Twenty First Funds

Société d'Investissement à Capital Variable

Prospectus

May 2021

The Company is registered under part I of the Law of 2010. The Company qualifies as a UCITS. The Company is managed by Twenty First Capital on the basis of freedom of services pursuant to chapter 15 of the Law of 2010.

The Shares (as such term is defined below) have not been registered under the United States Securities Act of 1933 and may not be offered directly or indirectly in the United States of America (including its territories and possessions) to nationals or residents thereof or to persons normally resident therein, or to any partnership or persons connected thereto unless pursuant to any applicable statute, rule or interpretation available under United States law.

The distribution of this prospectus (the “**Prospectus**”) in other jurisdictions may also be restricted; persons into whose possession this Prospectus comes are required to inform themselves about and to observe any such restrictions. This document does not constitute an offer by anyone in any jurisdiction in which such offer is not authorised or to any person to whom it is unlawful to make such offer.

Any information or representation given or made by any person which is not contained herein or in any other document which may be available for inspection by the public should be regarded as unauthorised and should accordingly not be relied upon. Neither the delivery of this Prospectus nor the offer, issue or sale of Shares in the Company shall under any circumstances constitute a representation that the information given in this Prospectus is correct as at any time subsequent to the date of this Prospectus.

All references herein to times and hours are to Luxembourg local time.

Shareholders are informed that their personal data or information given in the subscription documents or otherwise in connection with an application to subscribe for Shares, as well as details of their shareholding, will be stored in digital form or otherwise, and processed by the Company, acting as data controller, in compliance with the provisions of the Data Protection Law (as defined under section 1 “Definition” of this Prospectus) and section “Data Protection” hereof.

This Prospectus contains forward-looking statements, which provide current expectations or forecasts of future events. Words such as “may”, “expects”, “future” and “intends”, and similar expressions, may identify forward-looking statements, but the absence of these words does not mean that a statement is not forward-looking. Forward-looking statements include statements about the Company’s plans, objectives, expectations and intentions and other statements that are not historical facts. Forward-looking statements are subject to known and unknown risks and uncertainties and inaccurate assumptions that could cause actual results to differ materially from those expected or implied by the forward-looking statements. Prospective Shareholders should not unduly rely on these forward-looking statements, which apply only as of the date of this Prospectus.

The descriptions in the main body of this Prospectus are generally applicable to all Compartments. However, where different descriptions or exceptions appear in the Appendix, the descriptions or exceptions in such Appendix shall prevail. Thus, it is advisable to carefully review the relevant Appendices together with the main body of the Prospectus.

2. THE COMPANY

TWENTY FIRST FUNDS is an open-ended collective investment company ("*société d'investissement à capital variable*") established under the laws of the Grand Duchy of Luxembourg, with an "umbrella" structure comprising different Compartments each of which may be divided in separate Classes. In accordance with the Law of 2010, a subscription of Shares constitutes acceptance of all terms and provisions of the Prospectus and the Articles.

The Company offers investors, within the same investment vehicle, a choice between several Compartments which are distinguished mainly by their specific investment policy and/or by the currency in which they are denominated. The specifications of each Compartment are described in the relevant Appendix.

The assets and liabilities of each Compartment, as further described under Section 10.5 "Allocation of Assets and Liabilities among the Compartments", shall be segregated from the assets and liabilities of those of the other Compartments, with creditors having recourse only to the assets of the Compartment concerned and where the liabilities cannot be satisfied out of the assets of another Compartment. As between the Shareholders and creditors, each Compartment will be deemed to be a separate entity.

The Board of Directors may, at any time, decide on the creation of further Compartments and in such case, the Appendix will be updated. Each Compartment may have one or more Classes.

3. INVESTMENT POLICIES AND RESTRICTIONS

3.1 General Investment Policies for all Compartments

The provisions of this section apply only insofar as they are compatible with the specific investment policy disclosed in the relevant Appendix.

The Board of Directors determines the specific investment policy and investment objectives of each Compartment, which are described in more detail in the respective Appendix. The investment objectives of the Compartments will be carried out in compliance with the investment and borrowing restrictions set forth in section 3.3.

Each Compartment seeks an above-average total investment return, comprised principally of long-term capital appreciation, by investing in a diversified portfolio of transferable securities or in financial derivative instruments as described in respect of the investment objective and policies in the relevant Appendix. There can be no assurance that the investment objectives of any Compartment will be achieved.

In the general pursuit of obtaining an above-average total investment return as may be consistent with the preservation of capital, efficient portfolio management techniques may be employed to the extent permitted by the investment and borrowing restrictions stipulated by the Board of Directors.

The Compartments may from time to time also hold, on an ancillary basis, cash reserves or include other permitted assets with a short remaining maturity, especially in times when rising interest rates are expected.

Investors are invited to refer to the description of the investment policy of each Compartment in the Appendix for details.

The historical performance of the Compartments will be disclosed in the KIID for each Class. Past performance is not necessarily indicative of future results.

3.2 Specific Investment Policies for each Compartment

The specific investment policy of each Compartment is described in the Appendix.

3.3 Investment and Borrowing Restrictions

The Articles provide that the Board of Directors shall, based upon the principle of spreading of risks, determine the corporate and investment policy of the Company and the investment and borrowing restrictions applicable, from time to time, to the investments of the Company.

The Board of Directors has decided that the following restrictions shall apply to the investments of the Company and, as the case may be and unless otherwise specified for a Compartment in the Appendix, to the investments of each of the Compartments:

I.

- (1) The Company, for each Compartment, may invest in:
 - (a) transferable securities and money market instruments admitted to or dealt in on an Eligible Market;
 - (b) recently issued transferable securities and money market instruments, provided that the terms of issue include an undertaking that application will be made for admission to official listing on an Eligible Market and such admission is secured within one year of the issue;
 - (c) units of UCITS and/or other UCI, whether situated in a Member State or not, provided that:
 - (i) such other UCIs have been authorised under laws which provide that they are subject to supervision considered by the CSSF to be equivalent to that laid down in EU law, and that cooperation between authorities is sufficiently ensured,
 - (ii) the level of protection for unit holders in such other UCIs is equivalent to that provided for unit holders in a UCITS, and in particular that the rules on assets segregation, borrowing, lending, and uncovered sales of transferable securities and money market instruments are equivalent to the requirements of the UCITS Directive,
 - (iii) the business of such other UCIs is reported in half-yearly and annual reports to enable an assessment of the assets and liabilities, income and operations over the reporting period,
 - (iv) no more than 10% of the assets of the UCITS or of the other UCIs, whose acquisition is contemplated, can, according to their constitutional documents, in aggregate be invested in units of other UCITS or other UCIs;
 - (d) deposits with credit institutions which are repayable on demand or have the right to be withdrawn, and maturing in no more than 12 months, provided that the credit institution has its registered office in a Member State or, if the registered office of the credit institution is situated in a third country, provided that it is subject to prudential rules considered by the Luxembourg regulatory authority as equivalent to those laid down in EU law;
 - (e) financial derivative instruments, including equivalent cash-settled instruments, dealt in on an Eligible Market and/or financial derivative instruments dealt in over-the-counter ("**OTC derivatives**"), provided that:

- (i) the underlying consists of instruments covered by this section I. (1), financial indices, interest rates, foreign exchange rates or currencies, in which the Compartments may invest according to their investment objective;
 - (ii) the counterparties to OTC derivative transactions are institutions subject to prudential supervision, and belonging to the categories approved by the CSSF;
 - (iii) the OTC derivatives are subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or closed by an offsetting transaction at any time at their fair value at the Company's initiative;
- (f) money market instruments other than those dealt in on an Eligible Market, if the issue or the issuer of such instruments are themselves regulated for the purpose of protecting investors and savings, and provided that such instruments are:
- (i) issued or guaranteed by a central, regional or local authority or by a central bank of a Member State, the European Central Bank, the EU or the European Investment Bank, a third country or, in case of a Federal State, by one of the members making up the federation, or by a public international body to which one or more Member States belong, or
 - (ii) issued by an undertaking any securities of which are dealt in on Eligible Markets, or
 - (iii) issued or guaranteed by an establishment subject to prudential supervision, in accordance with criteria defined by EU law, or by an establishment which is subject to and complies with prudential rules considered by the CSSF to be at least as stringent as those laid down by EU law, such as, but not limited to, a credit institution which has its registered office in a country which is an OECD Member State and a FATF State.
 - (iv) issued by other bodies belonging to the categories approved by the CSSF provided that investments in such instruments are subject to investor protection equivalent to that laid down in the first, the second or the third indent and provided that the issuer is a company whose capital and reserves amount to at least ten million Euro (10,000,000 EUR) and which presents and publishes its annual accounts in accordance with the fourth directive 78/660/EEC, is an entity which, within a group of companies which includes one or several listed companies, is dedicated to the financing of the group or is an entity which is dedicated to the financing of securitisation vehicles which benefit from a banking liquidity line.
- (2) In addition, the Company may invest a maximum of 10% of the net assets of any Compartment in transferable securities and money market instruments other than those referred to under I. (1) above.
- (3) Under the conditions and within the limits laid down by the Law of 2010, the Company may, to the widest extent permitted by the Regulations (i) create a Compartment qualifying either as a Feeder Compartment or as a Master Fund, (ii) convert any existing Compartment into a Feeder Compartment, or (iii) change the Master Fund of any of its Feeder Compartment.
- (a) A Feeder Compartment shall invest at least 85% of its assets in the units of a Master Fund.
 - (b) A Feeder Compartment may hold up to 15% of its assets in one or more of the following:

- (i) ancillary liquid assets in accordance with paragraph (ii) below;
 - (ii) financial derivative instruments, which may be used only for hedging purposes.
- (c) For the purposes of compliance with paragraph III (1) (c) below, the Feeder Compartment shall calculate its global exposure related to financial derivative instruments by combining its own direct exposure under the second indent of under (b) with either:
 - (i) the Master Fund actual exposure to financial derivative instruments in proportion to the Feeder Compartment investment into the Master Fund; or
 - (ii) the Master Fund potential maximum global exposure to financial derivative instruments provided for in the Master UCITS management regulations or instruments of incorporation in proportion to the Feeder UCITS investment into the Master UCITS.

II. The Company may hold on an ancillary basis cash.

III.

(1)

- (a) The Company may invest no more than 10% of the net assets of any Compartment in transferable securities and money market instruments issued by the same issuing body.
- (b) The Company may not invest more than 20% of the net assets of any Compartment in deposits made with the same body.
- (c) The risk exposure of a Compartment to a counterparty in an OTC derivative transaction may not exceed 10% of its net assets when the counterparty is a credit institution referred to in I. (1) d) above or 5% of its net assets in other cases.

(2) Moreover, where the Company holds on behalf of a Compartment investment in transferable securities and money market instruments of issuing bodies which individually exceed 5% of the net assets of such Compartment, the total of all such investments must not account for more than 40% of the total net assets of such Compartment.

This limitation does not apply to deposits and OTC derivative transactions made with financial institutions subject to prudential supervision.

Notwithstanding the individual limits laid down in paragraph (1), the Company may not combine for each Compartment:

- (a) investments in transferable securities or money market instruments issued by a single body,
- (b) deposits made with a single body, and/or
- (c) exposures arising from OTC derivative transactions undertaken with a single body
- (d) in excess of 20% of the net assets of each Compartment.

(3) The limit of 10% laid down in sub-paragraph III. (1) (a) above is increased to a maximum of 35% in respect of transferable securities or money market instruments which are issued or guaranteed by a Member State, its local authorities, or by another Eligible State, including the federal agencies of the United States of America, Federal National Mortgage Association and

Federal Home Loan Mortgage Corporation, or by public international bodies of which one or more Member States are members.

- (4) The limit of 10% laid down in sub-paragraph III. (1) (a) is increased to 25% for certain bonds when they are issued by a credit institution which has its registered office in a Member State and is subject by law, to special public supervision designed to protect bondholders. In particular, sums deriving from the issue of these bonds must be invested in conformity with the law in assets which, during the whole period of validity of the bonds, are capable of covering claims attaching to the bonds and which, in case of bankruptcy of the issuer, would be used on a priority basis for the repayment of principal and payment of the accrued interest.

If a Compartment invests more than 5% of its net assets in the bonds referred to in this sub-paragraph and issued by one issuer, the total value of such investments may not exceed 80% of the value of the assets of the Compartment.

- (5) The transferable securities and money market instruments referred to in paragraphs (3) and (4) shall not be included in the calculation of the limit of 40% in paragraph (2).

The limits set out in sub-paragraphs (1), (2), (3) and (4) may not be aggregated and, accordingly, investments in transferable securities or money market instruments issued by the same issuing body, in deposits or in derivative instruments effected with the same issuing body may not, in any event, exceed a total of 35% of any Compartment's net assets;

Companies which are part of the same group for the purposes of the establishment of consolidated accounts, as defined in accordance with the seventh Council Directive 83/349/EEC of 13 June 1983 based on the Article 54 (3) (g) of the Treaty on consolidated accounts, as amended, or in accordance with recognised international accounting rules, are regarded as a single body for the purpose of calculating the limits contained in this paragraph III. (1) to (5).

The Company may cumulatively invest up to 20% of the net assets of a Compartment in transferable securities and money market instruments within the same group.

- (6) **Notwithstanding the above provisions, the Company is authorised to invest up to 100% of the net assets of any Compartment, in accordance with the principle of risk spreading, in transferable securities and money market instruments issued or guaranteed by a Member State, by its local authorities or agencies, or by another OECD Member State, the G20 or Singapore or by public international bodies of which one or more member states of the EU, provided that such Compartment must hold securities from at least six different issues and securities from one issue do not account for more than 30% of the net assets of such Compartment.**

IV.

- (1) Without prejudice to the limits laid down in paragraph V, the limits provided in paragraph III. (1) to (5) are raised to a maximum of 20% for investments in shares and/or bonds issued by the same issuing body if the aim of the investment policy of a Compartment is to replicate the composition of a certain stock or bond index which is sufficiently diversified, represents an adequate benchmark for the market to which it refers, is published in an appropriate manner and disclosed in the relevant Compartment's investment policy.
- (2) The limit laid down in paragraph (1) is raised to 35% where this proves to be justified by exceptional market conditions, in particular on Regulated Markets where certain transferable securities or money market instruments are highly dominant. The investment up to this limit is only permitted for a single issuer.

V.

- (1) The Company may not acquire shares carrying voting rights which should enable it to exercise significant influence over the management of an issuing body.
- (2) The Company may acquire no more than:
 - (a) 10% of the non-voting shares of the same issuer;
 - (b) 10% of the debt securities of the same issuer;
 - (c) 10% of the money market instruments of the same issuer;

These limits under second and third indents may be disregarded at the time of acquisition, if at that time the gross amount of debt securities or of the money market instruments or the net amount of the instruments in issue cannot be calculated.

The provisions of paragraph V shall not be applicable to transferable securities and money market instruments issued or guaranteed by a Member State or its local authorities or by any other Eligible State, or issued by public international bodies of which one or more member states of the EU are members.

These provisions are also waived as regards shares held by the Company in the capital of a company incorporated in a non-member state of the EU which invests its assets mainly in the securities of issuing bodies having their registered office in that State, where under the legislation of that State, such a holding represents the only way in which the Company can invest in the securities of issuing bodies of that State provided that the investment policy of the company from the non-member state of the EU complies with the limits laid down in paragraph III. (1) to (5), V. (1) and (2) and VI.

VI.

- (1) Unless otherwise provided for in the Appendix for a Compartment, no more than 10% of a Compartment's net assets may be invested in aggregate in the units of UCITS and/or other UCIs referred to in paragraph I. (1) (c).

In the case the restriction of the above paragraph is not applicable to a specific Compartment as provided in its investment policy, (i) such Compartment may acquire units of UCITS and/or other UCIs referred to in paragraph I. (1) (c) provided that no more than 20% of the Compartment's net assets be invested in the units of a single UCITS or other UCI, and (ii) investments made in units of UCIs other than UCITS may not in aggregate exceed 30% of the net asset of a Compartment.

For the purpose of the application of this investment limit, each Compartment of a UCITS and UCI with multiple Compartments is to be considered as a separate issuer provided that the principle of segregation of the obligations of the various Compartments vis-à-vis third parties is ensured.

- (2) The underlying investments held by the UCITS or other UCIs in which the Company invests do not have to be considered for the purpose of the investment and borrowing restrictions set forth under III. (1) to (5) above.
- (3) When the Company invests in the units of UCITS and/or other UCIs linked to the Company by common management or control, no subscription or redemption fees may be charged to the Company on account of its investment in the units of such other UCITS and/or UCIs, except for any applicable dealing charge payable to the UCITS and/or UCIs. In the case where a substantial proportion of the net assets are invested in investment funds the Appendix of the

relevant Compartment will specify the maximum management fee (excluding any performance fee, if any) charged to the Compartment and each of the UCITS or other UCIs concerned.

- (4) The Company may acquire no more than 25% of the units of the same UCITS or other UCI. This limit may be disregarded at the time of acquisition if at that time the net amount of the units in issue cannot be calculated. In case of a UCITS or other UCI with multiple Compartments, this restriction is applicable by reference to all units issued by the UCITS or other UCI concerned, all Compartments combined.

VII.

- (1) The Company may not borrow for the account of any Compartment amounts in excess of 10% of the net assets of that Compartment, any such borrowings to be from banks and to be effected only on a temporary basis, provided that the Company may acquire foreign currencies by means of back to back loans;
- (2) The Company may not grant loans to or act as guarantor on behalf of third parties.
- (3) This restriction shall not prevent the Company from acquiring transferable securities, money market instruments or other financial instruments referred to in I. (1) (c), (e) and (f) which are not fully paid.
- (4) The Company may not carry out uncovered sales of transferable securities, money market instruments or other financial instruments.
- (5) The Company may acquire movable or immovable property which is essential for the direct pursuit of its business.
- (6) The Company may not acquire either precious metals or certificates representing them.

VIII.

- (1) The Company needs not comply with the limits laid down in this chapter when exercising subscription rights attaching to transferable securities or money market instruments which form part of its assets. While ensuring observance of the principle of risk spreading, recently created Compartments may derogate from paragraphs III. (1) to (5), IV. and VI. (1) and (2) for a period of six months following the date of their creation.
- (2) If the limits referred to in paragraph (2) are exceeded for reasons beyond the control of the Company or as a result of the exercise of subscription rights, it must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interest of its Shareholders.
- (3) To the extent that an issuer is a legal entity with multiple Compartments where the assets of the Compartment are exclusively reserved to the investors in such Compartment and to those creditors whose claim has arisen in connection with the creation, operation or liquidation of that Compartment, each Compartment is to be considered as a separate issuer for the purpose of the application of the risk spreading rules set out in paragraphs III. (1) to (5), IV. and VI.

- IX. Each Compartment may, subject to the conditions provided for in the Articles as well as this Prospectus, subscribe, acquire and/or hold securities to be issued or issued by one or more Compartments of the Company without the Company being subject to the requirements of the Luxembourg law of 10 August 1915 on commercial companies, as amended, with respect to the subscription, acquisition and/or the holding by a company of its own Shares, under the condition however that:

- (1) the target Compartment does not, in turn, invest in the Compartment invested in this target Compartment;
- (2) no more than 10% of the assets of the target Compartment whose acquisition is contemplated may, pursuant to the Articles be invested in aggregate in units of other target Compartments of the same Company;
- (3) voting rights, if any, attaching to the relevant securities are suspended for as long as they are held by the Compartment concerned and without prejudice to the appropriate processing in the accounts and the periodic reports; and
- (4) in any event, for as long as these securities are held by the Company, their value will not be taken into consideration of the calculation of the net assets of the Company for the purposes of verifying the minimum threshold of the net assets imposed by the Law of 2010.

3.4 Financial Derivative Instruments

As specified in I. (1) (e) above, the Company may in respect of each Compartment invest in financial derivative instruments.

The Company shall ensure that its global exposure relating to derivative instruments does not exceed the total net value of its net assets. The exposure is calculated taking into account the current value of the Underlying Assets, the counterparty risk, future market movements and the time available to liquidate the positions.

Each Compartment may invest in financial derivative instruments within the limits laid down in I. (1) (e), provided that the exposure to the underlying assets does not exceed in aggregate the investment limits laid down in clause III. (1) to (5). When a Compartment invests in index-based financial derivative instruments, these investments do not have to be combined to the limits laid down in III. When a transferable security or money market instrument embeds a derivative, the latter must be taken into account when complying with the requirements of this restriction. When a Compartment qualifies as a Feeder Compartment, that Feeder Compartment shall calculate its global exposure related to financial derivative instruments in accordance with Section 3 I. (3) above.

The Compartments may use financial derivative instruments for investment purposes and for hedging purposes, within the limits of the Law of 2010. Under no circumstances shall the use of these instruments cause a Compartment to diverge from its investment policy.

3.5 SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS

The Company and any of its Compartments may employ SFTs for reducing risks (hedging), generating additional capital or income or for cost reduction purposes. Any use of SFTs for investment purposes will be in line with the risk profile and risk diversification rules applicable to the Company and any of its Compartments. The Company will engage in the following transactions:

(i) "securities lending" or "securities borrowing" means a transaction by which a counterparty transfers securities subject to a commitment that the borrower will return equivalent securities on a future date or when requested to do so by the transferor, that transaction being considered as securities lending for the counterparty transferring the securities and being considered as securities borrowing for the counterparty to which they are transferred;

(ii) "repurchase transaction" means a transaction governed by an agreement by which a counterparty transfers securities or guaranteed rights relating to title to securities where that guarantee is issued by a recognised exchange which holds the rights to the securities and the agreement does not allow a counterparty to transfer or pledge a particular security to more than one counterparty at a time, subject to a commitment to repurchase them, or substituted securities of the same description at a specified

price on a future date specified, or to be specified, by the transferor, being a repurchase agreement for the counterparty selling the securities and a reverse repurchase agreement for the counterparty buying them;

(iii) "buy-sell back transaction" or "sell-buy back transaction" means a transaction by which a counterparty buys or sells securities, commodities, or guaranteed rights relating to title to securities, agreeing, respectively, to sell or to buy back securities or such guaranteed rights of the same description at a specified price on a future date, that transaction being a buy-sell back transaction for the counterparty buying the securities or guaranteed rights, and a sell-buy back transaction for the counterparty selling them, such buy- sell back transaction or sell-buy back transaction not being governed by a repurchase agreement or by a reverse- repurchase agreement within the meaning of item (ii) above.

The Company and any of its Compartments may further enter into swap contracts relating to any financial instruments or indices, including TRSs. Total return swaps involve the exchange of the right to receive the total return, coupons plus capital gains or losses, of a specified reference asset, index or basket of assets against the right to make fixed or floating payments. As such, the use of TRSs or other derivatives with similar characteristics allows gaining synthetic exposure to certain markets or underlying assets without investing directly (and/or fully) in these underlying assets.

The Company or any of its delegates will report the details of any SFT and TRSs concluded to a trade repository or ESMA, as the case may be in accordance with the SFTR. SFTs and TRSs may be used in respect of any instrument that is eligible under article 50 of the UCITS Directive.

The assets that may be subject to SFTs and TRS are limited to equities.

The maximum and expected proportion of assets that may be subject to SFTs and TRSs will be set out for each Compartment in the relevant appendix.

The counterparties to the SFTs and TRS will be selected on the basis of very specific criteria taking into account notably their legal status, country of origin, and minimum credit rating. These financial counterparties will in any case comply with article 3 of SFTR.

The Company will collateralize its SFTs and TRS pursuant to the provisions set forth hereunder in section "Management of collateral of collateral and collateral policy".

As a principle, assets subject to SFTs and TRSs become the property of the counterparty of the Company and the assets of equivalent type will be returned to the Company at the maturity of the transaction. As a consequence, during the life of the transaction, the assets will not be held by the Depository.

Any collateral posted in favour of the Company or any of its Compartments under a title transfer arrangement should be held by the Depository. Such collateral may be held by one of the Depository's correspondents or sub-custodians provided that the Depository has delegated the custody of the collateral to such correspondent or sub-custodian and the depository remains liable subject to the provisions of the Law, if the collateral is lost by the sub-custodian. Collateral posted in favour of the Company or any of its Compartments under a security interest arrangement (e.g., a pledge) can be held by the Depository or a third party custodian which is subject to prudential supervision, and which is unrelated to the provider of the collateral.

Collateral received by the Company can be re-used in line with the provisions of the ESMA Guidelines on ETFs and other UCITS issues (ESMA/2012/832), as revised from time to time, released by the CSSF under CSSF Circulars 08/356, 13/559 and 14/592.

Policy on sharing of return generated by SFTs and TRS:

The majority of net revenues achieved from efficient portfolio management transactions or SFTs remain with the relevant Compartment.

Direct and indirect operational costs and fees may be deducted from the revenues delivered to the Compartment. These costs will not exceed the below percentages of the gross revenues:

securities lending or securities borrowing	5%
repurchase transaction	N/A
buy-sell back transaction or sell-buy back transaction	N/A
TRS	5%

These fees may be paid to counterparties of the Company such as agents or other intermediaries as defined under article 3 of SFTR and providing services in connection with TRS and SFTs as normal compensation of their services. Details of such amounts and counterparties will be disclosed in the annual report of the Company.

3.6 Use of Techniques and Instruments relating to Transferable Securities and Money Market Instruments

The Company, in order to generate additional revenue for Shareholders, may engage in securities lending transactions subject to complying with the provisions set forth in CSSF Circular 08/356 and the provisions on efficient management portfolio techniques set-forth in CSSF Circular 14/592.

