 2023

Performance review

The sub-fund underperformed the MSCI ACWI Net Return Index due to market timing differences. The sub-fund, which is priced at 1pm in Luxembourg, did not include the gains in North America on the last trading day in March, when the S&P 500 Index rose 1.4%. The US and Canada account for more than 50% of the portfolio by weighting.

Stock selection added value, with the strongest contribution from industrials (Siemens), materials (Air Products and Chemicals) and consumer staples (Unilever).

Stock selection also made a positive contribution in technology, with Infineon Technologies, the German semiconductor company, leading the gains.

Sector allocation benefited from an overweight relative to the benchmark in a buoyant energy sector. PrairieSky Royalty made the biggest contribution to sub-fund performance in the sector. We continue to believe that the Canadian company, which receives royalties from oil & gas bearing lands, remains well placed for long-term growth, and that the cashflows running into perpetuity with minimal operating costs, capital commitment or environmental liabilities present a compelling opportunity for long-term investors, with the added benefit of industry-leading credentials for ESG and sustainability.

First Republic Bank led the detractors. Our only holding in US banks was rescued by an injection of capital from larger banks after the regional bank became the focus of speculation about the risk of potential failure. First Republic is a small holding in the portfolio and the position is under review.

Investment activities

We made five new purchases and divested three positions – a level of turnover consistent with our long-term investment horizon of three to five years.

We initiated a new holding in Lululemon Athletica in the belief that the company is at the early stages of a long-term growth trajectory, driven by the development of Lululemon as a global brand for active lifestyles. The stark and indiscriminate selloff in the consumer discretionary sector provided an attractive entry point.

The negative sentiment which overshadowed the real estate sector provided us with what we saw as a buying opportunity for Alexandria Real Estate and Segro. Alexandria, which is structured as a real estate investment trust (REIT), provides exposure to life science infrastructure – the critical assets behind the research and development of drugs to address society's ongoing medical needs. Segro provides exposure to the long-term growth trend in e-commerce, with its portfolio of strategically located warehouses and fulfilment sites. The UK-listed company has exciting opportunities for growth in Europe, in our view, as well as a broad tenant base, including new economy businesses such as Amazon and Hello Fresh.

Toray Industries and BYD, both based in Asia, were the final purchases during the review period. Toray, based in Japan, has sustainability at its core as a market leader in carbon composites, which provide the aerospace industry with fuel efficiency benefits owing to their lighter weight compared to traditional materials. The application of composite technology has expanded into other industries including renewables for use in wind turbines as well as the development of hydrogen as a future fuel. We invested in BYD to diversify our exposure to the explosive growth in electric vehicles. We bought the Hong Kong-listed shares.

We gained three additional holdings by way of spinoffs: Embecta, Brookfield Corp and Meituan. We divested the small positions in Embecta, which was spun out of Becton Dickinson, and Meituan, the Chinese food delivery platform spun off by Tencent. We took the same course of action with JD.com, China's largest online retailer, which was also spun off by Tencent. Brookfield Corp has been retained as a core holding after the successful spinoff of a partial stake in its asset management business.

Investment review

We divested Epiroc (industrials) Unite Group (real estate) and Johnson & Johnson (healthcare) as a source of cash.

Outlook

We are under no illusion about the tougher economic times ahead, but we remain resolutely focused on the multi-decade trends that underpin our thematic approach. We remain active in our quest for new ideas.

We are undeterred in our belief that the sub-fund's chosen themes – from the road to zero carbon to cloud and connectivity – will persist for many years to come and that the beneficiaries of these powerful trends can generate profitable growth for a variety of stakeholders, including employees, customers, shareholders and broader society.

The ability to generate cashflow is absolutely critical in our company analysis. We are not investing in hope alone. History is littered with examples of blue sky concepts which never turned a profit, and speculative companies which commanded exorbitant multiples during their glory days have seen their unrealistic expectations pegged back. Fundamentals and value are the key determinants of long-term return, in our view.

Alex Araujo
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

Investment review

For the year ended 31 March 2023

Performance review

The period under review saw both bonds (fixed income securities) and equities (company shares) deliver negative returns. It was a challenging period for most asset classes, as surging inflation and higher interest rates dampened investor sentiment.

Although there was a continued recovery in the global economy following the COVID-19 pandemic, recession fears emerged as China's zero-COVID-19 policy and the war in Ukraine weighed on economic activity. Towards the end of the period, stresses in the banking industry also rattled financial markets.

Against this challenging background, the sub-fund delivered a negative total return across all of its share classes. Over the 12 months, the sub-fund's volatility has tracked higher than expectations (11.04% for the EUR A Acc class shares vs 4-8% expected) reflecting the volatility seen in the markets over the period. As volatility increased both in equities and fixed income markets last year the sub-fund did not benefit from cross asset diversification. However, we expect diversification to improve going forward given current yield levels in the fixed income space.

Our allocation to equities and core government bonds detracted from performance. However, our holdings in emerging market government bonds contributed positively.

The losses in equities were led by our North American portfolio, in particular our exposure to US financial and technology companies. Our holdings of Canadian banks also detracted. The US banking crisis in March had resulted in heightened volatility in banking and finance stocks. Nevertheless, our holdings in European equities performed well, led by German, Spanish and French companies. The sub-fund's holdings in the UK and Ireland marginally detracted.

Our significant holdings of long-dated US Treasury bonds, which we held as a potential diversifier to our riskier assets, posted losses. The large increase in interest rates had resulted in prices of bonds declining sharply, especially in longer-dated bonds.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

Early in the review period, we maintained a modest bias towards riskier assets by holding equities in major developed and developing countries, while having sizeable holdings in US Treasuries, emerging market sovereigns and corporate bonds.

Nonetheless, we turned more cautious towards risk assets in the second half of the review period. We made significant portfolio adjustments by reducing our core government bonds and reinvesting the proceeds into European credit and money market instruments. Money market instruments are debts due to be repaid within a year. These include interbank loans, commercial papers, and Treasury bills.

In April we added two dividend-paying US technology stocks, Intel and Nvidia, as we expected these stocks to exhibit continued earnings growth. In bonds, we initiated a position in 7-year US Treasury notes after a rapid rise in bond yields offered an attractive entry point.

In the autumn, we bought 30-year gilts after bond prices slumped as investors turned bearish over the UK mini-budget. As the price of these recovered in October, we took full advantage of this 'idiosyncratic' episode to close our position.

In US Treasuries, we switched out of 7-year notes into 30-year bonds as the long-dated bonds became more attractive following a sell-off in October. The 30-year Treasuries also provided potential diversification benefits for the sub-fund.

After rallies in global equity and bond markets towards the end of 2022, we reduced exposure to financial and technology stocks in Europe, the US and Japan. We also reduced US government bonds and held the proceeds in cash.

Investment review

Towards the end of the review period, we adjusted our US financial stocks following the US banking crisis.

At the end of the period, our cash and money market positions had increased significantly, in light of our more cautious stance on risk assets.

From 15 February 2023, the sub-fund's objective, investment policy and its strategy were updated to introduce a set of environmental, social and governance (ESG) exclusions. The new strategy was updated to reflect the role of ESG considerations in the sub-funds' investment process.

Outlook

In terms of asset classes, we remain relatively neutral towards equities as we believe valuations are still predicated on elevated earnings in most markets. In bonds, we maintain a slightly underweight position in government bonds and duration. As for credit, we prefer investment grade corporate bonds as they offer an attractive all-in yield.

We also seek to maintain an elevated cash position to take advantage of potential short-term opportunities due to market volatility which we believe will continue in the following months.

Steven Andrew and Stefano Amato
Co-sub-fund managers

Investment review information as at 31 March 2023.

Employees of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation until 15 February 2023

Until 15 February 2023, the sub-fund was categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities. From 16 February 2023, the sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

Counterparty exposure

Counterparty exposure

Counterparty	Derivative exposures	
	Forward currency contracts €'000	Collateral held as cash €'000
Barclays Bank London	14,655	0
Goldman Sachs International	17,867	0
HSBC Bank Plc	992,316	240
JP Morgan London	238,201	670
Merrill Lynch Pierce Fenner + Smith Inc	12,017	0
National Australia Bank Ltd	76,565	0
State Street Bank and Trust Company	998,591	5,300
State Street Bank and Trust Company, London Branch	120,853	0

Exposure represents the sub-fund's exposure to that counterparty.

The accompanying notes to the financial statements are an integral part of these financial statements.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

[a] Sub-fund performance before the launch of the sub-fund on 16 January 2018 is that of the relevant Merged Share Class of the M&G Income Allocation Fund, which includes UK taxes but excludes entry and exit charges. The M&G Income Allocation Fund is a UK authorised sub-fund which launched on 7 November 2013 and its non-Sterling share classes merged into M&G (Lux) Income Allocation Fund on 16 March 2018.

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Investment review

For the year ended 31 March 2023

Performance review

The period under review was a volatile one for financial markets, as economies grappled with high inflation (exacerbated by the war in Ukraine), rising interest rates (although rates remained very low in Japan) and recession fears. Despite the weak growth seen in most developed economies, including Japan, Japanese companies have been able to deliver solid earnings growth over the past year, partly due to the weakness of the yen.

Against this background the fund recorded a positive return. Outperformance was driven by stock selection, with holdings in Socionext, Sanrio and Kintetsu World Express adding value.

Socionext is a 'system-on-a-chip' design company. Its growth pathway plays to Japan's strength in the auto sector, where we believe revenues could grow in the high teens annually. We believe the company should also be a beneficiary of the increase in semiconductor content per car, partly to do with electrification.

Sanrio is a company we have extensively engaged with, which owns the intellectual property for the Hello Kitty franchise. Over the past three years, the company's share price has gone up significantly, which in our opinion demonstrates the power of self-help in a company that has been undervalued for a long time. We continue to engage with the management, with the aim of adding value.

Shares in logistics company Kintetsu rallied sharply following news of a proposed takeover by its largest shareholder.

Conversely, holdings in Ree Automotive, machinery company Minebea Mitsumi and financial services conglomerate Orix detracted.

We believe Ree sold off alongside other growth names. We remain holders and believe Ree has been the victim of indiscriminate selling of early-stage companies that have not yet reached profitability. Minebea offers some of the strongest growth in the sector and trades at a very attractive valuation, in our view.

Investment activity

We aim to identify significant dislocations between the price and what we consider to be the value of a stock that we can exploit and where we believe we have better insight than our peers. Our edge does not come from better forecasting, but rather from what we consider to be higher-quality pricing of risk. In addition, we actively engage with companies we invest in to add value in a range of areas. We believe this differentiates us as investment professionals and can lead us to unique investment opportunities.

Early in the review period, we closed a position in Fast Retailing and began a holding in Yamaha Motor. We believe Yamaha's strength lies in it motorcycle division and this business is likely to benefit from the switch to electric motorcycles.

We also exited positions in construction group Haseko and Isuzu Motors, using the profits to add Fuji Film, semiconductor specialist Tokyo Electron and advertising agency Dentsu, all of which we feel look globally relevant and attractively priced.

We also began positions in Ushio and Socionext. Mid-cap Ushio manufactures specialised lighting equipment used in three areas: industrial processes, visual imaging and life sciences. Ushio is an operationally well-run company that needs help to optimise its heavily over-capitalised balance sheet. We are actively engaging with the company.

In the latter stages of the review period, we established new positions in Oriental Land (owner of Tokyo Disneyland), newly-listed local airline Skymark and Mitsubishi Estate.

We believe the re-opening of the economy post-COVID-19 provides a strong tailwind for Oriental Land's profits and feel the market has missed a meaningful increase in gate-entry prices.

Skymark is a good business, in our view, and has a niche franchise, but it suffered because management lost discipline in the past. We believe the management

Investment review

have learnt from their mistake. The company's shares were very attractively priced at the time of its listing, in our view, given the demand for travel in Japan is back.

With a strong balance sheet, we believe Mitsubishi Estate is in a good position in the longer term to increase dividends to shareholders and continue to reinvest in its business. Domestic hotel and retail operations are also likely to benefit from an inflationary environment in Japan.

Outlook

Earnings in 2022 were favourable in Japan, albeit with much of the growth having been fuelled by a weak yen. However, the big picture is clear – in our view, Japan has ended its affair with structural deflation. This will likely provide a supportive environment to nominal GDP and equities going forward. We believe policy normalisation (the Bank of Japan finally announced a change in its Yield Curve Control policy in December 2022) reflects healthier economic fundamentals and should be celebrated.

We expect more evidence of self-help in 2023 and another year of solid underlying profit growth. The corporate change agenda bodes well for stockpickers like ourselves, while the more constructive outlook for prices and wages adds to our long-term optimism.

Carl Vine
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

Until 9 November 2022, the sub-fund was categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities. From 10 November 2022, the sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class as at 31 March 2023

	One year 31.03.22 %	Three years 31.03.20 % pa	Five years 31.03.18 % pa	Since launch[a] % pa	Launch date of the OEIC merged share class	Launch date of the sub-fund share class

[a] Sub-fund performance before the launch of the sub-fund on 26 October 2018 is that of the relevant Merged Share Class of the M&G Japan Fund, which includes UK taxes but excludes entry and exit charges. The M&G Japan Fund is a UK authorised sub-fund which launched on 6 April 1971 and its non-Sterling share classes merged into M&G (Lux) Japan Fund on 26 October 2018.

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Investment review

For the year ended 31 March 2023

Performance review

The period under review was a volatile one for financial markets, as economies grappled with high inflation (exacerbated by the war in Ukraine), rising interest rates (although rates remained very low in Japan) and recession fears. Despite the weak growth seen in most developed economies, including Japan, Japanese companies have been able to deliver solid earnings growth over the past year, partly due to the weakness of the yen.

Against this background the sub-fund recorded a positive return. Outperformance was driven mainly by stock selection, with key contributors including stockmarket newcomer Socionext, Sanrio and Namura Shipbuilding.

Socionext is a 'system-on-a-chip' design company. Its growth pathway plays to Japan's strength in the auto sector, where we believe revenues could grow in the high teens annually. We believe the company should also be a beneficiary of the increase in semiconductor content per car, partly to do with electrification.

Sanrio is a company we have extensively engaged with and owns the intellectual property for the Hello Kitty franchise. Over the past three years, the company's share price has gone up significantly, which in our opinion demonstrates the power of self-help in a company that has been undervalued for a long time. We continue to engage with the management, with the aim of adding value.

We expected Namura, a little-known ship builder, would benefit from rising orders and this has indeed turned out to be the case, with the company having a very strong order book.

Conversely, Ree Automotive, Minebea Mitsumi and Earth, a company with a dominant position in the insecticide market in Japan, held back relative returns.

We believe Ree sold off alongside other growth names. We remain holders and believe Ree has been the victim of indiscriminate selling of early-stage companies that have not yet reached profitability. Minebea offers some of the strongest growth in the sector and trades at a very attractive valuation in our view.

Investment activity

We aim to identify significant dislocations between the price and value of a stock that we can exploit and where we believe we have better insight than our peers. Our edge does not come from better forecasting, but rather from what we consider to be higher-quality pricing of risk. In addition, we actively engage with companies we invest in to add value in a range of areas. We believe this differentiates us as investment professionals and can lead us to unique investment opportunities.

Early in the review period we exited a position in Kintetsu World Express and closed positions in Perseus Proteomics, Nomura Real Estate and Tokyo Steel. The proceeds were recycled into opportunities where we see better risk/reward characteristics, including Ushio, Yamaha Motor and Rohm.

We also began a position in NTT Data and closed a position in housebuilder Haseko. Based on our assessment, there is considerable upside for NTT Data's shares as a result of recent M&A activity. We have engaged with Haseko over several years, encouraging management to improve shareholder returns and this has been achieved.

Advertising agency Dentsu and newly listed-airline Skymark also joined the portfolio. Having watched the transformation that has happened to Dentsu over the past two years, we have been forced to reconsider the risk-reward characteristics of the company, in view of significant improvements in both governance and corporate strategy.

Skymark is a good business, in our view, and has a niche franchise, but the business suffered because management lost discipline in the past, which we believe it has learned from. Its shares were very attractively priced at the time of its listing, in our view, given the demand for travel in Japan is back.

Investment review

We added globally relevant businesses Toray (a leading materials company set to benefit from Chinese reopening), Toyo Suisan (a global food business whose growth and profitability look underestimated), and under-priced, in our opinion, bicycle parts manufacturer Shimano.

We also added Megachips, a 'fabless' semiconductor manufacturer. This is an area of the sector that is often overlooked, in our view, and one where we believe we have a deep understanding. We think the market is underestimating Megachips' growth potential.

Outlook

Earnings in 2022 were favourable in Japan, albeit with much of the growth having been fuelled by a weak yen. However, the big picture is clear – in our view, Japan has exited its affair with structural deflation. This will likely provide a supportive environment to nominal GDP and equities going forward. We believe policy normalisation (the Bank of Japan finally announced a change in its Yield Curve Control policy in December 2022) reflects healthier economic fundamentals and should be celebrated.

We expect more evidence of self-help in 2023 and another year of solid underlying profit growth. The corporate change agenda bodes well for stockpickers like ourselves, while the more constructive outlook for prices and wages adds to our long-term optimism.

Carl Vine
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

Until 9 November 2022, the sub-fund was categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities. From 10 November 2022, the sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class as at 31 March 2023

Investment review

For the year ended 31 March 2023

Performance review

The period under review saw both bonds (fixed income securities) and equities (company shares) deliver negative returns. It was a challenging period for most asset classes, as surging inflation and higher interest rates dampened investor sentiment.

Although there was a continued recovery in the global economy following the COVID-19 pandemic, recession fears emerged as China's zero COVID-19 policy and Russia's war on Ukraine weighed on economic activity. Towards the end of the period, stresses in the banking industry also rattled financial markets.

Against this challenging background, the sub-fund delivered a negative total return across all of its share classes.

Within fixed income, long positions in government bonds and corporate bonds delivered a negative return. The large increase in interest rates resulted in prices of bonds declining sharply, particularly in longer-dated bonds. However, long positions in local currency emerging market bonds were more resilient.

Losses in equities were led by our North American portfolio, in particular the sub-fund's long exposure to US financial companies. The US banking crisis in March had resulted in heightened volatility in banking and finance stocks. Nevertheless, the sub-fund's holdings in European equities were more resilient.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

Early in the review period, following falls in stockmarkets, we increased the sub-fund's equity exposure, by reducing the size of its short position in the S&P 500 index, as well as adding some exposure to UK and German equities. (A short position is designed to benefit when the price of an underlying asset falls.) The short position in the US stockmarket was then increased in August, following a strong rally.

In the autumn, we made several portfolio changes in response to significant market price movements. These included increasing cash levels, to provide scope to respond to future market volatility. We also capitalised on volatility in UK government bond markets (caused by the UK mini-budget) by adding exposure and, in some cases, subsequently selling these positions within the space of a few days, after their prices initially dropped and then recovered at an almost unheard-of pace.

Later in the autumn, after a major sell-off of longer-dated US Treasury bonds, which steepened the yield curve (the yield curve is a graph which shows the yield on bonds plotted against the length of time until they mature), we reduced exposure to medium-term government bonds (bonds which mature in five to 10 years) and switched into 30-year bonds, as it was felt the latter had become more attractive and could potentially offer diversification. We then took advantage of the subsequent rally in long-dated US Treasuries to scale back exposure.

Early in 2023, we reduced the sub-fund's position in European, US and UK banks following strong performance (a move which proved timely) and we increased the sub-fund's exposure to European government bonds, as we believed their value was becoming more attractive. Elsewhere, we sold some of the sub-fund's long-dated US government bonds and reinvested in intermediate-term (between five and 10 years) US Treasuries.

We also introduced a foreign currency carry trade, increasing exposure to higher-yielding emerging market bonds, while trimming exposure to developed market bonds. We also reduced the sub-fund's equity exposure. Finally, following the steep fall in banking stocks in March we increased the sub-fund's exposure to what we consider to be quality banks modestly.

Outlook

Overall, the strategy remains cautiously positioned so as to respond to further elevated volatility, should it emerge. Changing perceptions of whether or not economies can navigate the current conditions will continue to drive markets, in our view.

Investment review

We continue to favour a balance of equities, with fixed income for diversification. The sub-fund remains liquid, ready to take advantage of opportunities where we see behavioural inconsistencies between asset prices and fundamentals.

Craig Moran
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Investment review

For the year ended 31 March 2023

Performance review

The sub-fund underperformed the S&P 500 Net Return Index, with the shortfall influenced by market timing differences. The sub-fund, which is priced at 1pm in Luxembourg, did not include the gains in North America on the last trading day in March when the S&P 500 Index rose 1.4%.

Stock selection added value, with the strongest contribution from technology. Broadcom led the gains in semiconductor stocks.

Mastercard outperformed in digital payments. Fidelity National Information Services (FIS), by contrast, underperformed.

Merck delivered strong gains in a resilient healthcare sector, while Air Products and Chemicals rose in materials.

VF Corp declined in consumer discretionary against a backdrop of tough trading conditions, while First Republic Bank fell in financials. First Republic was rescued by an injection of capital from larger banks after the regional bank became the focus of speculation about the risk of potential failure. The sub-fund remains underweight relative to the benchmark in banks.

Investment activities

We made 11 new purchases and 12 complete sales – a level of turnover consistent with our typical investment timeframe of three to five years. The number of holdings declined to 42.

The quality component of the sub-fund increased with the new purchases of Costco Wholesale (consumer staples), Motorola Solutions (technology), Zoetis (healthcare), Arthur J Gallagher (financials), Rexford Industrial Realty (real estate) and Accenture (technology).

WW Grainger (industrials) and Vulcan Materials (materials) were bought and sold during the review period after a strong run.

First Republic Bank (financials), Schlumberger (energy) and Pool Corp (consumer discretionary) were the other new holdings established during the review period.

We divested Broadridge, ADP and FIS in technology, while Caterpillar and Carrier Global provided a source of cash in industrials. The holding in TransUnion was consolidated into its peer Equifax. We exited Agilent Technologies and Abbott Labs in healthcare, while Crown Castle and Charles Schwab provided a source of cash in real estate and financials, respectively.

Outlook

The threat of a recession is real and requires careful consideration, but we are encouraged by the investment opportunities available to us in the current climate. We have been increasing exposure to the 'quality' segment of the portfolio without having to overpay for the privilege. We remain resolute in our belief that company fundamentals drive share prices over the long run, and remain focused in our application of a valuation discipline.

The savage fall in prices of growth stocks in 2022 underscores the importance of valuation. Speculative areas of the market have seen their unrealistic expectations reined back, but we believe the indiscriminate nature of the sell-off is creating attractive entry points for long-term winners with exciting growth prospects. Being selective will be paramount. Balance sheet strength is a key consideration in an environment of rising interest rates, and we continue to scrutinise cashflow generation in our fundamental analysis to ensure that dividends can be sustained in the years ahead.

We continue to believe that the majority of our holdings can sustain dividend growth in the 5-15% range over the long term, while offering an attractive yield. We are undeterred in our pursuit of dividend growth and remain committed to its viability not only as a source of rising income, but also as a total return strategy in the US market over the long term.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class as at 31 March 2023

Investment review

For the year ended 31 March 2023

Performance review

US equity markets fell in the 12 months under review, as investors grappled with concerns about rising inflation, tightening monetary conditions, and a short-lived banking crisis which began in the US and spread to Europe.

From a style perspective, lowly valued stocks outperformed growth stocks as expectations of higher interest rates saw investors become more cautious about the elevated valuations of many high-flying, growth orientated mega-cap stocks, particularly in the technology sector.

Relative performance benefited from stock selection in financials, consumer discretionary and utilities. Our below-benchmark position in consumer discretionary also contributed positively, as did the above-benchmark allocation to energy. In contrast, our below-benchmark position in the technology sector, as well as stock selection within it, was the main drag on relative returns.

Looking at individual companies, the sub-fund benefited from avoiding Amazon and Tesla during a period when higher interest rates resulted in investors re-evaluating the valuations of highly rated technology stocks. Higher energy prices helped oil firm ConocoPhillips deliver better-than-expected quarterly earnings and boost its planned 2022 capital return to shareholders. Drugmaker Merck was also a positive contributor as investors placed a premium on its defensive qualities.

Notable detractors included Devon Energy and real estate investment trust Highwoods Properties; the latter had a challenging time as the wider commercial real estate sector came under pressure in a higher interest rate environment. Relative performance was also hampered by not holding oil major ExxonMobil, which enjoyed a strong period due to higher energy prices.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

During the period under review, we acquired a new holding in GE Healthcare Technologies when the medical diagnostics business was spun off by General Electric. We started two new positions on attractive valuations: Lundin Mining – as we felt investors were overly pessimistic about the copper producer's operations – and Medtronic, a medical devices manufacturer, which has made a slower-than-expected recovery after the cancellation of elective procedures during the pandemic. Other new names included oil & gas explorer Devon Energy, biscuit and chocolate firm Mondelez International, data storage company Seagate Technology, semiconductor equipment firm KLA and media firm Warner Bros Discovery, which operates a range of television channels and streaming services.

Turning to sales, we exited Cognizant Technology Solutions, following a recovery in the share price and over longer-term concerns around the outsourcing IT services business' ability to manage inflationary pressure. We exited a position in Columbia Sportswear after the outdoor apparel manufacturer had outperformed a weak consumer discretionary sector last year. We sold our shares in AT&T as it had become a pure telecoms play after spinning off HBO. We exited our position in technology firm Hewlett Packard, which has been a laggard, taking advantage of a short-term run up in the share price. Finally, the positions in tobacco company Altria and oil firm ConocoPhillips were sold.

Outlook

Looking ahead, US stockmarkets are likely to remain volatile in the near term, as there is still much uncertainty over the trajectory of inflation and interest rates. The threat of further earnings downgrades could send company shares valuations in certain sectors even lower in 2023.

That being said, companies in general are in better shape than they were going into the great financial

Investment review

crisis (GFC), in our view, and the indiscriminate market sell-off is providing what we consider to be attractive opportunities on a selective basis.

As dedicated value investors, we remain optimistic about the prospects of the value investment style and the sub-fund's holdings. The rotation towards cheaper value companies that occurred during the period under review provided a stark reminder of how quickly investor sentiment can shift. We are hopeful that investors will continue to look more positively on out-of-favour value stocks, and think the sub-fund is well-placed to benefit from any further rotation away from growth.

Daniel White
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

Until 9 November 2022, the sub-fund was categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities. From 10 November 2022, the sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class as at 31 March 2023

Investment review

For the year ended 31 March 2023

Performance review

Bonds sold off around the world in the 12 months under review against a backdrop of surging interest rates, high inflation and economic concerns.

The period started with heightened volatility and risk-off sentiment amid the war in Ukraine. Commodity and energy prices skyrocketed in the aftermath of the Russian invasion because of sanctions and supply disruptions. The lingering impact of COVID-19 upheavals on global supply chains also contributed to inflation reaching multi-decade highs.

Central banks, led by the Federal Reserve (Fed), responded to the surging prices by kickstarting a round of rate increases that ended years of easy money. Higher rates weigh on bonds by driving up the yields sought by investors bond prices and yields move in opposite directions).

Global bond markets began to pick up in the second half of the period because easing inflation spurred optimism that interest rates were nearing a peak. The collapse of Silicon Valley Bank in the US in March further eased rate pressure because lenders tightened credit criteria. Government debt rallied due to a flight to safety amid wider banking upheavals, including the forced sale of Credit Suisse. Bank bonds slumped.

Across the whole year, core government bonds and investment-grade corporate debt posted losses because of the interest-rate increases. High-yield bonds dropped somewhat less, reflecting the sector's lower sensitivity to interest rates. Emerging-market bonds suffered because of the higher Fed rates and a stronger dollar.

The sub-fund outperformed its benchmark in the period with all share classes posting smaller losses than the benchmark. The benchmark is a composite index equally weighted across the Bloomberg Global Agg Corporate Index EUR Hedged, the Bloomberg Global High Yield Index EUR Hedged and the Bloomberg Global Treasury Index EUR Hedged, representing the global corporate bond market, the global high yield bond market and the global government bond market.

The outperformance was driven by returns in the second half of the period, when the sub-fund benefited from an overweight position in high-yield euro corporate bonds. By contrast, asset selection in high-yield US dollar financial bonds was a drag.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

We increased exposure to government bonds over the 12 months and used derivatives to pare exposure to investment-grade corporate debt. At the end of period, the sub-fund's debt exposure was roughly equally divided between government bonds, investment-grade debt and high-yield.

Within investment grade, we add fixed-rate bonds and reduced holdings of debt with floating coupons. This helped to increase the portfolio's exposure to interest rates, pushing duration to 5.8 years from 3.8 years. The sub-fund added duration in euros and sterling, while reducing it in dollars. This reflects our view that inflation will fall more quickly in the eurozone than in the US.

The portfolio's overall average credit rating rose a notch during the year to BBB+.

Outlook

Inflation and interest rates remain the main concerns for the global economy and the bond market. Price increases have started to cool, but it's too early to say that inflation has been defeated. Indeed, policymakers are likely to raise rates further to help cool prices. Borrowing costs will probably be elevated for some time to come, and recession remains a risk.

Within the bond market, we are generally neutral on high-yield valuations. Supply-demand imbalances and attractive all-in yields remain supportive, along with fundamentals. We also expect a shallower default cycle than the market. In the investment grade sector, investors can benefit from diversification amid market uncertainties and historically high yields.

M&G (Lux) Optimal Income Fund

Investment review

Richard Woolnough
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

[a] Fair valued.

All securities are on an official stock exchange listing except where referenced.
Interest rates represent either the stated coupon rate or, for floating rate securities, the current reset rate which is based upon interest rates indices.
Maturity dates represent either the stated date on the security, or the next interest reset date for floating rate securities or the prerefunded date for those types of securities.
Variable and floating coupon rates are those quoted as of 31 March 2023.

The accompanying notes to the financial statements are an integral part of these financial statements.

Exposure represents the sub-fund's exposure to that counterparty.

The accompanying notes to the financial statements are an integral part of these financial statements.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class as at 31 March 2023

[a] Sub-fund performance before the launch of the sub-fund on 5 September 2018 is that of the relevant Merged Share Class of the M&G Optimal Income Fund, which includes UK taxes but excludes entry and exit charges. The M&G Optimal Income Fund is a UK authorised sub-fund which launched on 8 December 2006 and its non-Sterling share classes merged into M&G (Lux) Optimal Income Fund on 8 March 2019.

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Investment review

For the year ended 31 March 2023

Performance review

European equity markets rose in the 12 months under review, despite concerns about inflation, tightening monetary conditions, and a short-lived banking crisis which began in the US and spread to Europe. The sub-fund itself delivered positive returns during the period.

The sub-fund's security selection within the financials and industrials sectors was the biggest driver of relative outperformance. In contrast, unfavourable stockpicking within the consumer discretionary sector was the main drag on returns versus the benchmark.

Looking at individual companies, the biggest individual contributor in financials was Irish lender AIB. Like many banks, it benefited from higher interest rates, which boosted profitability. Novo Nordisk was a top performer, as the Danish pharmaceuticals company continued its upward trajectory after raising its full-year earnings expectations in November. The sub-fund's lack of exposure to Swiss biotech group Roche also supported relative performance.

By contrast, the biggest detractor was Danish allergy immunotherapy specialist Alk-Abello. The firm lagged a generally weak healthcare sector, despite reporting strong revenue and profit growth. In a similar manner, international dialysis group Fresenius Medical Care was an underperformer.

Engagement activity

We engaged with Georgian financial institution Bank of Georgia to provide increased disclosure on the nature and number of underserved or unbanked people that it is currently reaching, to improve our ability to measure its impact. Management agreed that the company needed to improve visibility, and while it is still in the early days of developing KPIs on underserved people, it was fully willing to do this and to communicate those KPIs more meaningfully.

We also engaged with consumer health company Haleon after it spun out from GSK earlier in the period. Our aim was to ensure that the company would produce effective disclosures (as GSK does), and to encourage a number of activities, from awareness raising to data provision. Haleon agreed to publish a sustainability report and we will follow up with the company after the publication of the first version of this report to explore areas for potential improvement.

We engaged with Dutch paint and coatings company Akzo Nobel, after reports it had released anti-fouling chemical TBT (tributyltin, which had been banned in the early 2000s) into a Devon estuary in 2016. We wanted to ensure that this was a one-off accident, that effective remediation had been undertaken, and that policies and procedures were in place to keep it from happening again.

The site had been a testing facility for TBT, among others, and the spill was an accidental release of contaminated sediment from one of two tanks located on the site into the foreshore adjacent to the quay. The contaminated sediment was not expected to be in the tank and was a legacy remnant from before TBT was banned.