In accordance with the CSSF Circular 14/592, all revenues arising from efficient portfolio management techniques, net of any direct and indirect operational costs/fees, will be returned to the Company unless otherwise provided by the Appendix. In particular, fees and cost may be paid to the Management Company and other intermediaries providing services in connection with efficient portfolio management techniques as normal compensation of their services. Such fees may be calculated as a percentage of gross revenues earned by the Company through the use of efficient portfolio management techniques. Information on direct and indirect operational costs and fees that may be incurred in this respect as well as the identity of the entities to which such costs and fees are paid – as well as any relationship they have with the Depository Bank or Management Company - will be available in the annual report of the Company, if applicable, and disclosed in the Appendices. The Company may enter into repurchase agreements which consist in the purchase and sale of securities whereby the terms of the agreement entitle the seller to repurchase from the purchaser the securities at a price and at a time agreed amongst the two parties at the conclusion of the agreement.

The Company may act either as purchaser or as seller in repurchase transactions. Its entering in such agreements is however subject to the following rules:

- The Company may purchase or sell securities in the context of a repurchase agreement only if its counterpart is a highly rated financial institution which are experts in this type of transactions and which are subject to prudential supervision rules considered by the Luxembourg regulatory authority as equivalent to those prescribed by EU law.

- During the lifetime of a repurchase agreement, the Company may not sell the securities which are the object of the agreement either before the repurchase of the securities by the counterparty has been carried out or the repurchase period has expired.
- The Company must ensure to maintain the value of purchased securities subject to a repurchase obligation at a level such that it is able, at any time, to meet its obligations to redeem its own Shares.
- The Company must ensure that it is able at any time to recall any security that has been lent out or terminate any securities lending agreement into which it has entered
- When the Company enters into a reverse repurchase agreement, it must ensure that it is able at any time to recall the full amount of cash or to terminate the reverse repurchase agreement on either an accrued basis or a mark-to-market basis. When the cash is recallable at any time on a mark-to-market basis, the mark-to-market value of the reverse repurchase agreement should be used for the calculation of the net asset value of the Company.
- When the Company enters into a repurchase agreement, it should ensure that it is able at any time to recall any securities subject to the repurchase agreement or to terminate the repurchase agreement into which it has entered.

3.7 Management of collateral for OTC Derivative transactions and efficient portfolio management techniques

Where the Company enters into OTC derivative transactions and efficient portfolio management techniques, all collateral used to reduce counterparty risk exposure should comply with the following criteria at all times:

- (a) Liquidity – any collateral received other than cash should be highly liquid and traded on a regulated market or multilateral trading facility with transparent pricing in order that it can be sold quickly at a price that is close to pre-sale valuation. Collateral received should also comply with the provisions of paragraph V above.
- (b) Valuation – collateral received should be valued on at least a daily basis and assets that exhibit high price volatility should not be accepted as collateral unless suitably conservative haircuts are in place.
- (c) Issuer credit quality – collateral received should be of high quality.
- (d) Correlation – the collateral received by the Company must be issued by an entity that is independent from the counterparty and is expected not to display a high correlation with the performance of the counterparty.
- (e) Collateral diversification (asset concentration) – collateral should be sufficiently diversified in terms of country, markets and issuers. The criterion of sufficient diversification with respect to issuer concentration is considered to be respected if the Company receives from a counterparty of efficient portfolio management and OTC derivative transactions a basket of collateral with a maximum exposure to a given issuer of 20% of its net asset value. When the Company is exposed to different counterparties, the different baskets of collateral should be aggregated to calculate the 20% limit of exposure to a single issuer.

A Compartment may be fully collateralized in different transferable securities and money market instruments issued or guaranteed by a Member State, one or more of its local authorities, a third country, or a public international body to which one or more Member States belong, provided that the Company receives securities from at least six different issues and that securities from any single issue should not account for more than 30% of the NAV. Should a Compartment be fully collateralized in securities issued or guaranteed by a

Member State, the relevant Appendix should identify the Member States, local authorities, or public international bodies issuing or guaranteeing securities which they are able to accept as collateral for more than 20% of their net asset value.

Risks linked to the management of collateral, such as operational and legal risks, should be identified, managed and mitigated by the risk management process.

Detailed information regarding the nature of eligible collateral to be received by each Compartment, as well as relevant applicable haircuts is provided in each relevant Appendix.

- (f) Risks linked to the management of collateral, such as operational and legal risks, must be identified, managed and mitigated by the risk management process.
- (g) Where there is a title transfer, the collateral received should be held by the Depositary. For other types of collateral arrangement, the collateral can be held by a third party custodian which is subject to prudential supervision, and which is unrelated to the provider of the collateral.
- (h) Collateral received should be capable of being fully enforced by the Company at any time without reference to or approval from the counterparty.
- (i) Non-cash collateral received should not be sold, re-invested or pledged.
- (j) Cash collateral received should only be:
 - (i) placed on deposit with entities prescribed in paragraph I. (1) (d) above;
 - (ii) invested in high-quality government bonds;
 - (iii) used for the purpose of reverse repo transactions provided the transactions are with credit institutions subject to prudential supervision and the Company is able to recall at any time the full amount of cash on accrued basis;
 - (iv) invested in short-term money market funds.
- (k) Re-invested cash collateral should be diversified in accordance with the diversification requirements applicable to non-cash collateral.

3.8 Exercise of Voting Rights

The Company will exercise its voting rights in respect of instruments held by the Company in each Compartment in accordance with the voting policy of the Management Company or as the case may be the Investment Manager.

4. RISK-MANAGEMENT PROCESS

The Management Company must employ a risk-management process which enables it to monitor and measure at any time the risk of the positions in its portfolios and their contribution to the overall risk profile of its portfolios.

In accordance with the Law of 2010 and the applicable regulations, in particular CSSF Circular 11/512, the Management Company uses for each Compartment a risk-management process which enables it to assess the exposure of each Compartment to market, liquidity and counterparty risks, and to all other risks, including operational risks, which are material to that Compartment. The Management Company may use the Value-at-Risk (VaR) or commitment approach to monitor and measure the global exposure as further specified for each Compartment in the relevant Appendix.

5. RISK WARNINGS

The following is a general description of a number of risks which may affect the value of Shares. See also the section of the relevant Appendix for a discussion of additional risks particular to a specific issue of Shares. The description of the risks made below is not, nor is it intended to be, exhaustive. Not all risks listed necessarily apply to each issue of Shares, and there may be other considerations that should be taken into account in relation to a particular issue. What factors will be of relevance to a particular Compartment will depend upon a number of interrelated matters including, but not limited to, the nature of the Shares and the Compartment's Investment Policy.

No investment should be made in the Shares until careful consideration of all these factors has been made.

The Company bears the general risks laid down below. However, each Compartment is subject to specific risks, which the Board of Directors will seek to lower.

Past performance of a specific Compartment is not necessarily a guide to future performance and Shares should be regarded as a medium to long-term investment.

5.1 Introduction

The value of investments and the income from them, and therefore the value of and income from Shares relating to a Compartment can go down as well as up and an investor may not get back the amount the investor invests. Due to the various commissions and fees which may be payable on the Shares, an investment in Shares should be viewed as medium to long term. Short or leveraged funds are associated with higher risks and may better be considered as short to medium term investments. An investment in a Compartment should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. Investors should only reach an investment decision after careful consideration with their legal, tax, accounting, financial and other advisers. The legal, regulatory, tax and accounting treatment of the Shares can vary in different jurisdictions. Any descriptions of the Shares set out in the Prospectus, including any Appendix, are for general information purposes only. Investors should recognise that the Shares may decline in value and should be prepared to sustain a total loss of their investment. Risk factors may occur simultaneously and/or may compound each other resulting in an unpredictable effect on the value of the Shares.

5.2 General risks

Valuation of the Shares: the value of a Share will fluctuate as a result of changes in the value of, amongst other things, the Compartment's assets, the Underlying Asset and, where applicable, the financial derivative instruments used to expose the Compartment to the Underlying Asset synthetically.

Valuation of the Underlying Asset and the Compartment's assets: the Compartment's assets, the Underlying Asset or the financial derivative instruments used to expose the Compartment to the Underlying Asset synthetically may be complex and specialist in nature. Valuations for such assets or financial derivative instruments will usually only be available from a limited number of market professionals which frequently act as counterparties to the transactions to be valued. Such valuations are often subjective and there may be substantial differences between any available valuations.

Risks associated with discretionary management: the Management Company and/or the Investment Manager (if any) has implemented its investment strategies to create well-diversified funds. The securities to which the Compartments are exposed are selected based on the quantitative and systematic models developed by the Investment Manager which help to optimise the level of diversification achieved in relation with the benchmark. It can therefore not be excluded that the Management Company and/or the Investment Manager (if any) does not choose the most profitable assets.

Exchange rates: Although Shares in the Company may be denominated in a particular currency, the Company may invest its assets in securities denominated in a wide range of currencies, some of which may not be freely convertible. The net asset value of the Company as expressed in its base currency will fluctuate in accordance with the changes in the foreign exchange rate between that currency and the currencies in which the Company's investments are denominated. The Company may therefore be exposed to a number of risks as follows:

- Conversion into foreign currency or transfer from some markets of proceeds received from the sale of securities cannot be guaranteed.
- The value of the currency in some markets, in relation to other currencies, may decline such that the value of the investment is adversely affected.
- Exchange rate fluctuations may also occur between the trade date for a transaction and the date on which the currency is acquired to meet settlement obligations.
- It may not be possible or practicable to hedge against the consequent foreign exchange/currency risk exposure.

Interest rates: fluctuations in interest rates of the currency or currencies in which the Shares, the Compartment's assets and/or the Underlying Asset are denominated may affect financing costs and the real value of the Shares.

Inflation: the rate of inflation will affect the actual rate of return on the Shares. An Underlying Asset may reference the rate of inflation.

Yield: returns on Shares may not be directly comparable to the yields which could be earned if any investment were instead made in any Compartment's assets and/or Underlying Asset.

Correlation: the Shares may not correlate perfectly, nor highly, with movements in the value of Compartment's assets and/or the Underlying Asset.

Volatility: the value of the Shares may be affected by market volatility and/or the volatility of the Compartment's assets and/or the Underlying Asset. Stock markets are volatile and can move significantly in response to the issuer, demand and supply, political, regulatory, market and economic developments.

Credit Risk: Credit risk involves the risk that an issuer of a bond (or similar money-market instruments) held by the Compartment may default on its obligations to pay interest and repay principal and the Compartment will not recover their investment.

Counterparty risk: The Company may be subject to the risk of the inability of the counterparty, or any other entities, in or with which an investment or transaction is made, to perform in respect of undertaken transactions, whether due to insolvency, bankruptcy or other causes.

In some markets there may be no secure method of delivery against payment which would minimise the exposure to counterparty risk. It may be necessary to make payment on a purchase or delivery on a sale before receipt of the securities or, as the case may be, sale proceeds. No counterparty of the Company or a Compartment involved in such transactions is subject to the general supervision of the Depository Bank to the extent such counterparty does not hold assets of the Company or a Compartment.

The Compartment may enter into futures, options and swap contracts including CDS or use derivative techniques, each of which involves the risk that the counterparty will fail to respect its commitments under the terms of each contract.

Liquidity risk: certain types of securities may be difficult to buy or sell, particularly during adverse market conditions, which may affect their value. The fact that the Shares may be listed on a stock exchange is not an assurance of liquidity in the Shares.

Repurchase and Reverse Repurchase Agreement Risk: The use of repurchase and reverse repurchase agreements, if any, by certain Compartments involves certain risks. For example, if the seller of securities to the relevant Compartment under a reverse repurchase agreement defaults on its obligation to repurchase the underlying securities, as a result of its bankruptcy or otherwise, the said Compartment will seek to dispose of such securities, which action could involve costs or delays. If the seller becomes insolvent and subject to liquidation or reorganisation under applicable bankruptcy or other laws, the ability of the relevant Compartment to dispose of the underlying securities may be restricted. Finally, if a seller defaults on its obligation to repurchase securities under a reverse repurchase agreement, the Compartment may suffer a loss to the extent that it is forced to liquidate its position in the market, and proceeds from the sale of the underlying securities are less than the repurchase price agreed to by the defaulting seller.

Leverage: the Compartment's assets, Underlying Asset and the derivative techniques used to expose the Compartment to the Underlying Assets may comprise elements of leverage (or borrowings) which may potentially magnify losses and may result in losses greater than the amount borrowed or invested by the Compartment.

Political factors, emerging markets and non-OECD Member State assets: the performance of the Shares and/or the possibility to purchase, sell, or repurchase the Shares may be affected by changes in general economic conditions and uncertainties such as political developments, changes in government policies, the imposition of restrictions on the transfer of capital and changes in regulatory requirements. Such risks can be heightened in investments in, or relating to, emerging markets or non-OECD Member States. In addition, local custody services remain underdeveloped in many non-OECD and emerging market countries and there is a heightened transaction and custody risk involved in dealing in such markets. In certain circumstances, a Compartment may not be able to recover or may encounter delays in the recovery of some of its assets. Furthermore, the legal infrastructure and accounting, auditing and reporting standards in emerging markets or non-OECD Member States, may not provide the same degree of investor information or protection as would generally apply to major markets.

Share subscriptions and repurchases: provisions relating to the subscription and repurchase of Shares grant the Company discretion to limit the amount of Shares available for subscription or repurchase on any Business Day and, in conjunction with such limitations, to defer or pro rata such subscription or repurchase. In addition, where requests for subscription or repurchase are received after the cut-off deadline, there will be a delay between the time of submission of the request and the actual date of subscription or repurchase. Such deferrals or delays may operate to decrease the number of Shares or the repurchase amount to be received.

Listing: there can be no certainty that a listing on any stock exchange applied for by the Company will be achieved and/or maintained or that the conditions of listing will not change. Further, trading in Shares on a stock exchange may be halted pursuant to that stock exchange's rules due to market conditions and investors may not be able to sell their Shares until trading resumes.

Legal and regulatory: the Company must comply with regulatory constraints or changes in the laws affecting it, the Shares, or the investment restrictions, which might require a change in the investment policy and objectives followed by a Compartment. The Compartment's assets, the Underlying Asset and the derivative techniques used to expose the Compartment to the Underlying Assets may also be subject to change in laws or regulations and/or regulatory action which may affect the value of the Shares. The Company is domiciled in Luxembourg and Investors should note that all the regulatory protections provided by their local regulatory authorities may not apply. Investors should consult their financial or other professional adviser for further information in this area.

Nominee arrangements: where an investor invests in Shares via the Principal Placement and Distribution Agent, its sub-distribution or private placement agents and/or a nominee or holds interests in Shares through a clearing agent, such Shareholder will typically not appear on the register of Shareholders of the Company and may not therefore be able to exercise voting or other rights available to those persons appearing on the register.

Use of derivatives: Under certain conditions and for the purpose of efficient portfolio management, the Company may use options and futures on securities, indices and interest rates, CFDs on transferable securities, currencies or any other type of financial instruments. Also, where appropriate, the Company may hedge market and currency risks using futures, options, CFDs, or forward foreign exchange contracts. In order to facilitate efficient portfolio management and to better replicate the performance of the benchmark, the Company may finally, for a purpose other than hedging, invest in derivative instruments. The Company may only invest within the limits set out in the Prospectus under “Investment Restrictions”. Transactions in futures carry a high degree of risk. The amount of the initial margin is small relative to the value of the futures contract so that transactions are “leveraged” or “geared”. A relatively small market movement will have a proportionately larger impact which may work for or against the Investor. The placing of certain orders which are intended to limit losses to certain amounts may not be effective because market conditions may make it impossible to execute such orders. Financial futures prices are highly volatile and influenced by a variety of diverse factors including, changing supply and demand relationships, government, fiscal, monetary and exchange control programs and policies, national and international political and economic events and government intervention in certain markets, particularly in the currency and interest rate markets. Futures are also subject to illiquid situations when market activity decreases or when a daily price fluctuation limit has been reached.

Transactions in options also carry a high degree of risk. Selling (“writing” or “granting”) an option generally entails considerably greater risk than purchasing options. Although the premium received by the seller is fixed, the seller may sustain a loss well in excess of that amount. The seller will also be exposed to the risk of the purchaser exercising the option and the seller will be obliged either to settle the option in cash or to acquire or deliver the underlying investment. If the option is “covered” by the seller holding a corresponding position in the underlying investment or a future on another option, the risk may be reduced.

The attention of the Shareholders is drawn to the fact, that due to the use of derivative instruments to cover the inherent credit risk of some issuers or to achieve its investment objective, combined with the possibility to effect borrowings, there may be circumstances where the Company’s exposure may not entirely be covered by the assets of the Company. The risk associated with the use of the said instruments may not exceed 100% of the net asset value of the relevant Compartment.

Taxation: Potential investors’ attention is drawn to the taxation risks associated with investing in the Company. Further details relating to the Luxembourg tax legislation are given under the heading “Tax Aspects” in the main part of the prospectus. However, nothing in this Prospectus may be construed any tax advice and investors should consult their own professional advisers regarding any tax issues in the context of any contemplated investment in the Company.

FATCA Requirements: Pursuant to FATCA, the Company (or each Compartment) will be required to comply (or be deemed compliant) with extensive new reporting and withholding requirements designed to inform the U.S. Department of the Treasury of U.S.-owned foreign investment accounts. Failure to comply (or be deemed compliant) with these requirements will subject the Company (or each Compartment) to U.S. withholding taxes on certain US-sourced income and (effective 1 January 2017) gross proceeds. Pursuant to an intergovernmental agreement between the United States and Luxembourg, the Company (or each Compartment) may be deemed compliant, and therefore not subject to the withholding tax, if it identifies and reports U.S. taxpayer information directly to the Luxembourg government. Investors may be requested to provide additional information to the Company to enable the Company (or each Compartment) to satisfy these obligations. Failure to provide requested

information or, if applicable, satisfy its own FATCA obligations may subject an investor to liability for any resulting U.S. withholding taxes, U.S. tax information reporting and/or mandatory redemption, transfer or other termination of the investor's investment in its Shares. Detailed guidance as to the mechanics and scope of this new reporting and withholding regime is continuing to develop. There can be no assurance as to the timing or impact of any such guidance on future operations of the Company or its Compartments.

Fund of funds/ duplication of costs: The Compartments incur costs of its own management and administration comprising the fees paid to the Management Company, the Investment Manager (if any), the Depository, unless otherwise provided hereinafter and other service providers. It should be noted that, in addition, the Compartments incur similar costs in its capacity as an investor in the funds in which a Compartment invests, which in turn pay similar fees to their manager and other service providers. It is endeavoured to reduce duplication of management charges by negotiating rebates where applicable in favour of the Company with such funds or their managers. Further, the investment strategies and techniques employed by certain funds may involve frequent changes in positions and a consequent portfolio turnover. This may result in brokerage commission expenses which exceed significantly those of the funds of comparable size. The funds may be required to pay performance fees to their manager. Under these arrangements the managers will benefit from the appreciation, including unrealised appreciation of the investments of such funds, but they are not similarly penalised for realised or unrealised losses. As a consequence, the direct and indirect costs borne by the Compartment are likely to represent a higher percentage of the net asset value per Share than would typically be the case with UCITS which invest directly in equity and bond markets (and not through other UCITS/UCI/funds).

5.3 Underlying Asset risks

(a) General

Underlying Asset calculation and substitution: in certain circumstances described in the relevant Appendix, the Underlying Asset may cease to be calculated or published on the basis described or such basis may be altered or the Underlying Asset may be substituted. In certain circumstances such as the discontinuance in the calculation or publication of the Underlying Asset or suspension in the trading of any constituents of the Underlying Asset, it could result in the suspension of trading of the Shares or the requirement for market makers to provide two way prices on the relevant stock exchanges.

Corporate actions: securities comprising an Underlying Asset may be subject to change in the event of corporate actions in respect of those securities.

Tracking error: the following are some of the factors which may result in the value of the Shares varying from the value of the Underlying Asset: investments in assets other than the Underlying Asset may give rise to delays or additional costs and taxes compared to an investment in the Underlying Asset; investment or regulatory constraints may affect the Company but not the Underlying Asset; the fluctuation in value of a Compartment's assets; where applicable, any differences between the maturity date of the Shares and the Maturity Date of the relevant Compartment's assets; and the existence of a cash position held by a Compartment.

No investigation or review of the Underlying Asset(s): none of the Management Company, the Investment Manager (if any) or any of their delegates (if any) or affiliates has performed or will perform any investigation or review of the Underlying Asset on behalf of any prospective investor in the Shares. Any investigation or review made by or on behalf of the Company, the Management Company, the Investment Manager (if any) or any of their delegates (if any) or any of their affiliates is or shall be for their own proprietary investment purposes only.

(b) Certain risks associated with particular Underlying Assets

Certain risks associated with investment in particular Underlying Assets or any securities comprised therein are set out below.

Shares: the value of an investment in Shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events.

Pooled investment vehicles: alternative investment funds, mutual funds and similar investment vehicles operate through the pooling of investors' assets. Investments are then invested either directly into assets or are invested using a variety of hedging strategies and/or mathematical modelling techniques, alone or in combination, any of which may change over time. Such strategies and/or techniques can be speculative, may not be an effective hedge and may involve substantial risk of loss and limit the opportunity for gain. It may be difficult to obtain valuations of products where such strategies and/or techniques are used and the value of such products may depreciate at a greater rate than other investments. Pooled investment vehicles are often unregulated, make available only limited information about their operations, may incur extensive costs, commissions and brokerage charges, involve substantial fees for investors (which may include fees based on unrealised gains), have no minimum credit standards, employ high risk strategies such as short selling and high levels of leverage and may post collateral in unsegregated third party accounts.

Indices: the compilation and calculation of an index or portfolio will generally be rules based, account for fees and include discretions exercisable by the index provider or investment manager. Methodologies used for certain proprietary indices are designed to ensure that the level of the index reaches a pre-determined level at a specified time. However, this mechanism may have the effect of limiting any gains above that level. Continuous protection or lock-in features designed to provide protection in a falling market may also result in a lower overall performance in a rising market.

Real estate: the risks associated with an indirect investment in real estate include, but are not limited to: the cyclical nature of real estate values, changes in environmental, planning, landlord and tenant, tax or other laws or regulations affecting real property, demographic trends, variations in rental income and increases in interest rates.

Commodities: prices of commodities are influenced by, among other things, various micro and macro economic factors such as changing supply and demand relationships, weather conditions and other natural phenomena, agricultural, trade, fiscal, monetary, and exchange control programmes and policies of governments (including government intervention in certain markets) and other events.

Structured finance securities: structured finance securities include, without limitation, asset-backed securities and credit-linked securities, which may entail a higher liquidity risk than exposure to sovereign or corporate bonds. Certain specified events and/or the performance of assets referenced by such securities, may affect the value of, or amounts paid on, such securities (which may in each case be zero).

Master-Feeder Structure: Using a "feeder-master" fund structure, in particular the existence of multiple feeder funds investing in a Master fund, presents certain risks to the investors. Smaller feeder funds may be materially affected by the actions of larger feeder funds. For example, it is expected that a feeder fund may initially, and perhaps for the life of the Master Fund, hold a larger portion of the net asset value of the outstanding interests of the Master Fund. Consequently, if such feeder fund were to redeem from the Master Fund, the remaining feeder funds, including the Feeder Compartment, may experience higher pro rata operating expenses, thereby producing lower returns, and the Master Fund may become less diverse due to redemption by a larger feeder fund, resulting in increased portfolio risk.

A Feeder Compartment may hold only a minority of the net asset value of the outstanding voting interests of the Master Fund and, consequently, will not be able to control matters that require a vote of the investors of the Master Fund.

Emerging Markets: Underlying investments in emerging markets involve additional risks and special considerations not typically associated with investing in other more established economies or markets. Such risks may include (i) increased risk of nationalisation or expropriation of assets or confiscatory taxation; (ii) greater social, economic and political uncertainty, including war; (iii) higher dependence on exports and the corresponding importance of international trade; (iv) greater volatility, less liquidity and smaller capitalisation of markets; (v) greater volatility in currency exchange rates; (vi) greater risk of inflation; (vii) greater controls on foreign investment and limitations on realisation of investments, repatriation of invested capital and on the ability to exchange local currencies for the Reference Currency; (viii) increased likelihood of governmental involvement in and control over the economy; (ix) governmental decisions to cease support of economic reform programs or to impose centrally planned economies; (x) differences in auditing and financial reporting standards which may result in the unavailability of material information about issuers; (xi) less extensive regulation of the markets; (xii) longer settlement periods for transactions and less reliable clearance and custody arrangements; (xiii) less developed corporate laws regarding fiduciary duties of officers and directors and the protection of investors; and (xiv) certain considerations regarding the maintenance of the Compartment's financial instruments with brokers and securities depositories. Repatriation of investment income, assets and the proceeds of sales by foreign investors may require governmental registration and/or approval in some emerging countries. A Compartment may be adversely affected by delays in or a refusal to grant any required governmental registration or approval for such repatriation or by withholding taxes imposed by emerging market countries on interest or dividends paid on financial instruments held by the Company or gains from the disposition of such financial instruments.

In emerging markets, there is often less government supervision and regulation of business and industry practices, stock exchanges, over-the-counter markets, brokers, dealers, counterparties and issuers than in other more established markets. Any regulatory supervision which is in place may be subject to manipulation or control. Some emerging market countries do not have mature legal systems comparable to those of more developed countries. Moreover, the process of legal and regulatory reform may not be proceeding at the same pace as market developments, which could result in investment risk. Legislation to safeguard the rights of private ownership may not yet be in place in certain areas, and there may be the risk of conflict among local, regional and national requirements. In certain cases, the laws and regulations governing investments in securities may not exist or may be subject to inconsistent or arbitrary appreciation or interpretation. Both the independence of judicial systems and their immunity from economic, political or nationalistic influences remain largely untested in many countries. The Compartments may also encounter difficulties in pursuing legal remedies or in obtaining and enforcing judgments in local courts.

Investments in securities of issuers in emerging markets may be subject to greater risks than investments in securities of issuers from OECD Member States due to a variety of factors including currency controls and currency exchange rates fluctuations, changes in governmental administration or economic or monetary policy or changed circumstances in dealings between nations, expropriation, confiscatory taxation and potential difficulties in enforcing contractual obligations. There may be less publicly available information about issuers in certain countries and such issuers may not be subject to uniform accounting, auditing and financial reporting standards and requirements comparable to those of most OECD issuers. In certain countries, securities of local issuers are less liquid and more volatile than securities of comparable issuers of more mature economies and subject to lower levels of government supervision than those on the OECD. The investments in such markets may be considered speculative and subject to significant custody and clearance risks and delay in settlement.

Others: underlying Asset(s) may include other assets which involve substantial financial risk such as distressed debt, low quality credit securities, forward contracts and deposits with commodity trading advisors (in connection with their activities).

5.4 Risks relating to the use of SFTs

(i) Counterparty risk

The Company and any of its Compartments may enter into repurchase agreements and reverse repurchase agreements as a buyer or as a seller subject to the conditions and limits set out in section “SFTs and TRS”. If the other party to a repurchase agreement or reverse repurchase agreement should default, the Company or the relevant Compartment might suffer a loss to the extent that the proceeds from the sale of the underlying securities and/or other collateral held by the Company or the relevant Compartment in connection with the repurchase agreement or reverse repurchase agreement are less than the repurchase price or, as the case may be, the value of the underlying securities. In addition, in the event of bankruptcy or similar proceedings of the other party to the repurchase agreement or reverse repurchase agreement or its failure otherwise to perform its obligations on the repurchase date, the Company or the relevant Compartment could suffer losses, including loss of interest on or principal of the security and costs associated with delay and enforcement of the repurchase agreement or reverse repurchase agreement.

The Company and any of its Compartments may enter into securities lending transactions subject to the conditions and limits set out in the section 3.7 relating to Efficient Portfolio Management Techniques and section 3.5 relating to the use of SFTs. If the other party to a securities lending transaction should default, the Company or the relevant Compartment might suffer a loss to the extent that the proceeds from the sale of the collateral held by the Company or the relevant Compartment in connection with the securities lending transaction are less than the value of the securities lent. In addition, in the event of the bankruptcy or similar proceedings of the other party to the securities lending transaction or its failure to return the securities as agreed, the Company or the relevant Compartment could suffer losses, including loss of interest on or principal of the securities and costs associated with delay and enforcement of the securities lending agreement.

(ii) Operational risk

The risks arising from the use of repurchase agreements, reverse repurchase agreements and securities lending transactions will be closely monitored and techniques (including collateral management) will be employed to seek to mitigate those risks. Although it is expected that the use of repurchase agreements, reverse repurchase agreements and securities lending transactions will generally not have a material impact on the Company' or the relevant Compartment's performance.

(iii) Liquidity risk

The use of such techniques may have a significant effect, either negative or positive, on the Company' or the relevant Compartment 's NAV. The use of such techniques may although have an impact on the ability of the Company to meet redemption requests, security purchases or, more generally, reinvestment.

(iv) Legal risk

The use of SFT's and their consequences for the Company, are substantially affected by legal requirements. No assurance can be given that future legislation, administrative rulings or court decisions will not adversely affect the Company. Furthermore, certain transactions are entered into on the basis of complex legal documents. Such documents may be difficult to enforce or may be the subject of a dispute as to interpretation in certain circumstances. Whilst the rights and obligations of the parties to a legal document may be governed by Luxembourg law, in certain circumstances (for example insolvency proceedings) other legal systems may take priority which may affect the enforceability of existing transactions.

(v) Custody risk

The Company's assets are held in custody by the Depositary Bank, which exposes the Company to custodian risk. This means that the Company is exposed to the risk of loss of assets placed in custody as a result of insolvency, negligence or fraudulent trading by the Depositary Bank.

5.5 Risk relating to the use of TRSs

Because it does not involve physically holding the securities, synthetic replication through total return

(or unfunded swaps) and fully-funded swaps can provide a means to obtain exposure to difficult-to-implement strategies that would otherwise be very costly and difficult to have access to with physical replication. Synthetic replication therefore involves lower costs than physical replication. Synthetic replication however involves counterparty risk. If the Compartment engages in TRSs, there is the risk – beyond the general counterparty risk – that the counterparty may default or not be able to meet its obligations in full. Where the Company and any of its Compartment enters into TRSs on a net basis, the two payment streams are netted out, with Company or each Compartment receiving or paying, as the case may be, only the net amount of the two payments. Total return swaps entered into on a net basis do not involve the physical delivery of investments, other underlying assets or principal. Accordingly, it is intended that the risk of loss with respect to TRSs is limited to the net amount of the difference between the total rate of return of a reference investment, index or basket of investments and the fixed or floating payments. If the other party to a TRS defaults, in normal circumstances the Company or relevant Compartment's risk of loss consists of the net amount of total return payments that the Company or Compartment is contractually entitled to receive.

5.6 Other risks

Potential conflicts of interest: The Management Company, the Investment Manager (if any), their delegates (if any), the sales agents, the Administration Agent, and the Depositary may from time to time act as management company, investment manager or adviser, sales agent, administration agent, registrar or custodian in relation to, or be otherwise involved in, other funds or collective investment schemes which have similar investment objectives to those of any Compartment.

The Management Company, the Investment Manager (if any) and their delegates (if any) will enter into all transactions on an arm's length basis. The directors of the Management Company, the directors of the Investment Manager (if any), their delegates (if any) and any affiliate thereof, members, and staff may engage in various business activities other than their business, including providing consulting and other services (including, without limitation, serving as director) to a variety of partnerships, corporations and other entities, not excluding those in which the Company invests.

In the due course of their business, the above persons and entities may have potential conflicts of interest with the Company or Compartment. Any kind of conflict of interest is to be fully disclosed to the Board of Directors. In such event, each person and entities will at all times endeavour to comply with its obligations under any agreements to which it is party or by which it is bound in relation to the Company or any Compartment.

The directors of the Management Company, the directors of the Investment Manager (if any), the directors of their delegates (if any) and their members will devote the time and effort necessary and appropriate to the business of the Company.

Although it is aimed to avoid such conflicts of interest, the Management Company, the Investment Manager (if any), their delegates (if any) and their members will attempt to resolve all nonetheless arising conflicts in a manner that is deemed equitable to all parties under the given circumstances so as to serve the best interests of the Company and its Shareholders.

Allocation of shortfalls among Classes of a Compartment: the right of holders of any Class to participate in the assets of the Company is limited to the assets (if any) of the relevant Compartment and all the assets comprising a Compartment will be available to meet all of the liabilities of the Compartment, regardless of the different amounts stated to be payable on the separate Classes (as set out in the relevant Appendix). For example, if on a winding-up of the Company, the amounts received by the Company under the relevant Compartment's assets (after payment of all fees, expenses and other liabilities which are to be borne by the relevant Compartment) are insufficient to pay the full redemption amount payable in respect of all Classes of the relevant Compartment, each Class of the Compartment will rank *pari passu* with each other Class of the relevant Compartment and the proceeds of the relevant Compartment will be distributed equally amongst the Shareholders of that Compartment pro rata to the amount paid

up on the Shares held by each Shareholder. The relevant Shareholders will have no further right of payment in respect of their Shares or any claim against any other Compartment or any other assets of the Company. This may mean that the overall return (taking account of any dividends already paid) to Shareholders who hold Shares paying dividends quarterly or more frequently may be higher than the overall return to Shareholders who hold Shares paying dividends annually and that the overall return to Shareholders who hold Shares paying dividends may be higher than the overall return to Shareholders who hold Shares paying no dividends. In practice, cross liability between Classes is only likely to arise where the aggregate amounts payable in respect of any Class exceed the assets of the Compartment notionally allocated to that Class, that is, those amounts (if any) received by the Company under the relevant Compartment's assets (after payment of all fees, expenses and other liabilities which are to be borne by such Compartment) that are intended to Company payments in respect of such Class or are otherwise attributable to that Class. In these circumstances, the remaining assets of the Compartment notionally allocated to any other Class of the same Compartment may be available to meet such payments and may accordingly not be available to meet any amounts that otherwise would have been payable on such other Class.

Consequences of winding-up proceedings: If the Company fails for any reason to meet its obligations or liabilities, or is unable to pay its debts, a creditor may be entitled to make an application for the winding-up of the Company. The commencement of such proceedings may entitle creditors (including the Swap Counterparty) to terminate contracts with the Company and claim damages for any loss arising from such early termination. The commencement of such proceedings may result in the Company being dissolved at a time and its assets (including the assets of all Compartments) being realised and applied to pay the fees and expenses of the appointed liquidator or other insolvency officer, then in satisfaction of debts preferred by law and then in payment of the Company's liabilities, before any surplus is distributed to the Shareholders of the Company. In the event of proceedings being commenced, the Company may not be able to pay the full amounts anticipated by the relevant Appendix in respect of any Class or Compartments.

5.7 Sustainability Risks

Investors should note that Sustainability Risks generally vary by asset class, geographic scope, sectors and industries.

Sustainability Risks are principally linked to climate-related events resulting from climate change (*i.e.* Physical Risks) or to the society's response to climate change (*i.e.* Transition Risks), which may result in unanticipated losses that could affect Compartment' investments and financial condition.

Social events (*e.g.* inequality, inclusiveness, labour relations, investment in human capital, accident prevention, changing customer behaviour, *etc.*) or governance shortcomings (*e.g.* recurrent significant breach of international agreements, bribery issues, products quality and safety, selling practices, *etc.*) may also translate into Sustainability Risks.

While the Compartments do not actively promote ESG characteristics and/or Sustainability Factors, they remain exposed to Sustainability Risks.

Such Sustainability Risks are integrated into the investment decision making and risk monitoring to the extent that they represent a potential or actual material risks and/or opportunities to maximizing the long-term risk-adjusted returns, as further described under section 6 "*Sustainability Related Disclosures*" of the Prospectus.

6. SUSTAINABILITY RELATED DISCLOSURES

Pursuant to the SFDR, the Company is required to disclose the manner in which Sustainability Risks are integrated into the investment decision process implemented with respect to the Compartments as well as the results of the assessment of the likely impacts of Sustainability Risks on the returns of each Compartment.

While the Compartments do not actively promote ESG characteristics, they remain exposed to Sustainability Risks. Such Sustainability Risks are integrated into the investment decision making and risk monitoring for all the Compartments to the extent that they represent a potential or actual material risks and/or opportunities to maximizing the long-term risk-adjusted returns.

The impacts following the occurrence of a Sustainability Risk may be numerous and will vary depending on the specific risk, region and asset class linked to a Compartment's strategy. Generally, where a Sustainability Risk occurs in respect of an asset, there will be a negative impact on, or entire loss of, its value.

This section describes how sustainability risks are integrated in the investment decision process while the specific assessment of the likely impact of Sustainability Risks must be conducted at Compartment level. Further details and specific information are provided in the relevant Compartment's supplement.

More information on the incorporation of Sustainability Risks and opportunities into day-to-day business operations, are to be found on <http://www.twentyfirstcapital.com>.

Integration of Sustainability Risks

Except to the extent that more restrictive rules are provided for in connection with a specific Compartment under the relevant supplement, the investment policy of all Compartments shall comply with the rules laid down hereafter in relation to the integration of Sustainability Risks:

Evaluating Sustainability Risks is an integral part of each Compartment's investment process as, in the Management Company's view; Sustainability Risks can materially affect a company's financial performance, competitiveness and overall risk profile.

The Management Company considers Sustainability Risks as part of its broader analysis of individual issuers, using inputs from the Management Company's team of ESG analysts to help identify exposure to Sustainability Risks, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Management Company will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

In assessing these risks, the Management Company draws upon a wide variety of internal and external research to assess any potential impact on the value of the assets over the time horizon of the Fund.

The Investment Manager (if any) will also explicitly manage the Compartment's potential exposure to climate-type risks and other sustainability risks as defined under section 5 "*Risk Warning*" of the Prospectus.

7. ISSUE, REDEMPTION AND CONVERSION OF SHARES

Shares will be issued in registered form.

As further described in each relevant Appendix, the Company may create within each Compartment issue different Classes whose assets will be commonly invested pursuant to the specific investment policy of the relevant Compartment.

A distinct fee structure, currency of denomination, dividend policy, minimum holding amount, eligibility requirements or other specific feature may apply. The Company may notably issue Shares reserved to retail investors and Shares reserved to institutional investors. The range of available Classes and their features are described in the relevant Appendices.

Shares of a Compartment may be listed on the Luxembourg Stock Exchange or any other Regulated Market at the discretion of the Board of Directors and may be cleared through Clearstream Banking or Euroclear or other central depositories.

7.1 Subscription, Redemption and Conversion Requests

Unless otherwise provided for a specific Compartment in the relevant Appendix, requests for subscription, redemption and conversion of Shares should be sent to one of the sub-distribution and private placement agents or to the Company at its registered address in Luxembourg. Requests may also be accepted by facsimile transmission, or at the discretion of the Company by other means of telecommunication. An application form can be obtained from the Company.

Unless otherwise specified in the Appendix for any Compartment, requests for subscriptions, redemptions and conversions from or to any Compartment will be dealt with on the relevant Calculation Day, subject to the cut-off time specified in the relevant Appendix.

Requests received after such time will be accepted on the next Calculation Day. As a result, requests for the subscription, redemption and conversion of Shares shall be dealt with on an unknown net asset value basis before the determination of the net asset value for that day.

The Company does not permit market timing (as set out in CSSF Circular 04/146) or related excessive, short-term trading practices.

The Company has the right to reject any request for the subscription or conversion of Shares from any investor engaging in such practices or suspected of engaging in such practices and to take such further action as it may deem appropriate or necessary.

Subscription, redemption and conversion of Shares of a given Compartment shall be suspended whenever the determination of the net asset value per Share of such Compartment is suspended by the Company.

The Management Company may enter into an agreement with the distribution agent giving the distribution agent the power to sub delegate the distribution pursuant to which they agree to act as or appoint nominees for investors subscribing for Shares through their facilities. In such capacity the distributor or sales agent may effect subscriptions, conversion and redemptions of Shares in the nominee name on behalf of individual investors and request the registration of such transactions on the register of Shareholders of the Company in the nominee name.

The appointed nominee maintains its own records and provides the investor with individualised information as to its holdings of Shares in the Company. Except where local law or custom prohibits the practice, investors may invest directly in the Company and not avail themselves of a nominee service.

Unless otherwise provided by local law, any Shareholder holding Shares in a nominee account with a distributor has the right to claim, at any time, direct title to such Shares.

7.2 Deferral of Redemptions and Conversion

If the total requests for redemption and conversion out of a Compartment on any Calculation Day exceed 10% of the total value of Shares in issue of that Compartment, the Company may decide that redemption and conversion requests in excess of 10% shall be deferred until the next Calculation Day. On the next Calculation Day, or Calculation Days until completion of the original requests, deferred requests will be dealt with in priority to later requests.

7.3 Settlements

Subscriptions will generally be settled in cash. Payment of the Subscription Price must be made in cleared funds on the second Business Day from the relevant Calculation Day, unless otherwise indicated in the relevant Appendix.

However on an exceptional basis the Board of Directors may agree to issue shares as consideration for a contribution in kind of securities, in compliance with the conditions set forth by Luxembourg law, which may in particular provide for the obligation to deliver a valuation report from the auditor of the Company ("*réviseur d'entreprises agréé*") and provided that such securities comply with the investment objectives and policies of the relevant Compartment. Subscription in kind may be accepted in lieu, or in addition to cash payments. All costs and expenses related to the organisation of the contribution in kind of securities shall be borne by the relevant investor(s).

If, on the Settlement Day as determined in the Appendix, banks are not open for business, or an interbank settlement system is not operational, in the country of the currency of the relevant Class, then settlement will be on the next Business Day on which those banks and settlement systems are open.

Confirmation of completed subscriptions, redemptions and conversions will normally be dispatched on the Business Day following the execution of the transaction.

No redemption payments will be made until the original application form and relevant subscription monies have been received from the Shareholder and all the necessary anti-money laundering checks have been completed. Redemption proceeds will be paid on receipt of faxed instructions where such payment is made into the account specified by the Shareholder in the original application form submitted. However, any amendments to the Shareholder's registration details and payment instructions can only be effected upon receipt of original documentation.

7.4 Minimum Subscription and Holding Amounts

A minimum initial and subsequent subscription amount and minimum holding amounts for each Class may be set forth, as further detailed in the Appendices to the Prospectus. The Company has the discretion, from time to time, to waive or reduce any applicable minimum subscription and/or holding amounts.

The right to transfer, redeem or convert Shares is subject to compliance with any conditions (including any minimum subscription or holding amounts and eligibility requirements) applicable to the Class from which the redemption or conversion is being made, and also the Class into which the conversion is to be effected.

The Board of Directors may also, at any time, decide to compulsorily redeem all Shares from Shareholders whose holding is less than the minimum holding amount specified in the relevant Appendix or who fail to satisfy any other applicable eligibility requirements set out above. In such case the Shareholder concerned will receive one month's prior notice so as to be able to increase its holding above such amount or otherwise satisfy the eligibility requirements.

If a redemption or conversion request would result in the amount remaining invested by a Shareholder falling below the minimum holding amount of that Class, such request will be treated as a request to redeem or convert, as appropriate, the Shareholder's total holding in that Class. If the request is to transfer Shares, then that request may be refused by the Company.

The Company may restrict or prevent the ownership of Shares in the Company by any person, firm or corporate body, if in the opinion of the Company such holding (i) may be detrimental to the Company, (ii) if it may result in a breach of any law or regulation, whether Luxembourg or foreign, (iii) if as a result thereof the Company may become exposed to tax disadvantages or other financial disadvantages that it would not have otherwise incurred or (iv) if such person, firm or corporate body would not

comply with the eligibility criteria of a given Class. Such persons, firms or corporate bodies to be determined by the Board of Directors.

If the Company becomes aware that a Shareholder is holding Shares in breach of any law or regulation or otherwise in circumstances having, or which may have, adverse regulatory, tax or fiscal consequences for the Company or the Shareholders or would otherwise be detrimental to the interests of the Company or that the Shareholder has become or is a US Person, the Company may, in its sole discretion, redeem the Shares of the Shareholder. "US Person" shall have the meaning given in Regulation S under the U.S. Securities Act of 1933, as amended, and shall mean any national, citizen or resident of the United States of America or of any of its territories or possessions or areas subject to its jurisdiction or any person who is normally resident therein (including the estate of any such person or corporations or partnerships created or organised therein).

Shareholders are required to notify the Company immediately in the event that they are or become US Persons or hold Shares for the account or benefit of US Persons or hold Shares in breach of any law or regulation or otherwise in circumstances having, or which may have, adverse regulatory, tax or fiscal consequences for the Company or the Shareholders or otherwise be detrimental to the interests of the Company.

Where it appears that a person who should be precluded from holding Shares, either alone or in conjunction with any other person, is a beneficial owner of Shares, the Company may compulsorily redeem all Shares so owned in accordance with the provisions of the Articles.

7.5 Issue of Shares

Subscriptions for Shares can be made in relation to any day that is a Calculation Day for the relevant Compartment. Shares will be allotted at the subscription price of the relevant Class i.e. the net asset value per Share of such Class determined on the applicable Calculation Day for which the request has been accepted plus the applicable subscription fee, if any. Any subscription request shall be irrevocable.

If any sale commissions applied in relation to any particular Compartment, it will be disclosed in the relevant Appendix. The Company might be entitled to receive the sale commission (if any).

Failure to make good settlement by the Settlement Day as determined in the Appendix, may result in the Management Company bringing an action against the defaulting investor or its financial intermediary or deducting any costs or losses incurred by the Company against any existing holding of the applicant in the Company. In all cases any money returnable to the investor will be held by the Company without payment of interest pending receipt of the remittance.

Payment for Shares must be received by the Company in the reference currency of the relevant Class. Requests for subscriptions in any other major freely convertible currency will be accepted.

Investors are advised to refer to the terms and conditions applicable to subscriptions, which may be obtained by contacting the Company.

The Company may also limit the distribution of a given Class or Compartment to specific countries.

The Company may also restrict the distribution of the Company's Shares by distributors or agents who have not been approved.

The Company may also restrict or prevent the ownership of Shares by any person, firm or corporation, if such ownership may be against the interests of the Company or of the majority of Shareholders or of any Compartment or Class therein.

Where it appears that a person who should be precluded from holding Shares, either alone or in conjunction with any other person, is a beneficial owner of Shares, the Company may compulsorily redeem all Shares so owned in accordance with the provisions of the Articles.

The Company may, in its absolute discretion, delay the acceptance of any subscription for Shares of a Class restricted to institutional investors until such date as it has received sufficient evidence of the qualification of the investor as an institutional investor.

7.6 Anti-Money Laundering Procedures

Pursuant to international rules and AML Regulations, obligations have been imposed on all professionals of the financial sector to prevent the use of undertakings for collective investment for money laundering and financing of terrorism purposes. As a result of such provisions, the registrar agent of a Luxembourg undertaking for collective investment must in principle ascertain the identity of the subscriber in accordance with Luxembourg laws and regulations. The registrar agent may require subscribers to provide any document it deems necessary to effect such identification.

This identification procedure must be complied with by the Administration Agent, acting as registrar and transfer agent (or the relevant competent agent of registrar and transfer agent) in the case of direct subscriptions to the Company, and in the case of subscriptions received by the Company from any intermediary resident in a country that does not impose on such intermediary an obligation to identify investors equivalent to that required under AML Regulations.

In case of delay or failure by a subscriber to provide the documents required, the application for subscription (or, if applicable, for redemption) will not be accepted. Neither the undertakings for collective investment nor the registrar agent have any liability for delays or failure to process deals as a result of the subscriber providing no or only incomplete documentation.

7.7 Redemption of Shares

Requests for the redemption of Shares can be made in relation to any Calculation Day for the relevant Compartment. Redemptions will be carried out at the redemption price of the relevant Class, i.e. the net asset value per Share of such Class determined on the applicable Calculation Day on which the request has been accepted less the applicable redemption fee, if any. Any redemption request shall be irrevocable.

The Company may carry out any authentication procedures that it considers appropriate relating to a redemption request. This aims to mitigate the risk of error and fraud for the Company, its agents or Shareholders. Where it has not been possible to complete any authentication procedures to its satisfaction, the Company may delay the processing of payment instructions until authentication procedures have been satisfied.

This will not affect the Calculation Day on which the redemption request is accepted and the redemption to be applied. The Company shall not be held responsible to the Shareholder or anyone if it delays execution or declines to execute redemption instructions in these circumstances.

The Board of Directors may, upon request of one or more Shareholders, decide at its full discretion and provided that this does not affect the rights of the remaining Shareholders, to redeem the Shares in all or in part in kind in lieu of paying the redemption price in cash. In the case of several Shareholders redeeming in kind, assets transferred from the Compartments shall be distributed on a *pro rata* basis. The nature and type of assets to be transferred in such case shall be determined on a fair and reasonable basis and without prejudicing the interests of the other holders of Shares of the relevant Class or Classes and the valuation used shall be confirmed by a special report of the auditor of the Company. The costs of any such transfers shall be borne by the transferee. The short fall, if any, shall be satisfied in cash. All stamp duties, transfer and registration fees shall be paid by the redeeming Shareholder(s).

Redemption payments will normally be paid in the reference currency of the Class by bank transfer on the second Business Day from the relevant Calculation Day, unless otherwise indicated in the relevant Appendix. The Company is not responsible for any delays or charges incurred at any receiving bank or settlement system. A Shareholder may request, at its own cost and subject to the Company's prior approval that their redemption proceeds be paid in a currency other than the reference currency of the relevant Class.

If, in exceptional circumstances, redemption proceeds cannot be paid within the period specified above, payments will be made as soon as reasonably practicable thereafter (not exceeding, however, 10 Business Days) at the redemption price calculated on the relevant Calculation Day, it being understood that the Board of Directors will always ensure the overall liquidity of the Company.

If any redemption fee is applied in relation to any particular Compartment or Class, it will be disclosed in the relevant Appendix. The Company may be entitled to receive the redemption fee (if any).

Shares redeemed by the Company become null and void.

7.8 Conversion of Shares

Subject to any provision under this Prospectus and its Appendices, Shareholders have the right to convert all or part of their Shares of any Class of a Compartment into Shares of another Class of that or another Compartment, by applying for conversion in the same manner as for the subscription and redemption of Shares. Conversions within the Company are permitted provided that the Shareholder satisfies the eligibility requirements and minimum holding amounts set out in the Appendix such other conditions applicable to the contemplated Classes.

Conversion may be requested on a common Calculation Day for the original Class and the contemplated Class. The number of Shares issued upon conversion will be based upon the redemption price of the original Class and the net asset value of the contemplated Class, plus a conversion charge (if any), as disclosed in the relevant Appendix. The Company is entitled to any charges arising from conversions and any rounding adjustment. Any conversion request shall be irrevocable.

7.9 Transfer of Shares

Subject to the restrictions described herein, Shares are freely transferable and are each entitled to participate equally in the profits and liquidation proceeds attributable to the relevant Class.

The transfer of Shares may normally be carried out by delivery to the relevant distributor, sales agent or the Company of an instrument of transfer in appropriate form. On the receipt of the transfer request, and after reviewing the endorsement(s), signature(s) may be required to be certified by an approved bank, stock broker or public notary.

The right to transfer Shares is subject to the minimum investment and holding requirements as detailed above and in the Appendix.

Shareholders are advised to contact the relevant distributor, sales agent or the Company prior to requesting a transfer to ensure that they have the correct documentation for the transaction.

8. DIVIDEND POLICY

With respect to capitalisation Classes, the Board of Directors intends to recommend at the annual general meeting the reinvestment of their net assets.

Distributions may take place either in the form of a distribution of dividends or through redemption of Shares according to the rules defined in the Appendices.