The company said that TBT contamination remained isolated to the direct foreshore of its former site, and an independent study commissioned by the Environment Agency found no evidence of an ecological impact of the residual contamination in the area. Akzo is currently developing a remediation plan, and a formal remediation permit will be applied for with the Marine Management Organisation. The company hasn't experienced such issues at any of its other sites and believes it to be an isolated incident. It will take on board all the learnings to ensure an incident of this nature does not occur again.

Following our previous engagement with German ticketing and live entertainment business CTS Eventim, we again met with the company to check that it was on track for its emissions data gathering exercise, as well as target-setting commitments.

A new, more progressive, CFO joined the company in January 2023, who understood the company is currently lacking in its disclosures, and is working to improve this. The company is also still trying to

Investment review

determine if it is actually carbon-intensive, from a Scope 3 perspective – ie is it responsible for the emissions of people traveling to a concert that it sold the tickets to. M&G's climate team is considering the question for CTS and similar companies, and we will make the findings known to CTS.

Investment activities

In October 2022, we closed the sub-fund's position in Bank of Georgia, whose shares had rallied significantly. In the same month, we also opened a holding in Universal Music Group (UMG). One of UMG's main strengths is the breadth of its music catalogue. This is particularly important in the streaming world, where content owners such as UMG are rewarded based on their share of listening.

In December 2022, we took advantage of strong share price performance to trim our holding in Novo Nordisk. We also added to our holding in German online property platform Scout24.

Outlook

While there are signs of weakening inflation, particularly in the US, tight job markets suggest inflationary pressures remain. At the same time, slowing global growth is leading to expectations of recession and uncertainty around what central bank rate decisions might be. It looks likely to be a case of not 'if' there will be a recession, but how deep and long the global slowdown is likely to last.

These conditions may make equities look risky, but our sub-fund remains balanced and diversified, in our view, with a focus on being prepared for volatility ahead. Strong stock selection underpins our sub-fund, giving us confidence it can weather a downturn. We continue to invest in what we see as quality European companies that we think are well-positioned to surviveand thrive in the long term. We continue to hunt for unknown companies where we can find value.

Looking at the current portfolio, we remain confident in the quality of the companies we invest in, and we continue to be optimistic about their ability to generate long-term value, while also contributing towards the goals of the Paris Agreement on climate change.

One high spot is that we believe that the long-awaited re-opening of China positions it well for growth based on low valuations and a recovering economy. This could increase global demand for commodities and feed into other markets and geographies.

John William Olsen
Sub-fund manager

Investment review information as at 31 March 2023.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class as at 31 March 2023

Investment review

For the year ended 31 March 2023

Performance review

Global stockmarkets fell over the review period as central banks raised interest rates in a bid to cool rampant inflation. The price rises stemmed from the war in Ukraine, rebounding demand as COVID-19 restrictions eased and supply-chain disruptions caused by the pandemic.

Sub-fund performance over the reporting period was negative. Stockpicking in the financials and information technology sectors drove the outperformance. An overweight position in the healthcare sector was also beneficial.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

On a company level, Novo Nordisk and onsemi (previously ON Semiconductor) were among the biggest contributors to performance. Drugmaker Novo rose throughout the 12 months and raised its earnings forecast in November. Onsemi surpassed earnings expectations and announced a share buyback, while benefiting from the US government's huge push to boost domestic production of semiconductors. Investments in emerging-market lenders Bank of Georgia and HDFC Bank also boosted the sub-fund's performance.

On the downside, stockpicking in utilities was the main drag on performance over the period. The lack of exposure to the energy and consumer staples sectors also weighed on performance, along with stockpicking in the communication services sector.

Safaricom was one of the biggest detractors among individual companies. The Kenyan mobile network operator's profits dropped due to higher tax payments and the cost of entering the Ethiopian market, while continued Kenyan shilling weakness also weighed on the share price. Orsted was also a drag on performance, as the wind-power sector contends with rising costs and higher interest rates. ALK-Abelló was another detractor. The Danish pharmaceuticals company lowered the full-year sales growth forecast for its tablets business after a disappointing performance in Europe.

Investment activities

The sub-fund only added one new position during the reporting period, reflecting a focus on long-term investments.

This was eBay, which was purchased in December. The online marketplace plays a role in the circular economy as it facilitates the sale of used and refurbished goods.

The sub-fund also received a small amount of stock in Embecta in April following the insulin syringe maker's spin-off from another holding, Becton Dickinson. These shares were sold in July.

No other positions were exited during the year.

ESG engagements

The sub-fund managers engaged with a number of investment companies over the 12 months in order to pursue environmental, societal and governance (ESG) goals.

Some of our environmental advocacy included supporting decarbonisation efforts at both onsemi and healthcare company UnitedHealth. We also held meetings with US waste specialist Republic Services to encourage the company's recycling efforts, including a request for more granular recycling data. We also asked the company to engage with ESG data providers, particularly in light of its acquisition of hazardous waste company US Ecology.

As part of our governance efforts, we encouraged greater gender diversity on the boards of two of our investments – biotech firm Oxford Nanopore Technologies and renewable energy company SolarEdge. We also met with communications-tower operator Helios Towers to give our opinion on its sustainability materiality matrix before this was delivered to a wider audience. At Bank of Georgia, we discussed the lender's disclosure of data around the number of underserved/unbanked people it has served, to help us measure its positive impact.

Investment review

Outlook

The sub-fund seeks to invest in quality companies with a competitive advantage, and which offer long-term upside potential. We believe such businesses are likely to weather a world of higher borrowing costs and slower growth because their inherent strengths let them create value well in excess of their cost of capital. Higher interest rates and other long-term global challenges are also bolstering demand for companies that provide real-world sustainable outcomes.

Less generous access to capital will likely persist in 2023. This will weigh on the performance of capital-hungry growth companies that are valued based on cashflows in the distant future. By contrast, established companies with good cashflow yields, decent growth opportunities and a healthy return on invested capital will be less affected by the current economic challenges.

The 2022 market sell-off has also bolstered the possibility of making long-term gains because it reduced valuations. Similarly, recent volatility has opened opportunities in impactful companies, even with the sub-fund's limited turnover. More broadly, last year's upheavals have rebalanced the market, helping to remove an 'ESG premium' from some sustainable stocks.

John William Olsen
Sub-fund manager

Investment review information as at 31 March 2023.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

Long-term performance by share class as at 31 March 2023

Investment review

For the year ended 31 March 2023

Performance review

The period under review proved volatile for global fixed income markets, with the majority posting negative returns. The ongoing war in Ukraine exacerbated high food and energy prices, and central banks repeatedly hiked interest rates in efforts to curb inflation.

High interest rates make the fixed payments offered by government and investment grade corporate bonds less competitive. This causes bond yields to rise and their prices to fall. The impact is greater for long-dated bonds, and UK and US government bonds with maturity dates of 15 years or more were particularly weak. Investment grade corporate bonds performed better, but the best returns came from lower-quality, high yield bonds, which offer higher income potential to compensate for greater default risks.

Over the review period, the sub-fund primarily held investment grade corporate bonds (77% of the sub-fund's net exposure at the end of the period). While most paid fixed rates, the sub-fund had exposure to floating rate corporate bonds, which performed better as their interest rates can fluctuate depending on market conditions, shielding investors from the effects of inflation. At period end, 4.2% of the sub-fund's net exposure was in high yield corporate bonds.

The sub-fund is diversified across sectors and geographies, favouring quality banking and mortgage-backed bonds based in the US, eurozone and UK, while the sub-fund's average credit rating was A-. The largest individual issuers included Royal Bank of Canada, Nationwide Building Society, and Lloyds Banking Group. At the end of the period, the sub-fund's average maturity was 3.9 years.

The sub-fund's US dollar share classes delivered a positive total return for the year, while the euro share classes were in negative territory. However, in both euro and US dollar terms, the sub-fund successfully outperformed the benchmark (the Markit iBoxx EUR Corporates 1-3 year Index) over the 12 months under review.

The sub-fund's duration positioning (lower duration than the benchmark), and more defensive bias, contributed positively to relative performance. Duration is a measure of the sensitivity of a bond sub-fund to changes in interest rates, and our short duration positioning provided some protection against interest rate volatility. Conversely our foreign currency exposure, which is hedged back to euros, hampered performance.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

From 15 February 2023, the sub-fund's objective, investment policy and its strategy were updated to introduce a set of environmental, social and governance (ESG) exclusions. The new strategy was updated to reflect the role of ESG considerations in the sub-fund's investment process.

We remained cautiously positioned from a duration perspective throughout the period as we felt rising inflation rates would force central banks to keep hiking interest rates. Therefore, we maintained a low duration position of around 1.6 years.

Within credit, we began with an overweight spread duration but gradually reduced our credit exposure as spreads narrowed sharply. (Spread duration is a measure of the sensitivity of a bond sub-fund to changes in its credit spread.)

Outlook

We continue to believe investment grade corporate bonds should be able to withstand different market conditions, from a prolonged economic slowdown to a faster-than-expected return to growth. Furthermore, we believe this asset class is also well placed to withstand a recessionary environment – despite the uncertain economic outlook – as corporate fundamentals remain strong and we expect default rates to remain low.

Looking ahead, we believe expectations around inflation and recession risk will drive market performance. March's banking sector worries seem to be easing and inflation is currently heading in the right

Investment review

direction, which is positive for bonds. However, recession is still possible given that core prices – and central bank rates – remain elevated. In this uncertain environment, we will maintain a balanced and diversified approach, continuing to focus on investment grade bonds where we see good value and solid yields.

Matthew Russell
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

Until 15 February 2023, the sub-fund was categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities. From 16 February 2023, the sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

All securities are on an official stock exchange listing except where referenced.
Interest rates represent either the stated coupon rate or, for floating rate securities, the current reset rate which is based upon interest rates indices.
Maturity dates represent either the stated date on the security, or the next interest reset date for floating rate securities or the prerefunded date for those types of securities.
Variable and floating coupon rates are those quoted as of 31 March 2023.

Counterparty exposure

Counterparty exposure

Counterparty	Derivative exposures		
	Swaps €'000	Forward currency contracts €'000	Collateral held as cash €'000
Barclays Bank London	72,800	0	2,883
BNP Paribas	0	14,064	0
Deutsche Bank AG	0	5,590	0
HSBC Bank Plc	0	159,752	0
JP Morgan London	489,931	1,777	0
State Street Bank and Trust Company	0	89,641	0
State Street Bank and Trust Company, London Branch	0	350,646	0

Exposure represents the sub-fund's exposure to that counterparty.

The accompanying notes to the financial statements are an integral part of these financial statements.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

Long-term performance by share class as at 31 March 2023

	One year 31.03.22 %	Three years 31.03.20 % pa	Five years 31.03.18 % pa	Since launch[a] % pa	Launch date of the OEIC merged share class	Launch date of the sub-fund share class

[a] Sub-fund performance before the launch of the sub-fund on 26 October 2018 is that of the relevant Merged Share Class of the M&G Short Dated Corporate Bond Fund, which includes UK taxes but excludes entry and exit charges. The M&G Short Dated Corporate Bond Fund is a UK authorised sub-fund which launched on 29 January 1993 and its non-Sterling share classes merged into M&G (Lux) Short Dated Corporate Bond Fund on 26 October 2018.

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Shares in issue, Net Asset Values and Total Expense Ratios

Investment review

For the year ended 31 March 2023

Performance review

Equity markets and bonds both suffered losses in the year ended 31 March 2023, mainly because of declines in the first six months. Shares, in particular, bounced back in the second half without fully reversing the earlier losses.

The declines through September were fuelled by rising interest rates as central banks sought to cool inflation from multi-decade highs. Prices surged because of the war in Ukraine and European boycotts of Russian commodities. Continued COVID-19 disruptions also hampered global supply chains, while the wind-down of pandemic restrictions boosted demand.

Shares began to recover in late 2022 as easing inflation stoked optimism that interest rates were nearing a peak. Growing economic confidence also allowed stocks to weather the collapse of US lender Silicon Valley Bank and the forced sale of Credit Suisse to UBS in March 2023. Bond prices rose (yields fell) due to waning expectations for rate hikes.

The sub-fund posted negative returns over the review period, with losses across both equities and bonds. Over the 12 months, the sub-fund's volatility has tracked higher than expectations (12.15% for the EUR A Acc class shares vs 4-9% expected over five years, annualised) reflecting the volatility seen in the markets over the period. Over the past three years, annualised volatility was lower at 9.82%. As volatility increased both in equities and fixed income markets last year the sub-fund did not benefit from cross-asset diversification. However, we expect diversification to improve going forward given current yield levels in the fixed income space.

US shareholdings detracted from performance as increased interest rates weighed on growth-oriented technology stocks. Investment returns from other US stocks including financials were also negative. European stockholdings were profitable because higher interest rates boosted banks.

Among bond investments, the sub-fund made losses on US Treasuries as yields widened (prices fell) amid Federal Reserve rate increases. Corporate and emerging-market bond investments were also generally loss-making, with Chile being a notable exception. The sub-fund profited from buying UK gilts in a sell-off as the bonds quickly rallied following market intervention by the Bank of England.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

We took advantage of a market sell-off in April 2022 to purchase US technology stocks. The same month we added a seven-year European Investment Bank green bond to boost duration, while also selling South Africa and Chile bonds following steady performances in local-currency debt. In August, we sold US technology stocks after a market rally, along with US and European holdings exposed to housing and discretionary consumer spending.

In September, we made a tactical allocation to UK sovereign bonds after the government's spending plans sparked a gilt rout. The following month, we added a dollar-denominated Inter-American Development Bank bond because of rising US government yields. We sold two positions in short-dated US supranational bonds to increase sub-fund duration.

November moves included boosting exposure to large European banks via green bonds because of sound fundamentals at most bigger lenders and the market's overly pessimistic view on the sector. We trimmed equities following good performances and did some trades for SFDR Article 9 alignment purposes.

In January, we sold out of LG following an ESG downgrade by MSCI. We also exited Honda on sustainability concerns. Proceeds were invested in Takeda Pharmaceutical.

Outlook

Market volatility is likely to persist in the months ahead, partly because the effects of a year-long cycle of

Investment review

central bank rate increases are starting to emerge. Given this picture, we will seek to maintain high cash levels to take advantage of short-term opportunities.

Equity valuations appear to be based on an optimistic outlook for earnings and the economy, so we are relatively neutral on stocks. In terms of geographies, we prefer Europe, Japan and Asia because of lower valuations and/or earnings expectations. Our favoured sectors include technology and larger banks.

In fixed income, we continue to see opportunities across the sector for enhanced return and diversification opportunities.

Maria Municchi
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

Until 19 May 2022, the sub-fund was categorised as an Article 8 fund under SFDR. From 20 May 2022, the sub-fund is categorised as an Article 9 fund under SFDR. Information related to the sustainable investments of the sub-fund required to be disclosed under SFDR is available in Annex 1.

[a] Suspended.

[b] Fair valued.

[c] As part of the sub-fund merger between the M&G (Lux) Sustainable Allocation Fund and M&G (Lux) Conservative Allocation Fund on 21 October 2022, two sanctioned Russian-listed securities were transferred into the beneficial ownership of the M&G (Lux) Sustainable Allocation Fund. As both sub-funds have been prohibited from selling these assets, they have remained in a custody account of M&G (Lux) Conservative Allocation Fund.

All securities are on an official stock exchange listing except where referenced.

Interest rates represent either the stated coupon rate or, for floating rate securities, the current reset rate which is based upon interest rates indices.

Maturity dates represent either the stated date on the security, or the next interest reset date for floating rate securities or the prerefunded date for those types of securities.

Variable and floating coupon rates are those quoted as of 31 March 2023.

Investment review

For the year ended 31 March 2023

Performance review

In the first half of the review period, the outlook for emerging market debt continued to worsen due to sharp rises in interest rates. Furthermore, higher food and energy prices in developing countries pushed up inflation expectations, causing a spill-over into other goods and services. A strong US dollar exacerbated the situation, resulting in a flight of capital from emerging markets.

However, emerging market bonds rebounded strongly in the fourth quarter of 2022. This strong performance continued into the new year amid optimism about the reopening Chinese economy and expectations that major central banks would end their interest-rate hiking cycle in 2023. Moreover, major emerging market currencies such as the Mexican peso and Brazilian real rallied against the US dollar. Nonetheless, the US banking crisis in March created heightened volatility among lower-rated financial issuers.

All segments of the emerging market debt asset class registered negative returns over the review period, with local currency sovereign debt outperforming corporate bonds and hard currency sovereigns.

Early in the period, security selection weighed on relative performance, particularly our choices in Latin America. However, in the third and fourth quarters of 2022 security selection was favourable, with our holdings in Mexico and the Philippines among the positive contributors. Country allocation also added value in late 2022. Towards the end of the review period, both security selection and country allocation contributed negatively. Our overweight exposure to banking was unhelpful.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

There were changes to the sub-fund's positioning, with a sizeable shift from high yield to investment grade corporate bonds during the review period. We increased our exposure to the banking and financial services sector and trimmed our holdings in telecommunications and utilities. We maintained the sub-fund's duration positioning broadly in line with the benchmark throughout the review period.

Outlook

Overall, we believe the macroeconomic backdrop is favourable for emerging market bonds in 2023. An environment of modest economic growth and cooling inflation should be supportive. Inflation has started to moderate in many emerging economies due to the recent fall in food and energy prices. Food accounts for 30-45% of the consumer price index in poorer emerging markets. Meanwhile, we believe fundamentals remain generally robust at both a corporate and a sovereign level.

We also feel that emerging market bonds appear compelling from a valuation perspective, offering higher real yields when compared to developed market bonds. As inflation moderates and central banks slow the pace of interest rate hikes, current yields may look especially appealing, most notably within local currency bonds.

As for corporate bonds, we favour high yield over investment grade on valuation grounds, especially in Latin America and the Middle East. We continue to be selective and carry out detailed credit analysis to unearth interesting opportunities in the high yield segment.

Charles de Quinsonas
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Investment review

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

[a] Fair valued.

All securities are on an official stock exchange listing except where referenced.

Interest rates represent either the stated coupon rate or, for floating rate securities, the current reset rate which is based upon interest rates indices.

Maturity dates represent either the stated date on the security, or the next interest reset date for floating rate securities or the prerefunded date for those types of securities.

Variable and floating coupon rates are those quoted as of 31 March 2023.

The accompanying notes to the financial statements are an integral part of these financial statements.

Counterparty exposure

Counterparty exposure

Counterparty	Derivative exposures	
	Forward currency contracts US$'000	Futures US$'000
Bank of America Merrill Lynch	0	8
Citigroup Global Markets Limited	3,385	0
HSBC Bank Plc	44	0
JP Morgan London	880	0
Merrill Lynch Pierce Fenner + Smith Inc	153	0
State Street Bank and Trust Company	17,265	0

Exposure represents the sub-fund's exposure to that counterparty.

The accompanying notes to the financial statements are an integral part of these financial statements.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

Long-term performance by share class as at 31 March 2023

	One year 31.03.22 %	Three years 31.03.20 % pa	Five years 31.03.18 % pa	Since launch % pa	Launch date of the sub-fund share class

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Investment review

For the year ended 31 March 2023

Performance review

The review period was poor for bonds due to central banks pushing up interest rates in a bid to cool runaway inflation. Returns on fixed-income assets were generally negative as investors demanded higher yields to reflect the increasing interest rates. (Bond prices and yields move in opposite directions.) Economic concerns also weighed on markets.

Fixed income suffered throughout much of the period, as the Federal Reserve (Fed) raised its benchmark rates eight times to a range of 4.75-5%. Borrowing costs were close to zero just weeks before the period began. Other central banks, including the European Central Bank and Bank of England, also rapidly raised interest rates as the war in Ukraine drove up commodity prices and stoked inflation.

Pressure on bonds lessened toward the end of the period as signs that inflation was starting to cool spurred speculation that the Fed would slow or halt its rate increases. The March collapse of Silicon Valley Bank in the US also eased interest-rate pressure by spurring US banks to tighten lending criteria. Government bonds rallied amid the banking turmoil because of a flight to safety.

Still, the March spike only pared 12-month losses for core government bonds. Investment-grade corporate debt similarly fell over the year due to the government debt sell-off and wider investor caution. The US dollar strengthened on higher interest rates.

High yield bonds, issued by less creditworthy companies, declined less than investment-grade bonds, reflecting the sector's lower sensitivity to interest rates. Prices of high yield bonds are generally driven more by the economic outlook and default risks.

The sub-fund fell over the review period, trailing its benchmark, partly because of cautious positioning. Overweight positioning and security selection in healthcare (particularly Bausch Health and Community Health Systems) detracted from the sub-fund's performance, along with security selection in banking.

However, bond picks in telecommunications and media were positive contributors, particularly Virgin Media and Sprint. In terms of ratings, BB graded bonds weighed on returns, while security selection in B and CCC & below (the lowest-rated bonds) was beneficial. The sub-fund was slightly underweight in terms of duration.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

New-bond sales were muted throughout much of the period amid global economic uncertainties and rising interest rates. Secondary-market liquidity was often challenging, particularly in Europe.

We took part in primary market (new bond) issuance by security company Verisure, cargo carrier Atlas Air and environmental services provider Clean Harbors. We also bought into new deals from packaging makers Sealed Air and Mauser Packaging, as well as travel companies Spirit Airlines and Royal Caribbean.

Towards the end of the reporting period, we sold euro bonds after outperformance and rebalanced the sub-fund towards the US. We also focused on defensive trades, such as increasing quality or adding exposure in non-cyclical sectors, such as healthcare and technology, media and telecommunications.

ESG engagements

As investors who embed ESG considerations into our investment processes, it is important for us to understand the various unique risks involved across all of the different industries we invest in. As such, as part of our ongoing assessment of our holdings' ESG credentials, we engaged with several companies held to gain granular insight into how these firms are adapting to various ESG criteria. This exercise enables us to compare and contrast different approaches to ESG and sustainability, to better identify ESG leaders, and also to ultimately encourage best practice in the companies in which we invest.

Investment review

Outlook

Elevated inflation levels and uncertainty about how far interest rates will climb continue to hang over markets and the global economy. Recent banking turmoil in the US adds more complications, as it could lead to further credit tightening and potentially hasten a recession, even after regulators' speedy actions helped to contain the crisis.

Still, we believe that fundamentals are generally supportive, and that technical elements, such as supply/demand imbalances and an attractive all-in yield, will help to contain spreads. We also think that the default cycle will be shallower than market expectations.

James Tomlins and Stefan Isaacs
Co-sub-fund managers

Investment review information as at 31 March 2023.

Employees of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

Long-term performance by share class as at 31 March 2023

Investment review

For the year ended 31 March 2023

Performance review

The launch of the sub-fund was over-shadowed on 24th February by the Russian invasion of Ukraine. This caused the largest humanitarian crisis since the second world war, and the economic impact of the crisis is still profound. Markets had already been displaying signs of stress since the start of the year, with sharply higher inflation driven by pent up demand in the developed economies following the extended COVID-19 lockdowns. The invasion prompted significant commodity and energy price rises, as well as supply chain disruption due to sanctions, all of which fueled the existing supply side inflationary pressures during the first quarter of 2022.

Following the very weak Q1, risk assets suffered further significant losses during the second quarter as the market digested the spiraling levels of inflation in developed markets, and the tighter policy environment. As the quarter progressed concerns began to be focused on recession being the likely endgame, which proved a further drag on market performance. The first half of the year saw virtually all asset classes (credit, sovereign bonds, equities) suffer very significant negative returns, and the S&P 500 having its worst first half in over 60 years.

With CPI inflation at a 40 year high in the US, the Federal Reserve increased rates twice, reaching 1.75%, but this failed to rein in expectations of further increases to follow later in the year. In contrast, the ECB remained wholly reactive as the inflation crisis evolved. Sovereign spreads between the core and periphery widened sharply, and the risk of a Euro sovereign debt crisis caused by market 'fragmentation' caused further market weakness. Expectations of a difficult energy environment through the Winter for European economies overly dependent on Russian Gas caused credit market spreads to widen further, with Euro investment grade spreads above +200 basis points (2%) and Euro high yield spreads above +650 basis points.

The third quarter of 2022 saw further volatility, and substantial asset price falls across both government and credit markets. As the quarter progressed, rising inflation concerns saw central banks signal slowing growth would not deter them from raising interest rates. These heightened fears of muted growth and possible recession in 2023, and coupled with rising energy prices in Europe and UK saw significant market turmoil in late September, with government bond yields moving sharply higher. In the US and Germany, 10-year yields rose over 0.8% during the quarter, while UK yields rose 1.8%.

Notably, in the UK, problems were further compounded by the mini-budget in September that was badly received. Within 3 days gilt yields rose by more than 1%, and this rise was exacerbated by pension sub-funds' forced liquidations of gilts to meet collateral requirements for their derivative liability hedging strategies. The Bank of England was forced to intervene as a 'circuit breaker' – putting a floor under long dated gilts through targeted purchases, stabilizing the market, and buying time for affected parties to make proper assessments of financing needs.

In Europe, the ECB remained wholly reactive as the inflation has continued to accelerate above 10% in some EU countries. Gas prices rose over 30% in Q3, and fiscal measures such as Germany's €200bn package increased both deficits and borrowing by EU governments, which in turn set a conflict between tighter monetary policies and looser fiscal policies. Credit market spreads continued to widen, with investment grade spreads above +220 basis points and high yield spreads now above +600 basis points.

Despite tentative signs that inflation might be slowing during December, policymakers in the US stated that interest rates would continue to rise in 2023 as inflation remains well above the Fed's target. Investors continue to believe official rates will peak somewhere between 4.75% and 5%, based on their expectations of a shallow recession in the latter half of 2023, despite rising layoffs and falling house price data indicating the depth and timing of a slowdown remains very much in the balance. However, the belief that the interest rate and

Investment review

inflation peak was imminent bolstered risk assets for much of the quarter, but was less prevalent during December as a consequence of the increasingly weak economic data. Developed market Investment Grade Credit spreads were therefore broadly flat during December, but still 30 basis points tighter for the quarter as a whole, while US High Yield spreads weakened slightly during December.

2023 started strongly with gains across developed market government bonds in January, which offered some respite to credit markets following a volatile 2022. However, the rally was short lived as markets weakened in February in response to renewed inflation concerns. This was followed by significant volatility in March, driven by the collapse of Silicon Valley Bank in the US and the acquisition of Credit Suisse by UBS, which are possibly the first signs of central banks' aggressive monetary policy starting to pass through into the economy. During this period the MOVE index of Treasury volatility reached levels last seen at the height of the 2008 financial crisis. Government bonds rallied strongly as the market priced in recession fears. By the end of the March, the immediate volatility had subsided, but developed market government yields remain below the highs touched at the start of the month.

By the end of the period, government bond yields were significantly higher than the start of the sub-fund reporting period, in response to both higher inflation and the aggressive tightening cycles of the major central banks. US 10 year Treasuries ended the period 1.5% higher at 3.5%, 10 year German Bunds were 2.1% higher at 2.3% and UK Gilts 2.1% higher at 3.5%. Corporate bond spreads remained elevated relative to their starting points in all developed markets.

Portfolio activity during the review period

During the first 3 months from the sub-fund launch and against the background of sharply rising energy prices, inflation, and the tighter interest rate environment, the manager built risk slowly, taking advantage of the weaker market environment. The sub-fund was able to build positions at attractive entry levels, initially through Index CDS contracts, but as the size of the sub-fund grew, was able to diversify during the third quarter of 2023 through adding stock specific opportunities where we believed the credits to be cheap. Against this we were reducing the derivative exposure on a like for like basis, and all credit positions were in physical securities by end September. Credit spread duration has been close to 4 years during the second half of the period, with the manager reducing credit risk early in the first quarter of 2023 as a number of securities rallied to fair value levels. The sub-fund has held a low level of exposure to interest rate risk through much of the reporting period, but as we have approached the anticipated peak of the Central Bank's official rate rises, we have built overweight interest rate risk positions in short and intermediate bonds and futures in principally the US and Europe.

The additional turmoil caused by the demise of Credit Suisse during March 2023 provided a number of further opportunities to add names into the sub-fund. Overall, at the end of the reporting period, the sub-fund was highly diversified, having positions in 423 issues, from 333 different issuers. The sub-fund is an SFDR Article 8 sub-fund, and has a strong focus on ESG and sustainability. The sub-fund investible universe eliminates any issuers with UNGC violations in the areas of Human Rights, Labour, Environment or Corruption, and has a series of Business Involvement Revenue Screens to further remove businesses with exposures above proscribed levels to contentious business activities. It also has a positive tilt, eliminating those businesses from consideration that screened successfully, but that are deemed laggards by MSCI's ESG rating scales (rated B or CCC). The sub-fund has observed these guidelines throughout the year, and has an MSCI ESG rating of 'A'.

Outlook

The sub-fund is well positioned to capture opportunities that may arise from bond market volatility in both the interest rate and credit markets. The flexible opportunity set and global reach of the analyst team ensures that we have clear insight and visibility of risks, and highly diversified nature of the sub-fund minimises the impact of any unforeseen credit events. Looking

Investment review

forward, increased volatility in markets will likely remain, with inflation and recession risk dominating the scene. An active approach will be essential. From one side, inflation is heading in the right direction, reflecting the sharp fall in money supply, and should be positive for Fixed Income markets. However, the risk of a recession remains elevated as central banks continue to tighten financial conditions, albeit at a slower pace. It is at these points of inflection that policy errors often occur: the sub-fund stands ready to take advantage of attractively priced credit opportunities and to benefit from short term volatility in the interest rate markets.

Jim Leaviss and Richard Ryan
Co-sub-fund managers

Investment review information as at 31 March 2023.

Employees of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

Exposure represents the sub-fund's exposure to that counterparty.

The accompanying notes to the financial statements are an integral part of these financial statements.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

Long-term performance by share class as at 31 March 2023

	One year 31.03.22 %	Three years 31.03.20 % pa	Five years 31.03.18 % pa	Since launch % pa	Launch date of the sub-fund share class
Euro					
Class 'P' Accumulation	-0.4	n/a	n/a	+0.6	24.02.22
Class 'P' Distribution	-0.4	n/a	n/a	+0.6	24.02.22

Investment review

For the year ended 31 March 2023

Performance review

The sub-fund delivered a negative return.

As the sub-fund launched in December 2021 it is less than five years old and therefore cannot report on volatility over five years, which is its objective. However, broadly, as volatility increased both in equities and fixed income markets last year the sub-fund has not benefited from cross-asset diversification. We expect diversification to improve going forward given current yield levels in the fixed income space.

The investment period began with a particularly challenging environment across all major asset classes. Risk aversion took hold over fears of rising interest rates, global growth concerns and ongoing COVID-19 lockdowns in China.

This was against a backdrop of the ongoing war in Ukraine and its associated energy and supply-chain issues as well as banking sector turmoil late in the period following the failure of Silicon Valley Bank in the US and the rescue of Credit Suisse in Europe.

This led to disappointing returns across most major asset classes for much of the investment period. Equities, where we have most exposure, performed negatively with the exception of Asia, which was boosted by the reopening of China after its many COVID-19 lockdowns. North America was a strong detractor given the weight of our equity holdings in the region.

There were a few highlights in the overall sub-fund performance. Mainstream bonds were strongly negative and detracted from performance with the exception of the UK, which posted a positive performance relative to the benchmark.

Corporate bonds overall were marginally negative. In emerging markets, Mexican bonds contributed positively as did non-mainstream government bonds in Chile, though the latter was dragged down as an asset class by Colombian non-government bonds.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

Throughout the 12 months, we carried out minor portfolio rebalancing and remain ready to deploy cash towards sustainable assets as opportunities arise. We had expected markets to remain volatile and our investment approach remained adaptive and tactical in relation to our outlook and positioning.

Activity was fairly quiet early in the period, and we added a small amount to US technology equities amid the weakness in the sector. We also reduced our emerging market bond exposure following some steady performance in the local currency space.

We sold some of our European equity exposure following the rally in the summer of 2022, focusing on names that we felt had weaker environmental, social and governance (ESG) profiles. Thereafter, we added exposure to the European banking sector via positions in green bonds, as we feel that the majority of larger banks are in good shape from a fundamentals standpoint.

Towards the end of the period, we carried out a small amount of portfolio rebalancing to improve the sustainability credentials of the sub-fund. These changes included selling out of LG following an ESG downgrade from MSCI. We also sold out of Honda on sustainability concerns. We invested the proceeds into Takeda Pharmaceutical and Hitachi.

Outlook

Inflation has again been the main story over 2022 and into 2023 despite central banks' measures to bring it under control.