With respect to distribution Classes, the Board of Directors may decide to distribute interim dividends in the form of cash in the reference currency of the Class.

No distribution will be made to the extent that it would lead the capital of the Company to fall below EUR 1,250,000.

Distribution proceeds unclaimed after five years from the date of declaration will lapse and revert to the relevant Compartment.

9. MANAGEMENT AND ADMINISTRATION

The Directors of the Company are responsible for its management and supervision including the determination of investment policies.

9.1 Management Company

Pursuant to the Fund Management Agreement, the Company appointed Twenty First Capital as its management company.

Under the Fund Management Agreement, the Management Company provides investment management services, administrative agency, registrar and transfer agency services and marketing, distribution services to the Company, subject to the overall supervision and control of the Board of Directors.

The Management Company was incorporated as a French SAS. The Management Company is registered with the *Registre de Commerce et des Sociétés* under number 534 017 447. The Management Company is authorised and supervised by the *Autorité des Marchés Financiers* since 29 August 2011.

The Fund Management Agreement is concluded for an indefinite period of time and may be terminated by either party upon ninety (90) days prior written notice or forthwith by notice in writing in the specific circumstances provided in such agreement.

The Fund Management Agreement has been concluded for an indefinite duration and may be terminated by either party in writing with three months' notice.

The Management Company shall at all times act in the best interests of the Shareholders and according to the provisions set forth by the Law of 2010, the Prospectus and the Articles.

In fulfilling its responsibilities set forth by the Law of 2010 and the Fund Management Agreement, the Management Company is permitted to delegate all or a part of its functions to third parties, provided that it retains responsibility and oversight over such delegates. The appointment of third parties is subject to the approval of the Company and the CSSF. The Management Company's liability shall not be affected by the fact that it has delegated its functions to third parties.

Third parties to whom such functions have been delegated by the Management Company will be remunerated directly by the Company (out of the assets of the relevant Compartment), except as otherwise provided in the relevant Appendix. The Management Company shall also ensure compliance of the Company with the investment restrictions and oversee the implementation of the investment policy of each Compartment.

The Management Company will receive periodic reports from the Company's service providers in relation to the services which they provide. The Management Company shall also submit its own report to the Board of Directors on a periodic basis and inform the Board of Directors without delay of any non-compliance of the Company with the investment restrictions of each Compartment.

The Management Company may act as the management company of other open-ended collective investment schemes. The names of these other collective investment schemes are available upon request.

In consideration of its services, the Management Company is entitled to receive fees as indicated in the relevant Appendix. These fees shall be calculated based on the net asset value of the Compartment and shall be paid monthly in arrears, except otherwise indicated in the relevant Appendix.

In accordance with the 2014/91/UE Directive, the Management Company has established and applies a remuneration policy and practices that are consistent with, and promote, sound and effective risk management and that does not encourage risk taking which is inconsistent with the risk profile and the Articles of Incorporation of the Company.

The Management Company's remuneration policy is in line with the business strategy, objectives, values and interests of the Management Company and the Company and its investors and includes measures to avoid conflicts of interest.

The Management Company's remuneration policy and practices include fixed and variable components of salaries and discretionary pension benefits and apply to those categories of staff, including senior management, risk takers, control functions and any employee receiving total remuneration that falls within the remuneration bracket of senior management and risk takers whose professional activities have a material impact on the risk profiles of the Management Company or of the Company.

If and to the extent applicable, the assessment of performance is set in a multi-year framework appropriate to the holding period recommended to the investors of the Company managed by the Management Company in order to ensure that the assessment process is based on the longer-term performance of the Company and its investment risks and that the actual payment of performance-based components of remuneration is spread over the same period.

The details of the Management Company's remuneration policy are available on the following website <http://www.twentyfirstcapital.com/Regulatory-Information>. A paper copy of the remuneration policy will be made available free of charge to the investors of the Company upon request to the Management Company.

(a) Conflicts of Interest

For the purpose of identifying the types of conflict of interest that arise in the course of providing services and activities and whose existence may damage the interest of the Company, the Management Company will take into account, by way of minimum criteria, the question of whether the Management Company or a relevant person, or a person directly or indirectly linked by way of control to the Management Company, is in any of the following situations, whether as a result of providing collective portfolio management activities or otherwise:

- (i) the Management Company or that person is likely to make a financial gain, or avoid a financial loss, at the expense of the Company;
- (ii) the Management Company or that person has an interest in the outcome of a service or an activity provided to the Company or another client or of a transaction carried out on behalf of the Company or another client or, which is distinct from the Company interest in that outcome;
- (iii) the Management Company or that person has a financial or other incentive to favour the interest of another client or group of clients over the interests of the Company;
- (iv) the Management Company or that person carries on the same activities for the Company and for another client or clients which are not UCITS; and

- (v) the Management Company or that person receives or will receive from a person other than the Company an inducement in relation to collective portfolio management activities provided to the Company, in the form of monies, goods or services, other than the standard commission or fee for that service.

When identifying any potential types of conflict of interests, the Management Company will take into account

- (i) the interests of the Management Company, including those deriving from its belonging to a group or from the performance of services and activities, the interests of the clients and the duty of the Management Company towards the Company as well as
- (ii) the interests of two or more managed UCITS.

The summary description of the strategies referred to in that paragraph will be made available to the investors on request

(b) Best Execution

The Management Company will act in the best interests of the Company when executing decision to deal on behalf of the Company in the context of the portfolio management of the Compartment. For that purpose the Management Company will take all reasonable steps to obtain the best possible results for the Company, taking into account price, costs, speed, likelihood of execution and settlement, order size and nature, or any other consideration relevant to the execution of the order (best execution).

The relative importance of such factors will be determined by reference to the following criteria:

- (i) the objectives, investment policy and risks specific to the Company,
- (ii) the characteristics of the order.

9.2 The Investment Manager(s)

For the definition of the investment policy and the management of some of the Company's Compartments, the Management Company may be assisted by one or several investment managers (the "**Investment Manager(s)**").

Pursuant to the investment management agreements, the Management Company has, with the consent of the Board of Directors, expressly delegated to the Investment Manager(s) the discretion, on a daily basis but subject to the overall control and responsibility of the Management Company and the Company, to purchase and sell securities as agent for the Company and otherwise to manage the portfolios of some of the Compartments for the account and in the name of the Company.

Pursuant to the investment management agreement specified below, the Management Company, with the consent of the Company, has appointed the following Investment Manager to manage the assets of the following sub-Compartments pursuant to their respective investment objective and policy:

- **Keyquant for the Compartment Twenty First Funds – Quant Fund** pursuant to the agreement dated 19 January 2021 and effective as of 1 April 2021.

In consideration of its services, the Investment Manager is entitled to receive fees as indicated in the relevant Appendix.

9.3 Administration Agent

Pursuant to the Services Agreement, the Management Company appointed CACEIS Bank, Luxembourg Branch as administration agent of the Company.

Pursuant to the Domiciliary Services Agreement, the Company appointed CACEIS Bank, Luxembourg Branch as its domiciliary agent.

These agreements have been concluded for an indefinite duration and may be terminated by either party in writing with three (3) months' notice for the Services Agreement and not less than six (6) months prior to the date upon which such termination becomes effective regarding the Domiciliary Services agreement.

In its capacity as Administration Agent, CACEIS Bank, Luxembourg Branch shall notably perform the calculation of the net asset value per Shares for each existing Class or Compartment, management of accounts, the preparation of the annual and semi-annual financial statements and execute all tasks required as central administration.

In its capacity as the transfer and registration agent of the Company, CACEIS Bank, Luxembourg Branch shall in particular execute subscription, redemption and conversion applications and keep and maintain the register of Shareholders of the Company. In such capacity it is also responsible for supervising anti-money laundering measures under the AML Regulations. CACEIS Bank, Luxembourg Branch may request documents necessary for identification of investors.

For its services under the Services Agreement and the Domiciliary Services agreement, CACEIS Bank, Luxembourg Branch shall receive remuneration as further described in the relevant Appendix.

9.4 Depositary

CACEIS Bank, Luxembourg Branch, acts as a branch of CACEIS Bank, a public limited liability company (*société anonyme*) incorporated under the laws of France, having its registered office located at 1-3, place Valhubert, 75013 Paris, France, registered with the French Register of Trade and Companies under number 692 024 722 RCS Paris. It is an authorised credit institution supervised by the European Central Bank (“ECB”) and the *Autorité de contrôle prudentiel et de résolution* (“ACPR”). It is further authorised to exercise through its Luxembourg branch banking and central administration activities in Luxembourg. CACEIS Bank, Luxembourg Branch, acting as a branch of CACEIS Bank, is acting as Depositary of the Company in accordance with the Depositary Agreement and the relevant provisions of the Law of 2010 and applicable laws and regulations.

Investors may consult upon request at the registered office of the Company, the Depositary Agreement to have a better understanding and knowledge of the limited duties and liabilities of the Depositary.

The Depositary has been entrusted with the custody and/or, as the case may be, recordkeeping of the Compartments' assets, and it shall fulfil the obligations and duties provided for by Part I of the Law of 2010. In particular, the Depositary shall ensure an effective and proper monitoring of the Company' cash flows.

In due compliance with applicable laws and regulations the Depositary shall:

- (i) ensure that the sale, issue, re-purchase, redemption and cancellation of units of the Company are carried out in accordance with the applicable national law and regulations or the Articles;
- (ii) ensure that the value of the Shares is calculated in accordance with applicable laws and regulations, the Articles and the procedures laid down in the UCITS Directive;

- (iii) carry out the instructions of the Company, unless they conflict with applicable laws and regulations, or the Articles;
- (iv) ensure that in transactions involving the Company's assets any consideration is remitted to the Company within the usual time limits; and
- (v) ensure that Company's income is applied in accordance with applicable laws and regulations and the Articles.

The Depositary may not delegate any of the obligations and duties set out in (i) to (v) of this clause.

In compliance with the provisions of the UCITS Directive, the Depositary may, under certain conditions, entrust part or all of the assets which are placed under its custody and/or recordkeeping to correspondents or third party custodians as appointed from time to time. The Depositary's liability shall not be affected by any such delegation, unless otherwise specified, but only within the limits as permitted by the Law of 2010.

A list of these correspondents /third party custodians are available on the website of the Depositary (www.caceis.com, section "*veille réglementaire*"). Such list may be updated from time to time. A complete list of all correspondents/third party custodians may be obtained, free of charge and upon request, from the Depositary. Up-to-date information regarding the identity of the Depositary, the description of its duties and of conflicts of interest that may arise, the safekeeping functions delegated by the Depositary and any conflicts of interest that may arise from such a delegation are also made available to investors on the website of the Depositary, as mentioned above, upon request. There are many situations in which a conflict of interest may arise, notably when the Depositary delegates its safekeeping functions or when the Depositary also performs other tasks on behalf of the Company, such as administrative agency and registrar agency services. These situations and the conflicts of interest thereto related have been identified by the Depositary. In order to protect the Company's and its Shareholders' interests and comply with applicable regulations, a policy and procedures designed to prevent situations of conflicts of interest and monitor them when they arise have been set in place within the Depositary, aiming namely at:

- (a) identifying and analysing potential situations of conflicts of interest;
- (b) recording, managing and monitoring the conflict of interest situations either in:
 - relying on the permanent measures in place to address conflicts of interest such as maintaining separate legal entities, segregation of duties, separation of reporting lines, insider lists for staff members; or
 - implementing a case-by-case management to (i) take the appropriate preventive measures such as drawing up a new watch list, implementing a new Chinese wall, making sure that operations are carried out at arm's length and/or informing the concerned Shareholders of the Company, or (ii) refuse to carry out the activity giving rise to the conflict of interest.

The Depositary has established a functional, hierarchical and/or contractual separation between the performance of its UCITS depositary functions and the performance of other tasks on behalf of the Company, notably, administrative agency and registrar agency services.

The Company and the Depositary may terminate the Depositary Agreement at any time by giving ninety (90) days' notice in writing. The Company may, however, dismiss the Depositary only if a new depositary bank is appointed within two months to take over the functions and responsibilities of the Depositary. After its dismissal, the Depositary must continue to carry out its functions and

responsibilities until such time as the entire assets of the Compartments have been transferred to the new depositary bank.

The Depositary has no decision-making discretion nor any advice duty relating to the Company's investments. The Depositary is a service provider to the Company and is not responsible for the preparation of this Prospectus and therefore accepts no responsibility for the accuracy of any information contained in this Prospectus or the validity of the structure and investments of the Company.

10. CHARGES & EXPENSES

The Company shall bear the following expenses:

- all taxes which may be payable on the assets, income and expenses chargeable to the Company;
- standard brokerage fees and bank charges originating from the Company's business transactions; all fees due to the Board of Directors;
- all fees due to the Management Company, the Investment Manager (if any) and the Principal Placement Agent, the Administration Agent and the Depositary as further described in the relevant Appendix;
- all fees due to the auditor of the Company;
- all fees due to the legal advisors or similar administrative charges, incurred by the Company, the Management Company and the Depositary for acting on behalf of the Shareholders;
- all reasonable expenses of the Board of Directors, the Management Company, the Administration Agent and the Depositary;
- all expenses connected with publications and the supply of information to Shareholders, in particular the cost of printing global certificates and proxy forms for general meetings for the Shareholders, the cost of publishing the issue and redemption prices, and also the cost of printing, the distribution of the annual and semi-annual reports, the Prospectus as well as the KIID, including translation costs;
- all expenses involved in registering and maintaining the registration of the Company with all governmental agencies and stock exchanges;
- all fees due to any sub-paying agent, to representatives in foreign countries and any other agents,
- the costs related to extraordinary measures, in particular any expertise or trial aiming at the protection of the Shareholders' interests.

Any costs incurred by the Company, which are not attributable to a specific Compartment, will be charged to all Compartments in proportion to their net assets. Each Compartment will be charged with all costs or expenses directly attributable to it.

11. TAXATION

11.1 The Company

Under current law and practice, the Company is not liable to any Luxembourg income tax, nor are dividends paid by the Company liable to any Luxembourg withholding tax.

However, any Class available to all investors is liable in Luxembourg to a "*taxe d'abonnement*" of 0.05% per annum of its net assets, such tax being payable quarterly and calculated on the total net asset value of each Class at the end of the relevant quarter.

Any Class reserved to institutional investors is liable in Luxembourg to a "*taxe d'abonnement*" of 0.01% per annum of their net assets. Such tax being payable quarterly and calculated on the total net asset value of each Class at the end of the relevant quarter.

For Compartments whose exclusive policy is the investment in money market instruments, qualify for the reduced "*taxe d'abonnement*" of 0.01% per annum.

No tax is payable in Luxembourg on realised or unrealised capital appreciation of the assets of the Company. Although the Company's realised capital gains, whether short- or long-term, are not expected to become taxable in another country, the Shareholders must be aware and recognise that such a possibility, though quite remote, is not totally excluded.

The regular income of the Company from some of its securities as well as interest earned on cash deposits in certain countries may be liable to withholding taxes at varying rates, which normally cannot be recovered.

As a result of recent developments in EU law concerning the scope of the VAT exemption for management services rendered to investment funds, VAT on some of the fees paid out of the assets of the Company to remunerate service providers might be applied.

11.2 Shareholders

(a) Taxation of Luxembourg resident shareholders

(i) Individual shareholders

Dividends and other payments derived from the Shares by resident individuals shareholders, who act in the course of the management of either their private wealth or their professional / business activity, are subject to income tax at the progressive ordinary rate with a top effective marginal rate for the year 2014 of 40% per cent for a taxable income of more than EUR 100.000 (class 1 and 1a taxpayers) / EUR 200.000 (class 2 taxpayers, i.e. household of 2 persons). The maximum aggregate income tax rate will thus be of 42.8% (including the solidarity surcharge of 7%) for a taxable income ranging from EUR 100,000 to EUR 150,000 for class 1 and 1a taxpayers (or EUR 200,000 to EUR 300,000 for class 2 taxpayers) and 43.6% (including the solidarity surcharge of 9%) for a taxable income exceeding EUR 150,000 for class 1 and 1a taxpayers (or EUR 300,000 for class 2 taxpayers). Under current Luxembourg tax laws, 50 per cent of the gross amount of dividends received by resident individuals from (i) a fully-taxable Luxembourg resident company limited by share capital (*société de capitaux*), (ii) a company limited by share capital (*société de capitaux*) resident in a State with which Luxembourg has concluded a double tax treaty and liable to a tax corresponding to Luxembourg corporate income tax or (iii) a company resident in a EU Member State and covered by Article 2 of the EU Parent-Subsidiary Directive is exempt from income tax.

Capital gains realised on the disposal of the Shares by resident individual shareholders, who act in the course of the management of their private wealth, are not subject to income tax, unless said capital gains qualify either as speculative gains or as gains on a substantial participation. Capital gains are deemed to be speculative gains and are subject to income tax at ordinary rates if the Shares are disposed of within six months after their acquisition or if their disposal precedes their acquisition. A participation is deemed to be substantial where a resident individual shareholder holds, either alone or together with his spouse/partner and/or minor children, directly or indirectly at any time within the five years preceding the disposal, more than ten per cent of the share capital of the Company. Capital gains realised on a substantial participation more than six months after the acquisition thereof are subject to income tax according to the half-global rate method, (i.e. the average rate applicable to the total income is calculated according to progressive income tax rates and half of the average rate is applied to the capital gains realised on the substantial participation). A shareholder is also deemed to alienate a substantial participation if he acquired free of charge, within five years preceding the transfer, a participation that was constituting a substantial participation in the hands of the alienator (or the alienators in case of

successive transfers free of charge within the same five-year period). A disposal may include a sale, an exchange, a contribution or any other kind of alienation of the Shares.

Capital gains realised on the disposal of the Shares by resident individual shareholders, who act in the course of their professional / business activity, are subject to income tax at ordinary rates. Taxable gains are determined as being the difference between the price for which the Shares have been disposed of and the lower of their cost or book value.

(ii) Luxembourg resident corporate shareholders

Dividends and other payments derived from the Shares by a Luxembourg fully-taxable resident company are subject to corporate income tax and municipal business tax at the aggregate rate of 29.22% (for the municipality of Luxembourg-city).

Capital gains realised by a Luxembourg fully-taxable resident company on the Shares are subject to income tax at ordinary rates. Taxable gains are determined as being the difference between the price for which the Shares have been disposed of and the lower of their cost or book value.

The Shares are subject to net wealth tax in the hands of a Luxembourg fully-taxable resident company (levied annually at the rate of 0.5%, computed on the net asset value of the Luxembourg company as at 1 January of each year).

(iii) Tax exempt shareholders

A shareholder who is either (i) an undertaking for collective investment subject to the Law of 2010, (ii) a specialised investment fund governed by the law of 13 February 2007, or (iii) a family wealth management company governed by the law of 11 May 2007, is exempt from income tax in Luxembourg. Dividends derived from and capital gains realised on the Shares are thus not subject to income tax in their hands.

(b) Taxation of Luxembourg non-residents shareholders

Non-resident shareholders who have neither a permanent establishment nor a permanent representative in Luxembourg to which or whom the Shares are attributable are not liable to any taxation in Luxembourg in relation to the holding, sale, redemption or transfer of the Shares, subject to the application of the Council Directive 2003/48/EC regarding the taxation of savings income (see Section 11.2 (d) below).

Dividends received by a Luxembourg permanent establishment or permanent representative, as well as capital gains realised on the Shares, are subject to Luxembourg income tax at ordinary rates.

(c) Inheritance tax and gift tax

Under Luxembourg tax law, where an individual shareholder is a resident of Luxembourg for inheritance tax purposes at the time of his/her death, the Shares are included in his or her taxable basis for inheritance tax purposes. On the contrary, no inheritance tax is levied on the transfer of the Shares upon death of a shareholder in cases where the deceased was not a resident of Luxembourg for inheritance purposes.

(d) The CRS

The Company may be subject to the OECD Standard for Automatic Exchange of Financial Account Information in Tax matters and its CRS as set out in the CRS Law.

Under the terms of the CRS Law, the Company is likely to be treated as a Luxembourg Reporting Financial Institution. As such, as of 30 June 2017 and without prejudice to other applicable data protection provisions as set out in the Umbrella Fund documentation, the Company will be required to annually report to the Luxembourg tax authorities: personal and financial information related, inter alia, to the identification of, holdings by and payments made to (i) certain investors as per the CRS Law (the “Reportable Persons”) and (ii) Controlling Persons (as defined below of certain non-financial entities which are themselves Reportable Persons. This information, as exhaustively set out in Annex I of the CRS Law (the “Information”), will include Personal Data related to the Reportable Persons, namely: the name, residence address, TIN(s), the date and place of birth, the country of tax residence(s), the phone number, the account number (or functional equivalent), standing instructions to transfer funds to an account maintained in a reportable jurisdiction, the account balance or value, the total gross amount of interest, the total gross amount of dividends, the total gross amount of other income generated with respect to the assets held in the account, the total gross proceeds from the sale or redemption of property paid or credited to the account, the total gross amount of interest paid or credited to the account, the total gross amount paid or credited to the Subscriber with respect to the account, as well as any other information required by applicable laws.

The Company’s ability to satisfy its reporting obligations under the CRS Law will depend on each Shareholder providing the Company with the Information, along with the required supporting documentary evidence. In this context, Shareholders are hereby informed that, as further described under section 10.12 “Data Protection” of this Prospectus, as data controller, the Company will process the Information for the purposes as set out in the CRS Law. Failure to do so within the prescribed timeframe may trigger a notification of the account to the Luxembourg tax authorities. The Shareholders undertake to inform their Controlling Persons, if applicable, of the processing of their Information by the Company.

For the purposes of this section, “Controlling Person” means the natural persons who exercise control over an entity. In the case of a trust, the settlor(s), the trustee(s), the protector(s) (if any), the beneficiary(ies) or class(es) of beneficiaries, and any other natural person(s) exercising ultimate effective control over the trust, and in the case of a legal arrangement other than a trust, such term means persons in equivalent or similar positions. The term "Controlling Persons" must be interpreted in a manner consistent with the global standards against money laundering and terrorist financing issued by the Financial Action Task Force, known as the Financial Action Task Force Recommendations.

Shareholders are further informed that the Information related to Reportable Persons within the meaning of the CRS Law will be disclosed to the Luxembourg tax authorities annually for the purposes set out in the CRS Law. The Information may be disclosed by the Luxembourg tax authorities, under their own responsibility, to foreign tax authorities.

In particular, Reportable Persons are informed that certain operations performed by them will be reported to them through the issuance of statements, and that part of this information will serve as a basis for the annual disclosure to the Luxembourg tax authorities. The Information may also be processed by the Recipients and/or Sub-Recipients.

Similarly, Shareholders undertake to inform the Company within thirty (30) days of receipt of these statements should any included Personal Data be not accurate or incomplete. Shareholders further undertake to immediately inform the Company of, and provide the Company with all supporting documentary evidence of any changes related to the Information after occurrence of such changes.

Any Shareholder that fails to comply with the Company’s Information or documentation requests may be held liable for penalties imposed on the Company and attributable to such Shareholder’s failure to

provide the Information or subject to disclosure of the Information by the Company to the Luxembourg tax authorities.

As further described under section 10.12 “Data Protection” of this Prospectus, each Shareholder has a right to exercise his/her rights as regards the CRS Personal Data. The Company may take such action as it considers necessary in accordance with applicable law in relation to an investor's holding to ensure that any withholding tax payable by the Company, and any related costs, interest, penalties and other losses and liabilities suffered by the Company, the Administration Agent, the Management Company or any other investor, or any agent, delegate, employee, director, officer or affiliate of any of the foregoing persons, arising from such investor's failure to provide the requested information to the Company, is economically borne by such investor.

11.3 FATCA

(a) General Rules and Legal background

FATCA is part of the U.S. Hiring Incentives to Restore Employment Act. It is designed to prevent U.S. tax payers from avoiding U.S. tax on their income by investing through foreign financial institutions and offshore funds.

FATCA applies to so called Foreign Financial Institutions (“**FFIs**”), which notably include certain investment vehicles (“**Investment Entities**”), among which a UCITS.

According to the FATCA Rules, FFIs, unless they can rely under ad-hoc lighter or exempted regimes, need to report to the IRS certain holdings by/ and payments made to a/ certain U.S. investors b/ certain U.S. controlled foreign entity investor, c/ non U.S. financial institution investors that do not comply with their own obligations under FATCA and d/clients that are not able to document clearly their FATCA status. Investors not properly documented or not complying with their FATCA obligations may also suffer a 30% withholding tax on so called "withholdable payments"

On 24 March 2014, the Luxembourg and U.S. governments entered into a Model I IGA which aims to coordinate and facilitate the reporting obligations under FATCA with other U.S. reporting obligations of Luxembourg financial institutions.

According to the terms of the IGA, Reporting Luxembourg FFIs will have to report to the Luxembourg tax authorities instead of directly to the IRS. Information will be communicated onward by the Luxembourg authorities to the IRS under the general information exchange provisions of the U.S. Luxembourg income tax treaty.

For the purposes of this section, “Controlling Person” means the natural persons who exercise control over an entity. In the case of a trust, the settlor(s), the trustee(s), the protector(s) (if any), the beneficiary(ies) or class(es) of beneficiaries, and any other natural person(s) exercising ultimate effective control over the trust, and in the case of a legal arrangement other than a trust, such term means persons in equivalent or similar positions. The term "Controlling Persons" must be interpreted in a manner consistent with the Financial Action Task Force Recommendations.

Additionally, each Compartment is responsible for the processing of Personal Data and each Shareholder has notably a right to access the data communicated to the Luxembourg tax authorities and to correct such data (if necessary). Any data obtained by the Compartments are to be processed in accordance with the Data Protection Law. The Shareholder is informed that the information provided by him/her by the time of his/her subscription, including name, date and place of birth, contact details (including postal or email address), account number (or functional equivalent), account balance or value, and U.S. tax identification number, the total gross amount of interest, the total gross amount of dividends, the total gross amount of other income generated with respect to the assets held in the account, the total gross proceeds from the sale or redemption of property paid or credited to the account,

the total gross amount of interest paid or credited to the account, the total gross amount paid or credited to the Shareholder with respect to the account, standing instructions to transfer funds to an account maintained in the U.S., and any other relevant information in relation to the Shareholders or their Controlling Persons for the purposes of the FATCA Law may be provided to the Luxembourg Tax or Authority who in turn may provide it to the US tax authorities (the “FATCA Personal Data”).

The FATCA Personal Data will be reported by the Company to the Luxembourg tax authorities. The Luxembourg tax authorities, under their own responsibility, will in turn pass on the FATCA Personal Data to the US Internal Revenue Service in application of the FATCA Law.

The Shareholders undertake to inform their Controlling Persons, if applicable, of the processing of their FATCA Personal Data by the Umbrella Fund. The Shareholders are further informed that the FATCA Personal Data related to Reportable Persons within the meaning of the FATCA Law will be disclosed to the Luxembourg tax authorities annually for the purposes set out in the FATCA Law. In particular, Reportable Persons are informed that certain operations performed by them will be reported to them through the issuance of statements, and that part of this information will serve as a basis for the annual disclosure to the Luxembourg tax authorities. FATCA Personal Data may also be processed by the Recipients and/or Sub-Recipients.

As further described under section 10.12 “Data Protection” of this Prospectus, each Shareholder has a right to exercise his/her rights as regards the FATCA Personal Data..

(b) Other parties

Additional intergovernmental agreements similar to the IGA have been entered into or are under discussion by other jurisdictions with the U.S. Investors holding investments via distributors or custodians that are not in Luxembourg or in another IGA country should check with such distributors or custodians as to the distributor’s or custodian’s intention to comply with FATCA. Additional information may be required by the Company, custodians or distributors from certain investors in order to comply with their obligations under FATCA or under an applicable IGA.

The foregoing is only a summary of the implications of FATCA, is based on the current interpretation thereof and does not purport to be complete in all respects.

Investors should contact their own tax adviser regarding the application of FATCA to their particular circumstances.

12. GENERAL INFORMATION

12.1 Organisation

The Company is an investment company organised as a *société anonyme* under the laws of the Grand Duchy of Luxembourg and qualifies as a *société d’investissement à capital variable* subject to Part I of the Law of 2010. The Company was incorporated in Luxembourg on 22 May 2015. The Company is registered with the *Registre de Commerce et des Sociétés* of Luxembourg under number B 197.170. The Articles were published in the Luxembourg legal gazette (*RESA* (formerly (*Mémorial C*), *Recueil électronique des Sociétés et Associations*) on 4 June 2015.

The minimum capital of the Company required by Luxembourg law is 1,250,000 EUR.

12.2 The Shares

Fractional entitlements to Shares will be rounded up to 4 decimal places, unless otherwise provided in the relevant Appendix. Subject to the restrictions described herein, Shares in each Compartment are freely transferable and are each entitled to participate equally in the profits and liquidation proceeds

attributable to each Class of the relevant Compartment. The rules governing such allocation are set forth under 5. "Allocation of Assets and Liabilities among the Compartments".

The Shares, which are of no par value and which must be fully paid upon issue, carry no preferential or pre-emptive rights and each one is entitled to one vote at all meetings of Shareholders.

Should the Shareholders, at an annual general meeting, decide any distributions in respect of distribution Shares (if issued) these will be paid within one month of the date of the annual general meeting. Under Luxembourg law, no distribution may be decided as a result of which the net assets of the Company would become less than the minimum provided for under Luxembourg law.

12.3 Meetings

The annual general meeting of Shareholders will be held at the registered office of the Company in Luxembourg on the second Tuesday of April of each year at 11 am. If such day is a legal or a bank holiday in Luxembourg, the annual general meeting shall be held on the next following business day in Luxembourg.

Each Share confers the right to one vote. The vote on the payment of a dividend on a particular Class requires a separate majority vote from the meeting of Shareholders of the Class concerned. Any change in the Articles affecting the rights of a Compartment must be approved by a resolution of both the general meeting of the Company and the Shareholders of the Compartment concerned.

The Management Company draws the investors' attention to the fact that any investor will only be able to fully exercise his investor rights directly against the Company, notably the right to participate in general shareholders' meetings if the investor is registered himself and in his own name in the shareholders' register of the Company. In cases where an investor invests in the Company through an intermediary investing into the Company in his own name but on behalf of the investor, it may not always be possible for the investor to exercise certain shareholder rights directly against the Company. Investors are advised to take advice on their rights.

12.4 Reports and Accounts

Audited annual reports shall be issued within 4 months following the end of the accounting year and unaudited semi-annual reports shall be issued within 2 months following the period to which they refer. The annual and semi-annual reports shall be made available at the registered offices of the Company, the Depositary, the representatives and paying agents during ordinary office hours. The Company's accounting year ends on 31 December each year. The reference currency of the Company is the EUR. The aforesaid reports will comprise consolidated accounts of the Company expressed in EUR as well as individual information on each Compartment expressed in its Reference Currency.

12.5 Allocation of assets and liabilities among the Compartments

For the purpose of allocating the assets and liabilities between the Compartments, the Board of Directors has established a pool of assets for each Compartment in the following manner:

1. the proceeds from the issue of each Share of each Compartment are to be applied in the books of the Company to the pool of assets established for that Compartment and the assets and liabilities and income and expenditure attributable thereto are applied to such pool subject to the provisions set forth hereafter;
2. Where any asset is derived from another asset, such derivative asset is applied in the books of the Company to the same pool as the asset from which it was derived and on each revaluation of an asset, the increase or diminution in value is applied to the relevant pool;

3. Where the Company incurs a liability which relates to any asset of a particular pool or to any action taken in connection with an asset of a particular pool, such liability is allocated to the relevant pool;
4. in the case where any asset or liability of the Company cannot be considered as being attributable to a particular pool, such asset or liability is allocated to all the pools in equal parts or, if the amounts so justify, pro rata to the net asset values of the relevant Compartments;
5. upon the payment of dividends to the holders of Shares in any Compartment, the net asset value of such Compartment shall be reduced by the amount of such dividends.

If there have been created within each Compartment different Classes, the rules shall *mutatis mutandis* apply for the allocation of assets and liabilities amongst Classes.

12.6 Determination of the net asset value

The net asset value per Shares of each Compartment shall be expressed in its Reference Currency. The net asset value shall be determined by the Administration Agent on each Calculation Day and on any such day that the Board of Directors may decide from time to time by dividing the net assets of the Company attributable to each Class by the number of outstanding Shares of that Class.

The Administration Agent calculates the net asset value per Share in each Compartment on the Calculation Day as defined in the Appendix. In order to avoid market timing in their units, and prevent arbitrage opportunities, where the Compartment is a Feeder Compartment, the Calculation Day shall be the same day as the Calculation Day of the Master Fund.

The calculation of the net asset value of the Shares of any Compartment and the issue, redemption, and conversion of the Shares of any Compartment may be suspended in the following circumstances, in addition to any circumstances provided for by law:

- during any period (other than ordinary holidays or customary weekend closings) when any market or stock exchange is closed which is the principal market or stock exchange for a significant part of the Compartment's investments, or in which trading is restricted or suspended,
- during any period when an emergency exists as a result of which it is impossible to dispose of investments which constitute a substantial portion of the assets of the Compartment, or it is impossible to transfer money involved in the acquisition or disposal of investments at normal rates of exchange, or it is impossible to fairly determine the value of any assets in the Compartment,
- during any breakdown in the means of communication normally employed in determining the price of any of the Compartment's investments or the current prices on any stock exchange,
- when for any reason beyond the control of the Board of Directors, the prices of any investment held by the Compartment cannot be reasonably, promptly or accurately ascertained, or,
- during any period when remittance of money which will or may be involved in the purchase or sale of any of the Compartment's investments cannot, in the opinion of the and/or the Board of Directors, be effected at normal rates of exchange;
- when calculating the net asset value of a UCITS/UCIs in which the Company has invested a substantial portion of the assets of one or more Compartments or one or more classes is suspended or unavailable, or where the issue, redemption or conversion of shares or units of such UCITS or other UCI is suspended or restricted;

- in the event of the publication of the convening notice to a general meeting of Shareholders at which a resolution to wind up or merge the Company or one or more Compartment(s) is to be proposed or;
- during any period when in the opinion of the Directors of the Company there exist circumstances outside the control of the Company where it would be impracticable or unfair towards the Shareholders to continue dealing in Shares of any Compartment.

Furthermore, a Feeder Compartment may temporarily suspend the redemption, reimbursement or subscription of its Shares, when its master UCITS temporarily suspends the redemption, reimbursement or subscription of its shares/units, whether this be at its own initiative or at the request of its competent authorities, for a period identical to the period of suspension imposed on the master UCITS.

The suspension of the calculation of the net asset value and of the issue, redemption, and conversion of shares shall be published in a daily newspaper in Luxembourg and in another newspaper generally available in jurisdictions in which the Company is registered.

The value of the assets of each Compartment is determined as follows:

- I. The assets of the Company contain the following:
 1. all fixed-term deposits, money market instruments, cash in hand or cash expected to be received or cash contributions including interest accrued;
 2. all debts which are payable upon presentation as well as all other money claims including claims for purchase price payment not yet fulfilled that arise from the sale of investment fund Shares or other assets;
 3. all investment fund Shares;
 4. all dividends and distributions due in favour of the Company, as far as they are known to the Company;
 5. all interest accrued on interest-bearing securities that the Company holds, as far as such interest is not contained in the principal claim;
 6. all financial rights which arise from the use of derivative instruments;
 7. the provisional expenses of the Company, as far as these are not deducted, under the condition that such provisional expenses may be amortised directly from the capital of the Company;
 8. all other assets of what type or composition, including prepaid expenses.

The value of such assets is fixed as follows:

1. Investment funds are valued at their net asset value.
2. Liquid assets are valued at their nominal value plus accrued interest.
3. Fixed term deposits are valued at their nominal value plus accrued interest. Fixed term deposits with an original term of more than 30 calendar days can be valued at their yield adjusted price if an arrangement between the Company and the bank, with which the fixed term deposit is invested has been concluded including that the fixed term deposits are terminable at any time and the yield adjusted price corresponds to the realisation value. Other money market instruments with a residual maturity of no more than 12 months are valued as follows (linear valuation): the determining rate for these investments will be gradually adapted during repayment starting from the net acquisition price and keeping the resulting return constant. If there are notable changes in market conditions, the bias for valuation of money market instruments will be adapted to new market returns.

4. Commercial papers are valued at their nominal value plus accrued interest. Commercial papers with an original term of more than 90 calendar days can be valued at their yield adjusted price if an arrangement between the Company and the bank, with which the commercial paper is invested has been concluded including that the commercial papers are terminable at any time and the yield adjusted price corresponds to the realisation value.
5. Securities or financial instruments admitted for official listing on a Regulated Market are valued on the basis of the last available closing price at the time when the valuation is carried out. If the same security is quoted on a Regulated Markets, the quotation on the principal market for this security will be used. If there is no relevant quotation or if the quotations are not representative of the fair value, the evaluation will be made in good faith by the Board of Directors or their delegate.
6. Unlisted securities or financial instruments are valued on the basis of their probable value realisation as determined by the Board of Directors or their delegate using valuation principles which can be examined by the auditor of the Company, in order to reach a proper and fair valuation of the total assets of each Compartment.
7. Any other assets are valued on the basis of their probable value realisation as determined by the Board of Directors or their delegate using valuation principles which can be examined by the auditor of the Company, in order to reach a proper and fair valuation of the total assets of each Compartment.
8. OTC derivative financial instruments must be value at their «fair value» in accordance with CSSF Circular 08/356.
9. Units or shares of the Master Fund will be valued at their last determined and available net asset value.
10. In the event that it is impossible or incorrect to carry out a valuation in accordance with the above rules owing to particular circumstances, the Board of Directors or their delegate shall be entitled to use other generally recognised valuation principles which can be examined by an auditor, in order to reach a proper valuation of the total assets of each Compartment.

II. The liabilities of the Company contain the following:

1. all loans, bills of exchange and other sums due, including deposits of security such as margin accounts, etc. in connection with the use of derivative instruments; and
2. all administrative expenses that are due or have been incurred, including the costs of formation and registration at the registration offices as well as legal fees, auditing fees, all fees owed to the Management Company, the Administration Agent, the Investment Manager (if any), the Depositary and all other representatives and agents of the Company, the costs of mandatory publications, the Prospectus and the KIID, conclusions of transactions and other documents which are made available to the Shareholders. If the fee rates agreed between the Company and the employed service providers (such as the Management Company, the Administration Agent, Depositary or Investment Manager (if any)) for such services deviate with regard to individual Classes, the corresponding varying fees shall be charged exclusively to the respective Class; and
3. all known liabilities, whether due or not, including dividends that have been declared but not yet been paid; and
4. a reasonable sum provided for taxes, calculated as of the day of the valuation as well as other provisions and reserves approved by the Board of Directors; and
5. all other liabilities of the Company, of whatever nature, vis-à-vis third parties; however, each Compartment shall be exclusively responsible for all debts, liabilities and obligations attributable to it.

For the purpose of valuing its liabilities, the Company may include all administrative and other expenses of a regular or periodic nature by valuing these for the entire year or any other period and apportioning the resulting amount proportionally to the respective expired period of time. The method of valuation may only apply to administrative or other expenses which concern all of Shares equally.

For the purpose of valuation within the scope of this chapter, the following applies:

1. Shares that are redeemed in accordance with the provisions under "issue, redemption and conversion of shares" above shall be treated as existing Shares and shall be posted until immediately after the point in time set by the Board of Directors for carry out the valuation; from this point in time until the price is paid, they shall be treated as a liability of the Company; and
2. All investments, cash in hand and other assets of any fixed assets that are not in the denomination of the Class concerned shall be converted at the exchange rate applicable on the day of the calculation of net asset value, taking into consideration their market value; and
3. On every Calculation Day, all purchases and sales of securities which were contracted by the Company on this very Calculation Day must be included in the valuation to the extent possible.

12.7 Liquidation / Merger of Compartments

The Board of Directors may decide to liquidate any Compartment if, in its reasonable judgement, the protection of the interests of Shareholders require so. This will be the case when 1/ net assets of the Compartment have not reached or later on, have decreased to an amount which does not allow such a Compartment to be operated in an economically efficient manner; or 2/ a change in the economic or political situation relating to the Compartment concerned would justify such liquidation.

The decision of the liquidation will be notified to the Shareholders concerned prior to the effective date of the liquidation and the notification will indicate the reasons for, and the procedures of, the liquidation operations. Unless the Board of Directors otherwise decides in the interests of the Shareholders of the Compartment concerned, the latter may continue to request redemption or conversion of their Shares on the basis of the applicable net asset value, taking into account the estimated liquidation expenses. Formation expenses will be fully amortized.

Assets which could not be distributed to their beneficiaries upon the close of the liquidation of the Compartment will be deposited with the *Caisse de Consignation* on behalf of their beneficiaries.

In accordance with the provisions of the Law of 2010 applying to a Compartment qualifying as Feeder Compartment, the Feeder Compartment shall be liquidated upon the Master Fund being either liquidated, divided into two or more UCITS or merged with another UCITS, unless the CSSF approves either (a) the investment of at least 85 % of the assets of the Feeder Compartment into units of another master Fund, or (b) the Feeder Compartment's conversion into a UCITS which is not a feeder UCITS within the meaning of the Law of 2010.

Termination of a Compartment for other reasons than those mentioned in the preceding paragraphs, may be effected only upon prior approval by the Shareholders of the Compartment to be terminated, at a duly convened Compartment's Shareholders meeting which may be validly held without quorum and may decide by a simple majority of the Shareholders of the relevant Compartment present or represented.

The Board of Directors may decide to merge any Compartment into another Compartment or into another UCITS or a compartment within such UCITS (whether established in Luxembourg or another Member State or whether such UCITS is incorporated as a company or is a contractual type fund) in compliance with the procedures laid down in the Law of 2010.

Any merger will be carried out in accordance with the provisions and requirements of the Law of 2010 which governs all the consequences arising therefrom.

12.8 Liquidation of the Company

The Company is incorporated for an unlimited period. Dissolution and liquidation shall normally be decided upon by an extraordinary general meeting of Shareholders.

Such a meeting must be convened by the Board of Directors within 40 calendar days if:

- the net assets of the Company become less than two thirds of the minimum capital required by the Law of 2010. In this case the meeting, for which no quorum shall be required, shall decide on the dissolution by a simple majority of Shares represented at the meeting;
- the net assets of the Company fall below one quarter of the minimum capital, in which case the dissolution may be resolved by Shareholders holding one quarter of the Shares at the meeting.

In the event of dissolution of the Company, liquidation shall be carried out by one or several liquidators appointed by the meeting of Shareholders. Liquidators will proceed to the liquidation of the Compartment(s) portfolio in the best interests of the Shareholders and Shareholders will receive the net proceeds of liquidation. The net liquidation proceeds of each Compartment shall be distributed to the Shareholders of the relevant Compartment in proportion to their respective holdings.

At the close of liquidation, the proceeds of liquidation corresponding to liquidation proceeds that could not be repaid, will be kept in escrow at the Caisse de Consignation in Luxembourg. Amounts not claimed within the prescribed period are liable to be forfeited in accordance with the provisions of Luxembourg law.

12.9 Material Contracts

The following material contracts have been entered into:

1. the Fund Management Agreement;
2. the Depositary Agreement;
3. the Domiciliary Services Agreement;
4. the Investment Management Agreement; and
5. the Services Agreement.

12.10 Documents

Copies of the contracts mentioned above are available for inspection, and copies of the Articles, the current Prospectus, the KIIDs and the latest financial reports may be obtained free of charge during normal office hours at the registered office of the Company in Luxembourg and on the Management Company's website at www.twentyfirstcapital.com.

12.11 Complaints Handling

Shareholders may file complaints free of charge with the Management Company in an official language of their home country.

Shareholders can access the complaints handling procedure upon request at the registered office of the Management Company and on the Management Company's website at www.twentyfirstcapital.com.

12.12 Data Protection

Shareholders are informed that their personal data or information given in the subscription documents or otherwise in connection with an application to subscribe for Shares, as well as details of their shareholding, will be stored in digital form or otherwise, and processed by the Company, acting as data controller, in compliance with the provisions of the Data Protection Law (as defined under section 1 “Definition” of this Prospectus) and section “Data Protection” hereof.

The data processed includes the name, contact details (including postal and/or e-mail address), banking details and invested amount in the Company, related either to him/herself when the Shareholder is a natural person or in relation to the Shareholder’s representatives and/or beneficial owners when the Shareholder is a legal person (the “Personal Data”). Shareholders may, at their discretion, refuse to communicate the Personal Data to the Company. In this event however the Company may reject their request for shareholding in the Company.

The Personal Data is processed in order to enter into and perform the subscription in the Company (i.e. the performance of a contract, or in order to take pre-contractual steps at the Shareholder’s request), for the legitimate interests of the Company and to comply with the legal obligations imposed on the Company. In particular, Shareholders are informed that Personal Data contained in the application form and arising from the business relationship with the Company may be stored, modified or used in any other way, in compliance with the provisions of the Data Protection Law, by the Company and on behalf of the Company for the purpose of (i) administering and developing the business relationship with the Shareholders, (ii) maintaining the register of Shareholders; (iii) processing subscriptions, redemptions and conversions of interests and payments of dividends or interests to Shareholders; of (iv) performing controls on late trading and market timing practices; and (v) complying with applicable anti-money laundering rules as well as other applicable regulations like FATCA and the CRS Law.

The “legitimate interests” referred to above are:

- the processing purposes described in point (i) of the above paragraph of this data protection section;
- meeting and complying with the Company’s accountability requirements and regulatory obligations globally; and
- exercising the business of the Company in accordance with reasonable market standards.

To this end, Shareholders are informed that Personal Data may be transmitted by the Company to other entities, acting as data recipients (the “**Recipients**”), including the Management Company, the Administration Agent, the Investment Manager, the Depositary, the Principal Paying Agent, the Auditors, the Legal Advisors, financial advisers working with the Company, as well as other companies being appointed to support the business relationship.

The Personal Data may also be transferred to third-parties such as courts, governmental or regulatory agencies, including tax authorities, in accordance with applicable laws and regulations. In particular, Personal Data may be disclosed to the Luxembourg tax authorities, which in turn may, acting as data controller, disclose it to foreign tax authorities.

The Recipients may, under their own responsibility, disclose the Personal Data to their agents and/or delegates (the “**Sub-Recipients**”), which shall process the Personal Data for the sole purposes of assisting the Recipients in providing their services to the Company and/or assisting the Recipients in fulfilling their own legal obligations.

The Company may transfer Personal Data outside of the European Economic Area, namely Canada, which data protection laws provide an adequate level of protection.

The Recipients and Sub-Recipients may, as the case may be, process the Personal Data as data processors (when processing the Personal Data upon instructions of the Company), or as distinct data

controllers (when processing the Personal Data for their own purposes, namely fulfilling their own legal obligations).

In accordance with the provisions of the Data protection Law, Shareholders have a right to (i) request information about their Personal Data and access such data at any time, (ii) request their correction in cases where such data is inaccurate and incomplete, (iii) restrict the use of his/her/its Personal data, (iv) object to the processing of his/her/its Personal Data, (v) ask for erasure of his/her/its Personal Data, and (vi) ask for data portability.

In relation thereto, the Shareholder may exercise the above rights by letter addressed to the Company at the following address:

TWENTY FIRST CAPITAL
160, Boulevard Haussmann – 75008 Paris // FRANCE
+33(0)1 70 37 80 83
gdpr@twentyfirstcapital.com

The Shareholder also has a right to lodge a complaint with the Luxembourg data protection Authority (the “CNPD”), or if the Shareholder resides in another EU Member State, with any locally competent supervisory authority.

Shareholders are informed that their Personal Data shall not be retained for longer than necessary for the purpose of its processing, subject to statutory periods of limitation.

APPENDICES TO THE PROSPECTUS - COMPARTMENTS

The Compartments are the following:

- Twenty First Funds - Tactical Long/Short
- Twenty First Funds - Exclusif 21
- Twenty First Funds - Rendement Euro Plus
- Twenty First Funds - Quant Fund
- Twenty First Funds – ID France Smidcaps

APPENDIX I

Twenty First Funds - Tactical Long/Short

1. Currency

The net asset value per Share of this Compartment is expressed in EUR.

2. Profile of the typical investor

Investors must have a medium to long-term investment horizon with a high risk profile. This Compartment may not be appropriate for investors who plan to withdraw their money within 3 years.

The Compartment is suitable to investors who want to participate in opportunities arising mainly from equity markets whatever the direction of trends (i.e. up and/or down) as well as, albeit to a lesser degree, bond and forex markets. As such, investors are aware that the return of the Compartment depends on stock index, stock sector and/or single stock opportunities as well as, albeit to a lesser degree, interest rates and currency derivatives opportunities. However, the return of the Compartment is not necessarily correlated to market trends. Investors may indeed make (or lose) money when markets are going down (or up) and vice-versa.

All investments involve risk. It is not possible to guarantee against loss resulting from an investment in the Compartment, nor can there be any assurance that the Compartment's investment objectives will be achieved. Future returns of the Compartment are not guaranteed. Investors assume the risk of receiving a lower amount than the original investment.

Particular attention must be paid to the fact that the Compartment will be invested mainly in financial derivative instruments.

3. Investment Objectives and Policy

3.1 Investment objectives

The investment objective of the Compartment is to seek long term capital growth, measured in EUR, through a Long/Short strategy by entering into long and short positions in stocks indices, stock sectors and/or single stocks (with long positions expected to increase in price and short positions expected to decrease in price.) as well as, albeit to a lesser degree, interest rates and currency derivatives. However, although the focus will mainly be on European and American equity markets, the Compartment will not be confined to any minimum investment requirement in any geographical area or asset class given its very tactical approach,. As a result, depending on opportunities, the Compartment exposures and leverages (as detailed in paragraphs 6 and 7 below) may vary from zero to their upper limits and vice versa.

In order to achieve this goal, the Compartment will invest mainly through options contracts, futures contracts and CFD or swaps. The Compartment will then generate gains from investing in a broadly diversified portfolio of derivative positions. Each position consists of a derivative which can be bought (long) or sold (short). Thus, the positions aim to generate returns both from rising as well as from falling prices of the underlying assets.

The Compartment may also seek to benefit from worldwide equity market trends, whatever their direction (i.e. up and/or down), when opportunities arise. However the Compartment's return will not be necessarily correlated to equity markets performance.

In the same regard, the Compartment may seek to benefit from worldwide currency and bond trends, whatever their direction (i.e. up and/or down), essentially through options contracts, futures contracts, forward and/or swap positions, if some opportunities are detected. Like with equity markets, the performance of the Compartment generated on currency and bond markets will not necessarily be correlated to the performance of these two financial asset classes. The Compartment may make (*or lose*) money when these two financial asset classes (i.e. currencies and bonds) are going down (*or up*) and vice-versa. Under normal circumstances, the Compartment's exposure to the bond market is expected to range between 0% and 60%. Such exposure will mainly be acquired through investments in bond futures listed on major worldwide markets and/or vanilla options on these types of futures. As a result, the Compartment's exposure to the bond market is expected to stem from investments related to sovereign debt only. Besides, the Compartment will not invest in distressed or defaulted securities.

The Compartment does not intend to pay any dividend to shareholders. Any income arising from the Compartment is then automatically reinvested.

3.2 Investment policy

The Compartment is actively managed without reference to any benchmark.