The inflationary outlook, however, is somewhat diverging between the US and higher inflation in the UK and Europe, although tightening labour markets could drive up wages and add to inflationary pressures, so there is no room for complacency as worries over the possibility of a global recession continue, and it could

Investment review

be a question of how long, and how deep, that recession might be.

These conditions may make equities look risky and bonds more favourable, and our sub-fund remains balanced and diversified, with a focus on being prepared for volatility ahead.

Maria Municchi
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

Until 21 November 2022, the sub-fund was categorised as an Article 8 fund under SFDR. From 22 November 2022, the sub-fund is categorised as an Article 9 fund under SFDR. Information related to the sustainable investments of the sub-fund required to be disclosed under SFDR is available in Annex 1.

[a] Suspended.

All securities are on an official stock exchange listing except where referenced.

Interest rates represent either the stated coupon rate or, for floating rate securities, the current reset rate which is based upon interest rates indices.

Maturity dates represent either the stated date on the security, or the next interest reset date for floating rate securities or the prerefunded date for those types of securities.

Variable and floating coupon rates are those quoted as of 31 March 2023.

The accompanying notes to the financial statements are an integral part of these financial statements.

Counterparty exposure

Counterparty exposure

Counterparty	Derivative exposures		
	Forward currency contracts €'000	Futures €'000	Collateral held as cash €'000
Bank of America Merrill Lynch	0	43	0
BNP Paribas	4,022	0	0
HSBC Bank Plc	43,709	0	0

Merrill Lynch Pierce Fenner + Smith Inc	6,832	0	0
National Australia Bank Ltd	105,116	0	290
State Street Bank and Trust Company, London Branch	16,646	0	0

Exposure represents the sub-fund's exposure to that counterparty.

The accompanying notes to the financial statements are an integral part of these financial statements.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

Long-term performance by share class as at 31 March 2023

	One year 31.03.22 %	Three years 31.03.20 % pa	Five years 31.03.18 % pa	Since launch % pa	Launch date of the sub-fund share class
Euro					
Class 'LI' Accumulation	-8.0	n/a	n/a	-8.8	07.12.21

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Shares in issue, Net Asset Values and Total Expense Ratios

	Shares outstanding as at 31.03.23	NAV per share 31.03.23	31.03.22	31.03.21
Euro		**€**	**€**	**€**
Class 'LI' Accumulation	19,277,212.362	8.8581	9.6008	n/a

NAV at sub-fund level	**31.03.23 €'000**	**31.03.22 €'000**	**31.03.21 €'000**
Net assets	170,759	181,843	n/a
Swing pricing adjustment (see note 10)	n/a	n/a	n/a
Swing net assets	**170,759**	**181,843**	**n/a**

Total Expense Ratio 31.03.23	**TER[a]**
Euro	**%**
Class 'LI' Accumulation	0.60

[a] Includes charges from underlying investments. Please see the relevant Key Investor Information Document for a more reliable estimate of future charges (available from our website at mandg.lu).

Investment review

For the year ended 31 March 2023

Performance review

Bonds sold off around the world in the 12 months under review against a backdrop of surging interest rates, high inflation and economic concerns.

The period started with heightened volatility and risk-off sentiment amid the war in Ukraine. Commodity and energy prices skyrocketed in the aftermath of the Russian invasion because of sanctions and supply disruptions. The lingering impact of COVID-19 upheavals on global supply chains also contributed to inflation reaching multi-decade highs.

Central banks led by the Federal Reserve responded to the surging prices by kickstarting a round of interest rate increases that ended years of easy money. Higher rates weighed on bonds by driving up the yields sought by investors. (Bond prices and yields move in opposite directions.)

Global bond markets began to pick up in the second half of the period as moderating inflation spurred optimism that interest rates were nearing a peak. The collapse of Silicon Valley Bank in March further eased pressure on interest rates because lenders tightened credit criteria. Government debt rallied due to a flight to safety amid wider banking upheavals, including the forced sale of Credit Suisse. Bank bonds slumped.

Across the whole year, core government bonds and investment grade corporate debt posted losses due to the interest rate increases. High yield bonds dropped somewhat less, reflecting the sector's lower sensitivity to interest rates. Emerging market bonds suffered because of the higher Fed rates and a stronger dollar.

Against this challenging backdrop, the sub-fund posted a negative return, but marginally outperformed its benchmark over the period. The outperformance was driven by positive returns in the second half of the period, when the sub-fund benefited from favourable security selection. Our holdings in bonds with an MSCI ESG rating of AA were particularly helpful for relative returns.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Investment activities

We increased exposure to government bonds over the 12 months and reduced our exposure to high yield debt. At the end of period, the sub-fund's investment grade exposure remained at just over 50%, while the allocation to government bonds and high yield was around 30% and 15% of the sub-fund respectively. Duration was lengthened during the period from 3.8 years to 5.9 years. The sub-fund added duration in euros and sterling, while reducing it in dollars. This reflects our view that inflation will fall more quickly in the eurozone than in the US.

Early in the period we added longer-dated telecom companies (in both US dollar and euros) and also sold some financial bonds and higher-rated US dollar bonds like Apple and Microsoft. Later in 2022, credit activity was focused on finding relative value trades within the primary market. This included new deals from HSBC, Intesa Sao Paolo and the Polish government. We have been active in the primary market in 2023, participating in a number of new deals including issues from Crédit Agricole, Standard Chartered, Thames Water, Oracle, Tesco, Lloyds and the Romanian and Slovakian governments.

Outlook

Inflation and interest rates remain the main concerns for the global economy and the bond market. Price increases have started to cool, but it's too early to say that inflation has been defeated. Indeed, policymakers are likely to raise interest rates further to help cool prices. Borrowing costs will probably be elevated for some time to come, and recession remains a risk.

Within the bond market, we are generally neutral on high-yield valuations. We believe supply-demand imbalances and attractive all-in yields remain supportive, along with fundamentals. We also expect a shallower default cycle than the market. In the investment grade sector, investors can benefit from

Investment review

diversification amid market uncertainties and historically high yields.

Richard Woolnough
Sub-fund manager

Investment review information as at 31 March 2023.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

All securities are on an official stock exchange listing except where referenced.
Interest rates represent either the stated coupon rate or, for floating rate securities, the current reset rate which is based upon interest rates indices.
Maturity dates represent either the stated date on the security, or the next interest reset date for floating rate securities or the prerefunded date for those types of securities.
Variable and floating coupon rates are those quoted as of 31 March 2023.

The accompanying notes to the financial statements are an integral part of these financial statements.

State Street Bank and Trust Company	0	1,612	0	0
State Street Bank and Trust Company, London Branch	0	24,522	0	0

Exposure represents the sub-fund's exposure to that counterparty.

The accompanying notes to the financial statements are an integral part of these financial statements.

Financial highlights

Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

Long-term performance by share class as at 31 March 2023

	One year 31.03.22 %	Three years 31.03.20 % pa	Five years 31.03.18 % pa	Since launch % pa	Launch date of the sub-fund share class

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2023, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2023 and Total Expense Ratio (TER) for the year ended to 31 March 2023.

Notes to the financial statements

1 Basis of preparation

These financial statements have been prepared and presented in accordance with generally accepted accounting principles in Luxembourg and with the legal and regulatory requirements relating to the preparation and presentation of the financial statements as prescribed by the Luxembourg authorities for Luxembourg investment funds including the following significant accounting policies.

The financial statements have been prepared under a going concern assumption as deemed appropriate by the Management Company.

As indicated in Notes 14, M&G (Lux) Conservative Allocation Fund merged into M&G (Lux) Sustainable Allocation Fund on 21 October 2022 and M&G (Lux) Emerging Markets Income Opportunities Fund merged into M&G (Lux) Income Allocation Fund on 6 May 2022. As indicated in Note 15, M&G (Lux) Global Enhanced Equity Premia Fund will be liquidated on 27 July 2023. As such, the financial statements for M&G (Lux) Conservative Allocation Fund, M&G (Lux) Emerging Markets Income Opportunities Fund and M&G (Lux) Global Enhanced Equity Premia Fund have been prepared on a non-going concern basis. The application of the non-going concern basis of accounting has not led to material adjustments to the sub-fund's published net asset values.

2 Summary of significant accounting policies

a) Base currency

The combined financial statements of the Fund are expressed in euros, at the exchange rate at 31 March 2023, the base currency of M&G (Lux) Investment Funds 1. The financial statements of each sub-fund are expressed in the sub-funds' base currency.

b) Exchange rates

Transactions in currencies other than each sub-fund's base currency are translated at the rate of exchange ruling on the date of the transaction. Assets and liabilities are translated into each sub-fund's base currency at the rate of exchange ruling at the sub-fund's valuation point on 31 March 2023 being the last business day of the accounting year:

1 Euro € = 1.624644942 Australian dollar (AU$)

1 Euro € = 8.533178392 Hong Kong dollar (HK$)

1 Euro € = 1.446048085 Singapore dollar (SG$)

1 Euro € = 19.356281681 South African rand (ZAR)

1 Euro € = 11.266021756 Swedish krona (SEK)

1 Euro € = 0.997368252 Swiss franc (CHF)

1 Euro € = 0.878388470 UK sterling (£)

1 Euro € = 1.087049866 US dollar (US$)

1 Japanese yen ¥ = 0.006899839 Euro (€)

1 Japanese yen ¥ = 0.006881680 Swiss franc (CHF)

1 Japanese yen ¥ = 0.006060739 UK sterling (£)

1 Japanese yen ¥ = 0.007500469 US dollar (US$)

1 US dollar $ = 1.494545000 Australian dollar (AU$)

1 US dollar $ = 0.919921000 Euro (€)

Notes to the financial statements

1 US dollar $ = 7.849850000 Hong Kong dollar (HK$)

1 US dollar $ = 133.325000000 Japanese yen (¥)

1 US dollar $ = 10.457200000 Norwegian krone (NOK)

1 US dollar $ = 1.330250000 Singapore dollar (SG$)

1 US dollar $ = 17.806250000 South African rand (ZAR)

1 US dollar $ = 10.363850000 Swedish krona (SEK)

1 US dollar $ = 0.917500000 Swiss franc (CHF)

1 US dollar $ = 0.808048000 UK sterling (£)

c) Investments – recognition and valuation

All investments are initially recognised at the transaction price net of direct transaction costs (excluding accrued interest).

Realised gains and losses on sales of investments are determined on the basis of the average cost method where applicable. Investment cost is adjusted by the amortisation of premiums and accretion of discounts on a straight line basis. It includes the net amount received, excluding any interest treated as income, from derivative instruments.

Unrealised gains or losses on investments are determined by reference to the opening and closing valuation of investments and includes surpluses or deficits arising from unsettled derivative contracts.

At the end of the reporting year all investments have been valued using the prices and the portfolio holdings determined on 31 March 2023, at the last valuation point of the accounting year.

The methods of determining value for the principal classes of investment are:

- Equities and debt securities which are traded on an active market are included at the mid price (the mid point between the quoted bid and offer prices), excluding any accrued interest in respect of bonds.
- Collective investment schemes are included at either the mid of their cancellation and creation prices for dual priced sub-funds or their single price for single priced sub-funds.
- Other equities and debt securities which are unquoted or not actively traded on a quoted market are included at a value estimated by the Administrator and under policies and procedures approved and overseen by the Board of Directors using an appropriate valuation technique, excluding any accrued interest in respect of bonds.
- Exchange traded futures and options are included at either their single price or, if separate buying and selling prices are quoted, the average of the two prices.
- Over the counter equity options, credit default swaps, interest rate swaps, asset swaps and inflation swaps are included at a value provided by Markit Valuations Limited, an independent credit derivative price provider. Their value excludes any accrued interest in respect of derivatives where the interest is income in nature.
- Forward currency contracts, for share class hedging and investment, are included at a value determined by reference to current forward exchange rates for contracts with similar maturity profiles.
- Cash and amounts held in current, deposit, and margin accounts and in other time-related deposits shall be valued at their nominal value.

Notes to the financial statements

d) Recognition of income and expenses

- Dividends and any withholding tax, including ordinary stock dividends and special dividends, from equity investments are recognised when the security is quoted ex-dividend.
- Distributions from collective investment schemes, including any equalisation, are recognised when the scheme is priced ex-distribution.
- Interest income from debt securities is recognised daily on an accruals basis and includes the amortisation of premiums and accretion of discounts on a straight line basis.
- Income from derivatives is recognised on an accruals basis.
- Fixed deposit, money market deposit and bank interest are recognised daily on an accruals basis.
- Underwriting commission is recognised when the issue takes place.
- Fee rebates from investing in other collective investment schemes are recognised on an accruals basis.
- Expenses are recognised on an accruals basis.
- Luxembourg subscription tax (*taxe d'abonnement*) is recognised daily on an accruals basis.

e) Allocation of returns to share classes

The annual management charge, *taxe d'abonnement*, any share class hedging returns and associated share class hedging charges are directly attributable to individual share classes. All other returns are apportioned to each sub-fund's share classes pro-rata to the value of the net assets of the relevant share class on the day that the income or expenses are recognised.

The Fund operates income equalisation arrangements with a view to ensuring that the level of income accrued within a sub-fund is not affected by the issue, conversion or redemption of sub-fund shares during an accounting year.

The Directors operate a policy of 'swing pricing' where a swing price adjustment may be added to the net asset value per share to determine the price at which shares may be issued or redeemed. The swing price adjustment protects existing shareholders from the dilutive effect of direct and indirect portfolio dealing costs incurred when investments are bought or sold in response to net flows of money into or out of the sub-funds from investors buying and selling shares in the sub-funds.

f) Performance fee

In respect of certain sub-funds and certain share classes, the Management Company is entitled to receive from the net assets of each sub-fund or share class an annual performance fee which, if applicable, will be calculated and accrued each Valuation Day and payable to the Investment Manager annually in arrears at the end of an annual accounting period.

The performance fee is calculated based on a percentage of the increase in the Net Asset Value per share of each relevant share class above both its High Water Mark and Hurdle as described in the Prospectus (Appendix 2) for M&G (Lux) Investment Funds 1.

The rate at which the performance fee shall be applied (the 'Performance Fee Rate') for each share class and the Hurdle are set out in the 'Performance Fees' section of the relevant Fund Supplement in the Prospectus for M&G (Lux) Investment Funds 1.

Notes to the financial statements

Sub-fund	Amount of performance fee in sub-fund's currency	Percentage of average TNA
M&G (Lux) Episode Macro Fund		
Euro		
Class 'T-H' Accumulation	993,968	2.10%
Class 'TI-H' Accumulation	73,395	1.38%

US dollar		
Class 'T' Accumulation	194,972	1.99%
Class 'TI' Accumulation	172,598	2.04%

3 Distribution policy

Distribution shares may pay distributions to Shareholders, whereas Accumulation shares will instead accumulate all earnings pertaining to the relevant share class for the benefit of the Accumulation Shareholders. Distribution payments are made in the relevant share class currency.

The Directors will exercise their discretion to determine whether or not to declare a distribution in respect of Distribution shares. Distributions may be paid out of investment income, capital gains or capital at the discretion of the Directors. Distributions and their frequency are disclosed in note 13 of this report.

Unless detailed below, the distribution policy for all sub-funds and distribution share classes is to distribute all investment income gross of expenses.

The following distribution share classes distribute an amount or fixed percentage of the Net Asset Value per Share. Where the amount of investment income earned is not sufficient to meet this fixed amount or fixed percentage, a fixed Distribution Share Class may be required to make a payment out of capital. The Directors will periodically review fixed Distribution Share Classes policies and reserve the right to make changes to the distribution rate in cases where maintaining it may adversely impact the respective sub-funds or the Shareholders.

In order to conduct a controlled dividend flow to shareholders, the below sub-funds interim distributions will be at the sub-fund manager's discretion, up to the maximum of the distributable income available for the period.

M&G (Lux) Global Dividend Fund

M&G (Lux) Global Listed Infrastructure Fund

M&G (Lux) Income Allocation Fund

M&G (Lux) North American Dividend Fund

4 Transaction costs

Direct portfolio transaction costs include broker execution commission and taxes and are incremental costs that are directly attributable to the transaction. Indirect portfolio transaction costs represent the difference between the buying and selling prices of the sub-fund's investments (portfolio dealing spread); some types of investment, such as fixed interest securities, have no direct transaction costs and only the portfolio dealing spread is paid. Transaction costs are incorporated as part of realised gain/(loss) in the Statement of operations and changes in net assets.

Direct portfolio transaction costs	For the year ended 31 March 2023
M&G (Lux) Absolute Return Bond Fund	€1,238
M&G (Lux) Asian Fund	US$59,390
M&G (Lux) Better Health Solutions Fund[a]	US$14,216
M&G (Lux) Climate Solutions Fund	US$2,281

[a] For the period from 2 March 2023 (launch date of the sub-fund) until 31 March 2023.
[b] For the period from 1 April 2022 until 21 October 2022 (the merger date of the sub-fund).
[c] For the period from 1 April 2022 until 6 May 2022 (the merger date of the sub-fund).

Notes to the financial statements

5 Operating charges

Operating charges included in the Total Expense Ratio (TER) calculation include payments made to M&G and to providers independent of M&G:

- **Investment management:** Charge paid to M&G for investment management of the sub-fund (also known as Annual Management Charge).
- **Performance fee:** Performance fee paid (payable) to M&G based on performance of the applicable share class.
- **Administration:** Charge paid to M&G for administration services in addition to investment management – any surplus from this charge will be retained by M&G.
  Please note that this does not apply to M&G (Lux) Sustainable Macro Flexible Credit Fund and M&G (Lux) Multi Asset 2023 Fund, which carry a Single Charge.
- **Share class hedging:** Charge paid to M&G for currency hedging services to minimise exchange rate risk for the share class.
- **Oversight and other independent services:** Charges paid to providers independent of M&G for services which include depositary, custody and audit. From 1 October 2020, audit fees and custody transaction charges will be paid by the Management Company for any sub-fund where the NAV has been lower than €200m ('Threshold'). The Management Company reviews the Net Asset Value of the sub-funds at the end of each quarter. If at the end of two consecutive quarters a sub-fund's Net Asset Value is:
  - below the Threshold: the audit fees and custody transaction charges will be borne by the Management Company and excluded from the calculation of the Net Asset Value of the sub-fund.
  - above the Threshold: the audit fees and custody transaction charges will be included in the calculation of the Net Asset.
- **Taxation in Luxembourg:** Under current legislation, investors that are not resident in Luxembourg are not subject to capital gains or income tax, unless they have a permanent establishment in Luxembourg to which the share capital of the Fund is allocated. Retail share classes of the Fund are subject to a tax (*taxe d'abonnement*) of 0.05% per annum and institutional share classes of 0.01%.
- **Ongoing charges from underlying funds:** Ongoing charges on holdings in underlying funds that are not rebated. Where a sub-fund invests in collective investment schemes that are also managed by the Management Company (or an associate), the Management Company will rebate the Annual Management Charge and Administration Fee of the underlying collective investment scheme.

The operating charges paid by each share class of the sub-funds are shown in the Total Expense Ratio (TER) tables. Operating charges do not include portfolio transaction costs or any entry and exit charges also known as initial and redemption charges. The charging structures of the share classes may differ, and therefore the operating charges may differ. For each sub-fund there is no difference between operating charges and TER figures, unless disclosed under the specific TER table.

For M&G (Lux) Episode Macro Fund, the operating charges and performance fees are paid by the applicable share class. The charges do not include portfolio transaction costs or any entry and exit charges (also known as initial and redemption charges). The charging structures of the applicable share classes may differ, and therefore the operating charges and performance fees may differ. For further details of performance fee calculations please refer to the most recent Visa Stamped Prospectus approved by the CSSF on 22 February 2023.

Notes to the financial statements

For M&G (Lux) Multi Asset 2023 and M&G (Lux) Sustainable Macro Flexible Credit Fund, the Management Company takes a 'Single Charge' from each Share Class of the sub-fund to cover its duties, as well as operating, administration and oversight costs associated with the sub-fund. Such charge will be calculated and taken into account daily ('Single Charge'). For additional information on Single Charge, please refer to the Prospectus which is available on our website at mandg.com/investments/lu

6 Annual management, administration and share class hedging charges

Annual management charges are set out in the table below. In addition, there is an administration charge of 0.15% per share class. A Share class hedging charge of 0.01%-0.055% will apply to hedged share classes. These charges are accrued daily based on the net asset value of each share class. Any amounts outstanding at the year end are disclosed in the Statement of net assets.

Please note that the following table lists the available share classes. Each share class further contains an accumulation and distribution option.

Annual Management Charge

[m] Up to 1.00%.

Administration Charge

From 1 October 2020, a discount was introduced on the administration charge based on a sub-fund's Net Asset value (NAV), as shown in the table below. The sub-funds' administration charge is currently up to 0.15% per annum.

Sub-fund NAV	Discount	Buffer[a]	Discount removed/reduced[b]
€ 0-1.25bn	nil	n/a	n/a
€ 1.25-2.50bn	0.02%	€ 125m	€ 1.125bn
€ 2.50-3.75bn	0.04%	€ 125m	€ 2.375bn
€ 3.75-5.00bn	0.06%	€ 125m	€ 3.625bn
€ 5.00-6.25bn	0.08%	€ 125m	€ 4.875bn
€ 6.25-7.50bn	0.10%	€ 250m	€ 6.000bn
More than € 7.50bn	0.12%	€ 250m	€ 7.250bn

[a] Applied in case of reducing sub-fund NAV.
[b] When a sub-fund NAV falls below.

Please note that this change does not apply to the M&G (Lux) Multi Asset 2023 Fund and M&G (Lux) Sustainable Macro Flexible Credit Fund, which carry a Single Charge.

7 Depositary, safe custody and custody transaction charges

The Depositary takes a charge from each sub-fund as payment for its duties as depositary. The Depositary's charge is based on the NAV of each sub-fund, and in normal circumstances, the fees payable to the Depositary for its provision of services shall be subject to a maximum of 1 basis point.

Notes to the financial statements

The Depositary also receives a fee in relation to the safe-keeping of each sub-fund's assets (safe custody charges) and a fee in relation to processing transactions (custody transaction charges). The safe custody charge is a range between 0.00005% and 0.4% of the asset values and custody transaction charges range between €5 and €100 per transaction.

The Depositary's charge is calculated and taken into account daily on the same basis as described above for the Annual Management Charge. The safe custody charges and custody transaction charges are accrued daily.

8 Directors' fees

The Directors are entitled to receive fees of €50,000 per director per annum, which are paid by the Management Company. Philip Jelfs and Laurence Mumford have waived their entitlement to Director's fees. The Management Company shall also reimburse certain expenses of the Directors, in accordance with the Articles, out of the Administration Charge.

9 Taxes

Luxembourg

The Fund is, in principle, liable in Luxembourg to a subscription tax (*taxe d'abonnement*) of 0.05% per annum of its NAV, such tax being payable quarterly on the basis of the value of the aggregate net assets of the Fund at the end of the relevant calendar quarter.

This rate is reduced to 0.01% per annum for:

- Undertakings whose sole object is the collective investment in money market instruments and the placing of deposits with credit institutions;
- Undertakings whose sole object is the collective investment in deposits with credit institutions; and
- Individual sub-funds of UCIs with multiple sub-funds, as well as for individual classes of securities issued within a UCI or within a sub-fund of a UCI with multiple sub-funds, provided that the securities of such sub-funds or classes are reserved to one or more institutional investors.

As from 1 January 2021, the Fund or its individual sub-funds, may benefit from reduced subscription tax rates depending on the value of the relevant sub-fund's net assets invested in economic activities that qualify as environmentally sustainable within the meaning of Article 3 of the Taxonomy Regulation (the 'Qualifying Activities'), except for the proportion of net assets of the Fund or its individual sub-funds invested in fossil gas and/or nuclear energy related activities. The reduced subscription tax rates would be of:

- 0.04% if at least 5% of the total net assets of the Fund, or of its individual sub-funds, are invested in Qualifying Activities;
- 0.03% if at least 20% of the total net assets of the Fund, or of its individual sub-funds, are invested in Qualifying Activities;
- 0.02% if at least 35% of the total net assets of the Fund, or of its individual sub-funds, are invested in Qualifying Activities; and
- 0.01% if at least 50% of the total net assets of the Fund, or of its individual sub-funds, are invested in Qualifying Activities.

The subscription tax rates mentioned above would only apply to the net assets invested in Qualifying Activities.

Notes to the financial statements

In addition, exemptions are available from the subscription tax where:

- the value of the assets represented by units held in other UCIs, provided such units have already been subject to the subscription tax;
- UCIs reserved for Institutional Investors invested in money market instruments and deposits with credit institutions whose weighted residual portfolio maturity does not exceed 90 days and that have obtained the highest possible rating from a recognised rating agency;
- UCIs whose securities are reserved for retirement pension schemes;
- UCIs whose main objective is the investment in microfinance institutions;
- UCIs which securities are listed or traded and whose exclusive object is to replicate the performance of one or more indices.

The table below shows the *taxe d'abonnement* applicable to each share class.

Taxe d'abonnement

f The Single Charge which is up to 0.59% includes the *taxe d'abonnement*.
g The Single Charge which is up to 0.55% includes the *taxe d'abonnement*.

Other transaction taxes

Other jurisdictions may impose taxes, financial transactions taxes (FTT) or other transaction taxes on certain assets held by the sub-funds (for example, UK stamp duty, French FTT).

Withholding tax

Dividends, capital gains and interest received by the sub-fund on its investments may be subject to withholding taxes in the countries of origin which are generally irrecoverable as the sub-fund itself is exempt from income tax.

Notes to the financial statements

10 Swing pricing

Investments are bought or sold by a sub-fund when changes are made to the investment portfolio and in response to net flows of money into or out of the sub-funds from investors buying and selling shares in the sub-funds.

To protect existing investors, the Directors operate a policy of swing pricing. This policy gives the Directors the power to apply a 'swing price adjustment' to the Net Asset Value per share so that portfolio transaction costs incurred as a result of investors buying and selling shares in the sub-funds can be recovered from those investors through the price they pay or receive.

A swing price adjustment may be applied in the event that the daily net subscriptions or net redemptions exceed a predetermined threshold set by the Directors.

The published share price/NAV per share inclusive of the swing pricing adjustment is disclosed in the net asset values and total expense ratio table included within the Financial highlights section of each sub-fund. The swing price adjustment is not recognised in the Statement of net assets or the Statement of operations and changes in net assets.

Swing price adjustments received through buying and selling shares is included in the net in/outflows in the Statement of operations and changes in net assets.

Under normal market conditions, the adjustment will never be larger than 2% of what the NAV would otherwise be on any given Valuation Day. This adjustment may however be significantly higher and beyond the maximum threshold during exceptional market conditions such as periods of high volatility, reduced asset liquidity and market stress. The price adjustment applicable to a specific sub-fund is available on request from the Management Company at its registered office.

11 Transactions with connected persons by cross-investment

M&G Luxembourg S.A., as the Management Company, is a related party. Details of charges payable to M&G Luxembourg S.A. in respect of annual management, administration and share class hedging charges are disclosed in note 6. Amounts paid are disclosed in the Statement of operations and changes in net assets and amounts due at the year end are disclosed in the Statement of net assets.

As at 31 March 2023, the M&G (Lux) Dynamic Allocation Fund sub-fund invested in shares of the sub-funds M&G (Lux) Emerging Markets Hard Currency Bond Fund, M&G (Lux) Global Convertibles Fund, M&G (Lux) Global Emerging Markets Fund, M&G (Lux) Japan Fund, M&G (Lux) Sustainable Emerging Markets Corporate Bond Fund. The value of the shares held amounts to €87,909,354 and represents 3.93% of the net assets of the sub-fund M&G (Lux) Dynamic Allocation Fund.

As at 31 March 2023, the M&G (Lux) Global Maxima Fund sub-fund invested in shares of the sub-fund M&G Global Property Fund. The value of the shares held amounts to US$1,447,438 and represents 0.71% of the net assets of the sub-fund M&G (Lux) Global Maxima Fund.

As at 31 March 2023, the M&G (Lux) Global Target Return Fund sub-fund invested in shares of the sub-funds M&G Short Dated Corporate Bond Fund and M&G Total Return Credit Investment Fund. The value of the shares held amounts to €3,466,417 and represents 5.54% of the net assets of the sub-fund M&G (Lux) Global Target Return Fund.

Following sub-funds changed SFDR classification from Article 6 to Article 8 on 10 November 2022.

- M&G (Lux) Asian Fund
- M&G (Lux) Global Convertibles Fund
- M&G (Lux) Global Emerging Markets Fund
- M&G (Lux) Japan Fund
- M&G (Lux) Japan Smaller Companies Fund
- M&G (Lux) North American Dividend Fund

Notes to the financial statements

- M&G (Lux) North American Value Fund

Following sub-fund changed SFDR classification from Article 8 to Article 9 on 22 November 2022.

- M&G (Lux) Sustainable Multi Asset Growth Fund

Following sub-fund changed SFDR classification from Article 6 to Article 8 on 22 December 2022.

- M&G (Lux) European Strategic Value Fund

Nadya Wells was appointed an Independent Director on 6 February 2023.

Following sub-funds changed SFDR classification from Article 6 to Article 8 on 16 February 2023.

- M&G (Lux) Dynamic Allocation Fund
- M&G (Lux) Euro Corporate Bond Fund
- M&G (Lux) European Inflation Linked Corporate Bond Fund
- M&G (Lux) Global Macro Bond Fund
- M&G (Lux) Income Allocation Fund
- M&G (Lux) Short Dated Corporate Bond Fund

The M&G (Lux) Better Health Solutions Fund was launched on 2 March 2023.

15 Subsequent events

Following sub-fund changed SFDR classification from Article 6 to Article 8 on 7 April 2023.

- M&G (Lux) Global Dividend Fund

The M&G (Lux) Global Enhanced Equity Premia Fund sub-fund will be liquidated on 27 July 2023.

Predetermined yield of fixed share classes offered by M&G (Lux) Optimal Income Fund and M&G (Lux) Emerging Markets Bond Fund will be increased in August.

Risk management policies (unaudited)

The sub-funds' investment activities expose them to various types of risk which are associated with the financial instruments and markets in which they invest.

These financial statements are designed to enable users to evaluate the nature and extent of those risks and how they are managed.

Market risk

Market risk is the risk of loss resulting from fluctuations in the market value of positions in a sub-fund's portfolio attributable to changes in market variables, such as interest rates, foreign exchange rates, equity and commodity prices or an issuer's creditworthiness.

In measuring and monitoring market risk, the global exposure of a sub-fund is calculated on a daily basis, using a 'commitment' approach or 'Value at Risk' (VaR) approach.

'Commitment' approach

The commitment approach is applied for sub-funds investing only in traditional asset classes, namely equities, fixed income, money market instruments and collective investment schemes.

In addition, the approach is applied for sub-funds which use or intend to use derivatives or instruments embedding derivatives, but only for efficient portfolio management purposes, or in a simple way not necessarily restricted to efficient portfolio management.

Under the commitment approach the global exposure of sub-funds is measured and monitored using a commitment (adjusted notional) methodology.

'Value at Risk' approach

There are two forms of VaR approaches, absolute and relative, which are described below:

Absolute VaR

The absolute VaR is used where a sub-fund seeks to estimate the potential loss it could experience in a month (20 trading days) under normal market conditions. The requirement is that, 99% of the time, such sub-fund's worst outcome is no worse than a 20% decline in NAV.

Relative VaR

The relative VaR of a sub-fund is expressed as a multiple of a benchmark or reference portfolio and cannot, under the same circumstances as above, exceed twice the VaR of the relevant benchmark or reference portfolio.

The table below shows sub-funds using the 'commitment' approach and those using the VaR approach:

Sub-fund	Global exposure approach
M&G (Lux) Absolute Return Bond Fund	Absolute VaR
M&G (Lux) Asian Fund	Commitment
M&G (Lux) Better Health Solutions Fund	Commitment
M&G (Lux) Climate Solutions Fund	Commitment
M&G (Lux) Conservative Allocation Fund	Absolute VaR

[a] The sub-fund changed from using absolute VaR to relative VaR with effect 31 January 2023.

VaR limit

When VaR is calculated as a percentage of the net asset value to assess a sub-fund's market risk, it may not be greater than the VaR limit set for the sub-fund.

For the financial year from 1 April 2022 to 31 March 2023 the tables below show the VaR limits set for the sub-funds, together with the lowest, highest and average VaR calculated for each sub-fund during the year.

	Absolute VaR			
For the year to 31 March 2023	VaR limit %	Lowest %	Highest %	Average %
M&G (Lux) Absolute Return Bond Fund	3.33	1.04	2.26	1.82

Bloomberg MSCI Global HY Corporate ESG BB+ Sustainable SRI Bond Index

Leverage risk

Derivatives can be used by the sub-fund to generate market exposure to investments exceeding the net asset value. As a result of this exposure, positive or negative movement in markets may have a more significant effect on the net asset value of the sub-fund.