In order to meet its investment objectives and features (absolute return strategies), the position allocations of the Compartment will be tactical and highly reactive, and may then change very rapidly over time. Among others, the Compartment will focus on short-term options contracts, whether calls or puts, on the idea that, historically, market participants usually overestimate the upcoming movements in financial markets. Whether the movement of the market ex-post is above or below participants expectations will lead to a loss or a gain.

As a result, the time horizon of the positions of the Compartment will range from a few days up to a few weeks on average. The investment decision process will also be made pursuant to a combination of technical models and tools as well as top-down global macro fundamentals and bottom-up approaches. A strict money management (i.e. partial profits, stop-losses, risk-reward) may then be implemented on positions, if and when necessary, in order to both smooth the return of the Compartment and limit the risks.

Due to its tactical, short-term and highly reactive process, alongside the investment the Compartment makes in money market instruments to get a return on its cash holdings, exposures/leverages and positions of the portfolio may vary from zero to the upper limits that the Compartment is allowed to reach and vice-versa. Also, the Compartment may temporarily have no exposure/leverage/position (excluding money market instruments) if and when no opportunities are detected.

While the Compartment will invest mainly in financial derivative instruments in order to meet its investment objectives, derivative types can include but are not limited to the following:

1. Future and Forward contracts (including non-deliverable forwards) on transferable securities, interest rates, currencies or financial indices;
2. Swap contracts related to transferable securities, interest rates, foreign exchange rates and currencies or financial indices;
3. Option contracts on transferable securities, interest rates, currencies or financial indices;
4. CFDs on transferable securities, interest rates, currencies or financial indices.

Such derivatives will cover only liquid instruments on a worldwide basis. The Compartment therefore can be entirely liquidated, if necessary, in a reasonable time period.

Derivatives will be used in conformity with article 9 of the Grand-Ducal Regulation of 8 February 2008.

The counterparty risk on any transaction involving OTC derivative instruments and efficient portfolio management techniques may not exceed 10% of the assets of the Compartment when the counterparty is a credit institution domiciled in the EU or in a country where the CSSF considers that supervisory regulations are equivalent to those prevailing in the EU. This limit is set at 5% in any other case.

The Compartment may invest both in EUR and non-EUR denominated instruments. However, in order to protect the Compartment from non-EUR currency exposure, the Compartment may enter into currency hedging transactions.

The Compartment is engaged in security lending and repurchase transactions, such as CFDs and Swaps Equity.

The maximum proportion and expected level of assets that may be subject to SFTs and TRS is the following:

	Maximum proportion of assets	Expected level of assets
securities lending	0 %	0 %
repurchase transaction	0 %	0 %
TRS	100 %	50 %

The Compartment will not invest more than 10% of its net asset value in other UCITS or other UCIs that meet the four criteria of article 41(1)(e) of the Law of 2010.

Where the Compartment invests in a UCITS and/or other UCIs linked to the Management Company the manager of the underlying UCITS, respectively UCIs cannot charge subscription or redemption fees on account of the investment.

The aggregate maximum annual management fees that will be charged by the underlying UCITS in which the Compartment invests is 3% of their aggregate net asset values per annum. The effective management fees charged to the Compartment by the underlying UCITS will be disclosed in the Company's annual report.

4. Risk considerations linked to the investment policy of the Compartment

4.1 Financial derivative instruments risk

The Compartment will be invested mainly in financial derivative instruments (buying and/or short selling futures and options contracts, or CFDs and swaps). Although derivatives will cover only, liquid and main financial contracts on a worldwide basis, the use of such products and the sharp

moves that may result from any investment on stock, forex and bond markets, justify a high level of risk-reward profile.

The prices of financial futures are highly volatile and influenced by a series of factors that stem, inter alia, from variations in the relationship between supply and demand, monetary and exchange control programs and policies, fiscal and government controls, national and international political and economic events and government intervention in certain sectors, particularly in currency and interest rate markets, while the price of CFDs and swaps linked to stocks could be influenced by corporate events, mergers, IPOs, earnings, etc.

4.2 Risks associated with transactions in warrants, options, futures, swaps and CFDs

The Compartment may seek to protect or enhance the returns from the underlying assets by using warrants, options, futures, CFD and swap contracts and enter into forward foreign exchange transactions in currency. The ability to use these strategies may be limited by market conditions and regulatory limits and there can be no assurance that the objective sought to be attained from the use of these strategies will be achieved.

Participation in the warrants, options or futures markets and in swap contracts and in currency exchange transactions involves investment risks and transaction costs to which the Compartment would not be subject if the Compartment did not use these strategies.

If the Management Company's predictions of movements in the direction of the securities, foreign currency and interest rate markets are inaccurate, the adverse consequences to the Compartment may leave the Compartment in a worse position than if such strategies were not used.

Risks inherent to warrants, options, foreign currency, swaps, CFD, futures contracts and options on futures contracts include, but are not limited to: (a) dependence on the Management Company ability to predict correctly movements in the direction of interest rates, securities prices and currency markets; (b) imperfect correlation between the price of options and futures contracts and options thereon and movements in the prices of the securities or currencies being hedged; (c) the fact that skills needed to use these strategies are different from those needed to select portfolio securities; (d) the possible absence of a liquid secondary market for any particular instrument at any time; and (e) the possible inability of the Compartment to purchase or sell a portfolio security at a time that otherwise would be favourable for it to do so, or the possible need for the Compartment to sell a portfolio security at a disadvantageous time.

4.3 Discretionary risk

The discretionary management method applied to the Compartment relies on anticipating various market developments and assets selection. There is a risk that at any given time the Compartment may not be invested in the adequate markets or assets to perform. As a result, the Compartment net asset value may also decline.

Moreover, the return of the Compartment may not necessarily reflect the performance of the selected financial asset classes. Investors may indeed make (or lose) money when financial asset classes are going down (or up) and vice-versa.

4.4 Counterparty risk

The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments may expose the Compartment to financial loss.

This includes without limitation the clearer(s) and the prime broker(s) where the cash of the Compartment is transferred temporarily as collateral for clearing purposes on derivatives.

Also, where the Compartment enters into swap or CFD transactions it is exposed to a potential counterparty risk. In case of insolvency or default of the swap or CFD counterparty, such event might affect the assets of the Compartment.

4.5 Operational risk

Failures or delays in operational processes may negatively affect the Compartment.

4.6 Liquidity risk

Although the Compartment will only invest in liquid products, a risk of lower liquidity cannot be ruled out when there are insufficient buyers or sellers to allow the Compartment to sell or buy investments readily.

Events in which the trading of the securities that the Compartment holds is suspended or stopped may have an impact on the liquidity of and the value of its investments. Consequently, the processing of redemption requests may be delayed under exceptional circumstances, including in the event of the absence of liquidity that may make it difficult to determine the net asset value of the Compartment's Shares and thus cause the issuance and redemption of the Shares to be suspended.

4.7 Legislative and tax risk

There is a risk that a change in the tax legislation could affect the value of net dividends received from the underlying equity investments. Such dividends will generally be subject to withholding tax.

4.8 Credit and default risk

The Compartment invests its cash holdings in short term money market instruments. For that purpose, the Compartment may invest in investment grade corporate bonds with good liquidity and a remaining maturity of less than a year.

The creditworthiness of a fixed-income security's issuer may however deteriorate, increasing the required return and decreasing the security's value.

Also, default risk is the risk that companies or individuals will be unable to make the required payments on their debt obligations. Lenders and investors are exposed to default risk in virtually all forms of debt securities.

4.9 Sustainability Risks Likely Impacts

The portfolio of the Compartment is highly diversified; hence the Management Company believes that the Compartment will be exposed to a broad range of Sustainability Risks, which will differ depending on the nature of each asset class.

Some markets and sectors will have greater exposure to Sustainability Risks than others. For instance, the energy sector is known as a major Greenhouse Gas (GHG) producer and may be subject to greater regulatory or public pressure than other sectors and thus, greater risk. However, it is not anticipated that any single Sustainability Risk will drive a material negative financial

impact on the value of the Compartment.

In light of the Compartment's investment strategy and risk profile, the likely impacts of Sustainability Risks on the Compartment's returns are expected to be low.

5. Risk Management

In accordance with the Law of 2010 and the applicable regulations, in particular CSSF Circular 11/512, the Compartment is subject to a risk management process, which enables it to assess its exposure to market, liquidity and counterparty risks, and to all other risks, including operational risks, which are material for the Compartment. The Management Company will employ a process for accurate and independent assessment of the value of any OTC derivative instruments.

6. Calculation of global exposure

As part of its risk management process and in view of the absolute return strategy that is pursued, the global exposure of the Compartment is measured and controlled by the absolute VaR Approach. VaR limit of 20% over 20 days at the 99% level.

7. Leverage

(a) Gross leverage

The gross leverage is the sum of the long positions and the short positions (in absolute terms), with all asset classes combined:

Derivatives are converted into the equivalent position in the underlying assets.

Deltas of options are considered at their market value.

Forex exposure is added for securities which are not euro based.

Money markets instruments with maturity of no more than one year and money market funds (assuming a daily liquidity of the net asset value) are not taken into account.

The expected level of gross leverage may vary between 0% and 400% based on the net asset value per Share of the Compartment. Under certain circumstances however (such as the case of option put/call spreads positions), the level of leverage might exceed the before mentioned range.

As an example, assume that the Compartment holds the following positions, all valued in Euro:

- Long Dax futures contract with a notional value of 10.
- Long Eurostoxx put option with an underlying notional value of 10 and a delta of 0.50.
- Short S&P500 futures contract with a notional value of 15.
- Short S&P500 call option with an underlying notional value of 10 and a delta of 0.50.
- Long Cisco equity (as distinct to any swap) with a value of 5.
- Long Ericsson equity swap with a notional value of 5.
- Long German Bund futures contract with a value of 2.

The sum of long positions (all asset classes combined) is: + 10 for the Dax contract + 5 for the Cisco security + 5 for the Forex exposure of Cisco security in US dollar + 5 for the Ericsson swap + 0 for the Forex exposure of Ericsson swap + 2 for the German Bund contract = a total of + 27.

The sum of short positions (in absolute terms and all asset classes combined) is: + 5 for the Eurostoxx option + 15 for the S&P500 contract + 5 for the S&P500 option = a total of + 25.

In the end, the gross leverage of the compartment is the sum of both calculations, which gives a total of + 52.

(b) Net leverage

The net leverage is the sum (in absolute terms) of the nettings of the long positions and the short positions by asset class:

Derivatives are converted into the equivalent position in the underlying assets.

Deltas of options are considered at their market value. Forex exposure is added when securities positions are not Euro based. Money markets instruments with maturity of no more than one year and money market funds (assuming a daily liquidity of the NAV) are not taken into account.

In any case, the net leverage may not exceed 200% of the net asset value per Share of the Compartment.

In the example presented in the gross leverage paragraph above, the nettings by asset class are:

For the equity class: + 10 for the Dax contract - 5 for the Eurostoxx option - 15 for the S&P500 contract - 5 for the S&P500 option + 5 for the Cisco security + 5 for the Ericsson swap = a total of - 5 = i.e. a total of + 5 in absolute terms.

For the forex class: + 5 for the Forex exposure of Cisco security in US dollar + 0 for the Forex exposure of Ericsson swap in Swedish Krona = a total of + 5 = i.e. a total of + 5 in absolute terms.

For the fixed income class: +2 for the German Bund contract = i.e. a total of + 2 in absolute terms.

In the end, the net leverage of the compartment is the sum of all class nettings (in absolute terms), which gives a total of + 12.

8. Management of collateral

The Compartment does not receive any collateral.

9. Shares and fees

Twenty First Funds - Tactical Long/Short		
Class	Class A	Class B
Launch date	18 June 2015	18 June 2015
ISIN code	LU1240908654	LU1240908738
Investor Type	Institutional	Retail
Subscription Fee	0%	Up to 2%
Conversion Fee	None	

Redemption Fee	None	
Management Company Fee¹	Maximum 1.5%	Maximum 1.9%
Performance Fee²	15% HWM upon Hurdle Rate	
Maximum Administration, Domiciliary and Depository Fee	0.70% including 0.01% for CSSF subscription tax	0.70% including 0.05% for CSSF subscription tax
NAV currency	EUR	
NAV frequency	Every Business Day	
Hedging	N/A	
Dividend policy	Capitalisation	
Minimum subscription amount and minimum holding amount	EUR 100,000	EUR 1,000
Abbreviated name for commercial purposes	Tactical Long/Short A	Tactical Long/Short B

1. The Management Company Fee is payable monthly to the Management Company and is calculated on each Valuation Day on the basis of the Net Asset Value of the relevant Share Class (before deduction of any Performance Fee).
2. The Performance Fee is payable to the Management Company.

The Subscription Fee during the Offering Period, the amount of which will revert to the relevant Distributor, is a maximum percentage that will be calculated on the basis of the Initial Issue Price of the relevant Share Class. After the Offering Period, it will be calculated on the basis of the Net Asset Value of the relevant Share Class.

10. Dividend policy

With respect to the distribution Class(es), the Board of Directors may decide to distribute interim dividends. The distributions may take place either in the form of cash in the relevant currency of the Class or through redemption of Shares.

Dividends shall be paid out of the distributable profits of the Compartment as determined by the Board of Directors. Dividends payable to Shareholders will be paid by electronic transfer to the bank account designated by the Shareholder in which case the dividend will be paid at the expense of the payee.

The Board of Directors reserves the right to change the dividend policy of the Compartment in the future, in which case Shareholders would be notified in advance and this Appendix will be modified accordingly.

11. Cut-off Time

11:30 a.m. Luxembourg time on the applicable Valuation Day.

12. Subscription of Shares

Applications must be received by the Company no later than the Cut-off Time.

Any taxes and duties levied in connection with the subscription of Shares in certain countries (if any) shall be charged to the concerned investors.

13. Redemption of Shares

Redemption requests must be received by the Company no later than the Cut-off Time.

14. Conversion of Shares

Conversion requests must be received by the Company no later than the Cut-off Time.

15. Net Asset Value

The net asset value per Share of the Compartment is calculated each Calculation Day, dated as of the Valuation Day, based on the closing prices as of such Valuation Day.

The net asset value per Share will be rounded to 2 decimal places.

Fractional entitlements to Shares will be rounded to 2 decimal places.

16. Performance Fee

As from 1 January 2019, the performance period for the Compartment shall be each period from 1 January to 31 December in each year (the "Performance Period").

The Performance Fee is payable yearly to the Investment Manager as of 31 December of each year and covers each 12 month period starting on 1 January of each year.

The Compartment is subject to a Performance Fee of 15% upon Hurdle Rate defined by EONIA (Bloomberg ticker: EONIA Index) (the "**Benchmark**") with High Water Mark ("**HWM**"), taking subscriptions and redemptions into account and payable yearly to the Investment Manager (as described further below).

The Performance Fee amounts to 15% of any positive difference between the percentage change in the net asset value per Share of the relevant Class and the reference Hurdle Rate. However, if and when EONIA is negative, the Hurdle Rate is considered as zero.

The Performance Fee is calculated and accrued in the calculation of the net asset value per Share for each Performance Period, on the basis of the number of Shares currently in issue, including Shares which fall to be redeemed and excluding Shares which fall to be issued. The difference in yield between the percentage change in the net asset value per Share and the percentage change in the reference Hurdle Rate is calculated as follows:

$$(1 + \text{yield of net asset value per Share}) - (1 + \text{yield of reference Hurdle Rate}) = \text{yield difference}$$

The calculation of the Performance Fee entails a mechanism that ensures the Performance Fee to be due only if the cumulative difference since the Compartment's launch date, calculated pursuant to the aforementioned method, has reached a new high (High Water Mark principle). The

Performance Fee will then be payable for the difference between the cumulative prior high (before withdrawal of the Performance Fee) and the new high.

Any refund of this Performance Fee is not contemplated, even if the net asset value per Share falls down again after the Performance Fee has been paid.

When calculating the Performance Fee payable to the Investment Manager, the Compartment is using a benchmark within the meaning of the Benchmarks Regulation.

The Management Company has adopted a written plan setting out actions, which it will take with respect to the Compartment in the event that the Benchmark materially changes or ceases to be provided (the “**Contingency Plan**”), as required by article 28(2) of the Benchmarks Regulation. Shareholders may have access to the Contingency Plan free of charge upon request at the following address: contact@twentyfirstcapital.com.

As of the day of this visa-stamped Prospectus, the Benchmark is being provided by the European Money Market Institute, which is listed in the register referred to in article 36 of the Benchmarks Regulation as an administrator authorised pursuant to Article 34 of the Benchmarks Regulation.

Where a Performance Fee is payable out of the Compartment, it shall be calculated upon the increase in the net asset value per Share calculated at the end of the relevant Performance Period. Net realised and unrealised capital gains plus net realised and unrealised capital losses as at the end of the relevant Performance Period will be taken into consideration. As a result, the Performance Fee may be paid on unrealised gains which may subsequently never be realised.

APPENDIX II

Twenty First Funds - Exclusif 21

1. Currency

The net asset value per Share of this Compartment is expressed in EUR.

2. Profile of the typical investor

The Compartment is suitable for any subscriber seeking performance linked to the equity markets by trying to limit the risk of loss in bad times through the flexible management of allocation of assets.

It may be used to support unit-linked life insurance policies.

This Compartment may not be appropriate for investors who plan to withdraw their money within 3 years.

The reasonable amount to be invested in this Compartment depends on the personal situation of each investor. To determine such amount, an investor shall take into account its personal estate, its current and 5 year needs, as well as whether it wishes to take risks or, on the contrary, give priority to a prudent investment approach. It is highly recommended to an investor to sufficiently diversify its investments in order to not be exposed solely to the risk of this Compartment.

3. Investment Objectives and Policy

3.1 Investment objectives

The investment objective of the Compartment is to seek capital growth over the recommended investment period (minimum 5 years) through active and discretionary management of a diversified portfolio.

3.2 Investment policy

The Compartment is actively managed without reference to any benchmark.

The investment strategy implemented to achieve the investment objective relies on discretionary management.

Depending on the Management Company's stock market expectations, the Compartment will be exposed, directly or through the holding of UCITS and/or other UCIs units or shares, to equities, bonds, debt securities and money market instruments.

The allocation between those different asset classes, as well as the geographic areas to be favoured, will be determined according to the global macro-economic analysis carried out by the Management Company. Total exposure to equity risk may be between 0 and 100% inclusive. When the Management Company is expecting favourable developments in the equity markets, the Compartment will be invested in the higher end of the range in equities. On the other hand, during

a period of expectation of a downturn in the equity markets, debt securities and/or money market instruments will be favoured and may constitute 100% of the portfolio.

There will be no specific focus on a particular sector or geographic area and investments may be concentrated on a single sector or a single geographic area. The focus will rather be on the European area and then on the USA. Emerging countries will not represent more than 10% of the portfolio.

The selection of securities relies on a fundamental and classical financial analysis (price/profits ratio, rate of growth/price ratio, prices over net assets ratio, valuation pattern by discounting cash flow).

The Compartment is not authorised to enter into any securities financing transaction as defined in the SFTR or total return swaps or other financial derivative instruments with similar characteristics. Should the Compartment decide to enter into this type of operations in the future, the prospectus would be updated in accordance with the relevant regulations and CSSF Circulars in force.

3.3 Authorised investments and investment restrictions

The Compartment may invest in the following categories of assets and financial instruments:

a) Equities (0 to 100% exposure)

The Compartment invests in equities the capitalisation of which is in excess of EUR 1 billion. The Management Company will have an approach based on the value in the selection of securities forming the Compartment's portfolio, thereby seeking to invest in securities which seem to be undervalued.

b) Debt securities and money market instruments (0 to 100% exposure)

The Compartment invests in French Treasury bills, French Treasury bills with a standardised annual rate ("BTAN" – *Bon à Taux Annuel Normalisé*), French public and private sector bonds or bonds from an OECD country, deposit certificates issued by French or OECD companies and convertible bonds. Investments in debt securities and money market instruments will be made with no pre-defined percentage between public and private debt. There is no limit in respect of the borrowers' rating. The percentage of speculative securities does not exceed 20% of the net assets. The average duration of the portfolio is between -2 and 10 inclusive.

c) Shares or units of UCITS or UCIs

The Compartment may invest up to 10% of its assets in shares or units of UCITS and/or other UCIs within the meaning of I. (1) (c) of the investment and borrowing restrictions set forth in section 3.3 for the purposes of exposure to equity risk and/or interest-rate risk and/or credit risk and/or foreign exchange risk and/or incidentally to commodities risk and/or for the diversification of the instruments on which the Management Company prefers to rely on specialists or to invest the Compartment's cash. The Compartment may, within the above limits, invest in UCITS that qualify as ETFs which have an exposure to commodities (including precious metals).

These UCITS or UCIs may be managed or promoted by the Management Company or by a subsidiary or affiliate thereof.

d) Derivative instruments

The Compartment may use derivative instruments traded on a Regulated Market. The use of derivative instruments for the purposes of hedging equity, rate and foreign exchange risk enables:

- To protect a portion of the assets in the event of a downturn in the markets by the purchase of put options or call options.
- To protect a specific holding in the portfolio in the event of a downturn in a specific security by the purchase of put options or call options.
- To improve the return on the portfolio by the sale of call options on securities in the portfolio or the sale of put options.

The use of derivative instruments for the purposes of exposure to equity, rate and foreign exchange risks enables:

- To gain synthetic exposure to assets - markets, equities - by the purchase of call options, while retaining a portion of the assets' liquidity.
- To expose the asset to the underlying, index or equity, by the sale of put options.

These transactions are carried out only once per asset. No leverage is ever made. Forward exchange transactions are only carried out for hedging of securities positions held in foreign currency outside the Euro zone.

Rate swaps may be carried out in the context of the management of the Compartment's cash flow.

e) Securities with embedded derivatives (warrants, purchase warrants, certificates, etc.)

The Compartment may invest in specific instruments to influence equity, interest-rate or foreign exchange risks, for hedging purposes, exposure purposes or arbitrage purposes, by using the same techniques as those described for derivative instruments. These instruments include but are not limited to: warrants, purchase warrants, bonds with equity warrants, shares with equity warrants, bonds redeemable in shares, indices, equity or foreign exchange certificates, etc. The underlying assets of the embedded derivatives will be eligible investments in accordance with the Law of 2010.

The Compartment uses these securities for the purposes of exposure to equity risk or bond risk and/or for hedging purposes in respect of warrants or certificates. Investment in these instruments may range between 0 and 100% inclusive of the net assets.

f) Deposits

In the context of managing the Compartment's cash flow, the Management Company may invest in short-term deposits. Such deposits may not have a term longer than one year. The maximum

level of use of this asset category, apart from the period of building the portfolio, will be 40%. This level will depend on the Management Company's market expectations.

g) Temporary acquisitions and assignments of securities

The Management Company may enter into reverse repurchase agreements or may engage in securities lending transactions to manage the Compartment's cash flow.

To optimise return on the investments held in the portfolio, the Management Company may also enter into reverse repurchase agreements or may engage in securities lending transactions for up to 100% of the assets of the Compartment.

4. Risk considerations linked to the investment policy of the Compartment

The Compartment will be invested in financial instruments selected by the Management Company in the context of the investment strategy described above. These instruments will be exposed to market trends and risks.

Investors are advised to carefully consider the risks of investing in this Compartment and are therefore referred to Section 6 of the General Section which provides a non-exhaustive description of risks.

The following risk factors apply at the level of the Compartment:

4.1 Risk associated with discretionary management

The Compartment's performance depends on the Management Company's ability to anticipate movements in the various markets and in his selection of securities. There is a risk that the Compartment is not invested at all times in the best-performing markets and securities. The Compartment's performance may therefore not be optimal.

4.2 Counterparty risk

This risk is linked to the conclusion of contracts for financial forwards instruments and to assignments and acquisitions of securities. This is the risk of failure of a counterparty leading it to default on a payment.

4.3 Capital risk

This is the risk that the investor does not get back his initial investment as the Compartment does not benefit from any guarantee or protection.

4.4 Equity market risk

This is the risk of a general downturn in equity prices. When the equity markets go down, the Compartment's net asset value also goes down.

4.5 Interest-rate risk

This is the risk of an increase in rates (if sensitivity is positive) or a decrease in rates (if sensitivity is negative), which results in a downturn in prices of the bonds held in the portfolio and therefore a downturn in the Compartment's net asset value.

4.6 Credit risk

Any risk of downgrading of the issuer's rating and the risk that the issuer is unable to meet its financial obligations, which will lead to a downturn in the price of the security and therefore of the Compartment's net asset value.

Investment in high yield securities, the rating of which is low or non-existent, may increase the credit risk.

4.7 Foreign exchange risk

An investment in currencies other than the designated or benchmark currency involves a foreign exchange risk. Therefore, if the Euro appreciates against other currencies, the Compartment's net asset value may go down.

4.8 Concentration risk

The Compartment may be concentrated on a geographic area or activity sector. In the event of an adverse development, the market value may go down more sharply than the equity markets.

4.9 Risk associated with emerging countries

The investor's attention is drawn to the fact that the conditions of operation and monitoring of emerging markets may differ from the standards prevailing in the major international centres. As the Compartment may invest up to 10% of its assets in equities from emerging countries, downward movements on these markets may therefore result in a quicker and sharper fall in the net asset value.

4.10 Risk associated with commodities

As the Compartment may invest in UCITS which have an exposure to commodities (including precious metals) via an index, the price of the shares or units such UCITS may vary in relation to a commodities index.

4.11 Sustainability Risks Likely Impacts

The portfolio of the Compartment is highly diversified; hence the Management Company believes that the Compartment will be exposed to a broad range of Sustainability Risks, which will differ depending on the nature of each asset class.

Some markets and sectors will have greater exposure to Sustainability Risks than others. For instance, the energy sector is known as a major Greenhouse Gas (GHG) producer and may be subject to greater regulatory or public pressure than other sectors and thus, greater risk. However,

it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Compartment.