Derivatives can also be employed to hedge exposure. Consequently, higher derivative usage will not necessarily imply a higher level of risk for the sub-fund.

For sub-funds using VaR approaches we disclose the level of this leverage employed during the financial reporting year on a 'sum of notionals' basis. The lowest, highest and average level of leverage employed and utilisation of the leverage level calculated during the financial year from 1 April 2022 to 31 March 2023 are shown in the table below. Please note that not all the sub-funds were in existence for the whole financial year and therefore the data is only calculated from their respective launch dates (see footnote below table).

For the year to 31 March 2023[a]	Lowest	Highest	Average
M&G (Lux) Absolute Return Bond Fund (€'000)	34,419	69,564	42,276

[c] Leverage data is up to 6 May 2022 when the M&G (Lux) Emerging Markets Income Opportunities Fund was merged into M&G (Lux) Income Allocation Fund.

Other regulatory disclosures (unaudited)

Remuneration

The below disclosure is made in accordance with Undertakings for Collective Investments in Transferable Securities ('UCITS') V and the Guidelines on sound remuneration policies under the UCITS issued by the European Securities and Markets Authority ('ESMA Guidelines').

M&G Luxembourg S.A. (the 'UCITS Management Company') is subject to a remuneration policy which is consistent with the principles outlined in the ESMA Guidelines.

The remuneration policy is designed to ensure that any relevant conflicts of interest can be managed appropriately at all times and that the remuneration of employees is in line with the risk policies and objectives of the UCITS funds managed by the UCITS Management Company. Further details of the remuneration policy can be found here: mandgplc.com/our-business/mandg-investments/mandg-investments-business-policies. The remuneration policy and its implementation is reviewed on an annual basis, or more frequently where required, and is approved by the M&G plc Board Remuneration Committee. The most recent review found no fundamental issues with no material changes made to the policy.

M&G Luxembourg S.A. is required under UCITS to make quantitative disclosures of remuneration. These disclosures are made in line with M&G's interpretation of currently available guidance on quantitative remuneration disclosures. As market or regulatory guidance evolves, M&G may consider it appropriate to make changes to the way in which quantitative disclosures are calculated.

The 'Identified Staff' of M&G Luxembourg S.A are those who could have a material impact on the risk profile of M&G Luxembourg S.A. or the UCITS funds it manages and generally includes senior management, risk takers and control functions. 'Identified Staff' typically provide both UCITS and non-UCITS related services and have a number of areas of responsibility. Therefore, only the portion of remuneration for those individuals' services which may be attributable to UCITS is included in the remuneration figures disclosed. Accordingly the figures are not representative of any individual's actual remuneration. The information needed to provide a further breakdown of remuneration is not readily available and would not be relevant or reliable.

The amounts shown below reflect payments made in respect of the calendar year 1 January 2022 to 31 December 2022.

	Fixed Remuneration €'000	Variable Remuneration €'000	Total €'000	Beneficiaries
Senior Management	1,713	1,887	3,600	11
Other Identified Staff	5,163	27,963	33,126	39
Staff Member	17,036	10,155	27,191	172
Total	**23,912**	**40,005**	**63,917**	**222**

Securities Financing Transactions Regulation (SFTR)

Under the Securities Financing Transactions Regulation ('SFTR'), the Fund is required to disclose certain information in relation to its use of Securities Financing Transactions ('SFTs') including Total Return Swaps ('TRSs'). SFTs include various types of transactions, however, the Fund is currently only permitted to enter into TRSs, and only in relation to the following sub-funds:

- M&G (Lux) Absolute Return Bond Fund
- M&G (Lux) Dynamic Allocation Fund
- M&G (Lux) Emerging Markets Bond Fund
- M&G (Lux) Emerging Markets Hard Currency Bond Fund
- M&G (Lux) Episode Macro Fund
- M&G (Lux) Euro Corporate Bond Fund
- M&G (Lux) European Inflation Linked Corporate Bond Fund

Other regulatory disclosures (unaudited)

- M&G (Lux) Global Corporate Bond Fund
- M&G (Lux) Global Floating Rate High Yield Fund
- M&G (Lux) Global High Yield Bond Fund
- M&G (Lux) Global Macro Bond Fund
- M&G (Lux) Global Target Return Fund
- M&G (Lux) Income Allocation Fund
- M&G (Lux) Optimal Income Fund
- M&G (Lux) Short Dated Corporate Bond Fund
- M&G (Lux) Sustainable Allocation Fund
- M&G (Lux) Sustainable Global High Yield Bond Fund
- M&G (Lux) Sustainable Multi Asset Growth Fund
- M&G (Lux) Sustainable Optimal Income Bond Fund

During the year from 1 April 2022 to 31 March 2023 no sub-funds entered into Total Return Swaps.

Swiss investor information

For sub-funds registered in Switzerland FINMA requires to disclose the Total Expense Ratio (TER).

For these sub-funds the TERs are disclosed in the 'Total Expense Ratio' table that can be found in each sub-fund's financial highlights section.

Annex 1: Sustainable Finance Disclosure Regulation (unaudited)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) Investment Funds 1 - M&G (Lux) Asian Fund
Legal Entity Identifier: 549300ORHSL7KYFQYW10

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

● ● ☐ Yes ● ● ☒ No

☐ It made **sustainable investments with an environmental objective**:

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**:

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.78% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintained a weighted average ESG rating that was higher than that of the equity market as represented by its investment universe.

In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum,

have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**
  The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt were met at all times during the reporting period.

  Please see the below table for an overview of the Fund's performance relative to its sustainability indicator.

  The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Portfolio weighted average ESG score for the fund	6.01 ESG Score	98.17%	96.03%
Portfolio weighted average ESG score for the Investment Universe	5.99 ESG Score	98.90%	49.66%

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

  The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating

practices of the investments purchased by the Fund.

Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?
For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

Largest investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING	Manufacturing	6.43%	TW
SAMSUNG ELECTRONICS LTD	Manufacturing	4.69%	KR

ALIBABA GROUP HOLDING LTD	Wholesale and retail trade; repair of motor vehicles and motorcycles	2.44%	CN
JD.COM CLASS A INC	Wholesale and retail trade; repair of motor vehicles and motorcycles	2.43%	CN
DBS GROUP HOLDINGS LTD	Financial and insurance activities	2.32%	SG
PACIFIC BASIN SHIPPING LTD	Transportation and storage	2.12%	HK
AMCOR CDI PLC	Manufacturing	2.12%	AU
COSCO SHIPPING PORTS LTD	Transportation and storage	2.01%	HK
CHINA CONSTRUCTION BANK CORP H	Financial and insurance activities	2.01%	CN
BANK MANDIRI (PERSERO)	Financial and insurance activities	1.82%	ID
NATIONAL AUSTRALIA BANK LTD	Financial and insurance activities	1.73%	AU

What was the proportion of sustainability-related investments?

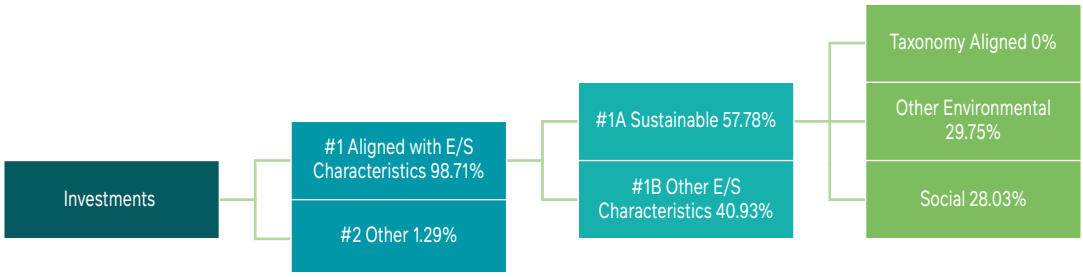
In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 98.71% of NAV as at 31 March 2023. This comprised 57.78% of NAV in sustainable investments, and the remaining 40.93% of NAV in investments with other environmental and or social characteristics.

The Fund did not commit to invest in investments aligned to the EU Taxonomy, 0% were aligned to the EU Taxonomy, while 29.75% related to investments with other environmental characteristics, and 28.03% related to socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**
  The graphic below provides an overview of the asset allocation.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	32.13%
Financial and insurance activities	27.00%
Information and communication	10.25%
Wholesale and retail trade; repair of motor vehicles and motorcycles	8.33%
Transportation and storage	6.84%
Mining and quarrying	4.61%
Construction	4.24%
Accommodation and food service activities	2.07%
Other	1.66%
Electricity, gas, steam and air conditioning supply	1.46%
Real estate activities	1.03%
Professional, scientific and technical activities	0.36%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

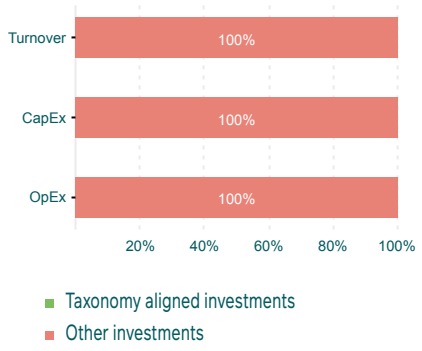
☒ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

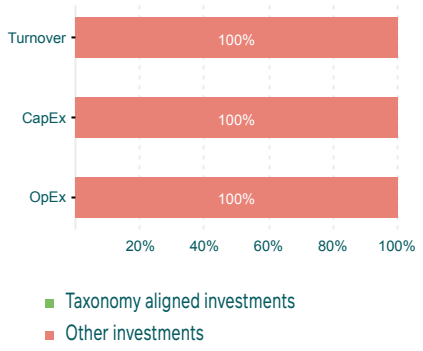
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional and enabling activities over the period was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0%
Share of Enabling Activities	0%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 29.75%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 28.03%.This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, near cash and money market funds as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach and it maintained a weighted average ESG rating that was higher than that of the equity market as represented by its investment universe. Its compliance with the same is reported in the sustainability indicators above.

How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A

- **How did this financial product perform compared with the broad market index?**
  N/A

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) Better Health Solutions Fund
Legal Entity Identifier: 254900DW7OX08JEEMU71

Sustainable investment objective

Did this financial product have a sustainable investment objective?

● ● [x] **Yes** ● ● [ ] **No**

- [ ] It made **sustainable investments with an environmental objective**:
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [x] It made **sustainable investments with a social objective**: 98.02%
- [ ] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Fund invested in companies that deliver solutions to address better health and well-being, in line with its sustainable investment objective. The strength of the fund's performance against this objective is evaluated in the sustainability indicators section below.

The alignment percentage indicated in the graphic below shows the allocation between sustainable investments made in pursuit of the sustainable investment objective and "Other" investments.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Please see the below table for an overview of the fund's performance relative to its sustainability indicators.

The 'Eligibility' figure is a measure of the percentage of fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

The majority of portfolio companies (representing 88.39% of the fund's Net Asset Value) aligned most closely with SDG 3: Good health and well-being, as might be expected from an investment fund focusing on better health and well-being outcomes. However, it is worth noting that many investee companies make secondary contributions to other SDGs. For example, Zoetis specialises in animal health products and services, with offerings ranging from vaccines to feed additives. Humans need sufficient nutrition to live productive lives and fend off disease, and the need for food will only increase as the population grows. Sustainable livestock production offers a safe and affordable option for these nutritional requirements. Zoetis therefore also contributes towards SDG 2: Zero hunger.

Another investee company, Amerisafe, specialises in workers' compensation insurance for small and medium-sized companies in hazardous industries. Amerisafe also provides safety training and advice to policyholders to promote safe, secure workplaces. The company therefore contributes to both SDG 3: Good health and well-being, and SDG 8: Decent work and economic growth.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG2 Zero Hunger	0%	100%	98.05%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG3 Good Health and Wellbeing	88.39%	100%	98.05%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG6 Clean Water and Sanitation	0%	100%	98.05%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG11 Sustainable Cities	0%	100%	98.05%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG12 Responsible Consumption and Production	0%	100%	98.05%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG8 Decent Work and Economic Growth	6.45%	100%	98.05%

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments not cause significant harm to any sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they were required to pass a series of tests, including:
  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

  Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

Largest investments	Sector	% Assets	Country
NOVO NORDISK CLASS B	Manufacturing	8.22%	DK
THERMO FISHER SCIENTIFIC INC	Manufacturing	6.16%	US
UNITEDHEALTH GROUP INC	Financial and insurance activities	4.91%	US

What was the proportion of sustainability-related investments?

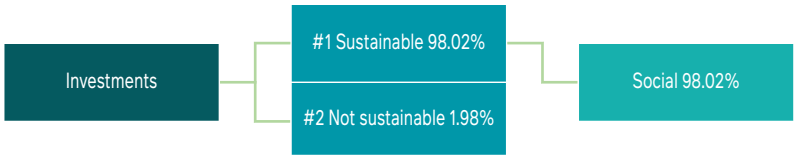
In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 80% of the Fund to be invested in social sustainable investments, in pursuit of the social sustainable investment objective.

As of 31 March 2023, 98.02% of the Net Asset Value of the Fund was in sustainable investments, which is above the minimum commitment of 80%. The Fund did not commit to invest in investments aligned to the EU Taxonomy. 0% of the sustainable investments were aligned to the EU Taxonomy, 0% related to investments with environmental objectives and 98.02% related to investments with a social objective.

1.98 % of the Fund was composed of "not sustainable" investments.

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**
  The graphic below provides an overview of the asset allocation.



#1 Sustainable covers sustainable investments with environmental or social objectives.
#2 Not sustainable includes investments which do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**
  The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	68.69%
Financial and insurance activities	8.32%
Human health and social work activities	7.37%
Professional, scientific and technical activities	4.52%
Construction	3.23%
Information and communication	3.11%
Other	1.95%
Administrative and support service activities	1.12%
Wholesale and retail trade; repair of motor vehicles and motorcycles	0.94%
Arts, entertainment and recreation	0.74%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 0% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

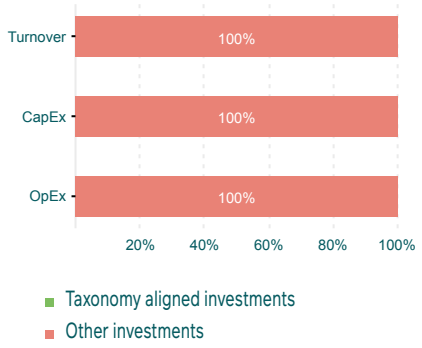
☐ Yes:
☐ In fossil gas ☐ In nuclear energy
☒ No

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

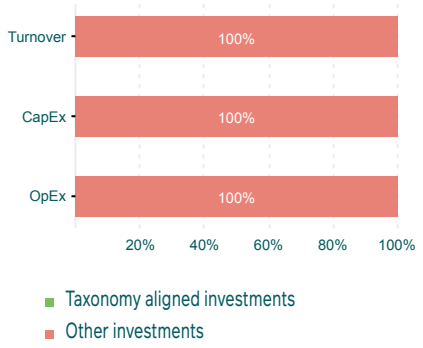
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*
*** As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.*

- **What was the share of investments made in transitional and enabling activities?**
  The share of the Fund's investments made in transitional and enabling activities over the period was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of transitional activities	0%
Share of enabling activities	0%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?
The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 0%. This compares to a minimum percentage commitment of 0% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?
The share of sustainable investments with a social objective was 98.02%. This compares to a minimum percentage commitment of 80% stated in the Fund's precontractual disclosure.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held varying levels of cash, near cash and money market funds, and derivatives as "Other" investments, for hedging purposes or in connection with cash held for ancillary liquidity. No minimum environmental or social safeguards are applied, other than as stated below:

Where derivatives are used to take investment exposure to diversified financial indices, these will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund has invested in companies that deliver solutions to address better health and well-being. Its compliance with the same is reported in the sustainability indicators above. ESG engagements are also a key focus for the fund in order to help investment companies improve their impact and sustainability standards, to support the fund's sustainable investment objective.

We carried out a series of engagements on the theme of bioethics. With several investee companies creating innovative solutions at the frontiers of biological and medical technology, there is a risk that their products could be used for nefarious purposes.

For example, genetic sequencers have been linked to the monitoring of the Uyghur population in China. In this case, we engaged with two investee genetic sequencing companies, Illumina and Thermo Fisher Scientific to find out what action they have taken to reduce this risk. While we were satisfied with both companies' responses, and their broader policies and procedures around the misuse of equipment, we will continue to monitor the issue and engage more widely where we see the potential for negative bioethical impacts.

How did this financial product perform compared to the reference sustainable benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- **How did the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**
  N/A

- **How did this financial product perform compared with the reference benchmark?**

- **How did this financial product perform compared with the broad market index?**
  N/A

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) Investment Funds 1 - M&G (Lux) Climate Solutions Fund
Legal Entity Identifier: 254900TXGEMG2PHLBX89

Sustainable investment objective

Did this financial product have a sustainable investment objective?

● ● [x] **Yes** ● ● [ ] **No**

[x] It made **sustainable investments with an environmental objective**: 96.73%

- [x] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- [x] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

[ ] It made **sustainable investments with a social objective**:

[ ] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

- [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- [ ] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] with a social objective

[ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Fund invested in companies that deliver solutions to the challenge of climate change, in line with its sustainable investment objective. The strength of the fund's performance against this objective is evaluated in the sustainability indicators section below.

The alignment percentage indicated in the graphic below shows the allocation between sustainable investments made in pursuit of the sustainable investment objective and "Other" investments.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Please see the below table for an overview of the fund's performance relative to its sustainability indicators.

The 'Eligibility' figure is a measure of the percentage of fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

It is worth highlighting that 20.81% of the fund's Net Asset Value (NAV) is invested in companies providing solutions to the climate challenge, and 87.1% of NAV is invested in those that have a net positive effect on carbon emissions (their products and services help to remove a larger amount of emissions than those emitted in providing these products or services). The fund also has 53.85% of NAV invested in companies that have comitted to setting or have set science-based targets. These are emission reduction targets considered to be in line with the temperature reductions necessary to limit the worst effects of global warming, in line with the goals of the Paris Agreement.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG7 -Affordable and Clean Energy	17.44%	97.92%	98.41%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG9 Industry, Innovation and Infrastructure	32.95%	97.92%	98.41%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG11 Sustainable Cities	10.54%	97.92%	98.41%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG15 Life on Land	3.08%	97.92%	98.41%
Percentage (%) of NAV with ratified Science Based Targets (SBTs)	44.64%	97.92%	61.81%
% of CO2 emissions with Science Based Targets (SBTs)	71.90% tCO2e	96.33%	59.09%
Percentage (%) of NAV committed to Science Based Targets (SBTs)	9.21%	97.92%	61.81%
Percentage (%) of NAV participating in Task Force on Climate Related Financial Disclosures (TCFD) reporting	67.42%	97.92%	95.33%
Percentage (%) of NAV in investments with net positive carbon emissions (i.e. investments that are considered to remove more potential carbon emissions than they produce)	87.10%	97.92%	98.41%
Percentage (%) of NAV in Climate Solutions companies	20.81%	96.33%	100%
Total renewable energy produced (megawatt hours)	3335.53 Mwh	97.92%	12.48%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG12 Responsible Consumption and Production	20.24%	97.92%	98.41%

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments not cause significant harm to any sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they were required to pass a series of tests, including:
  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 80% of the Fund to be invested in environmental sustainable investments, in pursuit of the environmental sustainable investment objective.

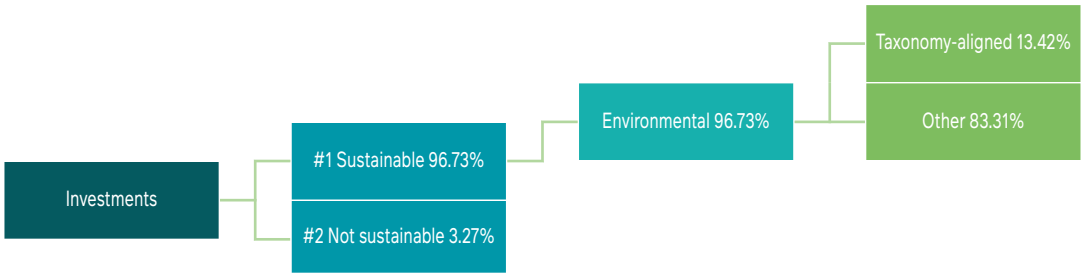
As of 31 March 2023, 96.73% of the Net Asset Value of the Fund was in sustainable investments, which is above the minimum commitment of 80%. Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 13.42% of the sustainable investments were aligned to the EU Taxonomy. 83.31% related to investments with other environmental objectives.

3.27 % of the Fund was composed of "not sustainable" investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The graphic below provides an overview of the asset allocation.



#1 Sustainable covers sustainable investments with environmental or social objectives.
#2 Not sustainable includes investments which do not qualify as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	60.06%
Electricity, gas, steam and air conditioning supply	15.18%
Information and communication	9.54%
Water supply; sewerage, waste management and remediation activities	5.75%
Other	3.67%
Other service activities	3.60%
Wholesale and retail trade; repair of motor vehicles and motorcycles	2.20%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 13.42% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **What was the share of investments made in transitional and enabling activities?**
  The share of the Fund's investments made in transitional activities was 0% and in enabling activities was 2.05% over the period. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Transitional	0%
Enabling	2.05%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?
The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 83.31%.

This compares to a minimum percentage commitment of 80% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?
The share of sustainable investments with a social objective was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?
During the reference period the Fund held varying levels of cash and derivatives as "Other" investments, for hedging purposes or in connection with cash held for ancillary liquidity. No minimum environmental or social safeguards are applied, other than as stated below:

Where derivatives are used to take investment exposure to diversified financial indices, these will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

What actions have been taken to attain the sustainable investment objective during the reference period?
The Fund has invested in companies that deliver solutions to the challenge of climate change. Its compliance with the same is reported in the sustainability indicators above. ESG engagements are also a key focus for the fund in order to help investment companies improve their impact and sustainability standards, to support the fund's sustainable investment objective.

We met with US engineering simulation software developer Ansys to encourage it to establish emission reduction targets and commit to the Science Based Targets initiative (SBTi), to disclose the drivers of its scope 1 and 2 footprint and provide a timeframe for scope 3 disclosures. We also asked for disclosure of the company's 'scope 4' (avoided) emissions, to better allow us to quantify the real world impacts it was delivering. Similarly, we engaged with Ball Corporation to discuss their decarbonisation plans and push for increased ambition around scope 3 emissions.

The company is currently working to align its scope 3 emission reduction target with a temperature increase of no more than 1.5°C above pre-industrial times (rather than 2°C). We held meetings with US waste specialist Republic Services to encourage the company's recycling efforts, including a request for more granular recycling data.

How did this financial product perform compared to the reference sustainable benchmark?
N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- **How did the reference benchmark differ from a broad market index?**
  N/A.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**
  N/A.

- **How did this financial product perform compared with the reference benchmark?**
  N/A.

- **How did this financial product perform compared with the broad market index?**
  N/A.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) Investment Funds 1 - M&G (Lux) Diversity and Inclusion Fund
Legal Entity Identifier: 254900YIO1LVTNZ3KH90

Sustainable investment objective

Did this financial product have a sustainable investment objective?

● ● [x] **Yes** ● ● [ ] **No**

- [ ] It made **sustainable investments with an environmental objective**:
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [x] It made **sustainable investments with a social objective**: 96.38%
- [ ] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Fund invested in companies that have demonstrable gender and/or ethnic diversity, or which provide solutions empowering social equality, in line with its sustainable investment objective. The strength of the fund's performance against this objective is evaluated in the sustainability indicators section below.

The alignment percentage indicated in the graphic below shows the allocation between sustainable investments made in pursuit of the sustainable investment objective and "Other" investments.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Please see the below table for an overview of the fund's performance relative to its sustainability indicators.

The 'Eligibility' figure is a measure of the percentage of fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Encouragingly, companies representing 81.53% of the fund's Net Asset Value reported board gender diversity greater than 30%. This is a requirement for 'diversity' investee companies at the time of purchase, and we will engage with companies if the figure falls below 30%, to find out what measures will be taken to improve this in the quickest and smoothest fashion possible.

It is worth highlighting that the coverage numbers tend to be lower for indicators surrounding gender and ethnic diversity representation, and annual changes to these, due to lower data availability in this area. This data is supplied by investee companies, and although we have seen improvements in disclosure in recent years, there is more to do. Importantly, certain investee companies also operate in regions where the disclosure of workforce ethnicity information is restricted. However, where possible, we are prioritising engaging with investee companies on the theme of improving disclosure of data surrounding gender and ethnic minority representation.

Investee companies also contributed towards a range of United Nations Sustainable Development Goals (SDGs), including SDG 5: Gender equality, SDG 8: Decent work and economic growth, and SDG 9: Industry, innovation and infrastructure. However, it is worth highlighting that many companies will contribute to more than one SDG.

For example, mobile telecommunications tower company Helios Towers contributes towards SDG 9, but also SDG 3 and 4, by allowing greater access to mobile healthcare and educational services.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Year-on-Year Change of women on the board	0%	96.73%	49.12%
Year-on-Year Change of women in leadership roles	0.59%	96.73%	57.26%
Year-on-Year Change of ethnic diversity on the board	0%	96.73%	27.02%
Year-on-Year Change of ethnic diversity in leadership roles	-	96.73%	0%
Percentage (%) NAV with board gender diversity (more than 30%), as reported by the company	81.53%	98.40%	96.75%
Percentage (%) NAV with board ethnic diversity (more than 30%), as reported by the company	14.15%	98.40%	51.55%
Percentage (%) NAV considered by the Investment Manager to have leadership diversity, based on data reported by the company	-	98.40%	0%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG3 Good Health and Wellbeing	10.59%	98.40%	98.32%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG4 Quality Education	0%	98.40%	98.32%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG5 Gender Equality	4.43%	98.40%	98.32%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG8 Decent Work and Economic Growth	8.92%	98.40%	98.32%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG9 Industry, Innovation and Infrastructure	10.41%	98.40%	98.32%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG10 Reduced Inequalities	6.69%	98.40%	98.32%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG16 Peace, Justice and Strong Institutions	0%	98.40%	98.32%

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments not cause significant harm to any sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they were required to pass a series of tests, including:
  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful.
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

Largest investments	Sector	% Assets	Country
QUEST DIAGNOSTICS INC	Human health and social work activities	4.66%	US
HDFC BANK ADR REPRESENTING THREE L	Financial and insurance activities	4.38%	IN
INTACT FINANCIAL CORP	Financial and insurance activities	4.00%	CA
MICROSOFT CORP	Information and communication	3.91%	US

MSA SAFETY INC	Manufacturing	3.05%	US

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 80% of the Fund to be invested in social sustainable investments, in pursuit of the social sustainable investment objective.

As of 31 March 2023, 96.38% of the Net Asset Value of the Fund was in sustainable investments, which is above the minimum commitment of 80%. None of the sustainable investments were expected to be aligned to the EU Taxonomy. 0% of the sustainable investments were aligned to the EU Taxonomy and 0% related to investments with environmental objectives, while 96.38% related to investments with a social objective.

3.62% of the Fund is comprised of "not sustainable" investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The graphic below provides an overview of the asset allocation.

#1 Sustainable covers sustainable investments with environmental or social objectives.
#2 Not sustainable includes investments which do not qualify as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	30.55%
Information and communication	18.70%
Financial and insurance activities	18.08%
Wholesale and retail trade; repair of motor vehicles and motorcycles	12.45%
Human health and social work activities	9.01%
Other	3.27%
Construction	3.05%
Water supply; sewerage, waste management and remediation activities	2.46%
Administrative and support service activities	2.41%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 0% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

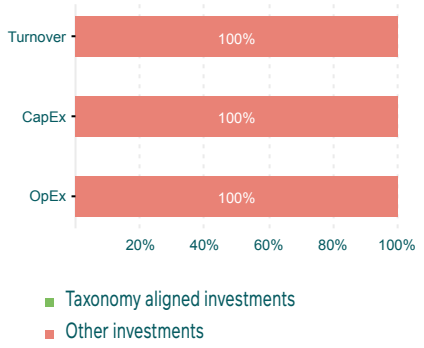
☒ No

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

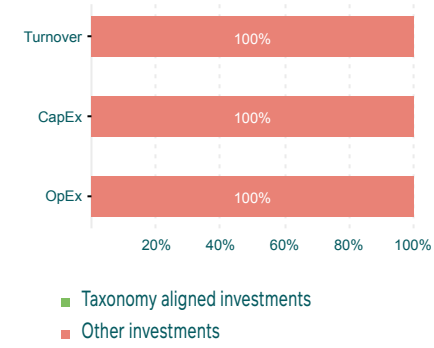
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*
*** As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.*

- **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional and enabling activities over the period was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of transitional activities	0%
Share of enabling activities	0%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 0%. This compares to a minimum percentage commitment of 0% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 96.38%. This compares to a minimum percentage commitment of 80% stated in the Fund's precontractual disclosure.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held varying levels of cash and derivatives as "Other" investments, for hedging purposes or in connection with cash held for ancillary liquidity. No minimum environmental or social safeguards are applied, other than as stated below:

Where derivatives are used to take investment exposure to diversified financial indices, these will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund has invested in companies that have demonstrable gender and/or ethnic diversity, or which provide solutions empowering social equality.

ESG engagements are also a key focus for the fund in order to help investment companies improve their impact and sustainability standards, to support the fund's sustainable investment objective. For example, we engaged with Bank of Georgia to encourage the company to provide more detailed data around the under-served people it reaches with its financial products. This will allow us to greater measure its positive impact on social inclusion. We also met with UK retailer WH Smith to discuss various elements of staff remuneration, including the financial viability of paying staff the Real Living Wage, and a pay rise the company implemented to help ease the cost of living crisis.

How did this financial product perform compared to the reference sustainable benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- **How did the reference benchmark differ from a broad market index?**
  N/A
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**
  N/A
- **How did this financial product perform compared with the reference benchmark?**
  N/A
- **How did this financial product perform compared with the broad market index?**
  N/A

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) Investment Funds 1 - M&G (Lux) Dynamic Allocation Fund
Legal Entity Identifier: 549300PZ80BI5Q8OS924

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

● ● ☐ **Yes** ● ● ☒ **No**

☐ It made **sustainable investments with an environmental objective**:

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**:

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 71.33% of sustainable investments

- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**
  The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  The Fund may allocate to sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment.

  The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

  Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 20% of the Fund to be in Sustainable Investments.

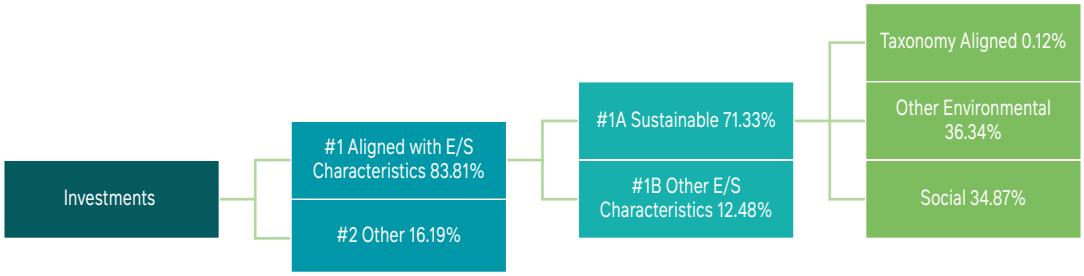
Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 83.81% of NAV as at 31 March 2023. This comprised 71.33% of NAV in sustainable investments, and the remaining 12.48% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.12% were aligned to the EU Taxonomy. 36.34% related to investments with other environmental characteristics, and 34.87% related to socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The graphic below provides an overview of the asset allocation.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**
  The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Public administration and defence; compulsory social security	39.12%
Financial and insurance activities	34.12%
Other	7.87%
Manufacturing	7.17%
Information and communication	2.51%
Mining and quarrying	2.43%
Wholesale and retail trade; repair of motor vehicles and motorcycles	1.59%
Electricity, gas, steam and air conditioning supply	0.95%
Transportation and storage	0.94%
Real estate activities	0.90%
Human health and social work activities	0.54%
Professional, scientific and technical activities	0.48%
Administrative and support service activities	0.42%
Construction	0.31%
Accommodation and food service activities	0.24%
Water supply; sewerage, waste management and remediation activities	0.20%
Activities of extraterritorial organisations and bodies	0.09%
Arts, entertainment and recreation	0.07%
Other service activities	0.02%
Education	0.01%
Agriculture, forestry and fishing	0.01%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0.12%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

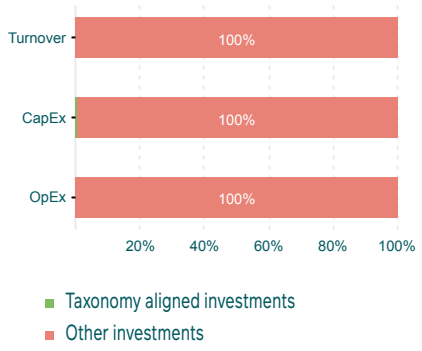
☒ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

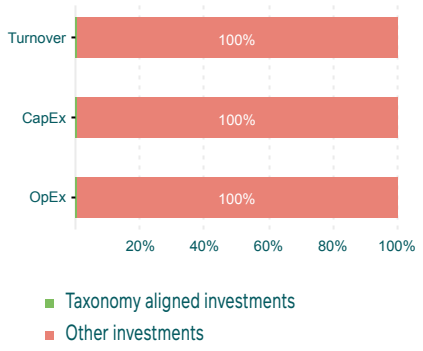
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 52.05% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities was 0% and in enabling activities was 0.01% over the period. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.01%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 36.34%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 34.87%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, near cash, collectives, FX derivatives and similar derivatives. No safeguards were applied.

The Fund may hold cash, near cash and money market funds, FX, interest rate derivatives and similar derivatives (which may include certain technical trades such as government bond futures used for duration trades) as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators above.

How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
  N/A
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
  N/A
- **How did this financial product perform compared with the reference benchmark?**
  N/A
- **How did this financial product perform compared with the broad market index?**
  N/A

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) Investment Funds 1 - M&G (Lux) Euro Corporate Bond Fund
Legal Entity Identifier: 549300O6WRQEB3PFIE51

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

● ● ☐ **Yes** ● ● ☒ **No**

☐ It made **sustainable investments with an environmental objective**:

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**:

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 72.06% of sustainable investments

- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes the use of an Exclusionary Approach (as defined below):

The Fund excludes certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments such as asset-backed securities (ABS), this also includes assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager is promoting environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

No reference benchmark has been designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**
  The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

  The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

  Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

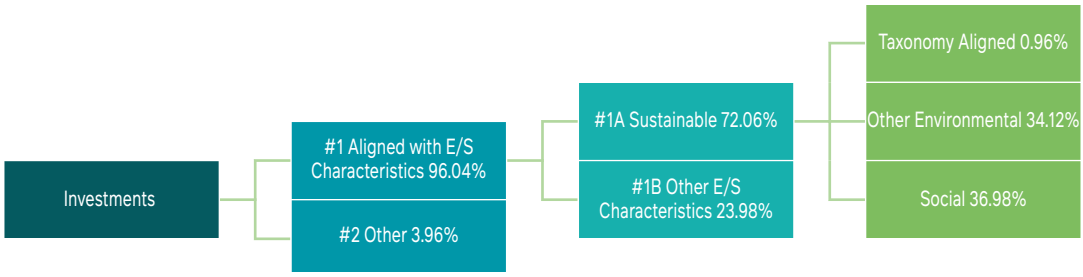
In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 96.04% of NAV as at 31 March 2023. This comprised 72.06% of NAV in sustainable investments, and the remaining 23.98% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.96% were aligned to the EU Taxonomy. 34.12%related to investments with other environmental characteristics, and 36.98% related to socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**
  The graphic below provides an overview of the asset allocation.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Financial and insurance activities	62.00%
Manufacturing	7.27%
Other	6.86%
Information and communication	6.80%
Electricity, gas, steam and air conditioning supply	5.52%
Real estate activities	4.99%
Public administration and defence; compulsory social security	2.35%
Administrative and support service activities	1.42%
Professional, scientific and technical activities	0.85%
Wholesale and retail trade; repair of motor vehicles and motorcycles	0.81%
Transportation and storage	0.52%
Accommodation and food service activities	0.27%
Human health and social work activities	0.13%
Construction	0.13%
Water supply; sewerage, waste management and remediation activities	0.07%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 0.96% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☒ Yes:

☐ In fossil gas ☒ In nuclear energy

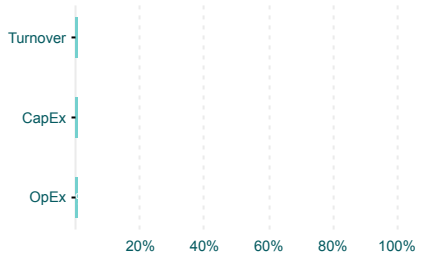
☐ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

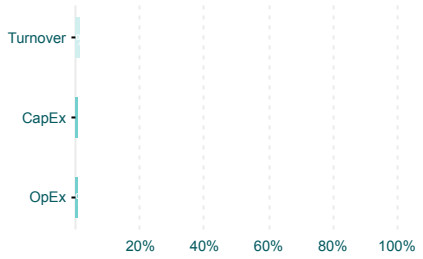
The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy aligned: Fossil gas
Taxonomy aligned: Nuclear energy
Taxonomy aligned: (No Fossil gas & Nuclear)
Non Taxonomy aligned
TurnoverTotal (90.22%)
CapexTotal (0.88%)
OpExTotal (1.22%)

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy aligned: Fossil gas
Taxonomy aligned: Nuclear energy
Taxonomy aligned: (No Fossil gas & Nuclear)
Non Taxonomy aligned
TurnoverTotal (1.18%)
CapexTotal (0.45%)
OpExTotal (0.62%)
This graph represents 97.54% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0.01% and in enabling activities 0.26%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.01%
Share of Enabling Activities	0.26%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 34.12%.This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 36.98%.This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, near cash and money market funds, FX derivatives and similar derivatives (which may include certain technical trades such as government bond futures used for duration trades) as "Other" investments, for liquidity management purposes. No minimum environmental or social safeguards were applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e., UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators section above.

How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A

- **How did this financial product perform compared with the broad market index?**
  N/A

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

This graph represents 49.54% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities 0.03%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0%
Share of Enabling Activities	0.03%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?
The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 38.93%.This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?
The share of socially sustainable investments was 37.34%.This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?
During the reference period the Fund held cash, near cash and money market funds, FX derivatives and similar derivatives (which may include certain technical trades such as government bond futures used for duration trades) as "Other" investments, for normal liquidity purposes. No minimum environmental or social safeguards were applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e., UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?
The Fund applied an exclusion policy to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators section above.

How did this financial product perform compared to the reference benchmark?
N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A

- **How did this financial product perform compared with the broad market index?**
  N/A

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) Investment Funds 1 - M&G (Lux) European Strategic Value Fund
Legal Entity Identifier: 549300F39NTG0M8EIX97

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

● ● ☐ **Yes** ● ● ☒ **No**

☐ It made **sustainable investments with an environmental objective**:

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**:

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 62.98% of sustainable investments

- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintained a weighted average ESG rating that was equivalent to at least an MSCI A rating.

In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt were met at all times during the reporting period.

The Fund committed to maintain a weighted average ESG rating that is either:

1. Higher than that of the equity market as represented by its investment universe; or
2. Equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met.

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator.

The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Portfolio weighted average ESG score for the fund	7.33 ESG Score	94.88%	97.14%
Portfolio weighted average ESG score for the Investment Universe	7.89 ESG Score	96.56%	49.41%

- **...and compared to previous periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating

practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?
For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 April 2022 to 31 March 2023

Largest investments	Sector	% Assets	Country
TOTALENERGIES	Manufacturing	3.94%	FR
BP PLC	Manufacturing	3.60%	GB
NOVARTIS AG	Manufacturing	3.53%	CH
TESCO PLC	Wholesale and retail trade; repair of motor vehicles and motorcycles	2.95%	GB
KONINKLIJKE AHOLD DELHAIZE NV	Wholesale and retail trade; repair of motor vehicles and motorcycles	2.76%	NL
SHELL PLC	Mining and quarrying	2.58%	NL
UPM-KYMMENE	Manufacturing	2.47%	FI
ASTRAZENECA PLC	Manufacturing	2.21%	GB
UCB SA	Manufacturing	2.05%	BE
CARREFOUR SA	Wholesale and retail trade; repair of motor vehicles and motorcycles	2.04%	FR
BANK OF IRELAND GROUP PLC	Financial and insurance activities	2.00%	IE
FBD HOLDINGS PLC	Financial and insurance activities	1.70%	IE
GLAXOSMITHKLINE	Manufacturing	1.69%	GB
CAIXABANK SA	Financial and insurance activities	1.62%	ES
ERICSSON CLASS B	Manufacturing	1.60%	SE

What was the proportion of sustainability-related investments?

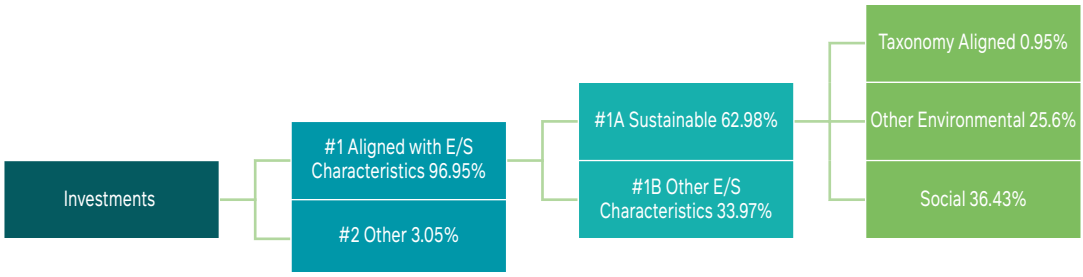
In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 0% in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 96.95% of NAV as at 31 March 2023. This comprised 62.98% of NAV in sustainable investments, and the remaining 33.97% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.95% were aligned to the EU Taxonomy. 25.6% related to investments with other environmental characteristics, and 36.43% related to socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**
  The graphic below provides an overview of the asset allocation.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	49.58%
Financial and insurance activities	13.75%
Wholesale and retail trade; repair of motor vehicles and motorcycles	11.37%
Other	5.04%
Electricity, gas, steam and air conditioning supply	5.02%
Mining and quarrying	4.15%
Transportation and storage	3.65%
Information and communication	2.71%
Administrative and support service activities	1.59%
Human health and social work activities	1.21%
Accommodation and food service activities	1.01%
Construction	0.92%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0.95%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

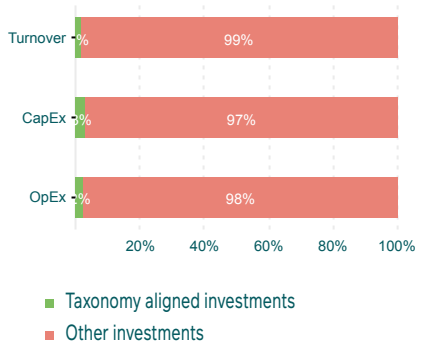
☒ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

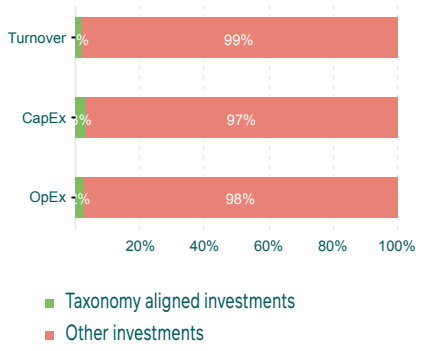
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0.18% and in enabling activities 0.50%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.18%
Share of Enabling Activities	0.50%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 25.60%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 36.43%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, near cash and money market funds as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e., UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. The Fund committed to maintain a weighted average ESG rating that is either

1. higher than that of the equity market as represented by its investment universe; or
2. equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met. Its compliance with the same is reported in the sustainability indicators above.

How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) Investment Funds 1 - M&G (Lux) Global Dividend Fund
Legal Entity Identifier: 549300TRK90WIUZI3612

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

● ● ☐ **Yes** ● ● ☒ **No**

☐ It made **sustainable investments with an environmental objective**:

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**:

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 82.74% of sustainable investments

- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintained a weighted average ESG rating that was higher than that of the equity market as represented by its investment universe.

In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt were met at all times during the reporting period.

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator.

The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Portfolio weighted average ESG score for the fund	7.55 ESG Score	96.47%	99.85%
Portfolio weighted average ESG score for the Investment Universe	6.79 ESG Score	98.36%	49.67%

- **...and compared to previous periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund.

Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process. Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund. Information on how the principal adverse impacts were taken into account will be provided in the Fund's annual report.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

Largest investments	Sector	% Assets	Country
METHANEX CORP	Manufacturing	6.99%	CA
MICROSOFT CORP	Information and communication	5.04%	US
GIBSON ENERGY INC	Wholesale and retail trade; repair of motor vehicles and motorcycles	4.76%	CA
BROADCOM INC	Manufacturing	4.18%	US
KEYERA CORP	Wholesale and retail trade; repair of motor vehicles and motorcycles	3.69%	CA
NOVARTIS AG	Manufacturing	3.45%	CH
AMCOR CDI PLC	Manufacturing	3.38%	AU
ANALOG DEVICES INC	Manufacturing	3.38%	US
BRISTOL MYERS SQUIBB	Manufacturing	3.19%	US
IMPERIAL BRANDS PLC	Manufacturing	3.14%	GB
TAKEDA PHARMACEUTICAL LTD	Manufacturing	3.05%	JP
ABRDN PLC	Financial and insurance activities	2.82%	GB
KLA CORP	Manufacturing	2.55%	US
SIEMENS N AG	Other	2.40%	DE
TRINSEO PLC	Manufacturing	2.38%	US

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

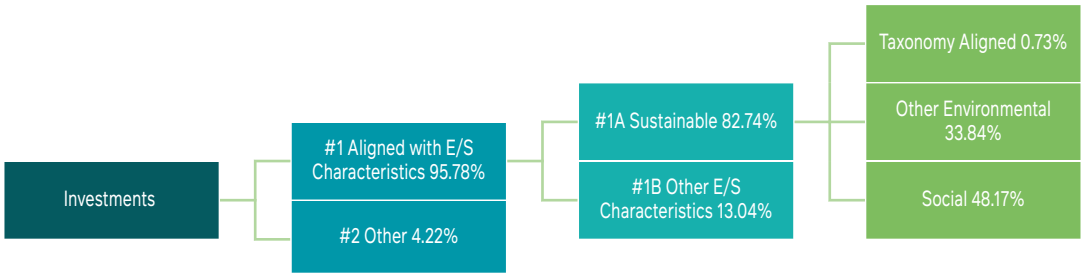
Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 95.78% of NAV as at 31 March 2023. This comprised 82.74% of NAV in sustainable investments, and the remaining 13.04% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.73% were aligned to the EU Taxonomy. 33.84% related to investments with other environmental characteristics, and 48.17% related to socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The graphic below provides an overview of the asset allocation.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	61.94%
Financial and insurance activities	13.72%
Wholesale and retail trade; repair of motor vehicles and motorcycles	12.93%
Information and communication	5.81%
Other	3.67%
Mining and quarrying	1.70%
Professional, scientific and technical activities	0.22%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0.73%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

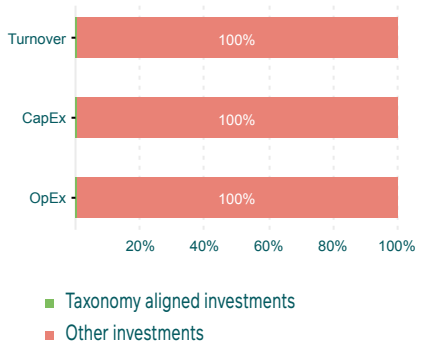
☒ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

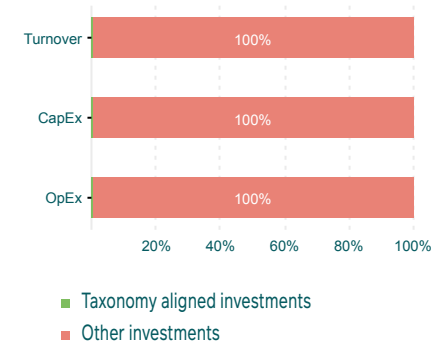
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 100% of the total investments.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**
  The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities 0.18%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0%
Share of Enabling Activities	0.18%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?
The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 33.84%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?
The share of socially sustainable investments was 48.17%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?
During the reference period the Fund held cash, near cash and money market funds as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?
The Fund applied an exclusion policy to achieve its Exclusionary Approach and it maintained a weighted average ESG rating that was higher than that of the equity market as represented by its investment universe. Its compliance with the same is reported in the sustainability indicators above.

How did this financial product perform compared to the reference benchmark?
N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
  N/A

- **How did this financial product perform compared with the reference benchmark?**

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

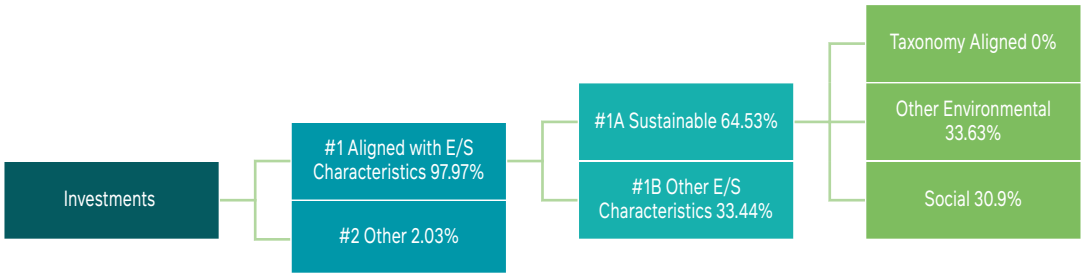
Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 97.97% of NAV as at 31 March 2023. This comprised 64.53% of NAV in sustainable investments, and the remaining 33.44% of NAV in investments with other environmental and or social characteristics.

The Fund did not commit to invest in investments aligned to the EU Taxonomy, 0% were aligned to the EU Taxonomy. 33.63% related to investments with other environmental characteristics, and 30.90% related to socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The graphic below provides an overview of the asset allocation.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**
  The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	37.89%
Financial and insurance activities	31.84%
Information and communication	7.33%
Wholesale and retail trade; repair of motor vehicles and motorcycles	7.20%
Mining and quarrying	4.03%
Electricity, gas, steam and air conditioning supply	2.72%
Transportation and storage	2.38%
Other	1.96%
Construction	1.83%
Administrative and support service activities	1.38%
Real estate activities	1.24%
Education	0.20%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

  N/A

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) Global Listed Infrastructure Fund
Legal Entity Identifier: 222100K85SU14IF7PW30

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

● ● ☐ **Yes** ● ● ☒ **No**

☐ It made **sustainable investments with an environmental objective**:

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**:

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.43% of sustainable investments

- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and it made investments that are SDG-aligned (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society and to assist it in delivering more sustainable outcomes ("Exclusionary Approach").

The Fund considered the UN Sustainable Development Goals (SDGs) as part of its investment process and the sustainability themes considered by the Investment Manager are based on the SDGs as a relevant framework to measure contribution to sustainability factors ("SDG-alignment"). 98.91% of the Fund's investments by value were in investments considered by the Investment Manager to be related to sustainability themes.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**
  The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and SDG-alignment were met at all times during the reporting period.

  Please see the below table for an overview of the Funds' performance relative to its sustainability indicator.

  The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the

sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Percentage (%) of investments by value that is SDG-aligned	81.11%	97.33%	99.72%

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

  The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund.

  Investments held by the Fund are then subject to ongoing monitoring and a quarterly review process.

  Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund. Information on how the principal adverse impacts were taken into account will be provided in the Fund's annual report.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/22 to 31/03/23

Largest investments	Sector	% Assets	Country
ENEL	Electricity, gas, steam and air conditioning supply	3.74%	IT
E.ON N	Electricity, gas, steam and air conditioning supply	3.53%	DE
CROWN CASTLE INC	Other	3.26%	US
TC ENERGY CORP	Transportation and storage	3.13%	CA
PRAIRIESKY ROYALTY LTD	Mining and quarrying	3.04%	CA
FRANCO NEVADA CORP	Financial and insurance activities	3.03%	CA
EDISON INTERNATIONAL	Electricity, gas, steam and air conditioning supply	2.95%	US
TRANSURBAN GROUP STAPLED UNITS	Transportation and storage	2.94%	AU
GIBSON ENERGY INC	Wholesale and retail trade; repair of motor vehicles and motorcycles	2.89%	CA
SEGRO REIT PLC	Real estate activities	2.83%	GB
EQUINIX REIT INC	Information and communication	2.81%	US
VINCI SA	Construction	2.71%	FR
INFRASTRUTTURE WIRELESS ITALIANE	Information and communication	2.63%	IT
KEYERA CORP	Wholesale and retail trade; repair of motor vehicles and motorcycles	2.57%	CA
AES CORP	Electricity, gas, steam and air conditioning supply	2.50%	US

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 51% of the Fund to be in Sustainable Investments.

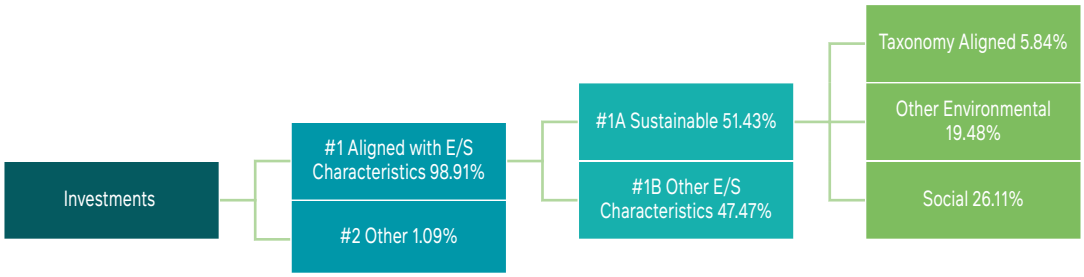
Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 98.91% of NAV as at 31 March 2023. This comprised 51.43% of NAV in sustainable investments, and the remaining 47.47% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 5.84% were aligned to the EU Taxonomy. 19.48% related to investments with other environmental characteristics, and 26.11% related to socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The graphic below provides an overview of the asset allocation.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**
  The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Electricity, gas, steam and air conditioning supply	30.43%
Financial and insurance activities	15.96%
Transportation and storage	12.92%
Real estate activities	12.72%
Information and communication	7.08%
Construction	6.45%
Wholesale and retail trade; repair of motor vehicles and motorcycles	5.46%
Mining and quarrying	5.01%
Water supply; sewerage, waste management and remediation activities	2.27%
Other	0.95%
Administrative and support service activities	0.75%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 5.84%.This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it.The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

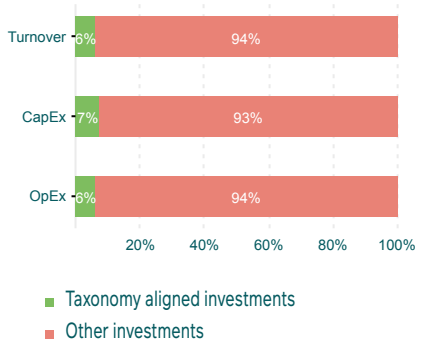
☒ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

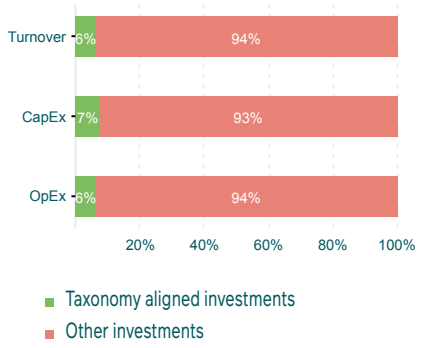
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
  The share of the Sub-Fund's investments made in transitional activities over the period was 0% and in enabling activities 1.75%. This compares to a minimum percentage commitment of 0% stated in the Sub-Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	1.75%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?
The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 19.48%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?
The share of socially sustainable investments was 26.11%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Sub-Fund held varying levels of cash and cash equivalents as "Other" investments during the reporting period as part of normal liquidity management. No minimum safeguards were applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach and it made investments that are SDG-aligned. Its compliance with the same is reported in the sustainability indicators above.

How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
  N/A

- **How did this financial product perform compared with the reference benchmark?**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

● ● ☐ **Yes** ● ● ☒ **No**

☐ It made **sustainable investments with an environmental objective**:

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**:

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 55.85% of sustainable investments

- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**
  The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

  The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

  The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

  Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics.

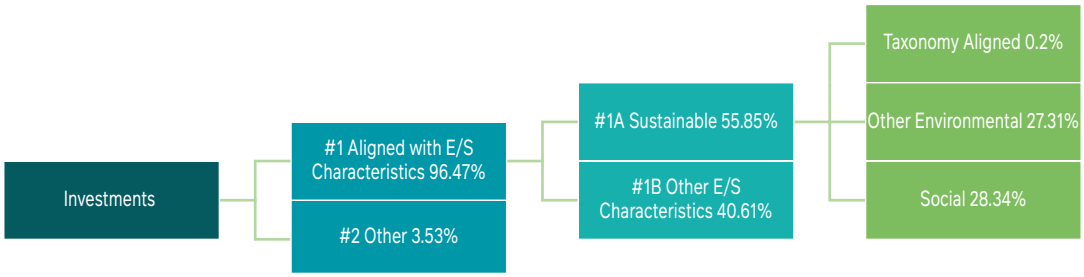
Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 96.47% of NAV as at 31 March 2023. This comprised 55.85% of NAV in sustainable investments, and the remaining 40.61% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.2% were aligned to the EU Taxonomy. 27.31% related to investments with other environmental characteristics, and 28.31% related to socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The graphic below provides an overview of the asset allocation.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**
  The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Public administration and defence; compulsory social security	65.21%
Financial service activities, except insurance and pension funding	18.90%
Other	8.32%
Manufacturing	2.80%
Information and communication	2.78%
Electricity, gas, steam and air conditioning supply	0.59%
Wholesale and retail trade; repair of motor vehicles and motorcycles	0.56%
Real estate activities	0.30%
Accommodation and food service activities	0.29%
Transportation and storage	0.20%
Administrative and support service activities	0.06%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 0.2% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

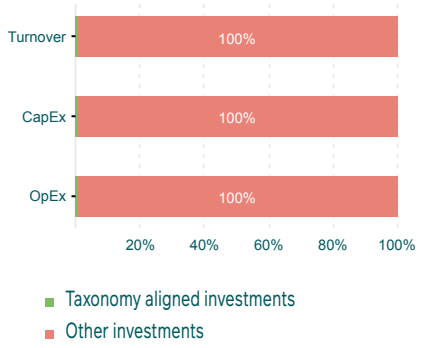
☒ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

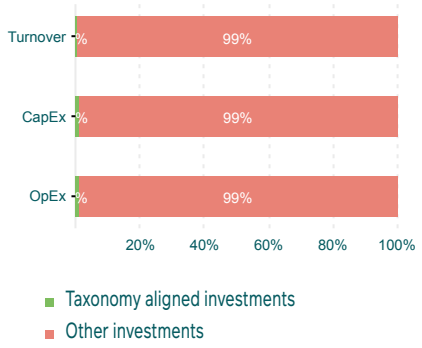
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 28.86% of the total investments.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**
  The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities 0.11%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.11%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?
The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 27.31%.This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?
The share of socially sustainable investments was 28.34%.This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, near cash and money market funds, FX derivatives and similar derivatives (which may include certain technical trades such as government bond futures used for duration trades) as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators section above.

How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

● ● [x] **Yes** ● ● [ ] **No**

[x] It made **sustainable investments with an environmental objective**: 95.5%

- [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- [x] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

[ ] It made **sustainable investments with a social objective**:

[ ] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

- [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- [ ] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] with a social objective

[ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Fund invested in companies that contribute towards the Paris Agreement climate change goal, in line with its sustainable investment objective. The strength of the fund's performance against this objective is evaluated in the sustainability indicators section below.

The alignment percentage indicated in the graphic below shows the allocation between sustainable investments made in pursuit of the sustainable investment objective and "Other" investments.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Please see the below table for an overview of the fund's performance relative to its sustainability indicators.

The 'Eligibility' figure is a measure of the percentage of fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

In the reporting period, the Fund's normalised Weighted Average Carbon Intensity (WACI) was 59.3 t CO2e. The WACI is a measure of the carbon intensity of all underlying holdings, weighted to their allocations in the Fund.

Notably, investee companies providing climate solutions helped to avoid more than 197 million tonnes of CO2 equivalents, according to the latest available company disclosures. Investee companies in this area included Schneider Electric, which produces energy management and automation components, and Linde, a producer of industrial gases which helps its customers to reduce their emissions, for example, by producing hydrogen for ultra-low sulphur diesel, or by creating thermal coatings that improve the energy efficiency of gas turbines and jet engines.

Furthermore, 41.37% of the fund's Net Asset Value (NAV) was held in companies with ratified science-based targets, while a further 28.13% of NAV was held in companies that have committed to science-based targets.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Percentage (%) of NAV committed to Science-Based Targets (SBTs)	28.13%	98.17%	73.61%
Percentage (%) of NAV with ratified Science-Based Targets (SBTs)	41.37%	98.17%	73.61%
Percentage (%) of NAV participating in Task Force on Climate-Related Financial Disclosures (TCFD) reporting	83.85%	98.17%	98.08%
Tonnes of CO2 emissions avoided by positive impact investments	197050000 tCO2e	98.17%	12.07%
Total renewable energy produced (megawatt hours)	-	98.17%	0%
Weighted average carbon intensity (WACI) for the fund	59.30 tCO2e	96.24%	100%

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments not cause significant harm to any sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they were required to pass a series of tests, including:
  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful.
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

  Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

How did this financial product consider principal adverse impacts on sustainability factors?
For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

Largest investments	Sector	% Assets	Country
UNITEDHEALTH GROUP INC	Financial and insurance activities	7.14%	US
MICROSOFT CORP	Information and communication	6.79%	US
NOVO NORDISK CLASS B	Manufacturing	5.47%	DK
ALPHABET INC CLASS A	Information and communication	4.46%	US
MANHATTAN ASSOCIATES INC	Information and communication	4.20%	US
SCHNEIDER ELECTRIC	Manufacturing	4.12%	FR
WH SMITH PLC	Wholesale and retail trade; repair of motor vehicles and motorcycles	4.08%	GB
UNILEVER PLC	Manufacturing	3.92%	GB
BECTON DICKINSON	Manufacturing	3.72%	US
VISA INC CLASS A	Financial and insurance activities	3.62%	US
TOKIO MARINE HOLDINGS INC	Financial and insurance activities	3.18%	JP
JOHNSON CONTROLS INTERNATIONAL PLC	Manufacturing	3.13%	IE
DISCOVER FINANCIAL SERVICES	Financial and insurance activities	2.93%	US
AMERICAN EXPRESS	Financial and insurance activities	2.90%	US
KUEHNE UND NAGEL INTERNATIONAL AG	Transportation and storage	2.77%	CH

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 80% to be invested in environmental sustainable investments, in pursuit of the environmental sustainable investment objective.

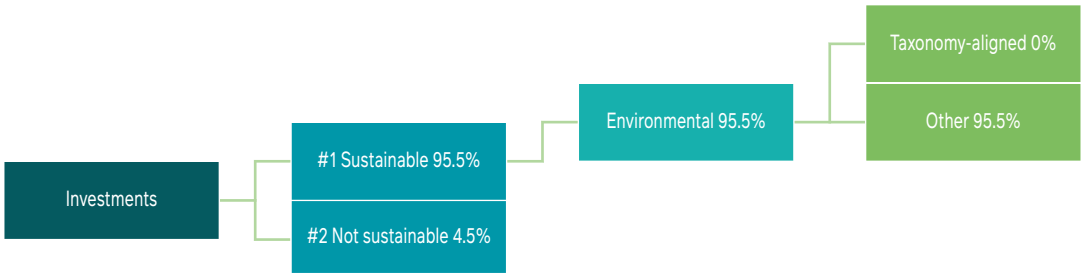
As of 31 March 2023, 95.50% of the Net Asset Value of the Fund was in sustainable investments, which is above the minimum commitment of 80%. None of the sustainable investments were expected to be aligned to the EU Taxonomy. 0% of the sustainable investments were aligned to the EU Taxonomy, while 95.50% related to investments with environmental objectives.

4.50% of the Fund is comprised of "not sustainable" investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The graphic below provides an overview of the asset allocation.