In light of the Compartment’s investment strategy and risk profile, the likely impacts of Sustainability Risks on the Compartment’s returns are expected to be low.

5. Risk Management

In accordance with the Law of 2010 and the applicable regulations, in particular Circular CSSF 11/512, the Compartment is subject to a risk management process, which enables it to assess its exposure to market, liquidity and counterparty risks, and to all other risks, including operational risks, which are material for the Compartment. The Management Company will employ a process for accurate and independent assessment of the value of any OTC derivative instruments.

6. Calculation of global exposure

As part of its risk management process and in view of the long-only strategy that is pursued, the global exposure of the Compartment is measured and controlled by the Commitment Approach.

The global exposure of the Compartment does not exceed 100% of its total net assets on average.

7. Management of collateral

The Compartment does not receive any collateral.

8. Shares and fees

Twenty First Funds - Exclusif 21		
Class	Class C	Class I
Launch date	26 September 2016	26 September 2016
ISIN code	LU1373287983	LU1373288015
Investor Type	Retail	Institutional
Subscription Fee	Up to 3%	None
Conversion Fee	None	
Redemption Fee	None	

Management Company Fee¹	Maximum of 1.65%	Maximum of 1%
Performance Fee	10% above Hurdle Rate	
NAV currency	EUR	
NAV frequency	Each Business Day	
Hedging	N/A	
Dividend policy	Capitalisation	
Minimum subscription amount and minimum holding amount	1 Share	EUR 1,000,000
Abbreviated name for commercial purposes	Exclusif 21 C	Exclusif 21 I

The Management Company may receive out of the assets of the Compartment a transaction fee of up to 0.50% (inclusive of VAT) of each acquisition and sale of shares.

¹ An all-in fees structure has been put in place for this Compartment, meaning that the Management Company Fee includes:

- the amortization of formation and restructuring expenses;
- the fees of the accounting valuator;
- the fees of the Depositary and the entities to which the depositary function may have been delegated by it;
- the custody fees;
- the domiciliation fees;
- the transfer agent fees;
- the fees related to the preparation of the financial statements;
- the fees related to the publication of financial statements and financial communications;
- the fees related to the calculation of the net asset value of the Compartment;
- the fixed management fees of the Management Company;
- the directors' fees;
- the insurance premiums of the Compartment;
- the audit fees;
- the CSSF subscription tax (*taxe d'abonnement*);
- the taxes related to the UCITS status of the Compartment;
- the entertainment expenses:
- the transaction costs of the Depositary;
- the costs related to the Compartment's banking service.

9. Dividend policy

With respect to the Class(es) distributing dividends, the Board of Directors may decide to distribute interim dividends. The distributions may take place either in the form of cash in the relevant currency of the Class or through redemption of Shares.

Dividends shall be paid out of the distributable profits of the Compartment as determined by the Board of Directors. Dividends payable to Shareholders will be paid by electronic transfer to the bank account designated by the Shareholder in which case the dividend will be paid at the expense of the payee.

The Board of Directors reserves the right to change the dividend policy of the Compartment in the future, in which case Shareholders would be notified in advance and this Appendix will be modified accordingly.

10. Cut-off Time

11:30 a.m. Luxembourg time on the applicable Valuation Day.

11. Subscription of Shares

Applications must be received by the Company no later than the Cut-off Time.

Any taxes and duties levied in connection with the subscription of Shares in certain countries (if any) shall be charged to the concerned investors.

12. Redemption of Shares

Redemption requests must be received by the Company no later than the Cut-off Time.

13. Conversion of Shares

Conversion requests must be received by the Company no later than the Cut-off Time.

14. Net Asset Value

The net asset value per Share of the Compartment is calculated each Calculation Day, dated as of the Valuation Day, based on the closing prices as of such Valuation Day.

The net asset value per Share will be rounded to 2 decimal places.

Fractional entitlements to Shares will be rounded to 2 decimal places.

15. Performance Fee

The performance period for the Compartment shall be each period from 1 October of each year to 30 September of the following year, except for the first performance period which shall commence on the first allotment of Shares in a Class and end on 30 September 2017 (the “**Performance Period**”).

The Performance Fee is payable yearly to the Management Company as of 30 September of each year and covers each 12 month period starting on 1 October of each year and shall terminate on 30 September of the following year, except for the first Performance Period which will start on the Compartment's launch date and will terminate on 30 September 2017.

A Performance Fee is due only if the net asset value as of 30 September is higher than the net asset value as of 30 September of the previous year upon Hurdle Rate of 5%, except for the first Performance Period where a Performance Fee is due only if the net asset value of the relevant Class as of 30 September is higher than 1,395.74 for Class C and 990.97 for Class I with an Hurdle Rate of 5%.

The Compartment is subject to a Performance Fee of 10% upon Hurdle Rate of 5%, taking subscriptions and redemptions into account and payable yearly to the Management Company.

The Performance Fee is calculated and accrued in the calculation of the net asset value per Share for each Valuation Day, on the basis of the number of Shares currently in issue, including Shares which fall to be redeemed and excluding Shares which fall to be issued.

The Performance Fee in respect of each Performance Period will be calculated by reference to the Net Asset Value before deduction for any accrued Performance Fee.

If a Share is redeemed (or converted) other than at the end of a Performance Period, the Performance Fee calculated in respect of such Share as at the Valuation Day as of which such Share is redeemed (or converted) shall be crystallised and become payable to the Management Company.

Any refund of this Performance Fee is not contemplated, even if the net asset value per Share falls down again after the Performance Fee has been paid.

Where a Performance Fee is payable out of the Compartment, it shall be calculated upon the increase in the net asset value per Share calculated at the end of the relevant Performance Period. Net realised and unrealised capital gains plus net realised and unrealised capital losses as at the end of the relevant Performance Period will be taken into consideration. As a result, the Performance Fee may be paid on unrealised gains which may subsequently never be realised.

APPENDIX III

Twenty First Funds - Rendement Euro Plus

1. Currency

The net asset value per Share of this Compartment is expressed in EUR.

2. Profile of the typical investor

The Compartment is suitable for investors seeking a bond yield for the recommended investment period, resulting from a diversified portfolio of bonds and other debt securities as well as money market instruments denominated in Euro.

The reasonable amount to be invested in this Compartment depends on the personal situation of each investor. To determine such amount, an investor shall take into account its personal estate, its current and future needs, its contemplated investment duration, as well as whether it wishes to take risks or, on the contrary, give priority to a prudent investment approach. It is highly recommended to an investor to sufficiently diversify its investments in order not to being exposed solely to the risk of this Compartment.

This Compartment may not be appropriate for investors who plan to withdraw their money within 3 years.

3. Investment Objectives and Policy

3.1 Investment objectives

The investment objective of the Compartment is to exceed the performance of the FTSE MTS Eurozone Government Bond 3-5Y index + 1% over the recommended period of investment, mainly by investing in bonds and other debt securities denominated in Euro.

3.2 Benchmark

The benchmark is the FTSE MTS Eurozone Government Bond 3-5Y index.

The FTSE MTS Eurozone Government Bond 3-5Y index represents the price of a basket of Euro zone liquid Government bonds, at fixed rates, with a residual term of 3 to 5 years. FTSE MTS Eurozone Government Bond 3-5Y index reproduces the market performance of Government bonds in the Euro zone, by relying on a basket of bonds selected according to specific criteria. Therefore not all Euro zone Government bonds are included in this index.

The indicator is retained on the closing price and expressed in Euro, coupons reinvested.

3.3 Investment policy

The portfolio is put together and managed on the basis of a quantitative and qualitative analysis of the investment universe, in order to include in the Compartment's portfolio the securities judged to be consistent with the management objectives and constraints.

The Compartment is actively managed and references the FTSE MTS Eurozone Government Bond 3-5Y index (the “**Benchmark**”) for performance comparison purposes. As indicated above, the Compartment’s objective is to exceed the performance of the Benchmark + 1% over the recommended period of investment. The Benchmark only consists in an outperformance target for the Compartment.

The investment objective is to put together a portfolio of broadly diversified bonds and negotiable debt securities denominated in Euro responding to quality and prudential criteria specific to the Management Company. Under normal market conditions, the portfolio’s average rating is expected to be of BBB or Baa2.

Strategies used

In order to achieve its objective, the Compartment is investing in bonds and other debt securities denominated in Euro.

The portfolio will be invested in bond and monetary securities, issued by States or private or public companies from OECD countries. Unhedged exposure to securities denominated in a currency other than the Euro and exposure to foreign exchange risk will remain incidental.

The portfolio may incidentally be re-invested in equities quoted on a regulated market or on a multilateral trading facility and issued by private sector companies, of any market capitalisation, located exclusively within the Euro zone countries.

A maximum of 5% only of the Compartment’s net assets can be invested in small-caps (less than € 150 million). In all cases, exposure to equity risk shall not exceed 10% of the net assets.

Up to 10% of the Compartment’s net assets may also be invested in shares or units of UCITS or UCIs that meet the four criteria of article 41(1)(e) of the Law of 2010. These UCIs may be closed-end funds provided they comply with UCITS eligibility rules.

The objective of diversification of the Compartment is to be exposed to a minimum of forty public or private issuers within 12 (twelve) months as from the date of its launch, it being understood that the Management Company has the option of exposing the Compartment to less than forty issuers if it considers that it will be in the shareholders interest (in particular with regard to specific market conditions or the Compartment’s investment capacities).

The securities acquired in the portfolio, or their issuers, must, at the time of acquisition:

- for a minimum of 30% of the portfolio: either be rated “Investment Grade” as a minimum according to the worst rating awarded by any internationally recognized rating agency selected, approved or referenced by the Management Company, or, if no agency has produced any analyses, benefit from an implied rating equivalent to this level according to estimates by the management team and the risk management team of the Management Company. As an example, “Investment Grade”, is understood a rating at least equal to BBB- on the Standard & Poor’s scale.

and,

- for the remainder, “High Yield” (speculative securities). These more risky speculative securities generally present higher probabilities of default than those securities in the “Investment Grade” category. The “High Yield” (speculative securities) categorisation of a security will be retained if at least one internationally recognized rating agency selected, approved or referenced by the Management Company recognised such a quality in the security in question or, if no agency has produced any analyses, if the security benefits from an implied rating equivalent to this level according to estimates by the management team and the risk management team of the Management Company. As an example, by “High Yield” (speculative securities), is understood a rating of less than BBB- on the Standard & Poor’s scale.

In the event of a downgrading to the “non investment grade” of the rating of a security or issuer present in the portfolio, the Management Company may (i) retain it for a tolerance period of six (6) months with effect from such downgrading being recorded, if it considers at its discretion that the issuer or the security in question may regain “Investment Grade” over such period and/or (ii) retain it in the portfolio subject to a minimum of 30% of the securities in the portfolio remaining in the “Investment Grade” category. Failing this, the Management Company must proceed with the sale of the security in question or of one or more other “High Yield” (speculative securities) securities in the portfolio, in order to always comply with the above-mentioned rule.

Structure of the allocation

The Management Company determines a target allocation in order to optimise the portfolio’s current yield, while minimising the risk of capital loss. This allocation will integrate market rates, credit premiums and the shape of the bond curve.

The basic strategy will therefore be to acquire debt securities of different maturities and adapted to the target allocation. The Compartment may divest any security in the portfolio, specifically to improve the portfolio’s yield, to comply with the above-mentioned ratio of 30% of “Investment Grade” category securities or to minimise the portfolio’s average default risk. The Compartment may also re-invest in any new debt security.

The Compartment’s portfolio is built around a “bottom up” approach for the selection of securities (i.e. extract the relative value of one counterparty in relation to another) and “top down” for optimisation of the portfolio (i.e. degree of exposure to the High Yield market, sector allocation or by rating category).

There will be no predefined criteria of sector or capitalisation of the issuers in the selection of bonds and other debt securities in the portfolio.

Furthermore, during the period of building the portfolio, the Management Company reserves the option of remaining invested in money market instruments.

The Management Company is putting together the portfolio in relation to the selection of issuers, hedging rate and lifespan of the assets, the average lifespan of the portfolio and the maturity profile of the securities held, which will be monitored continuously.

Spread of sensitivity to interest rates within which the Compartment is managed	Between 0 and 6
Denomination currencies of the securities in which the Compartment is invested	Euro: 50% to 100% of the net assets (*) Others: 0 to 50% of the net assets
Level of foreign exchange risk borne by the Compartment	A maximum of 10% of the net assets
Geographic area of the issuers of the securities to which the Compartment is exposed	OECD: from 90 to 100% of the debt securities (*) Others: from 0 to 10% of the debt securities

(*) *The 100% limit may occasionally be exceeded in the context of significant subscriptions/redemptions, significant market variations or even due to a slight delay in payment in respect of divestment/investment transactions of the Compartment's assets.*

3.4 Authorised investments and investment restrictions

The Compartment may invest in the following categories of assets and financial instruments:

a) Debt securities and money market instruments

The Compartment will be invested in bonds, money market instruments and other French or foreign negotiable debt securities denominated in Euro, the issuers of which will be located in the OECD zone: fixed and/or variable rate bonds, adjustable rate bonds, index-linked bonds, convertible bonds and government bonds. The Compartment may incidentally invest in securities issued by issuers outside the OECD.

The portfolio may include securities issued in currencies other than the Euro (for example, US Dollar, British Pound, Swiss Franc, Japanese Yen, etc.). Thus, exposure to foreign exchange risk will remain incidental and must not, in any event, exceed 10% of the Compartment's net assets. The Management Company will in fact take positions on derivatives with a view to hedging the portfolio against the foreign exchange risk, by using forward exchange contracts, futures, swaps or options.

A minimum of 30% of the securities in the portfolio must be "Investment Grade" category, in accordance with the terms stated above. As an example, by "Investment Grade", is understood a rating at least equal to BBB- on the Standard & Poor's scale.

The distribution of private/public debt is not defined in advance; it will take place depending on the general allocations defined by the Management Company and market opportunities. In the same way, the Management Company will define the duration in relation to the management objectives and constraints defined previously (e.g. credit sensitivity, rate sensitivity).

The portfolio's sensitivity to interest rates may vary between 0 and 6.

Divestments improving the portfolio's yield may be planned, specifically to improve the portfolio's yield, to comply with the above-mentioned ratio of 30% of "Investment Grade" category securities or to minimise the portfolio's average default risk.

The Management Company does not impose any constraint in respect of subordination or in respect of the legal characteristics of the debt securities eligible for investment.

b) Equities

The Compartment may be exposed up to a maximum of 10% to one or more markets of equities issued in the OECD countries.

The portfolio may therefore incidentally be re-invested in equities quoted on a regulated market or on a multilateral trading facility and issued by private sector companies, of any market capitalisation, located exclusively within the Euro zone countries.

A maximum of 5% only of the Compartment's net assets can be invested in small-caps. In all cases, exposure to equity risk shall not exceed 10% of the net assets.

c) Shares or units of UCITS or UCIs

In order to manage cash flow or access specific markets (sector or geographic), the Compartment may invest up to 10% of its assets in units of UCITS and/or of other UCIs within the meaning of I. (1) (c) of the investment and borrowing restrictions set forth in section 3.3.

These UCITS or UCIs may be managed or promoted by the Management Company or by a subsidiary or affiliate thereof.

d) Contingent convertibles instruments

The Compartment may invest up to 10% of its assets in so called contingent convertibles instruments ("CoCos").

CoCos are debt instruments which could be convertible into equity or written down if a pre-specified trigger event occurs. Many of the larger financial institutions have lately embraced the use of CoCos as a cost effective way of meeting the level of going-concern capital required by Regulation (EU) No 575/2013 on prudential requirements for credit institutions and investment firms (the "**Credit Requirement Regulation**" or "**CRR**") in addition to the Common Equity Tier 1 capital (as defined in the CRR; "**CET1**"). The CRR allows a financial institution to issue Additional Tier 1 ("AT1") securities in non-CET1 capital but in the form of CoCos. To qualify as AT1s the CoCos need to be able to be written down or converted into equity when a certain trigger CET1 is reached or when the relevant regulatory authority deems the issuer being non-viable under the Bank Recovery and Resolution Directive.

Investors should fully understand and consider the risks of CoCos.

CoCos entail a valuation risk. To correctly value the instruments the Company needs to evaluate the probability of activating the trigger, the extent and probability of any losses upon trigger conversion (not only from write-downs of their principal value but also from unfavourably timed conversion to equity) and the likelihood of cancellation of coupons. These risks may be highly challenging to model. Though certain risk factors are transparent, e.g., trigger level, coupon frequency, leverage, credit spread of the issuer, and rating of instrument, if any, other factors are discretionary or difficult to estimate, e.g. individual regulatory requirements relating to the capital buffer, the issuers' future capital position, issuers' behaviour in relation to coupon payments on AT1 CoCos, and any risks of contagion. Importantly, as one descends down the capital structure to sub-investment grade where the majority of CoCos sit, the level of precision in estimating value when compared to more highly rated instruments, deteriorates.

Investors may be exposed to extension risk as there may be no incentive, in the form of a coupon step-up, for the issuer to redeem the securities issued. This would cause the securities' duration to lengthen and to expose investors to higher interest rate risk

Investors should also take into account that the trigger levels differ and determine exposure to conversion risk depending on the CET1 distance to the trigger level. Furthermore, coupon payments on AT1 instruments are entirely discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time. Contrary to classic capital hierarchy, CoCo investors may suffer a loss of capital when equity holders do not. AT1 CoCos are issued as perpetual instruments, callable at predetermined levels only with the approval of the competent authority. The structure of CoCo instruments is innovative yet untested.

CoCos may entail a liquidity risk, meaning that under certain conditions it may be difficult to sell them. If the relevant market for a specific CoCo is illiquid, it may not be possible to liquidate a position at all or at an acceptable price. This risk generally increases the more likely it gets that the pre-specified trigger event of a given CoCo occurs.

Finally, when CoCos are written down, the NAV of the Compartment may significantly decrease.

e) Distressed or defaulted securities

The Compartment can not directly buy a distressed or defaulted security. However, if the security is already in the portfolio at the moment of default or stressed situation, this security could be held in the Compartment if the Management Company expects a short-term improvement. The Compartment should not have more than 5% of its net assets invested in distressed or defaulted securities at any time.

f) Other eligible assets

The Compartment may invest up to 10% of its net assets in money market instruments, debt securities or equity securities not admitted to or dealt in on an Eligible Market.

Financial futures instruments quoted on a regulated or organised market in France or abroad or traded over-the-counter

The Compartment may participate in securities, futures and options, traded on regulated or organised markets in France and abroad, or traded over-the-counter, with the aim of hedging or exposure to rate risk.

The financial futures instruments in question are specifically rate derivatives (rate swaps, options and futures), used in the context of managing the Compartment's rate sensitivity.

The Compartment may use financial futures instruments for up to 100% of the net assets and thus take the portfolio's global commitment to 200% in compliance with the sensitivity spread.

Within the limits provided for by the regulations, the Management Company may also recourse to simple credit derivatives (Credit Default Swap, CDS), in order to hedge and/or expose the portfolio to the risk of a repayment gap on one (CDS Single-Name standard) or more issuers (e.g. CDS indices) and/or hedge the risk of failure of one or more issuers.

The use by the Management Company of credit derivatives will firstly enable the portfolio's global credit exposure to be managed and also the taking or hedging of individual or multi-issuers' credit risks.

The Compartment may more generally be exposed to an index comprising the financial instruments stated in the investment and borrowing restrictions.

Counterparties to transactions on financial contracts traded over-the-counter

At the date of this Prospectus, the Management Company can process over-the-counter transactions with the following counterparties: BNP Paribas, Bank of America Merrill Lynch, Credit Suisse, Deutsche Bank, Goldman Sachs, HSBC, JPMorgan Chase Bank N.A., Morgan Stanley, Royal Bank of Scotland and Société Générale.

Furthermore, the Management Company maintains, at the date of this Prospectus, relations with the following counterparties with which the Management Company may be required to deal: BNP Paribas, Bank of America Merrill Lynch, Credit Suisse, Deutsche Bank, Goldman Sachs, HSBC, JPMorgan Chase Bank N.A., Morgan Stanley, Royal Bank of Scotland and Société Générale.

None of these counterparties has a power of discretionary decision-making over the composition or management of the Compartment's portfolio or over the underlying asset of the financial contracts acquired by the Compartment, or needs to give its approval for any transaction relating to the portfolio.

By the transactions carried out with these counterparties, the Compartment bears the risk of their failure (insolvency, bankruptcy, etc.). In such a situation, the realisation value of the Compartment may go down.

g) Securities with embedded derivatives

The Compartment may be incidentally exposed (i.e. up to a maximum of 10% of its net assets) to convertible bonds when these offer more attractive opportunities than the above-mentioned bonds or debt securities. Generally, the equity sensitivity, at the time of acquisition of these convertible bonds, is negligible but market changes may highlight residual equity sensitivity.

Exposure to equity risk shall never exceed 10% of the Compartment's net assets.

Some bonds include a call or put option (usually High Yield bonds). The Compartment has no restriction to invest in these bonds.

The underlying assets of the embedded derivatives will be eligible investments in accordance with the Law of 2010.

h) Deposits

The Compartment may invest up to 20% of its net assets in deposits with one or several credit institutions which are repayable on demand or have the right to be withdrawn, and maturing in no more than 12 months.

i) Cash borrowing

In the context of its normal operations, the Compartment may not borrow amounts in excess of 10% of its net assets, any such borrowings to be from banks and to be effected only on a temporary basis.

j) Temporary acquisitions and assignments of securities

Any temporary acquisitions or assignments of securities are carried out in the context of managing cash flow and/or optimising the Compartment's revenues. These transactions consist of securities lending and borrowing or repurchase and reverse repurchase transactions. Temporary acquisitions and assignments of securities may take place for up to 100% of the Compartment's assets.

The Compartment is not authorised to enter into any securities financing transaction as defined in the SFTR or total return swaps or other financial derivative instruments with similar characteristics. Should the Compartment decide to enter into this type of operations in the future, the prospectus would be updated in accordance with the relevant regulations and CSSF Circulars in force.

Planned and authorised level of use

This type of transaction is carried out in accordance with the level of available liquidities and subject to compliance with the Compartment's structural constraints.

4. Risk considerations linked to the investment policy of the Compartment

The Compartment will mainly be invested in financial instruments selected by the Management Company. These instruments will be exposed to market trends and risks.

Investors are advised to carefully consider the risks of investing in this Compartment and are therefore referred to Section 6 of the General Section which provides a non-exhaustive description of risks.

The following risk factors apply at the level of the Compartment:

4.1 Risk of capital loss

The investor is advised that it may not get back all the capital invested, the Compartment not benefiting from any guarantee or protection of the capital invested.

4.2 Performance risk

The investor is advised that performance of the Compartment may not achieve its objectives.

4.3 Interest-rate risk

Due to its composition, the Compartment may be subject to interest-rate risk. This risk results from the fact that in general the price of debt securities and bonds goes down when rates increase. Investors in bonds or other fixed income securities may record negative performance following fluctuations in interest rates.

4.4 Credit and default risk

Credit risk represents the potential risk of downgrading of the issuer's rating and/or the risk that the issuer is unable to honour its commitments, leading to a drop in the security and therefore of the net asset value.

4.5 Credit risk/ High Yield

This is the credit risk applying to "speculative" securities which present increased probabilities of default than those of "Investment Grade" securities. As compensation, they offer higher levels of return but may, if the rating is downgraded, reduce the Compartment' net asset value significantly. The unrated counterparties which may be selected will, in the same way, mainly fall into this category and may present the same or higher risks as a result of their unrated nature. As an example, by "High Yield" (speculative securities), is understood a rating of less than BBB- and by "Investment Grade", is understood a rating at least equal to BBB- on the Standard & Poor's scale.

4.6 Counterparty risk

This is the risk associated with the use by the Compartment of financial futures or over-the-counter instruments and/or recourse to temporary acquisitions and assignments of securities. These transactions concluded with one or more eligible counterparties potentially expose the Compartment to a risk of failure of one of these counterparties which could lead to a default in payment.

4.7 Risk associated with discretionary management

Discretionary management relies on forecasted changes in the various markets and UCITS selected. There is a risk that the Compartment is not invested at all times in the best-performing markets. Likewise, there is a risk that the UCITS selected are not the best-performing and/or achieve a lower performance than their benchmark index.

4.8 Equity risk

This is the risk of variation in the rates of the equities to which the portfolio is exposed. The Compartment may be exposed in minority proportions to convertible bonds when these enable more attractive opportunities to be offered than the above-mentioned bonds. Principally, the equity sensitivity, at the time of acquisition of these convertible bonds, is negligible but market changes may highlight residual equity sensitivity.

4.9 Risk resulting from holding Convertible Bonds

The Compartment may be exposed to convertible bonds; these may highlight residual equity sensitivity and experience wide variations associated with changes in the underlying equity rates. The investor's attention is drawn to the fact that the Compartment's net asset value will go down in the event of adverse changes.

4.10 Foreign exchange risk

This is the risk of variation in foreign currencies affecting the value of the securities held by the Compartment. The investor's attention is drawn to the fact that, notwithstanding the hedging implemented by the Management Company against the foreign exchange risk, there is a risk that the Compartment's net asset value may go down in the event of an adverse change in the rates of currencies other than the Euro. Exposure to the foreign exchange risk will in all cases be incidental.

4.11 Sustainability Risks Likely Impacts

The portfolio of the Compartment is highly diversified; hence the Management Company believes that the Compartment will be exposed to a broad range of Sustainability Risks, which will differ depending on the nature of each asset class.

Some markets and sectors will have greater exposure to Sustainability Risks than others. For instance, the energy sector is known as a major Greenhouse Gas (GHG) producer and may be subject to greater regulatory or public pressure than other sectors and thus, greater risk. However, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Compartment.

In light of the Compartment's investment strategy and risk profile, the likely impacts of Sustainability Risks on the Compartment's returns are expected to be low.