#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**
  The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	35.38%
Financial and insurance activities	27.91%
Information and communication	22.08%
Wholesale and retail trade; repair of motor vehicles and motorcycles	5.31%
Other	3.76%
Transportation and storage	2.77%
Administrative and support service activities	1.53%
Other service activities	1.27%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 0% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

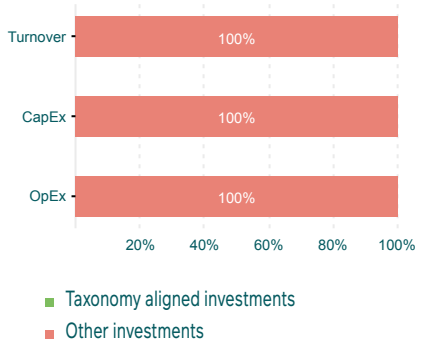
☒ No

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

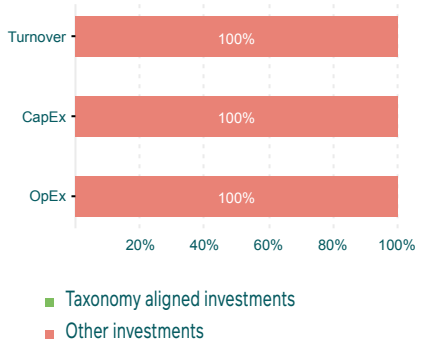
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*
*** As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.*

- **What was the share of investments made in transitional and enabling activities?**
  The share of the Fund's investments made in transitional and enabling activities over the period was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of transitional activities	0%
Share of enabling activities	0%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?
The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 95.50%. This compares to a minimum percentage commitment of 80% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?
The share of sustainable investments with a social objective was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held varying levels of cash, near cash and money market funds, and derivatives as "Other" investments, for hedging purposes or in connection with cash held for ancillary liquidity. No minimum environmental or social safeguards are applied, other than as stated below:

Where derivatives are used to take investment exposure to diversified financial indices, these will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund has invested in companies that contribute towards the Paris Agreement climate change goal. Its compliance with the same is reported in the sustainability indicators above.

ESG engagements are also a key focus for the fund in order to help investment companies improve their climate and sustainability standards, to support the fund's sustainable investment objective.

For example, we engaged with Ball Corporation to discuss their decarbonisation plans and push for increased ambition around scope 3 emissions. The company is currently working to align its scope 3 emission reduction target with a temperature increase of no more than 1.5°C above pre-industrial times (rather than 2°C).

Similarly, we encouraged US diversified managed healthcare company UnitedHealth's decarbonisation plans, including scope 3 assessment and Science Based Targets initiative (SBTi) validation.

We were pleased to see that UnitedHealth has now committed to SBTi validation, and plans to submit its targets for approval in 2023. The company recently hired a chief sustainability officer, reporting to the chief executive, and subsequently published a much improved sustainability report in June 2022 (and will take our points on board for next year's report). It intends to create an ESG steering committee, to be in place by the end of year, led by the chief sustainability officer and comprised of business leaders, to help further act on sustainability considerations. The company also plans to have its scope 3 inventory completed by the end of the year. We will continue to engage with UnitedHealth as it moves along its path to decarbonisation.

How did this financial product perform compared to the reference sustainable benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- **How did the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**
  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A

- **How did this financial product perform compared with the broad market index?**
  N/A

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) Investment Funds 1 - M&G (Lux) Global Themes Fund
Legal Entity Identifier: 2549003Q1RX8JB20XW74

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

● ● ☐ **Yes** ● ● ☒ **No**

☐ It made **sustainable investments with an environmental objective**:

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**:

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 76.08% of sustainable investments

- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintained a weighted average ESG rating that was higher than that of the equity market as represented by its investment universe.

In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

Sustainability indicators measure how the environmental or social characteristics promoted

- **How did the sustainability indicators perform?**
  The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt were met at all times during the reporting period.

by the financial product are attained.

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator.

The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Portfolio weighted average ESG score for the fund	7.37 ESG Score	98.93%	98.59%
Portfolio weighted average ESG score for the Investment Universe	6.79 ESG Score	99.48%	49.67%

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

  The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

  The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process. Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

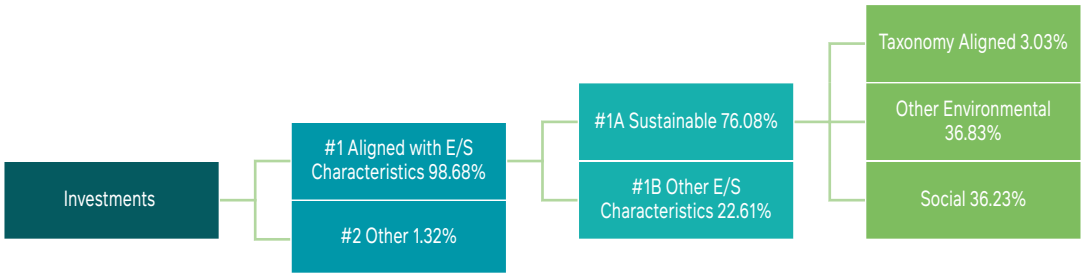
Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 98.68% of NAV as at 31 March 2023. This comprised 76.08% of NAV in sustainable investments, and the remaining 22.61% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 3.03% were aligned to the EU Taxonomy. 36.83% related to investments with other environmental characteristics, and 36.23% related to socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The graphic below provides an overview of the asset allocation.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**
  The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	38.05%
Financial and insurance activities	15.47%
Information and communication	13.89%
Mining and quarrying	6.89%
Real estate activities	6.15%
Electricity, gas, steam and air conditioning supply	5.69%
Wholesale and retail trade; repair of motor vehicles and motorcycles	4.83%
Transportation and storage	2.76%
Water supply; sewerage, waste management and remediation activities	2.09%
Construction	1.27%
Other	1.07%
Human health and social work activities	1.02%
Administrative and support service activities	0.50%
Professional, scientific and technical activities	0.32%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 3.03%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

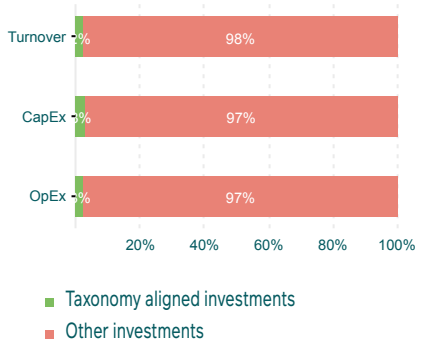
☒ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

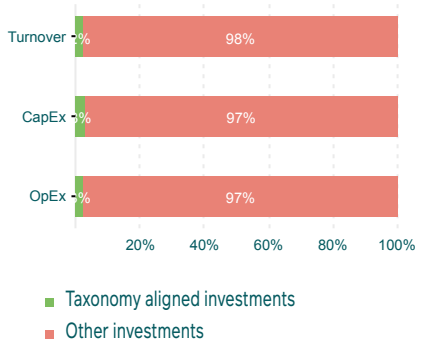
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
  The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities 0.27%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.27%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?
The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 36.83%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?
The share of socially sustainable investments was 36.23%.This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, near cash and money market funds as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach and it maintained a weighted average ESG rating that was higher than that of the equity market as represented by its investment universe. Its compliance with the same is reported in the sustainability indicators above.

How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A

- **How did this financial product perform compared with the broad market index?**
  N/A

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) Investment Funds 1 - M&G (Lux) Income Allocation Fund
Legal Entity Identifier: 5493009TGYUIY117XO13

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

● ● ☐ **Yes** ● ● ☒ **No**

☐ It made **sustainable investments with an environmental objective**:

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**:

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 62.83% of sustainable investments

- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments such as asset-backed securities (ABS), this also includes assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach").

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**
  The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

  The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:
  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

  Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

Largest investments	Sector	% Assets	Country
TREASURY BOND	Public administration and defence; compulsory social security	11.65%	US
TREASURY BOND	Public administration and defence; compulsory social security	4.06%	US
MEXICO (UNITED MEXICAN STATES) (GO		2.28%	MX
CHILE (REPUBLIC OF)	Public administration and defence; compulsory social security	2.21%	CL
CHILE (REPUBLIC OF)	Public administration and defence; compulsory social security	2.21%	CL

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 20% of the Fund to be in Sustainable Investments.

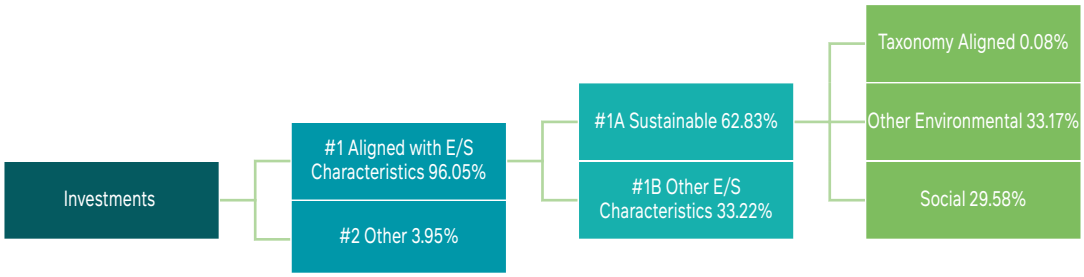
Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 96.05% of NAV as at 31 March 2023. This comprised 62.83% of NAV in sustainable investments, and the remaining 33.22% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.08% were aligned to the EU Taxonomy. 33.17% related to investments with other environmental characteristics, and 29.58% related to socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The graphic below provides an overview of the asset allocation.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Public administration and defence; compulsory social security	40.36%
Financial and insurance activities	21.52%
Manufacturing	16.99%
Information and communication	4.77%
Other	3.74%
Construction	3.14%
Wholesale and retail trade; repair of motor vehicles and motorcycles	2.50%
Activities of extraterritorial organisations and bodies	2.15%
Real estate activities	1.85%
Human health and social work activities	1.10%
Transportation and storage	0.94%
Administrative and support service activities	0.60%
Accommodation and food service activities	0.21%
Electricity, gas, steam and air conditioning supply	0.06%
Mining and quarrying	0.05%
Other service activities	0.00%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0.08%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

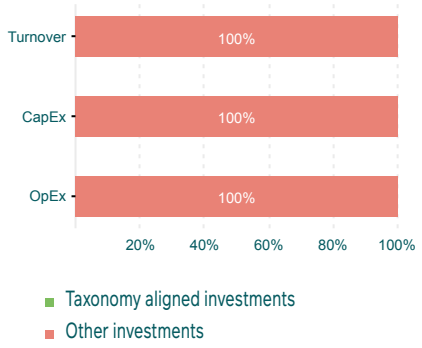
☒ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

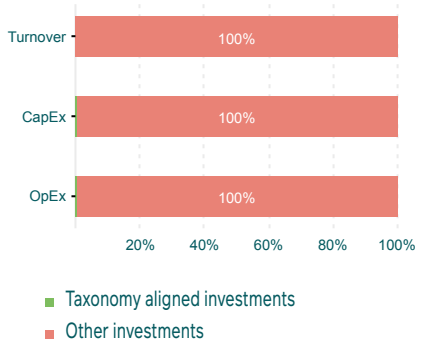
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 62.08% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**
  The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities 0.02%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0%
Share of Enabling Activities	0.02%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?
The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 33.17%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?
The share of socially sustainable investments was 29.58%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, near cash, collectives, FX derivatives and similar derivatives. No safeguards were applied.

The Fund may hold cash, near cash and money market funds, FX, interest rate derivatives and similar derivatives (which may include certain technical trades such as government bond futures used for duration trades) as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators above.

How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A

- **How did this financial product perform compared with the broad market index?**
  N/A

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) Investment Funds 1 - M&G (Lux) Japan Fund
Legal Entity Identifier: 549300OR1ZG2XAP7AU07

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

● ● ☐ **Yes** ● ● ☒ **No**

☐ It made **sustainable investments with an environmental objective**:

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**:

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 62.51% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintained a weighted average ESG rating that was equivalent to at least an MSCI A rating.

In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt were met at all times during the reporting period.

The Fund committed to maintain a weighted average ESG rating that is either:

1. Higher than that of the equity market as represented by its investment universe; or
2. Equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met.

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator.

The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Portfolio weighted average ESG score for the Fund	6.69 ESG Score	98.78%	98.60%
Portfolio weighted average ESG score for the Investment Universe	7.15 ESG Score	99.42%	50%

- **...and compared to previous periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund.

Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process. Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

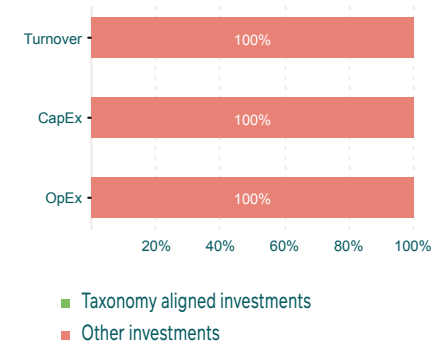
2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 100% of the total investments.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**
  The share of the Fund's investments made in transitional and enabling activities over the period was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of transitional activities	0%
Share of enabling activities	0%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?
The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 37.29%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?
The share of socially sustainable investments was 25.22%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?
During the reference period the Fund held cash and near cash as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?
The Fund applied an exclusion policy to achieve its Exclusionary Approach. The Fund committed to maintain a weighted average ESG rating that is either

1. higher than that of the equity market as represented by its investment universe; or
2. equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met. Its compliance with the same is reported in the sustainability indicators above.

How did this financial product perform compared to the reference benchmark?

In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

Sustainability indicators measure how the environmental or social characteristics promoted

- **How did the sustainability indicators perform?**
  The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt were met at all times during the reporting period.

by the financial product are attained.

The Fund committed to maintain a weighted average ESG rating that is either

1. higher than that of the equity market as represented by its investment universe; or
2. equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met.

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator.

The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March			
Portfolio weighted average ESG score for the fund	5.82 ESG Score	98.12%	81.90%
Portfolio weighted average ESG score for the Investment Universe	6.45 ESG Score	99.15%	48.92%

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

  The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund.

  Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process. Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

Largest investments	Sector	% Assets	Country
SPARX GROUP LTD	Financial and insurance activities	3.71%	JP
OPEN UP GROUP INC	Administrative and support service activities	3.49%	JP
CREDIT SAISON LTD	Financial and insurance activities	3.34%	JP
KYB CORP	Manufacturing	3.14%	JP
NIKON CORP	Manufacturing	3.12%	JP
NIPPON PILLAR PACKING LTD	Manufacturing	3.09%	JP
AXXZIA INC	Manufacturing	2.96%	JP
SANRIO LTD	Wholesale and retail trade; repair of motor vehicles and motorcycles	2.76%	JP
SUMITOMO FORESTRY LTD	Construction	2.73%	JP
NIPPON SIGNAL LTD	Manufacturing	2.68%	JP
T HASEGAWA LTD	Manufacturing	2.62%	JP
TOYOTA INDUSTRIES CORP	Manufacturing	2.53%	JP
TAZMO LTD	Manufacturing	2.51%	JP
NORITSU KOKI LTD	Manufacturing	2.36%	JP
USHIO INC	Manufacturing	2.34%	JP

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

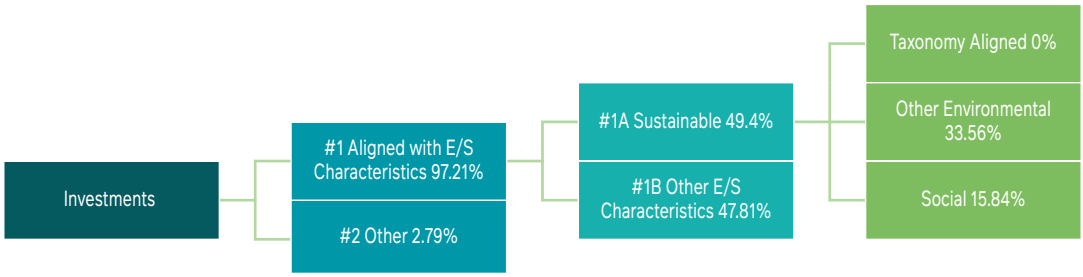
Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 97.21% of NAV as at 31st March 2023. This comprised 49.40% of NAV in sustainable investments, and the remaining 47.81% of NAV in investments with other environmental and or social characteristics.

The Fund did not commit to invest in investments aligned to the EU Taxonomy, 0% were aligned to the EU Taxonomy, while 33.56% related to investments with other environmental characteristics, and 15.84% related to socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The graphic below provides an overview of the asset allocation.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	54.11%
Administrative and support service activities	8.25%
Financial and insurance activities	8.03%
Transportation and storage	7.77%
Information and communication	7.02%
Construction	4.02%
Wholesale and retail trade; repair of motor vehicles and motorcycles	3.87%
Professional, scientific and technical activities	3.20%
Other	2.42%
Agriculture, forestry and fishing	1.32%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

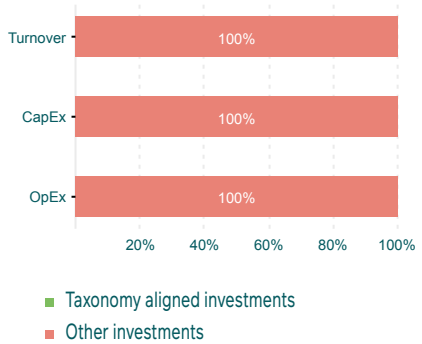
☒ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

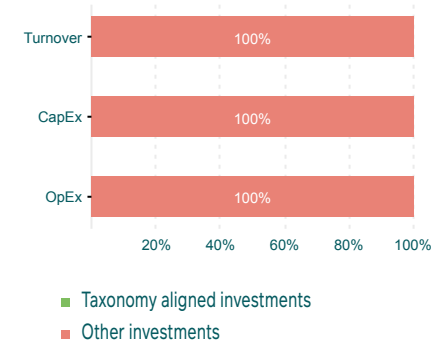
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The share of the Fund's investments made in transitional and enabling activities over the period was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of transitional activities	-%
Share of enabling activities	-%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?
The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 33.56%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?
The share of socially sustainable investments was 15.84%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?
During the reference period the Fund held cash and near cash and as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?
The Fund applied an exclusion policy to achieve its Exclusionary Approach. The Fund committed to maintain a weighted average ESG rating that is either

1. higher than that of the equity market as represented by its investment universe; or
2. equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met. Its compliance with the same is reported in the sustainability indicators above.

How did this financial product perform compared to the reference benchmark?
N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A

- **How did this financial product perform compared with the broad market index?**
  N/A

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) North American Dividend Fund

Legal Entity Identifer: LU1670627253

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

● ● ☐ **Yes** ● ● ☒ **No**

☐ It made **sustainable investments with an environmental objective**:

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**:

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 89.05% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintained a weighted average ESG rating that was higher than that of the equity market as represented by its investment universe.

In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt were met at all times during the reporting period.

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator.

The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Portfolio weighted average ESG score for the fund	7.32 ESG Score	98.74%	100%
Portfolio weighted average ESG score for the Investment Universe	6.68 ESG Score	99.37%	49.82%

- **...and compared to previous periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund.

Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

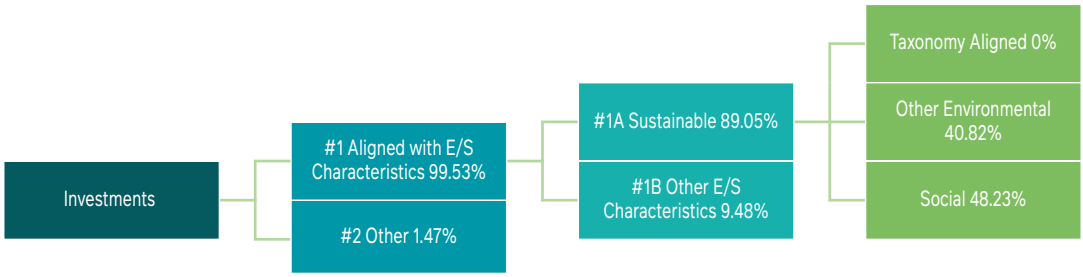
Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 98.53% of NAV as at 31 March 2023. This comprised 89.05% of NAV in sustainable investments, and the remaining 9.48% of NAV in investments with other environmental and or social characteristics.

The Fund did not commit to invest in investments aligned to the EU Taxonomy, 0% were aligned to the EU Taxonomy. 40.82% related to investments with other environmental characteristics, and 48.23% related to socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The graphic below provides an overview of the asset allocation.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	45.66%
Information and communication	17.05%
Financial and insurance activities	14.10%
Electricity, gas, steam and air conditioning supply	5.24%
Mining and quarrying	4.77%
Transportation and storage	3.80%
Wholesale and retail trade; repair of motor vehicles and motorcycles	3.53%
Other	2.63%
Real estate activities	2.10%
Administrative and support service activities	0.56%
Human health and social work activities	0.55%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

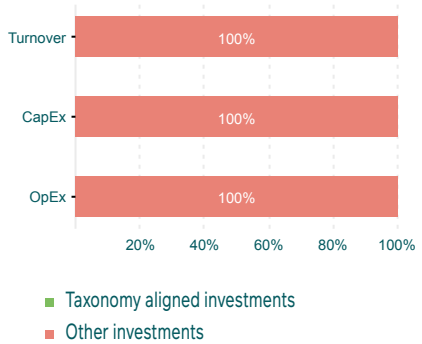
☒ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

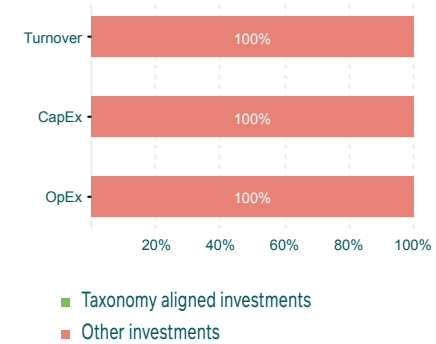
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional and enabling activities over the period was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	-%
Share of Enabling Activities	-%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?
The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 40.82%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?
The share of socially sustainable investments was 48.23%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?
During the reference period the Fund held cash, near cash and money market funds as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?
The Fund applied an exclusion policy to achieve its Exclusionary Approach and it maintained a weighted average ESG rating that was higher than that of the equity market as represented by its investment universe. Its compliance with the same is reported in the sustainability indicators above.

How did this financial product perform compared to the reference benchmark?
N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
  N/A.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
  N/A.

- **How did this financial product perform compared with the reference benchmark?**
  N/A.

- **How did this financial product perform compared with the broad market index?**
  N/A.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) Investment Funds 1 - M&G (Lux) North American Value Fund
Legal Entity Identifier: 549300JHS93E10IP4365

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

● ● ☐ **Yes** ● ● ☒ **No**

☐ It made **sustainable investments with an environmental objective**:

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**:

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 76.42% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintained a weighted average ESG rating that was equivalent to at least an MSCI A rating.

In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the investment Manager's good governance test. When assessing good governance practice the Investment manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

Sustainability indicators measure how the environmental or social characteristics promoted

- **How did the sustainability indicators perform?**
  The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt were met at all times during the reporting period.

by the financial product are attained.

The Fund committed to maintain a weighted average ESG rating that is either

1. higher than that of the equity market as represented by its investment universe; or
2. equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met.

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator.

The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Portfolio weighted average ESG score for the fund	6.10 ESG Score	97.37%	100%
Portfolio weighted average ESG score for the Investment Universe	6.68 ESG Score	98.53%	49.82%

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

  The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund.

  Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

Largest investments	Sector	% Assets	Country
JOHNSON & JOHNSON	Manufacturing	3.41%	US
META PLATFORMS INC CLASS A	Information and communication	3.00%	US
CHEVRON CORP	Manufacturing	2.83%	US

VERIZON COMMUNICATIONS INC	Information and communication	1.81%	US

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

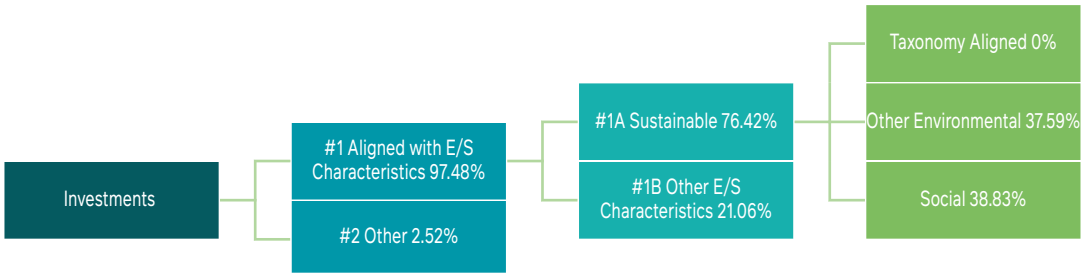
Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 97.48% of NAV as at 31 March 2023. this comprised 76.42% of NAV in sustainable investments, and the remaining 21.06% of NAV in investments with other environmental and or social characteristics.

The Fund did not commit to invest in investments aligned to the EU Taxonomy, 0% were aligned to the EU Taxonomy, while 37.59% related to investments with other environmental characteristics, and 38.83% related to socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The graphic below provides an overview of the asset allocation.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	45.66%
Information and communication	17.05%
Financial and insurance activities	14.10%
Electricity, gas, steam and air conditioning supply	5.24%
Mining and quarrying	4.77%
Transportation and storage	3.80%
Wholesale and retail trade; repair of motor vehicles and motorcycles	3.53%
Other	2.63%
Real estate activities	2.10%
Administrative and support service activities	0.56%
Human health and social work activities	0.55%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

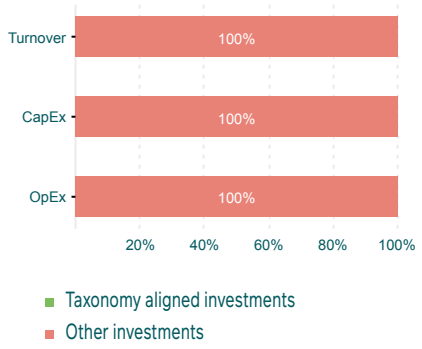
☒ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

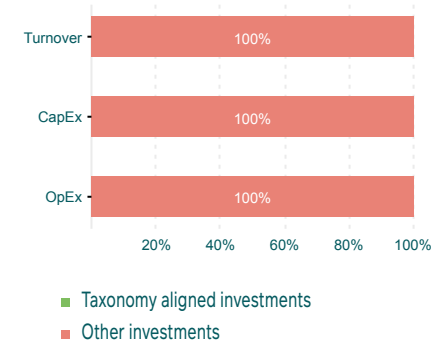
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

The share of the Fund's investments made in transitional and enabling activities over the period was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0%
Share of Enabling Activities	0%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?
The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 37.59%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?
The share of socially sustainable investments was 38.83%.This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?
During the reference period the Fund held cash, near cash and money market funds as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?
The Fund applied an exclusion policy to achieve its Exclusionary Approach. The Fund committed to maintain a weighted average ESG rating that is either

1. higher than that of the equity market as represented by its investment universe; or
2. equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met. Its compliance with the same is reported in the sustainability indicators above.

How did this financial product perform compared to the reference benchmark?
N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A

- **How did this financial product perform compared with the broad market index?**
  N/A

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: M&G (Lux) Investment Funds 1 - M&G (Lux) Optimal Income Fund
Legal Entity Identifier: 5493008ON3OV4FEXKY59

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

● ● ☐ Yes ● ● ☒ No

☐ It made **sustainable investments with an environmental objective**:

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**:

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 61.81% of sustainable investments

- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager is promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG factors.

The Fund maintained a weighted average ESG rating that was higher than its investment universe ("Positive ESG Tilt"). In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

Sustainability indicators measure how the environmental or social characteristics promoted

- **How did the sustainability indicators perform?**
  The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt outcome were met at all times during the reporting period.

by the financial product are attained.

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator.

The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Portfolio weighted average ESG score for the fund	6.83 ESG score	65.38%	91.16%
Portfolio weighted average ESG score for the Investment Universe	6.11 ESG score	64.60%	42.62%

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

  The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

  Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

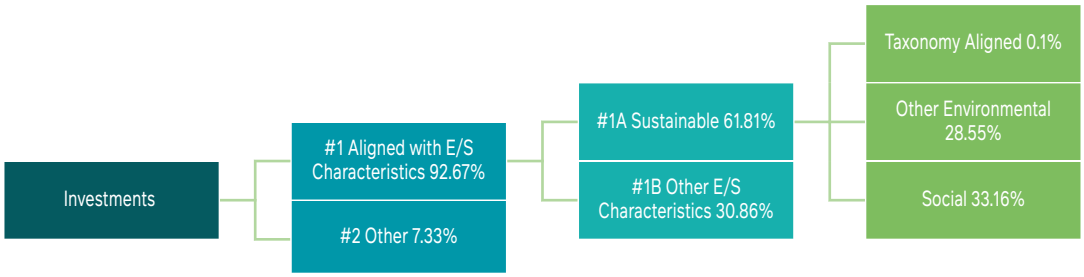
Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 92.67% of NAV as at 31st March 2023. This comprised 61.81% of NAV in sustainable investments, and the remaining 30.86% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.10% were aligned to the EU Taxonomy. 28.55% related to investments with other environmental characteristics, and 33.16% related to socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The graphic below provides an overview of the asset allocation.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**
  The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Financial and insurance activities	43.70%
Public administration and defence; compulsory social security	26.47%
Manufacturing	8.92%
Other	8.27%
Information and communication	4.57%
Electricity, gas, steam and air conditioning supply	2.62%
Real estate activities	0.90%
Administrative and support service activities	0.79%
Accommodation and food service activities	0.68%
Human health and social work activities	0.66%
Transportation and storage	0.65%
Wholesale and retail trade; repair of motor vehicles and motorcycles	0.62%
Activities of extraterritorial organisations and bodies	0.49%
Professional, scientific and technical activities	0.39%
Construction	0.14%
Mining and quarrying	0.10%
Water supply; sewerage, waste management and remediation activities	0.03%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 0.10% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

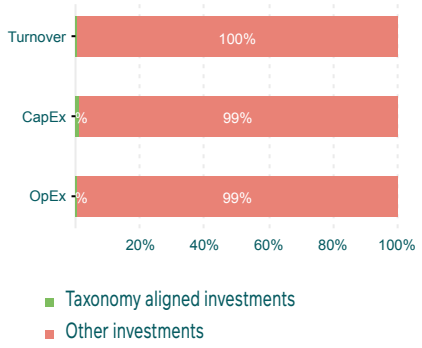
☒ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

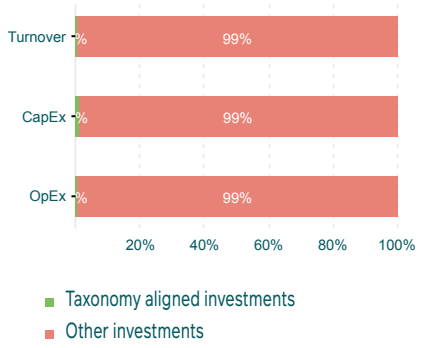
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 70.5% of the total investments.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**
  The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities 0.01%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of transitional activities	0%
Share of enabling activities	0.1%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?
The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 28.55%.This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?
The share of socially sustainable investments was 33.16%.This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, near cash and money market funds, FX, interest rate derivatives and similar derivatives (which may include certain technical trades such as government bond futures used for duration trades) as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach and maintained an ESG rating that was higher than its investment universe, thereby applying a Positive ESG tilt to the portfolio. Its compliance with the same is reported in the sustainability indicators above.

How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Sustainable investment objective

Did this financial product have a sustainable investment objective?

● ● [x] **Yes** ● ● [ ] **No**

[x] It made **sustainable investments with an environmental objective**: 96.55%

- [x] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- [x] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

[ ] It made **sustainable investments with a social objective**:

[ ] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

- [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- [ ] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] with a social objective

[ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Fund invested in companies that contribute towards the Paris Agreement climate change goal, in line with its sustainable investment objective. The strength of the fund's performance against this objective is evaluated in the sustainability indicators section below.

The alignment percentage indicated in the graphic below shows the allocation between sustainable investments made in pursuit of the sustainble investment objective and "Other" investments.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Please see the below table for an overview of the fund's performance relative to its sustainability indicators.

The 'Eligibility' figure is a measure of the percentage of fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Notably, 47% of the fund's Net Asset Value (NAV) was held in companies with ratified science-based targets, while a further 19% of NAV was held in companies that have committed to science-based targets.

Furthermore, investee companies providing climate solutions helped to avoid more than 183 million tonnes of CO2 equivalents, according to the latest available company disclosures. Investee companies in this area included Schneider Electric, which produces energy management and automation components, and efficient transportation and logistics company DSV.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Percentage (%) of NAV committed to Science-Based Targets (SBTs)	18.82%	98.36%	79.17%
Percentage (%) of NAV with ratified Science-Based Targets (SBTs)	46.78%	98.36%	79.17%
Percentage (%) of NAV participating in Task Force on Climate-Related Financial Disclosures (TCFD) reporting	89.70%	98.36%	98.49%
Total renewable energy produced (megawatt hours)	-	98.36%	0%
Tonnes of CO2 emissions avoided by positive impact investments	183750000 tCO2e	98.36%	7.47%
Weighted average carbon intensity (WACI) for the fund	51.78 tCO2e	96.85%	99.63%

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments not cause significant harm to any sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:
  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful.
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

  Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

Largest investments	Sector	% Assets	Country
NOVO NORDISK CLASS B	Manufacturing	7.25%	DK
SCHNEIDER ELECTRIC	Manufacturing	5.13%	FR

RECKITT BENCKISER GROUP PLC	Manufacturing	3.15%	GB

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 80% to be invested in environmentally sustainable investments, in pursuit of the environmentally sustainable investment objective.

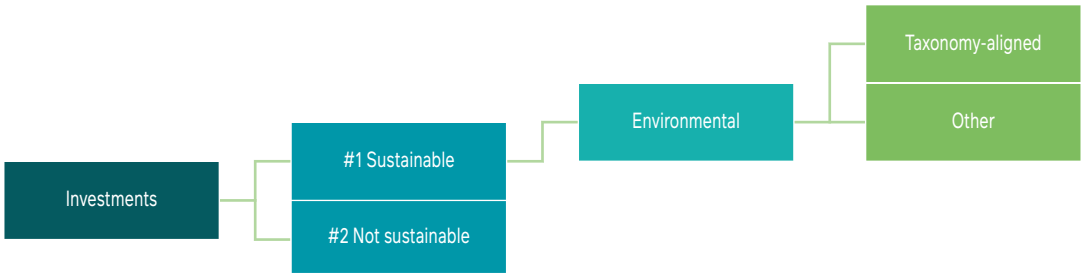
As of 31 March 2023, 96.55% of the Net Asset Value of the Fund was in sustainable investments, which is above the minimum commitment of 80%. Whilst the fund did not commit to invest in investments aligned to the EU Taxonomy, 0.76% of the sustainable investments were aligned to the EU Taxonomy. 95.79% related to investments with environmental objectives and 0% related to investments with a social objective.

3.45 % of the Fund is comprised of "not sustainable" investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The graphic below provides an overview of the asset allocation.



#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**
  The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	46.47%
Information and communication	14.51%
Financial and insurance activities	12.63%
Transportation and storage	7.55%
Wholesale and retail trade; repair of motor vehicles and motorcycles	7.17%
Arts, entertainment and recreation	3.46%
Other	3.15%
Administrative and support service activities	2.64%
Human health and social work activities	2.05%
Water supply; sewerage, waste management and remediation activities	0.36%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 0.76% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

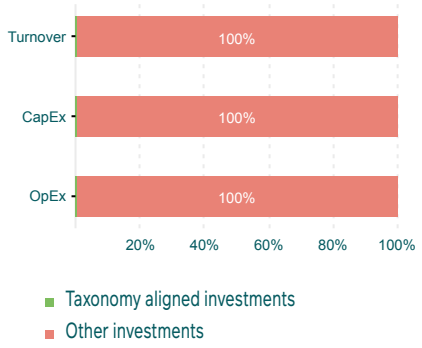
☒ No

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

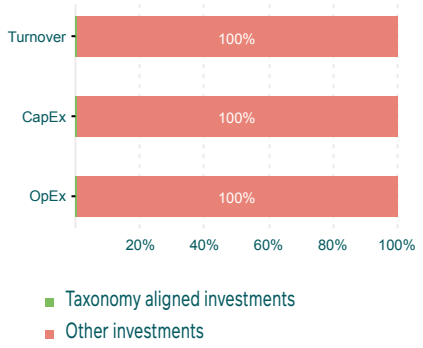
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*
*** As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.*

- **What was the share of investments made in transitional and enabling activities?**
  The share of the Fund's investments made in transitional activities was 0% and in enabling activities was 0.19% over the period. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of transitional activities	0%
Share of enabling activities	0.19%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?
The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 95.79%. This compares to a minimum percentage commitment of 80% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?
The share of sustainable investments with a social objective was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held varying levels of cash, money market funds, and derivatives as "Other" investments, for hedging purposes or in connection with cash held for ancillary liquidity. No minimum environmental or social safeguards are applied, other than as stated below:

Where derivatives are used to take investment exposure to diversified financial indices, these will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund has invested in companies that contribute towards the Paris Agreement climate change goal. Its compliance with the same is reported in the sustainability indicators above.

ESG engagements are also a key focus for the fund in order to help investment companies improve their climate and sustainability standards, to support the fund's sustainable investment objective.

For example, we engaged with German ticketing and live entertainment business CTS Eventim in June 2022, encouraging the company to disclose its scope 1, 2 and 3 carbon emissions (where currently there is no disclosure), and to consider decarbonisation plans, ultimately to be validated by Science Based Targets initiative (SBTi). The company is beginning to focus on reporting its emissions, the majority of which will be scope 3, relating to travel to events, energy use at events and waste. The plan is to provide emissions disclosures in its 2023 annual report, with the publication of targets in 2024, likely to be put to the SBTi.

We followed this up with another engagement in January 2023, to discuss the company's data gathering and target-setting commitments. The company was still trying to determine if it is actually carbon intensive, from a scope 3 perspective (i.e. whether it is responsible for the emissions of people traveling to a concert that it sold the tickets to). M&G's climate team is considering the question for CTS and similar companies, and we will make their findings known to CTS. We now await the next annual report, and will continue to engage with the company.

How did this financial product perform compared to the reference sustainable benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- **How did the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**
  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A

- **How did this financial product perform compared with the broad market index?**
  N/A

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) Investment Funds 1 - M&G (Lux) Positive Impact Fund
Legal Entity Identifier: 549300XGF5HHUXGRO059

Sustainable investment objective

Did this financial product have a sustainable investment objective?

● ● [X] **Yes** ● ● [ ] **No**

[X] It made **sustainable investments with an environmental objective**: 51.48%

- [X] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- [X] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

[X] It made **sustainable investments with a social objective**: 46.47%

[ ] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

- [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- [ ] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] with a social objective

[ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Fund invested in companies that have a positive societal impact through addressing the world's major social and/or environmental challenges, in line with its sustainable investment objective. The strength of the fund's performance against this objective is evaluated in the sustainability indicators section below.

The alignment percentage indicated in the graphic below shows the allocation between sustainable investments made in pursuit of the sustainable investment objective and "Other" investments.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

- **How did the sustainability indicators perform?**

  Please see the below table for an overview of the fund's performance relative to its sustainability indicators.

  The 'Eligibility' figure is a measure of the percentage of fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

  In the reporting period, 97.97% of the fund was held in investments aligned with the UN's Sustainable Development Goals (SDGs). This is in line with the fund's aim of holding impactful companies which contribute towards at least one of the SDGs. Furthermore, 88.3% of the fund's Net Asset Value (NAV) was held in companies participating in Task Force on Climate-related Financial Disclosures (TCFD) reporting. The TCFD provides recommendations for companies to disclose clear, comparable and consistent information about the risks and opportunities presented by climate change, with the aim of improving transparency for investors and other market participants.

  Notably, 31.35% of the fund's NAV was held in companies that have ratified science-based targets, while a further 13.2% of NAV was held in companies that have committed to science-based targets. These companies accounted for 63.3% of the fund's CO2 emissions. Science-based targets are emission reduction targets that are consistent with the pace recommended by climate scientists to achieve the goals of the Paris Agreement, thereby limiting the worst impact of climate change. In other words, if they are in line with emission-reduction levels required to keep the temperature increase below 1.5°C compared to pre-industrial temperatures. These companies are therefore demonstrating their intention to contribute positively towards global climate action, aside from their primary positive social or environmental impact.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Weighted average carbon intensity (WACI)	126.26 tCO2e /€m sales	97.03%	98.09%
Percentage (%) of NAV committed to Science-Based Targets (SBTs)	13.20%	98.01%	56.97%
Percentage (%) of NAV with ratified Science-Based Targets (SBTs)	31.35%	98.01%	56.97%
% of CO2 emissions with Science Based Targets (SBTs)	63.30% tCO2e	97.03%	50.59%
Percentage (%) of NAV participating in Task Force on Climate-Related Financial Disclosures (TCFD) reporting	88.30%	98.01%	99.01%
Percentage (%) of NAV in Climate Solutions companies	7.92%	97.03%	100%
Percentage (%) of NAV in Circular Economy solutions companies	10.56%	98.01%	99.01%
Percentage (%) of NAV investment providing environmental solutions	24.94%	98.01%	99.01%
Percentage (%) of NAV invested in positive impact assets in the Fund	98.93%	100%	99.01%
Percentage (%) of investments by value that is SDG-aligned	97.97%	98.01%	99.01%

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments not cause significant harm to any sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they were required to pass a series of tests, including:
  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful.
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

  Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 80% of the Fund to be invested in sustainable investments, with at least 30% in sustainable investments with a social objective and at least 30% in sustainable investments with an environmental objective.

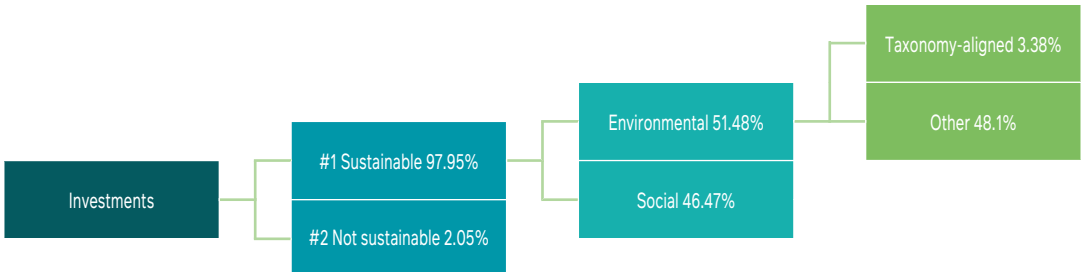
As of 31 March 2023, 97.95% of the Net Asset Value of the Fund was in sustainable investments, which is above the minimum commitment of 80%. None of the sustainable investments were expected to be aligned to the EU Taxonomy. However, 3.38% of the sustainable investments were aligned to the EU Taxonomy, while 48.10% related to investments with environmental objectives and 46.47% related to investments with a social objective.

2.05% of the Fund is comprised of "not sustainable" investments.

Asset allocation describes the share of investments in specific assets.

- ## What was the asset allocation?

  The graphic below provides an overview of the asset allocation.



#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	55.69%
Financial and insurance activities	15.13%
Human health and social work activities	6.55%
Information and communication	4.82%
Water supply; sewerage, waste management and remediation activities	3.72%
Electricity, gas, steam and air conditioning supply	3.16%
Construction	3.15%
Other	2.97%
Other service activities	2.03%
Professional, scientific and technical activities	1.55%
Wholesale and retail trade; repair of motor vehicles and motorcycles	1.03%
Education	0.21%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 3.38% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

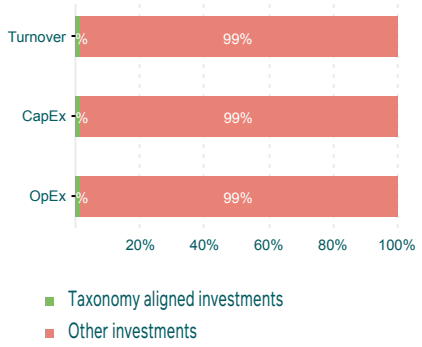
☒ No

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

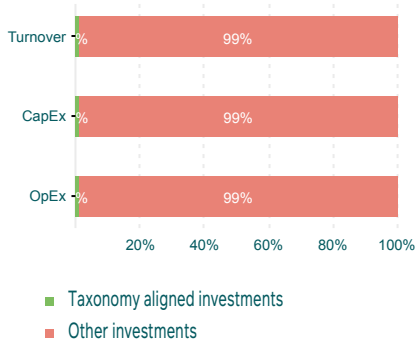
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 100% of the total investments.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**
  The share of the Fund's investments made in transitional and enabling activities over the period was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0%
Share of Enabling Activities	0%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**
  The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 48.10%. This compares to a minimum percentage commitment of 30% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

- **What was the share of socially sustainable investments?**
  The share of sustainable investments with a social objective was 46.47%. This compares to a minimum percentage commitment of 30% stated in the Fund's precontractual disclosure.

- **What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**
  During the reference period the Fund held varying levels of cash, money market funds, and derivatives as "Other" investments, for hedging purposes or in connection with cash held for ancillary liquidity. No minimum environmental or social safeguards are applied, other than as stated below:

  Where derivatives are used to take investment exposure to diversified financial indices, these will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

What actions have been taken to attain the sustainable investment objective during the reference period?
The Fund has invested in companies that have a positive societal impact through addressing the world's major social and/or environmental challenges. Its compliance with the same is reported in the sustainability indicators above.

ESG engagements are also a key focus for the fund in order to help investment companies improve their impact and sustainability standards, to support the fund's sustainable investment objective.

For example, we met with US engineering simulation software developer Ansys to encourage it to establish emission reduction targets and commit to the Science Based Targets initiative (SBTi), to disclose the drivers of its scope 1 and 2 emissions footprint and provide a timeframe for scope 3 disclosures. We also asked for disclosure of the company's 'scope 4' (avoided) emissions, to better allow us to quantify the real world impacts it was delivering.

Elsewhere, we encouraged greater gender diversity on the boards of two of our investee companies – genetic sequencing specialist Oxford Nanopore and solar power component company SolarEdge. We also engaged with Bank of Georgia, to encourage improved disclosure of data around the number of underserved/unbanked people it has served, to help us better measure its positive impact.

How did this financial product perform compared to the reference sustainable benchmark?
N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- **How did the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**
  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A

- **How did this financial product perform compared with the broad market index?**
  N/A

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance)

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**
  The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

  The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

  The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

  Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allowed the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund. Information on how the principal adverse impacts were taken into account will be provided in the Fund's annual report.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

Largest investments	Sector	% Assets	Country
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	3.87%	DE

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

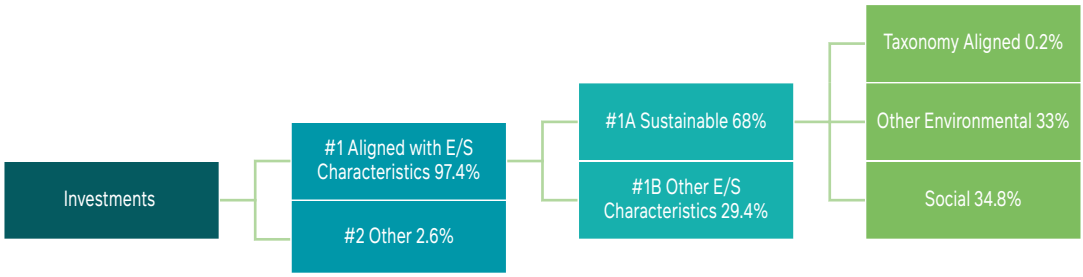
Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 97.37% of NAV as at 31 March 2023. This comprised 68% of NAV in sustainable investments, and the remaining 29.38% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.21% were aligned to the EU Taxonomy. 32.98% related to investments with other environmental characteristics, and 34.81% related to socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The graphic below provides an overview of the asset allocation.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Financial and insurance activities	41.22%
Other	23.23%
Public administration and defence; compulsory social security	13.21%
Manufacturing	8.09%
Information and communication	5.51%
Electricity, gas, steam and air conditioning supply	2.32%
Transportation and storage	2.07%
Real estate activities	1.10%
Administrative and support service activities	0.53%
Wholesale and retail trade; repair of motor vehicles and motorcycles	1.39%
Accommodation and food service activities	1.00%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 0.21% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

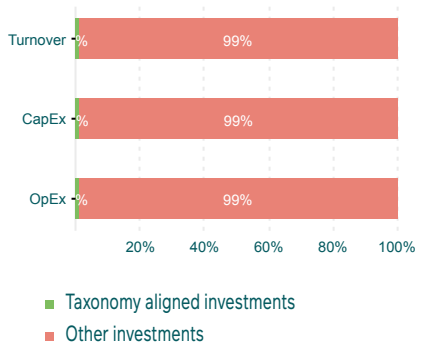
☒ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

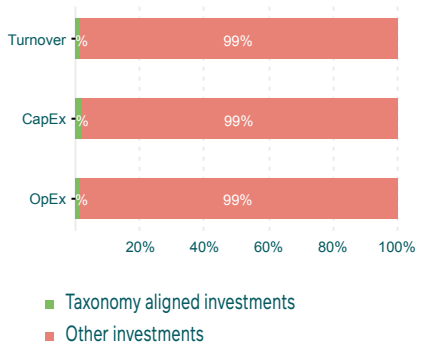
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 81.13% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities 0.17%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of transitional activities	0%
Share of enabling activities	0.17%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?
The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 32.98%.This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?
The share of socially sustainable investments was 34.81%.This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?
During the reference period the Fund held cash and near cash, FX derivatives and similar derivatives (which may include certain technical trades such as government bond futures used for duration trades) as "Other" investments, for normal liquidity management purposes. No minimum environmental or social safeguards were applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e., UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?
The Fund applied an exclusion policy to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators section above.

How did this financial product perform compared to the reference benchmark?
N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A

- **How did this financial product perform compared with the broad market index?**
  N/A

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) Investment Funds 1 - M&G (Lux) Sustainable Allocation Fund
Legal Entity Identifier: 549300G7EE7U31UKHL78

Sustainable investment objective

Did this financial product have a sustainable investment objective?

● ● [x] **Yes** ● ● [ ] **No**

[x] It made **sustainable investments with an environmental objective**: 67.2%

- [x] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- [x] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

[x] It made **sustainable investments with a social objective**: 30.12%

[ ] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

- [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- [ ] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] with a social objective

[ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The fund contributed to a sustainable economy by investing in assets supporting environmental and/or social goals, in particular climate change mitigation, in line with its sustainable investment objective. The strength of the fund's performance against this objective is evaluated in the sustainability indicators section below.

The alignment percentage indicated in the graphic below shows the allocation between sustainable investments made in pursuit of the sustainable investment objective and "Other" investments.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

- **How did the sustainability indicators perform?**

  As part of the climate focus of the fund, we aim to assess our holdings not only relative to their current carbon emissions and emission intensity but also on the basis of their climate transparency, governance and ambition as represented by clear reduction targets.

  It is encouraging to see that a significant amount of holdings now have SBTi-aligned targets. These organisations are increasingly embedding sustainability-led approaches within their organisations that could help prevent the worst impacts of climate change and future-proof their business growth.

  It also encouraging to see that over half of fund holdings now consist of positive impact assets. Our allocation to attractively valued impact assets has increased in recent years as the pool of eligible investments has grown as companies and governments strive to adapt products and solutions to meet the world's social and environmental challenges.

  The fund's declining weighted average carbon emissions intensity reflects the decisions made in the investment process and growing climate data accessibility to inform our decisions. The fund also holds several investments in renewable energy infrastructure and solution providers.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Change in CO2 emissions intensity over the previous three year period CAGR Corporate	-8.24 CAGR 3Y	71.60%	64.14%
Change in CO2 emissions intensity over the previous three year period CAGR Sovereign	-3.53 CAGR 3Y	21.33%	73.90%
Percentage (%) of sovereigns party to the Paris Agreement	73.90%	21.33%	73.90%
Weighted average carbon intensity (WACI) for the fund	59.14 tCO2e /€m sales	71.60%	88.44%
Percentage (%) of NAV with ratified Science-Based Targets (SBTs)	26.44%	83.46%	50.89%
Percentage (%) of corporate issuers participating in the Carbon Disclosure Project (CDP)	68.14%	71.60%	89.61%
Tonnes of CO2 emissions avoided by positive impact investments	385911148 tCO2e	83.47%	17.23%
Percentage (%) of sovereign ranked above the Social Progress Index (SPI) Global Average, which assesses how well a society provides its people with material needs, and does not have a negative 5 year trend	96.53%	21.33%	96.53%
Number of underserved people reached including patients treated, customers served etc. by positive impact investments	110.8 Million people	83.47%	26.60%
Percentage (%) of NAV invested in positive impact assets in the Fund	52.70%	100%	100%

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments not cause significant harm to any sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:
  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful.
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

  Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be invested in sustainable investments, in pursuit of the sustainable investment objective, with at least 20% in sustainable investments with a social objective and at least 30% in sustainable investments with an environmental objective.

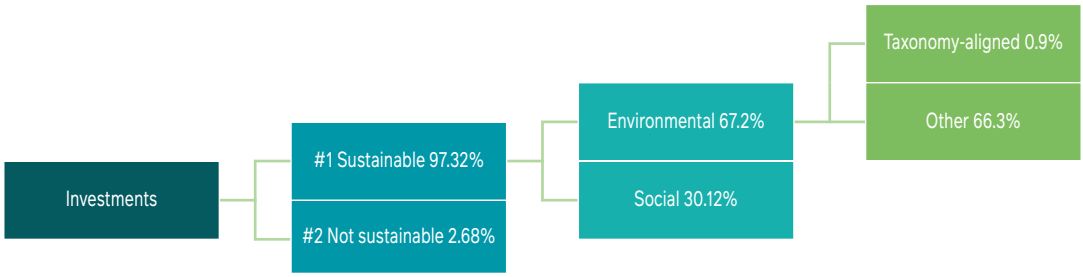
As of 31 March 2023, 97.32% of the Net Asset Value of the Fund was in sustainable investments, which is above the minimum commitment of 70%. Whilst the fund did not commit to invest in investments aligned to the EU Taxonomy, 0.90% of the sustainable investments were aligned to the EU Taxonomy. 66.30% related to investments with environmental objectives and 30.12% related to investments with a social objective.

2.68 % of the Fund is comprised of "not sustainable" investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The graphic below provides an overview of the asset allocation.



#1 Sustainable covers sustainable investments with environmental or social objectives.
#2 Not sustainable includes investments which do not qualify as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Financial and insurance activities	21.55%
Public administration and defence; compulsory social security	20.47%
Manufacturing	18.59%
Activities of extraterritorial organisations and bodies	16.55%
Information and communication	5.85%
Other	5.76%
Real estate activities	2.42%
Electricity, gas, steam and air conditioning supply	2.32%
Human health and social work activities	1.97%
Construction	1.92%
Wholesale and retail trade; repair of motor vehicles and motorcycles	1.18%
Water supply; sewerage, waste management and remediation activities	0.53%
Education	0.45%
Professional, scientific and technical activities	0.44%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 0.90% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

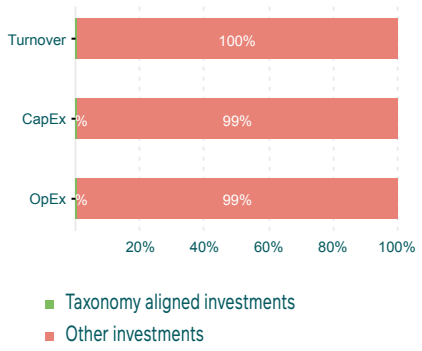
☒ No

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

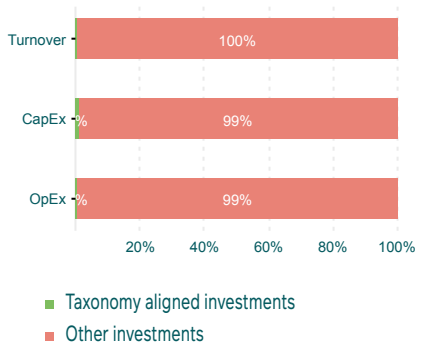
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 76% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*
*** As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.*

- **What was the share of investments made in transitional and enabling activities?**
  The share of the Fund's investments made in transitional activities was 0.02% and in enabling activities was 0.13% over the period. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of transitional activities	0.02%
Share of enabling activities	0.13%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?
The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 66.30%. This compares to a minimum percentage commitment of 30% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?
The share of sustainable investments with a social objective was 30.12%. This compares to a minimum percentage commitment of 20% stated in the Fund's precontractual disclosure.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?
During the reference period the Fund held varying levels of cash, near cash, FX and FX forwards as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied.

As part of the fund merger between the Fund and M&G (Lux) Conservative Allocation Fund on 21 October 2022, two sanctioned Russian-listed securities were transferred into the beneficial ownership of the Fund. As both funds have been prohibited from selling these assets, they have remained in a custody account of M&G (Lux) Conservative Allocation Fund.

What actions have been taken to attain the sustainable investment objective during the reference period?
The Fund contributed to a sustainable economy by investing in assets supporting environmental and/or social goals, in particular climate change mitigation. Its compliance with the same is reported in the sustainability indicators above.

ESG engagements are also a key focus for the fund in order to help investment companies improve their impact and sustainability standards, to support the fund's sustainable investment objective. An example of an engagement carried out in 2022 was with Ball Corporation, the world's leading aluminium packaging specialist. The objective of the engagement was to encourage the firm's decarbonisation plans and push for increased ambition around scope 3 emissions. We met with the company's chief sustainability officer in May 2022 to discuss these matters. The company announced that it will be publishing a recycling roadmap in September 2022, aimed at ensuring a 1.5°C pathway for its Scope 3 emissions.

We divested from LG Corp in the beginning of 2023 following a downgrade in its MSCI ESG score due to governance related issues.

How did this financial product perform compared to the reference sustainable benchmark?
N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- **How did the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**
  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A

- **How did this financial product perform compared with the broad market index?**
  N/A

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

● ● ☐ **Yes** ● ● ☒ **No**

☐ It made **sustainable investments with an environmental objective**:

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**:

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 61.08% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a strategy to achieve a Positive ESG Outcome (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society and to assist it in delivering more sustainable outcomes. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that were considered to do significant harm to environmental and/or social objectives.

The Fund had a higher weighted average ESG rating and lower weighted average carbon intensity than an index used as a proxy for its investment universe ("Positive ESG Outcome"). The Fund's calculation methodology did not include those securities that do not have carbon intensity data respectively, or cash, near cash, some derivatives and some collective investment schemes.

In constructing a portfolio which favours investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings remaining within the narrowed universe. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark has been designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and strategy to achieve a Positive ESG Outcome were met nearly all of the time during the reporting period. The Fund's exclusions were breached on three occasions.

The exclusions were passively breached on one occasion as a result of a holding receiving an ESG rating downgrade. However, as the holding is a Russian sanctioned security, the portfolio is currently unable to trade the stock and it remains as a holding. On another occasion, we accidentally traded on a debut bond issue (Freeport Indonesia) where information was not systematically available to show it was a UNGC violator. The stock was sold the following day and the fund was compensated. Following changes to the Fund's ESG screening in October 2021, the Fund failed to sell a local currency government bond issued in Kazakhstan tenge, which had been bought prior to Freedom House screening being introduced. (Kazakhstan is an ESG-failing country, according to Freedom House rules, and by extension holding its currency is excluded.) The bond matured in May 2023, before the breach was detected, realising a gain for the Fund, and is no longer held by the Fund.

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator.

The 'Eligibility' figure is a measure of the percentage of Sub-Fund's assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 May 2023			
Portfolio weighted average ESG score for the fund	6.37 ESG Score	86.40%	73.71%
Portfolio weighted average ESG score for the Investment Universe	5.25 ESG Score	93.01%	42.21%
Weighted average carbon intensity (WACI) for the fund	126. 93 tCO2e /€m sales	86.40%	76.69%
Weighted average carbon intensity (WACI) for the Investment Universe	584.83 tCO2e /€m sales	93.10%	43.17%

- **...and compared to previous periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they were required to pass a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)

3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

  Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?
For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

Largest investments	Sector	% Assets	Country
BOC AVIATION PTE LTD	Administrative and support service activities	1.91%	US
TSMC GLOBAL LTD	Financial and insurance activities	1.76%	VG
LENOVO GROUP LTD	Manufacturing	1.50%	HK
GREENKO SOLAR MAURITIUS LTD	Other	1.48%	MU
BANGKOK BANK PUBLIC CO LTD (HONG K	Financial and insurance activities	1.29%	HK

TREASURY NOTE	Public administration and defence; compulsory social security	2.21%	US

What was the proportion of sustainability-related investments?

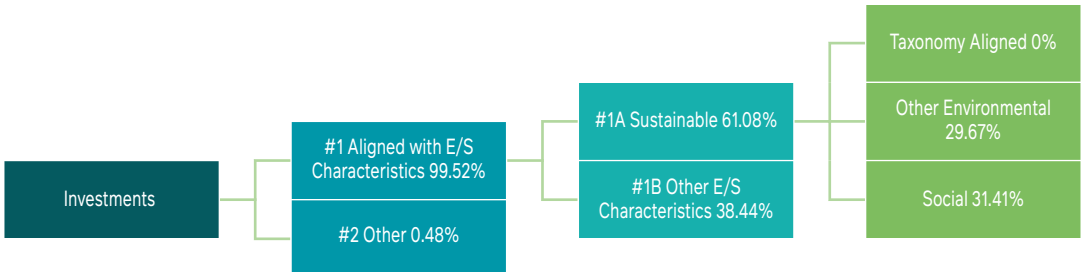
In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 40% of the Fund to be in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 99.52% of NAV as at 31st March 2023. This comprised 61.08% of NAV in sustainable investments, and the remaining 38.44% of NAV in investments with other environmental and or social characteristics.

The Fund did not commit to invest in investments aligned to the EU Taxonomy, 0% were aligned to the EU Taxonomy, while 29.67% related to investments with other environmental characteristics, and 31.41% related to socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**
  The graphic below provides an overview of the asset allocation.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Financial and insurance activities	46.01%
Information and communication	12.32%
Public administration and defence; compulsory social security	11.50%
Manufacturing	9.15%
Mining and quarrying	4.30%
Electricity, gas, steam and air conditioning supply	3.57%
Administrative and support service activities	3.37%
Other	2.75%
Wholesale and retail trade; repair of motor vehicles and motorcycles	2.40%
Transportation and storage	1.34%
Activities of extraterritorial organisations and bodies	0.90%
Real estate activities	0.87%
Accommodation and food service activities	0.59%
Construction	0.52%
Agriculture, forestry and fishing	0.22%
Other service activities	0.20%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was
0%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

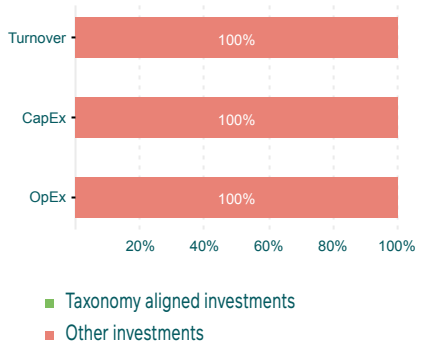
☒ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

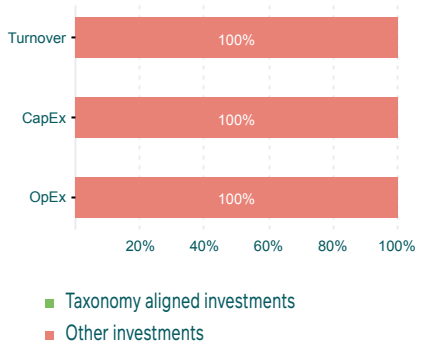
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 88.19% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional and enabling activities over the period was 0%. This compares to a minimum percentage commitment of 0% stated in the Sub-Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0%
Share of Enabling Activities	0%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 29.67%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 31.41%.This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, near cash and money market funds, and FX derivatives as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach and met its strategy to achieve a Positive ESG Outcome. Its compliance with the same is reported in the sustainability indicators above.

How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A

- **How did this financial product perform compared with the broad market index?**
  N/A

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) Sustainable Global High Yield Bond Fund
Legal Entity Identifier: 222100FNZWQINHRH8058

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

● ● ☐ **Yes** ● ● ☒ **No**

☐ It made **sustainable investments with an environmental objective**:

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**:

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63.66% of sustainable investments

- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a strategy to achieve a Positive ESG Outcome (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society and to assist it in delivering more sustainable outcomes. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that were considered to do significant harm to environmental and/or social objectives.

The Fund had a higher weighted average ESG rating and lower weighted average carbon intensity than an index used as a proxy for its investment universe ("Positive ESG Outcome"). The Fund's calculation methodology did not include those securities that do not have carbon intensity data respectively, or cash, near cash, some derivatives and some collective investment schemes.

In constructing a portfolio which favours investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings remaining within the narrowed universe.

At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark has been designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance)

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and strategy to achieve a Positive ESG Outcome were met nearly all of the time during the reporting period. The Fund's exclusions were passively breached on one occasion as a result of a stock receiving an ESG rating downgrade, following which it was sold.

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator.

The 'Eligibility' figure is a measure of the percentage of Sub-Fund's assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Weighted average carbon intensity (WACI) for the fund	120.10 tCO2e /€m sales	89.54%	87.45%
Weighted average carbon intensity (WACI) for the Investment Universe	355.28 tCO2e /€m sales	93.13%	42.06%
Portfolio weighted average ESG score for the fund	6.13 ESG Score	89.54%	87.80%
Portfolio weighted average ESG score for the Investment Universe	5.21 ESG Score	93.13%	41%

- **...and compared to previous periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager uses a series of proprietary tests based on available data to determine whether and how an investment makes positive contribution(s) towards environmental and social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they were required to pass a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e., not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

  Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above.

  These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?
For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

What was the proportion of sustainability-related investments?

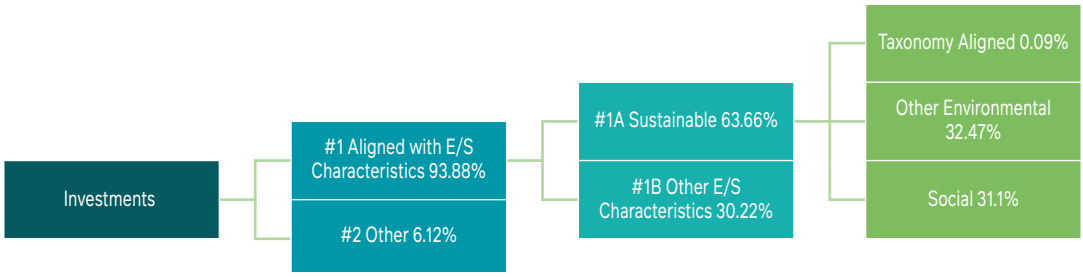
In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 40% of the Fund to be in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 93.88% of NAV as at 31 March 2023. This comprised 63.66% of NAV in sustainable investments, and the remaining 30.22% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.09% were aligned to the EU Taxonomy. 32.47% related to investments with other environmental characteristics, and 31.10% related to socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**
  The graphic below provides an overview of the asset allocation.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Financial and insurance activities	33.62%
Information and communication	17.84%
Manufacturing	15.65%
Other	8.35%
Wholesale and retail trade; repair of motor vehicles and motorcycles	6.09%
Human health and social work activities	5.74%
Administrative and support service activities	2.59%
Transportation and storage	2.26%
Public administration and defence; compulsory social security	2.13%
Construction	1.68%
Accommodation and food service activities	1.68%
Real estate activities	0.99%
Professional, scientific and technical activities	0.61%
Water supply; sewerage, waste management and remediation activities	0.39%
Other service activities	0.21%
Electricity, gas, steam and air conditioning supply	0.18%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0.09%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

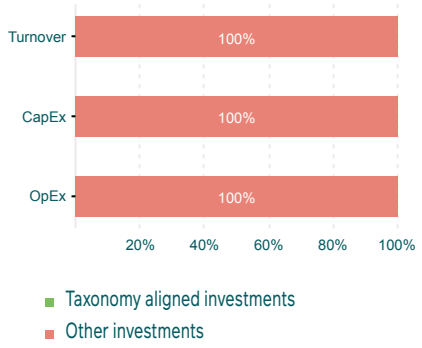
☒ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

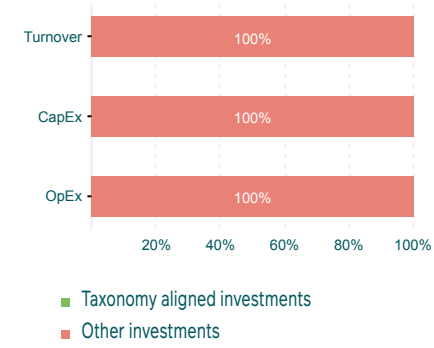
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 100% of the total investments.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities 0.02%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of transitional activities	0.00%
Share of enabling activities	0.02%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 32.47%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 31.10%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, near cash, FX and similar derivatives (which may include certain technical trades such as government bond futures used for duration trades) as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach and met its strategy to achieve a Positive ESG Outcome. Its compliance with the same is reported in the sustainability indicators above.

How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A

- **How did this financial product perform compared with the broad market index?**
  N/A

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) Investment Funds 1 - M&G (Lux) Sustainable Macro Flexible Credit Fund
Legal Entity Identifier: 254900MBYTIXGWFWME22

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

● ● ☐ **Yes** ● ● ☒ **No**

☐ It made **sustainable investments with an environmental objective**:

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**:

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 67.57% of sustainable investments

- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a strategy to achieve a Positive ESG Outcome (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society and to assist it in delivering more sustainable outcomes. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that were considered to do significant harm to environmental and/or social objectives.

The Fund had a higher weighted average ESG rating and lower weighted average carbon intensity than an index used as a proxy for its investment universe ("Positive ESG Outcome"). The Fund's calculation methodology did not include those securities that do not have carbon intensity data respectively, or cash, near cash, some derivatives and some collective investment schemes.

In constructing a portfolio which favours investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings remaining within the narrowed universe. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark has been designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance)

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**
  The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and strategy to achieve a Positive ESG Outcome were met at all times during the reporting period.

  Please see the below table for an overview of the Fund's performance relative to its sustainability indicator.

  The 'Eligibility' figure is a measure of the percentage of Sub-Fund's assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Portfolio weighted average ESG score for the fund	7.15 ESG Score	56.98%	68.96%
Portfolio weighted average ESG score for the Investment Universe	6.13 ESG Score	52.68%	28.47%
Weighted average carbon intensity (WACI) for the fund	82.96 tCO2e /€m sales	56.98%	70.72%
Weighted average carbon intensity (WACI) for the Investment Universe	271.92 tCO2e /€m sales	52.67%	29.20%

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  The Fund may allocate to sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment.

  The Investment Manager uses a series of proprietary tests based on available data to determine whether and how an investment makes positive contribution(s) towards environmental and social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they were required to pass a series of tests, including:

  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?
For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

Largest investments	Sector	% Assets	Country
FRANCE (REPUBLIC OF)	Public administration and defence; compulsory social security	3.04%	FR

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 51% of the Fund to be in Sustainable Investments.

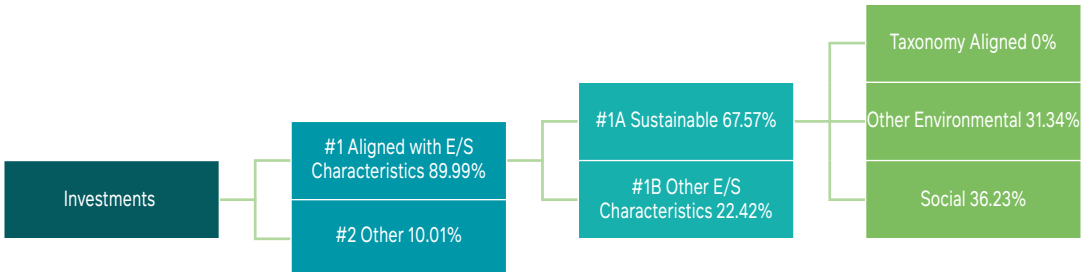
Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 89.99% of NAV as at 31st March 2023. This comprised 67.57% of NAV in sustainable investments, and the remaining 22.42% of NAV in investments with other environmental and or social characteristics.

The Fund did not commit to invest in investments aligned to the EU Taxonomy, 0% were aligned to the EU Taxonomy, while 31.34% related to investments with other environmental characteristics, and 36.23% related to socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

- ## What was the asset allocation?

  The graphic below provides an overview of the asset allocation.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Financial and insurance activities	48.69%
Public administration and defence; compulsory social security	19.05%
Other	9.00%
Manufacturing	7.86%
Information and communication	3.50%
Real estate activities	3.01%
Electricity, gas, steam and air conditioning supply	1.72%
Transportation and storage	1.70%
Professional, scientific and technical activities	0.99%
Administrative and support service activities	0.97%
Wholesale and retail trade; repair of motor vehicles and motorcycles	0.97%
Human health and social work activities	0.79%
Activities of extraterritorial organisations and bodies	0.69%
Administrative and support service activities	0.61%
Accommodation and food service activities	0.42%
Construction	0.26%
Other service activities	0.19%
Water supply; sewerage, waste management and remediation activities	0.15%
Mining and quarrying	0.05%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

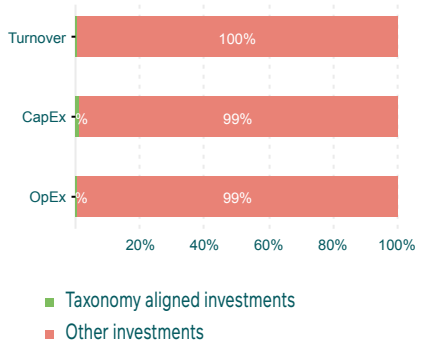
☒ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

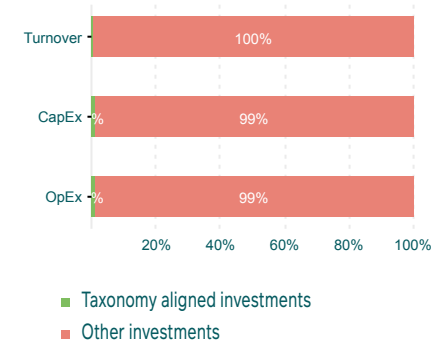
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 93.37% of the total investments.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of the Fund's investments made in transitional and enabling activities over the period was 0.01%. This compares to a minimum percentage commitment of 0.16% stated in the Sub-Fund's precontractual disclosure.

Activity	Percentage Investments
Share of transitional activities	0.01%
Share of enabling activities	0.16%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?
The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 31.34%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?
The share of socially sustainable investments was 36.23%.This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?
During the reference period the Fund held cash, near cash and money market funds, FX, interest rate derivatives and similar derivatives (which may include certain technical trades such as government bond futures used for duration trades) as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics

What actions have been taken to meet the environmental and/or social characteristics during the reference period?
The Fund applied an exclusion policy to achieve its Exclusionary Approach and met its strategy to achieve a Positive ESG Outcome. Its compliance with the same is reported in the sustainability indicators above.

How did this financial product perform compared to the reference benchmark?
N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A

- **How did this financial product perform compared with the broad market index?**
  N/A

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) Sustainable Multi Asset Growth Fund
Legal Entity Identifier: 254900DTG2UFJ7LAT088

Sustainable investment objective

Did this financial product have a sustainable investment objective?

● ● [x] **Yes** ● ● [ ] **No**

[x] It made **sustainable investments with an environmental objective**: 62.39%

- [x] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- [x] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

[x] It made **sustainable investments with a social objective**: 35.04%

[ ] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

- [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- [ ] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] with a social objective

[ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The fund contributed to a sustainable economy by investing in assets supporting environmental and/or social goals, in particular climate change mitigation, in line with its sustainable investment objective. The strength of the fund's performance against this objective is evaluated in the sustainability indicators section below.

The alignment percentage indicated in the graphic below shows the allocation between sustainable investments made in pursuit of the sustainable investment objective and "Other" investments.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

As part of the climate focus of the fund, we aim to assess our holdings not only relative to their current carbon emissions and emission intensity but also on the basis of their climate transparency, governance and ambition as represented by clear reduction targets.

It is encouraging to see that a significant amount of holdings now have SBTi-aligned targets. These organisations are increasingly embedding sustainability-led approaches within their organisations that could help prevent the worst impacts of climate change and future-proof their business growth.

It also encouraging to see that nearly half of fund holdings now consist of positive impact assets. Our allocation to attractively valued impact assets has increased in recent years as the pool of eligible investments has grown as companies and governments strive to adapt products and solutions to meet the world's social and environmental challenges.

The fund's declining weighted average carbon emissions intensity reflects the decisions made in the investment process and growing climate data accessibility to inform our decisions. The fund also holds several investments in renewable energy infrastructure and solution providers.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Change in CO2 emissions intensity over the previous three year period CAGR Corporate	-8.00 CAGR 3Y	85.52%	86.16%
Change in CO2 emissions intensity over the previous three year period CAGR Sovereign	-3.83 CAGR 3Y	9.28%	62.17%
Percentage (%) of sovereigns party to the Paris Agreement	62.17%	9.28%	62.17%
Weighted average carbon intensity (WACI) for the fund	78.79 tCO2e /€m sales	85.52%	91.35%
Percentage (%) of NAV with ratified Science-Based Targets (SBTs)	33.71%	92.20%	61.30%
Percentage (%) of corporate issuers participating in the Carbon Disclosure Project (CDP)	78.92%	85.52%	92.69%
Tonnes of CO2 emissions avoided by positive impact investments	399575143 tCO2e	92.20%	20.80%
Percentage (%) of sovereign ranked above the Social Progress Index (SPI) Global Average, which assesses how well a society provides its people with material needs, and does not have a negative 5 year trend	100%	9.28%	100%
Number of underserved people reached including patients treated, customers served etc. by positive impact investments	248 Million people	92.20%	38.12%
Percentage (%) of NAV invested in positive impact assets in the Fund	46%	100%	100%

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments not cause significant harm to any sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:
  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful.
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

  The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

  Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

What was the proportion of sustainability-related investments?

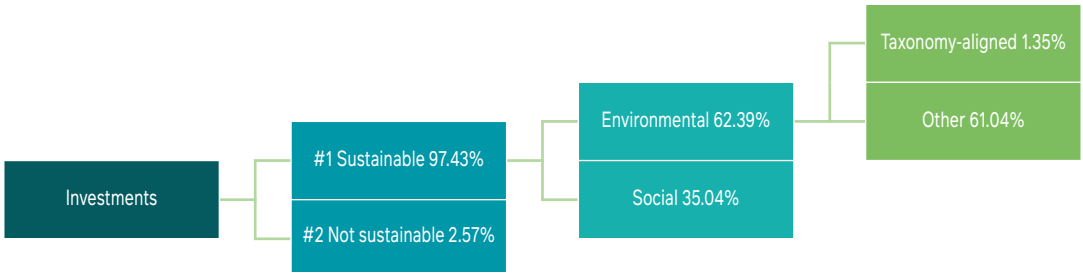
In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be invested in sustainable investments, in pursuit of the sustainable investment objective, with at least 20% in sustainable investments with a social objective and at least 30% in sustainable investments with an environmental objective.

As of 31 March 2023, 97.43% of the Net Asset Value of the Fund was in sustainable investments, which is above the minimum commitment of 70%. Whilst the fund did not commit to invest in investments aligned to the EU Taxonomy, 1.35% of the sustainable investments were aligned to the EU Taxonomy. 61.04% related to investments with environmental objectives and 35.04% related to investments with a social objective.

2.57 % of the Fund is comprised of "not sustainable" investments.

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**
  The graphic below provides an overview of the asset allocation.



#1 Sustainable covers sustainable investments with environmental or social objectives.
#2 Not sustainable includes investments which do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**
  The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Financial and insurance activities	30.05%
Manufacturing	28.80%
Public administration and defence; compulsory social security	9.28%
Information and communication	6.79%
Electricity, gas, steam and air conditioning supply	4.38%
Real estate activities	4.09%
Construction	3.96%
Other	2.69%
Human health and social work activities	2.44%
Wholesale and retail trade; repair of motor vehicles and motorcycles	2.29%
Activities of extraterritorial organisations and bodies	2.05%
Education	1.00%
Water supply; sewerage, waste management and remediation activities	0.95%
Professional, scientific and technical activities	0.75%
Transportation and storage	0.48%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 1.35% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

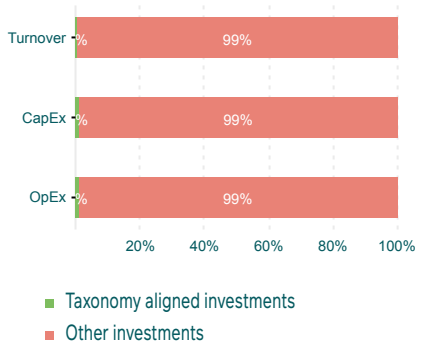
☒ No

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

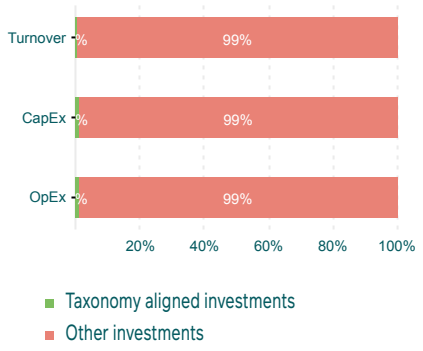
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 90.63% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*
*** As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.*

- **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities was 0.01% and in enabling activities was 0.14% over the period. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of transitional activities	0.01%
Share of enabling activities	0.14%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 61.04%. This compares to a minimum percentage commitment of 30% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 35.04%. This compares to a minimum percentage commitment of 20% stated in the Fund's precontractual disclosure.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held varying levels of cash, near cash, FX and FX forwards as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund contributed to a sustainable economy by investing in assets supporting environmental and/or social goals, in particular climate change mitigation. Its compliance with the same is reported in the sustainability indicators above.

ESG engagements are also a key focus for the fund in order to help investment companies improve their impact and sustainability standards, to support the fund's sustainable investment objective. An example of an engagement carried out in 2022 was with Ball Corporation, the world's leading aluminium packaging specialist. The objective of the engagement was to encourage the firm's decarbonisation plans and push for increased ambition around scope 3 emissions. We met with the company's chief sustainability officer in May 2022 to discuss these matters. The company announced that it will be publishing a recycling roadmap in September 2022, aimed at ensuring a 1.5°C pathway for its Scope 3 emissions.

We divested from LG Corp in the beginning of 2023 following a downgrade in its MSCI ESG score due to governance related issues.

How did this financial product perform compared to the reference sustainable benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- **How did the reference benchmark differ from a broad market index?**
  N/A
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**
  N/A
- **How did this financial product perform compared with the reference benchmark?**
  N/A
- **How did this financial product perform compared with the broad market index?**
  N/A

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: M&G (Lux) Sustainable Optimal Income Bond Fund
Legal Entity Identifier: 254900JKCO00UZ0A2X81

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

● ● ☐ **Yes** ● ● ☒ **No**

☐ It made **sustainable investments with an environmental objective**:

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**:

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 67.29% of sustainable investments

- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a strategy to achieve a Positive ESG Outcome (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society and to assist it in delivering more sustainable outcomes. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that were considered to do significant harm to environmental and/or social objectives.

The Fund had a higher weighted average ESG rating and lower weighted average carbon intensity than an index used as a proxy for its investment universe ("Positive ESG Outcome"). The Fund's calculation methodology did not include those securities that do not have carbon intensity data respectively, or cash, near cash, some derivatives and some collective investment schemes.

In constructing a portfolio which favours investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings remaining within the narrowed universe. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark has been designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**
  The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and strategy to achieve a Positive ESG Outcome were met nearly all of the time during the reporting period. The Fund's exclusions were passively breached on one occasion as a result of a stock receiving an ESG rating downgrade, following which it was sold.

  Please see the below table for an overview of the Fund's performance relative to its sustainability indicator.

  The 'Eligibility' figure is a measure of the percentage of Sub-Fund's assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability Indicator Name	Value	Eligibility	Coverage
As at - 31 March 2023			
Weighted average carbon intensity (WACI) for the fund	55.13 tCO2e /€m sales	64.34%	91.60%
Weighted average carbon intensity (WACI) for the Investment Universe	90.81 tCO2e /€m sales	62.99%	47.82%
Portfolio weighted average ESG score for the fund	7.22 ESG Score	64.34%	90.54%
Portfolio weighted average ESG score for the Investment Universe	6.49 ESG Score	62.99%	47.84%

- **...and compared to previous periods?**
  The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment. The Investment Manager uses a series of proprietary tests based on available data to determine whether and how an investment makes positive contribution(s) towards environmental and social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they were required to pass a series of tests, including:

  1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
  2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
  3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments must passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?
For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 to 31/03/2023

Largest investments	Sector	% Assets	Country
TREASURY NOTE	Public administration and defence; compulsory social security	3.67%	US
TREASURY NOTE	Public administration and defence; compulsory social security	3.32%	US
TREASURY NOTE	Public administration and defence; compulsory social security	2.62%	US
TREASURY NOTE	Public administration and defence; compulsory social security	1.96%	US
FRANCE (REPUBLIC OF)	Public administration and defence; compulsory social security	1.75%	US
FRANCE (REPUBLIC OF)	Public administration and defence; compulsory social security	1.66%	FR
TREASURY NOTE	Public administration and defence; compulsory social security	1.62%	US
TREASURY NOTE	Public administration and defence; compulsory social security	1.20%	US
UK CONV GILT	Public administration and defence; compulsory social security	1.02%	GB
AVIVA PLC	Financial and insurance activities	0.80%	GB
MORGAN STANLEY	Financial and insurance activities	0.74%	US
LEGAL & GENERAL GROUP PLC	Financial and insurance activities	0.72%	GB
DEUTSCHE TELEKOM INTERNATIONAL FIN	Financial and insurance activities	0.70%	NL
TELEFONICA EMISIONES SAU	Financial and insurance activities	0.70%	ES
TREASURY BOND	Public administration and defence; compulsory social security	0.69%	US

What was the proportion of sustainability-related investments?

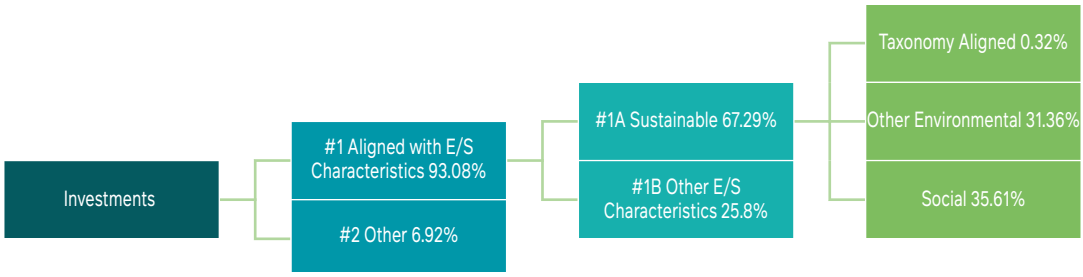
In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 51% of the Fund to be in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 93.08% of NAV as at 31 March 2023. This comprised 67.29% of NAV in sustainable investments, and the remaining 25.80% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.32% were aligned to the EU Taxonomy. 31.36% related to investments with other environmental characteristics, and 35.61% related to socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**
  The graphic below provides an overview of the asset allocation.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Financial and insurance activities	45.67%
Public administration and defence; compulsory social security	26.80%
Other	8.86%
Information and communication	5.99%
Manufacturing	5.31%
Electricity, gas, steam and air conditioning supply	2.10%
Real estate activities	1.09%
Administrative and support service activities	0.87%
Human health and social work activities	0.87%
Accommodation and food service activities	0.77%
Activities of extraterritorial organisations and bodies	0.59%
Construction	0.53%
Wholesale and retail trade; repair of motor vehicles and motorcycles	0.31%
Transportation and storage	0.17%
Professional, scientific and technical activities	0.07%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0.32%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

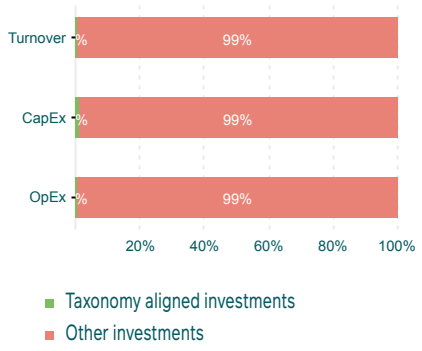
☒ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

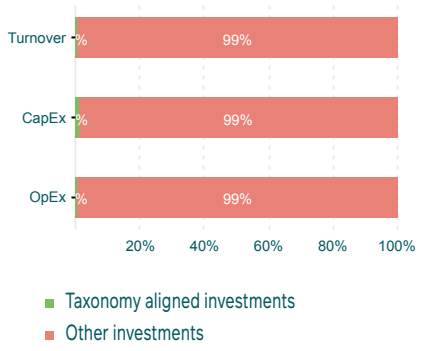
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 72.12% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities 0.07%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.07%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report. The Fund will provide historic comparison in the next Periodic Report.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 31.36%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 35.61%.This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, near cash, FX and similar derivatives (which may include certain technical trades such as government bond futures used for duration trades) as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach and met its strategy to achieve a Positive ESG Outcome. Its compliance with the same is reported in the sustainability indicators above.

How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

1933 Act The United States Securities Act of 1933, as amended.

1940 Act The United States Securities Act of 1940, as amended.

Accumulation shares Shares in respect of which all earnings are accumulated and added to the capital property of a Fund.

Administration agreement The administration agreement dated 14 September 2018 pursuant to which the Administrator is appointed to provide services with respect to the Fund.

Administrator State Street Bank International GmbH, Luxembourg Branch.

Ancillary liquid assets Refers to liquid assets such as cash deposits (at sight).

Articles Articles of incorporation of the Fund.

Auditor Ernst & Young S.A.

Base currency The base currency of the Fund is the Euro.

Business day Unless otherwise stated in a Supplement, any day when the banks are fully open for normal banking business in both England and Luxembourg (excluding 24 December and 31 December).

Class or Class of shares or Share class A class of shares in issue or to be issued.

CSDR European regulation No. 09/20142 aiming to improve securities settlement in the EU and within its central securities depositories (CSDs)

CSSF The Luxembourg Commission de Surveillance du Secteur Financier, being the Luxembourg regulatory authority in charge of the supervision of UCIs in the Grand-Duchy of Luxembourg 'CSSF Circular 04/146' (the CSSF Circular 04/146 of 17 June 2004 regarding the protection of undertakings for collective investment and their investors against late trading and market timing practices), as amended 'CSSF Regulation 12/02' the CSSF Regulation 12/02 of 14 December 2012 on the fight against money laundering and terrorist financing, as amended.

Dealing day Unless otherwise stated in a Supplement, any Business Day.

Dealing request deadline Such time in respect of any relevant Dealing Day as shall be specified in the relevant Supplement for that Fund or such other time as the Directors may determine.

Depositary State Street Bank International GmbH, Luxembourg Branch.

Depositary agreement The depositary agreement dated 5 December 2016 pursuant to which the Depositary is appointed to provide depositary services to the Fund.

Directors The members of the Board of Directors of the Fund for the time being and any duly constituted committee thereof and any successors to such members as may be appointed from time to time.

Distribution shares Shares in respect of which dividends may be distributed periodically to Shareholders.

ESMA The European Securities and Markets Authority or its successor authority.

ESMA guidelines 2014/937 Refers to the guidelines on ETFs and other UCITS issues published on 1 August 2014 by ESMA (ESMA/2014/937), as implemented in Luxembourg and entered into force on 1 October 2014 as may be amended, supplemented and/or implemented from time to time.

EU The European Union.

Euribor The Euro Interbank Offered Rate, which is based on the average interest rates at which a panel of European banks borrow money from one another.

FATCA The provisions of the US HIRE Act generally referred to as the Foreign Account Tax Compliance Act.

FCA The Financial Conduct Authority or its successor authority in the United Kingdom.

FCA rules The rules of the FCA, as the same may be amended from time to time.

Fund M&G (Lux) Investment Funds 1.

Group or Group of companies Companies belonging to the same body of undertakings and which must draw up consolidated accounts in accordance with Council Directive 83/349/EEC of 13 June 1983 on consolidated accounts and according to recognised international accounting rules, as amended.

Hedged share classes Those classes where a currency hedging strategy is applied.

Glossary (unaudited)

Ineligible investor Any person to whom a transfer of shares (legally or beneficially) or by whom a holding of shares (legally or 3 beneficially) would or, in the opinion of the Directors, might: a) be in breach of any law (or regulation by a competent authority) of any country or territory by virtue of which the person in question is not qualified to hold such shares; or b) require the Fund, the Management Company or the Investment manager to be registered under any law or regulation whether as an investment fund or otherwise, or cause the Fund to be required to comply with any registration requirements in respect of any of its shares, whether in the United States of America or any other jurisdiction; or c) cause the Fund, its Shareholders, the Management Company or the Investment manager some legal, regulatory, taxation, pecuniary or material administrative disadvantage which the Fund, its Shareholders, the Management Company or the Investment manager might not otherwise have incurred or suffered 'Initial Offer Period' (the period set by the Directors in relation to any Fund or Class of shares as the period during which shares are initially on offer and as specified in the relevant Supplement).

Institutional investor As defined in the UCI Law and by guidelines or recommendations issued by the CSSF from time to time.

Investment management agreement The investment management agreement dated 7 December 2018 pursuant to which the investment manager is appointed to provide discretionary investment management services to the Fund and the sub-funds.

Investment manager M&G Investment Management Limited.

IRS The US Internal Revenue Service.

KID Key Information Documents, a legally required pre-contractual document describing in brief the objectives, policies, risks, costs, past performance and other relevant information for a given Share Class of a given sub-fund.

Luxembourg The Grand-Duchy of Luxembourg.

Management Agreement The management agreement dated 1 October 2018 pursuant to which the Management Company is appointed by the Fund.

Management Company M&G Luxembourg S.A.

Member state A member state of the European Union. The states that are contracting parties to the agreement creating the European Economic Area other than the member states of the European Union, within the limits set forth by this agreement 4 and related acts, are considered as equivalent to member states of the European Union.

Money market instruments Instruments normally dealt on the money market which are liquid, and have a value which can be accurately determined at any time, and instruments eligible as money market instruments, as defined by guidelines issued by the CSSF from time to time.

Net Asset Value The net asset value of the Fund, a sub-fund or a Class (as the context may require) as calculated in accordance with the Articles and the Prospectus.

Net Asset Value per share The Net Asset Value in respect of any sub-fund or Class divided by the number of shares of the relevant sub-fund or Class in issue at the relevant time.

Non-Member State Any state which is not a Member State.

OECD The Organisation for Economic Co-operation and Development.

OECD CRS OECD Common Reporting Standard.

OTC (over the counter) derivative A derivative instrument entered into with an approved counterparty outside of an exchange.

Price per share Unless otherwise defined in a Supplement, the Net Asset Value per Share attributable to the shares issued in respect of a sub-fund or Class, plus or minus any attributable swing price adjustment, as described in the section of this Prospectus entitled 'Swing Pricing and Dilution Levy'.

Prospectus The Prospectus, as may be amended or supplemented from time to time.

Reference currency The currency of the relevant sub-fund.

Registrar and transfer agent RBC Investor Services Bank S.A.

Registrar and transfer agency agreement The registrar and transfer agency agreement dated 6 December 2016 pursuant to which the registrar and transfer agent is appointed to provide certain registration and transfer agency services in respect of the Fund.

Regulated market A regulated market according to Directive 2004/39/EC of the European Parliament and of the Council of 21 April 2004 on markets in financial instruments amending Council Directive 2000/12/EC of the European Parliament and of the Council and repealing Council Directive 93/22/EC ('MiFID'). A list of EU-regulated markets according to MiFID is regularly updated and published by the European Commission.

Share or shares Shares of any Class in the sub-fund as the context requires.

Glossary (unaudited)

Share class currency The currency of the relevant Class.

Shareholder A person registered as the holder of shares on the sub-fund's register of shareholders.

Sub-fund A specific pool of assets established within the Fund, within the meaning of Article 181 of the UCI Law.

Sub-fund manager An employee of M&G FA Limited who manages the investment of money on its behalf.

Supplement A supplement to the Prospectus specifying certain information in respect of a sub-fund and/or one or more classes.

Transferable securities (i) shares and other securities equivalent to shares ('shares'); (ii) bonds and other debt instruments ('debt securities'); and (iii) any other negotiable securities that carry the right to acquire any such transferable securities by subscription or exchange, to the extent they do not qualify as Techniques and Instruments as described in the Prospectus (Appendix 1) for M&G (Lux) Investment Funds 1.

UCI(s) Undertaking(s) for collective investment.

UCI law The Luxembourg law of 17 December 2010 on undertakings for collective investment, as may be amended from time to time.

UCITS An undertaking for collective investment in transferable securities established pursuant to the UCITS Directive.

UCITS directive The Directive 2009/65/EC of the European Parliament and Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities, as amended by Directive 2014/91/EU as regards depositary functions, remuneration policies and sanctions.

United States, US or USA The United States of America (including the States and District of Columbia) and any of its territories, possessions and other areas subject to its jurisdiction.

Valuation day Unless otherwise stated in a Supplement, any Business Day.

M&G Luxembourg S.A. is authorised and regulated by the Commission de Surveillance du Secteur Financier. The Fund's registered office is 16, boulevard Royal, 2449 Luxembourg, Luxembourg.