5. Risk Management

In accordance with the Law of 2010 and the applicable regulations, in particular Circular CSSF 11/512, the Compartment is subject to a risk management process, which enables it to assess its exposure to market, liquidity and counterparty risks, and to all other risks, including operational risks, which are material for the Compartment. The Management Company will employ a process for accurate and independent assessment of the value of any OTC derivative instruments.

6. Calculation of global exposure

As part of its risk management process and in view of the long-only strategy that is pursued, the global exposure of the Compartment is measured and controlled by the Commitment Approach.

The global exposure of the Compartment does not exceed 100% of its total net assets on average.

7. Management of collateral

Any collateral will exclusively consist in cash and will not be re-invested.

8. Shares and fees

9. Dividend policy

With respect to the Class(es) distributing dividends, the Board of Directors may decide to distribute interim dividends. The distributions may take place either in the form of cash in the relevant currency of the Class or through redemption of Shares.

Dividends shall be paid out of the distributable profits of the Compartment as determined by the Board of Directors. Dividends payable to Shareholders will be paid by electronic transfer to the bank account designated by the Shareholder in which case the dividend will be paid at the expense of the payee.

The Board of Directors reserves the right to change the dividend policy of the Compartment in the future, in which case Shareholders would be notified in advance and this Appendix will be modified accordingly.

10. Cut-off Time

11:30 a.m. Luxembourg time on the applicable Valuation Day.

11. Subscription of Shares

Applications must be received by the Company no later than the Cut-off Time.

Any taxes and duties levied in connection with the subscription of Shares in certain countries (if any) shall be charged to the concerned investors.

12. Redemption of Shares

Redemption requests must be received by the Company no later than the Cut-off Time.

13. Conversion of Shares

Conversion requests must be received by the Company no later than the Cut-off Time.

14. Net Asset Value

The net asset value per Share of the Compartment is calculated each Calculation Day, dated as of the Valuation Day, based on the closing prices as of such Valuation Day.

The net asset value per Share will be rounded to 2 decimal places.

Fractional entitlements to Shares will be rounded to 2 decimal places.

15. Performance Fee

The performance period for the Compartment shall be each period from 1 July of each year and shall terminate on 30 June of the following year, except for the first performance period which shall commence on the first allotment of Shares in a Class and end on 30 June 2017 (the “**Performance Period**”).

The Performance Fee is payable yearly to the Management Company as of 30 June of each year and covers each 12 month period starting on 1 July of each year and shall terminate on 30 June of the following year, except for the first Performance Period which will start on the Compartment’s launch date and will terminate on 30 June 2017.

A Performance Fee is due only if the net asset value as of 30 June is higher than the net asset value as of 30 June of the previous year, except for the first Performance Period where a Performance Fee is due only if the net asset value of the relevant Class as of 30 June 2017 is higher than 117.58 for Class C and 105.14 for Class D.

The Compartment is subject to a Performance Fee of 20% for Class C and Class D Shares and to a Performance Fee of 10% for Class I Shares upon Hurdle Rate defined by the FTSE MTS Eurozone Government Bond 3-5Y index (the “**Benchmark**”) + 1%, taking subscriptions and redemptions into account.

The Performance Fee is calculated and accrued in the calculation of the net asset value per Share for each Valuation Day, on the basis of the number of Shares currently in issue, including Shares which fall to be redeemed and excluding Shares which fall to be issued.

If a Share is redeemed (or converted) other than at the end of a Performance Period, the Performance Fee calculated in respect of such Share as at the Valuation Day as of which such Share is redeemed shall be crystallised and become payable to the Management Company.

The Performance Fee in respect of each Performance Period will be calculated by reference to the Net Asset Value before deduction for any accrued Performance Fee.

Any refund of this Performance Fee is not contemplated, even if the net asset value per Share falls down again after the Performance Fee has been paid.

The Management Company has adopted a written plan setting out actions, which it will take with respect to the Compartment in the event that the Benchmark materially changes or ceases to be provided (the “**Contingency Plan**”), as required by article 28(2) of the Benchmarks Regulation.

Shareholders may have access to the Contingency Plan free of charge upon request at the following address: contact@twentyfirstcapital.com.

As of the day of this visa-stamped Prospectus, the Benchmark is being provided by FTSE International Limited, which is not yet listed in the register referred to in article 36 of the Benchmarks Regulation, as it has not yet obtained authorisation or registration pursuant to Article 34 of the Benchmarks Regulation and is relying on transitional provisions. Should the status of the Benchmark's administrator change, this Prospectus will be amended accordingly.

Where a Performance Fee is payable out of the Compartment, it shall be calculated upon the increase in the net asset value per Share calculated at the end of the relevant Performance Period. Net realised and unrealised capital gains plus net realised and unrealised capital losses as at the end of the relevant Performance Period will be taken into consideration. As a result, the Performance Fee may be paid on unrealised gains which may subsequently never be realised.

APPENDIX IV

Twenty First Funds – Quant Fund

1. Currency

While the reference currency of this Compartment is USD, the net asset value per Share of the Compartment is expressed in the currency of the relevant share class (see section 7).

2. Profile of the typical investor

Investors must have a medium to long-term investment horizon with a high risk profile. This Compartment may not be appropriate for investors who plan to withdraw their money within 3 years.

The Compartment is suitable to investors who want to participate in opportunities arising mainly from the direction of trends (i.e. up and/or down) across a broadly diversified portfolio of global markets. As such, investors are also seeking an investment that is not necessarily correlated to returns from traditional asset classes over the long-term.

All investments involve risk. It is not possible to guarantee against loss resulting from an investment in the Compartment, nor can there be any assurance that the Compartment's investment objectives will be achieved. Future returns of the Compartment are not guaranteed. Investors assume the risk of receiving a lower amount than the original investment.

3. Investment Objectives and Policy

3.1 Investment objective

The investment objective of the Compartment is to seek attractive risk-adjusted long term capital growth through the implementation of a managed futures strategy seeking to generate gains by entering into long and short positions within a broadly diversified portfolio of global markets while maintaining low-to-zero long-term average correlation to traditional markets.

The Compartment does not intend to pay any dividend to shareholders. Any income arising from the Compartment is then automatically reinvested.

3.2 Investment policy

The Compartment will seek to achieve its investment objective by primarily utilising global futures and foreign exchange contracts (spot and forward) within multiple systematic, leveraged investment strategies that are combined with proprietary risk management and execution techniques. The Compartment is actively managed without reference to any benchmark.

Each of the strategies to be pursued by the Compartment will aim to achieve a positive excess-return-to-risk ratio in capturing global market trends across multiple time frames, while maintaining a targeted overall level of risk.

The Compartment will utilize strategies that are based on a quantitative analysis of price of markets as well as non-price inputs in generating a trading signal. The strategies are intended to exploit inefficiencies in the market that manifest themselves in reoccurring trends across multiple time

frames. The duration for each position will vary from a day to several years depending on the behaviour of a specific market and strategies employed.

The generation of strategy signals and the execution of the strategies are systematic by nature and predominately automated. The trading strategies the Investment Manager will pursue or may pursue on behalf of the Compartment at any time may encompass a variety of investment techniques, both directly and derivatively, including, without limitation: statistically-based trading strategies and market condition-based trading strategies as determined by the Investment Manager in its sole discretion. Statistically-based trading strategies involve the analysis of, among other things, daily, weekly and longer-term prices, implied and realized volatility, volume, open interest and other statistical analysis that may be of predictive value in seeking to predict price movements of certain financial instruments. Such strategies may sometimes be characterized by their trend-following or mean reverting nature. Market-condition based trading strategies rely in part on measures of market conditions including, but not limited to, assessments of volatility, volume and quantitative measures of risk-seeking versus risk-averting behaviour.

The Compartment will actively monitor and invest in a broad range of asset classes such as equities, currencies, fixed income and commodities (including energies, base and precious metals and crops). Investments that the Compartment may pursue in commodity markets will be achieved through an investment in a structured financial instrument described below in section 4.

The Compartment will make extensive use of futures contracts and other derivatives including forward markets, options and swaps. Such derivatives will cover only liquid instruments on a worldwide basis. The Compartment therefore can be entirely liquidated, if necessary, in a reasonable time period. A portion of the Compartment's assets may be held in cash or cash equivalent investments, including, but not limited to, short-term investment funds, bank deposits and/or U.S. Government securities (including U.S. treasury bills). A portion of these assets may be used for derivatives' margining and collateral requirements. There are no geographic limits on the market exposure of the Compartment's assets. This flexibility allows the Investment Manager to look for investments or gain exposure to asset classes and markets around the world, including emerging markets, that it believes will enhance the Compartment's ability to meet its investment objective.

Derivatives will be used in conformity with article 9 of the Grand-Ducal Regulation of 8 February 2008.

The counterparty risk on any transaction involving OTC derivative instruments and efficient portfolio management techniques may not exceed 10% of the assets of the Compartment when the counterparty is a credit institution domiciled in the EU or in a country where the CSSF considers that supervisory regulations are equivalent to those prevailing in the EU. This limit is set at 5% in any other case.

While the Reference Currency of the Compartment is USD, a proportion of its assets will, however, be invested in securities and other investments which are denominated in currencies other than the Reference Currency. Accordingly, the value of such assets may be affected favourably or unfavourably by fluctuations in currency rates and the Investment Manager may enter into foreign exchange hedging transactions to attempt to mitigate part or all of such currency risks. In addition, the Investment Manager may enter into foreign exchange hedging transactions in respect of each Share Class where the Share Class Currency is different to the Reference Currency, the aim of

which is to protect the Net Asset Value of such Share Class against adverse movements of the exchange rate between the Share Class Currency and the Reference Currency.

The Compartment is not authorised to enter into any securities financing transaction as defined in the SFTR or total return swaps or other financial derivative instruments with similar characteristics. Should the Compartment decide to enter into this type of operations in the future, the prospectus would be updated in accordance with the relevant regulations and CSSF Circulars in force.

The Compartment will not invest more than 10% of its net asset value in other UCITS or other UCIs.

Where the Compartment invests in a UCITS and/or other UCIs linked to the Management Company the manager of the underlying UCITS, respectively UCIs cannot charge subscription or redemption fees on account of the investment.

The aggregate maximum annual management fees that will be charged by the underlying UCITS in which the Compartment invests is 3% of their aggregate net asset values per annum. The effective management fees charged to the Compartment by the underlying UCITS will be disclosed in the Company's annual report.

4. Structured Financial Instruments

The Compartment may invest in structured financial instruments ("SFI"). SFI may be issued by Société Générale or SG Issuer (with Société Générale as guarantor) or any affiliated entity.

The above SFI invested by the Compartment are compliant with the Law of 2010 and the Grand-Ducal Regulation of 8 February 2008 and shall comply with the following criteria pursuant to the requirements of the UCITS Rules:

- (i) there shall be either a market price available or an independent valuation performed for such SFI. For the avoidance of doubt, a valuation provided by the Administrator of the Fund constitutes an independent valuation;
- (ii) the SFI shall be listed on the EURO MTF Luxembourg Stock Exchange and will be issued by issuers located notably in Luxembourg, Ireland or France;
- (iii) the SFI shall provide exposure on a 1:1 basis to interests in a Cayman fund entity which intends to employ an investment management strategy providing exposure to global markets and more specifically to the agricultural, energy, metal and other commodity sectors. 1:1 exposure to the Cayman fund is achieved through the issuance of a debt security by Société Générale or SG Issuer (with Société Générale as guarantor) or any affiliated entity (the "Debt Issuer") and the commitment by the Dealer as defined below to paying the return on the debt giving 1:1 exposure to the Cayman fund. The SFI shall not have embedded leverage or embed a derivatives component. The maximum exposure of the Compartment to any single commodity shall not exceed 20% of the Net Asset Value of the Compartment (up to 35% under exceptional circumstances – the investment up to this limit of 35% is only permitted for one single issuer);
- (iv) investments in SFI in the aggregate shall not exceed 20% of the Net Asset Value of the Compartment; and

(v) Société Générale and SG Option Europe or any affiliated entity, acting in its capacity as dealer and market maker for the SFI (the “Dealer”), shall commit to purchase the SFI from the Compartment in the absence of market disruption events at its most recent net asset value. This net asset value will be the amount (net of all costs or fees) that would be received in cash by Société Générale or any affiliated entity for a redemption order on its 1:1 exposure to the Cayman fund.

Specific Risk Warning

Investors should note that the Compartment is not guaranteed or capital protected. Investors in this Compartment should be prepared and able to sustain losses of the capital invested, up to a total loss. The Compartment’s investment strategy is speculative and entails substantial risks. There can be no assurance that the investment objective of the Compartment will be achieved, and results may vary substantially over time. An investment in the Compartment involves a high degree of leverage and risk, including the risk that the entire amount invested may be lost. You should be aware that synthetic short selling (i.e., obtaining “short” positions through the use of derivatives), the use of derivatives for other purposes and other leveraged positions and limited diversification could, in certain circumstances, substantially increase the impact of adverse market conditions on the Compartment’s Net Asset Value. See “Risk considerations linked to the investment policy of the Compartment”.

5. Risk considerations linked to the investment policy of the Compartment

5.1 Derivative instruments

The Compartment mainly uses both exchange-traded and over-the-counter derivatives, including, but not limited to, futures, forwards, swaps, options and contracts for differences, as part of its investment policy. These instruments can be highly volatile and expose investors to a high risk of loss. Transactions in over-the-counter contracts may involve additional risk as there is no exchange market on which to close out an open position. It may be impossible to liquidate an existing position, to assess the value of a position or to assess the exposure to risk. Contractual asymmetries and inefficiencies can also increase risk, such as break clauses, whereby a counterparty can terminate a transaction on the basis of a certain reduction in Net Asset Value, incorrect collateral calls or delays in collateral recovery.

Derivatives, in particular derivatives which are negotiated “over-the-counter” are subject to legal risks including the uncertainty in the applicability of laws, or the interpretation or enforceability of contracts or an action by a court or regulatory body that could invalidate a derivative contract entered into by the Compartment.

The prices of derivative instruments may be imperfectly correlated to the prices of the underlying securities, for example, because of transaction costs and interest rate movements. The prices of exchange traded derivative instruments may also be subject to changes in price due to supply and demand factors.

5.2 Particular risks of OTC derivatives

Unlike exchange-traded derivatives, which are standardised with respect to the underlying instrument, expiration date, contract size, and strike price, the terms of OTC derivatives, are generally established through negotiation with the other party to the instrument. While this type of arrangement allows the Compartment greater flexibility to tailor the instrument to its needs, OTC derivatives may involve greater legal risk than exchange-traded instruments, as there may be a risk of loss if OTC derivatives are deemed not to be legally enforceable or are not documented correctly.

There also may be a legal or documentation risk that the parties to the OTC derivatives may disagree as to the proper interpretation of its terms. If such a dispute occurs, the cost and unpredictability of the legal proceedings required for the Compartment to enforce its contractual rights may lead the Compartment to decide not to pursue its claims under the OTC derivatives. The Compartment thus assumes the risk that it may be unable to obtain payments owed to it under OTC arrangements, that those payments may be delayed or made only after the Compartment has incurred the costs of litigation.

5.3 Commodities

The Compartment may make investments linked to commodities. The performance of a commodity, and consequently investments linked to such commodity, is dependent upon various factors, including (without limitation) supply and demand, liquidity, weather conditions and natural disasters, direct investment costs, location, changes in tax rates and changes in laws, regulations and the activities of governmental or regulatory bodies. Commodity prices tend to be more volatile than most other asset categories, making investments in commodities more risky and more complex than other investments.

5.4 Forward foreign exchange contracts

A forward foreign exchange contract is a contractually binding obligation to purchase or sell a particular currency at a specified date in the future. Forward foreign exchange contracts are not uniform as to the quantity or time at which a currency is to be delivered and are not traded on exchanges. Rather, they are individually negotiated transactions. Forward foreign exchange contracts are generally effected through a trading system known as the interbank market. It is not a market with a specific location but rather a network of participants electronically linked. Documentation of transactions generally consists of an exchange of telex or facsimile messages. There is no limitation as to daily price movements on this market and in exceptional circumstances there have been periods during which certain banks have refused to quote prices for forward foreign exchange contracts or have quoted prices with an unusually wide spread between the price at which the bank is prepared to buy and that at which it is prepared to sell. Transactions in forward foreign exchange contracts are not regulated by any regulatory authority nor are they guaranteed by an exchange or clearing house. The Compartment is subject to the risk of the inability or refusal of its counterparties to perform with respect to such contracts. Any such default would eliminate any profit potential and compel the Compartment to cover their commitments for resale or repurchase, if any, at the then current market price. These events could result in significant losses.

5.5 Operating History

Although the principal of the Investment Manager has significant prior experience in portfolio management, the past performance of any investments or investment funds managed by the principal of the Investment Manager cannot be construed as any indication of the future results of

an investment in the Compartment and no representation is made that the Compartment is likely to achieve returns similar to these investments' track record. The performance of the Compartment will depend on the success of the Investment Objective and Policy. Pursuit of such Investment Objective and Policy by the Compartment involves uncertainty. No assurance can be given that suitable investment opportunities in which to deploy all of the Compartment's capital will be located. A reduction in the volatility and pricing inefficiency of the markets in which the Compartment will seek to invest, as well as other market factors, will reduce the effectiveness of the Compartment's investment strategy resulting in an adverse effect on performance results.

5.6 Other activities of the Investment Manager

The Investment Manager and its members, officers, employees and affiliates, including those involved in the investment management of the Compartment may be engaged in businesses in addition to the investment management of the Compartment. The Investment Manager may have proprietary interests in, and manage and advise, other accounts or funds which may have investment objectives similar or dissimilar to those of the Compartment and/or which may engage in transactions in the same types of securities and instruments as the Compartment. The Compartment's performance may differ significantly from the results achieved by the Investment Manager for other accounts managed or advised by the Investment Manager. When making an investment where conflicts of interest arise, the Investment Manager will endeavour to act in a fair, reasonable and equitable manner as between the Compartment and its other clients. Personnel of the Investment Manager are not required to devote all or any specified portion of their time to managing the affairs of the Compartment and are not required to accord exclusivity or priority to the Compartment in the event of limited investment opportunities, but will devote to the Compartment so much of their time as the Investment Manager deems necessary or appropriate. The Investment Manager may choose to trade or rebalance separate products with similar strategies at different times. Investment activities by the Investment Manager on behalf of other clients may give rise to additional conflicts of interest and demands on their time and resources. The Investment Manager may from time to time act as directors or investment managers in relation to or otherwise be involved with other companies established by parties other than the Company or Compartment. In such event, should a conflict of interest arise, the Investment Manager will endeavour to ensure that it is resolved fairly.

5.7 Investment Manager risk

The investment performance of the Compartment is substantially dependent on the services of certain individuals. In the event of the death, incapacity, departure, insolvency or withdrawal of these individuals, the performance of the Compartment may be adversely affected.

5.8 Strategy Risk

Strategy risk is associated with the failure or deterioration of an entire strategy such that most or all investment managers employing that strategy suffer losses. Strategy specific losses may result from excessive concentration by multiple investment managers in the same investment or general economic or other events that adversely affect particular strategies (e.g., the disruption of historical pricing relationships). The strategies employed by the Compartment may be speculative and involve substantial risk of loss in the event of such failure or deterioration, in which event the performance of the Compartment may be adversely affected.

5.9 Availability of Suitable Investment Opportunities

The Compartment competes with other potential investors to acquire interests in its targeted investments. Certain of the Compartment's competitors may have greater financial and other resources and may have better access to suitable investment opportunities. There can be no assurance that the Compartment will be able to locate and complete suitable investments that satisfy the Compartment's objectives or that leverage will be available with acceptable counterparties on acceptable terms. Whether or not suitable investment opportunities are available to the Compartment, the Compartment will bear the Management Fees and other expenses described herein.

5.10 Concentration of Investments; Diversification

Subject at all times to the Investment Policies, the Compartment has the ability to concentrate its investments in a limited number of issuers, countries, sectors or instruments. Adverse movements in a particular economy, sector or instrument type in which the Compartment is concentrated could negatively affect performance to a considerably greater extent than if the Compartment's investments were not so concentrated. In addition, concentration of the Compartment's investments could also result in less correlation between the Compartment's performance and the performance of the markets on which securities held by the Compartment are traded.

5.11 Short Sales

The Investment Manager may use the strategy of synthetic short selling of assets. This involves trading on margin and can involve greater risk than investments based on a long position. A synthetic short sale of an asset involves the risk of a theoretically unlimited adverse move in the market price of such asset.

5.12 Trading Judgment

The success of the proprietary valuation techniques and trading strategies employed by the Compartment is subject to the judgment and skills of the Investment Manager and the research team that it oversees. Additionally, the trading abilities of the portfolio management team with regard to execution and discipline are important to the return of the Compartment. There can be no assurance that the investment decisions or actions of the Investment Manager will be correct. Incorrect decisions or poor judgment may result in substantial losses.

5.13 Model and Data Risk

Given the complexity of the investments and strategies of the Compartment, the Investment Manager relies heavily on quantitative models and information and data supplied by third parties ("Models and Data"). Models and Data are used to construct sets of transactions and investments, to provide risk management insights, and to assist in hedging the Compartment's investments.

When Models and Data prove to be incorrect or incomplete, any decisions made in reliance thereon expose the Compartment to potential risks. For example, by relying on Models and Data, the Investment Manager may be induced to buy certain investments at prices that are too high, to sell

certain other investments at prices that are too low, or to miss favourable opportunities altogether. Similarly, any hedging based on faulty Models and Data may prove to be unsuccessful.

Some of the models used by the Investment Manager for the Compartment may be predictive in nature. The use of predictive models has inherent risks. For example, such models may incorrectly forecast future behaviour, leading to potential losses on a cash flow and/or a mark-to-market basis. In addition, in unforeseen or certain low-probability scenarios (often involving a market disruption of some kind), such models may produce unexpected results, which can result in losses for the Compartment. Furthermore, because predictive models are usually constructed based on historical data supplied by third parties, the success of relying on such models may depend heavily on the accuracy and reliability of the supplied historical data.

All models rely on correct market data inputs. If incorrect market data is entered into even a well-founded model, the resulting information will be incorrect. However, even if market data is input correctly, “model prices” will often differ substantially from market prices, especially for instruments with complex characteristics, such as derivative instruments.

5.14 Obsolescence risk

The Compartment is unlikely to be successful unless the assumptions underlying the models are realistic and either remain realistic and relevant in the future or are adjusted to account for changes in the overall market environment. If such assumptions are inaccurate or become inaccurate and are not promptly adjusted, it is likely that profitable trading signals will not be generated. If and to the extent that the models do not reflect certain factors, and the Investment Manager does not successfully address such omission through its testing and evaluation and modify the models accordingly, major losses may result. The Investment Manager will continue to test, evaluate and add new models, as a result of which the existing models may be modified from time to time. Any modification of the models or strategies will not be subject to any requirement that Shareholders receive notice of the change or that they consent to it. There can be no assurance as to the effects (positive or negative) of any modification of the models or strategies on the Compartment’s performance.

5.15 Crowding/convergence risk

There is significant competition among quantitatively-focused managers, and the ability of the Investment Manager to deliver returns consistent with the Compartment’s objectives and policies is dependent on its ability to employ models that are simultaneously profitable and differentiated from those employed by other managers. To the extent that the Investment Manager’s models used for the Compartment come to resemble those employed by other managers, the risk that a market disruption that negatively affects predictive models will adversely affect the Compartment is increased, and such a disruption could accelerate reductions in liquidity or rapid repricing due to simultaneous trading across a number of funds in the marketplace.

5.16 Risk of programming and modelling errors

The research and modelling process engaged in by the Investment Manager is extremely complex and involves financial, economic, econometric and statistical theories, research and modelling; the results of that process must then be translated into computer code. Although the Investment Manager seeks to hire individuals skilled in each of these functions and to provide appropriate

levels of oversight, the complexity of the individual tasks, the difficulty of integrating such tasks, and the limited ability to perform “real world” testing of the end product raises the chances that the finished model may contain an error; one or more of such errors could adversely affect the Compartment’s performance and, depending on the circumstances, would generally not constitute a trade error under the Compartment’s policies.

5.17 Proprietary trading methods

The trading methods employed by the Investment Manager on behalf of the Compartment are proprietary to the Investment Manager. Therefore, subject to disclosure and transparency requirements under applicable laws and regulations, Shareholders are not able to determine details of such trading methods or whether they are being followed.

5.18 Counterparty risk

The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments may expose the Compartment to financial loss. This includes without limitation the clearer(s) and the prime broker(s) where the cash of the Compartment is transferred temporarily as collateral for clearing purposes on derivatives.

Also, where the Compartment enters into swap or CFD transactions it is exposed to a potential counterparty risk. In case of insolvency or default of the swap or CFD counterparty, such event might affect the assets of the Compartment.

Some of the markets in which the Compartment may effect transactions are “over-the-counter” (or “interdealer”) markets. The participants in such markets are typically not subject to the same credit evaluation and regulatory oversight as are members of “exchange– based” markets. In addition, many of the protections afforded to participants on some organised exchanges, such as the performance guarantee of an exchange clearing house, might not be available in connection with such “over-the-counter” transactions. This exposes the Compartment to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the Compartment to suffer a loss. Such “counterparty risk” is accentuated for contracts with longer maturities where events may intervene to prevent settlement, or where the relevant Fund has concentrated its transactions with a small group of counterparties. Moreover, although the Compartment shall only transact with eligible counterparties, the Investment Manager has no formal credit function which evaluates the creditworthiness of the relevant Fund’s counterparties. The ability of the Compartment to transact business with any one or number of counterparties, the lack of any separate evaluation of such counterparties’ financial capabilities and the absence of a regulated market to facilitate settlement may increase the potential for losses by the Compartment.

5.19 Operational risk

Failures or delays in operational processes may negatively affect the Compartment.

5.20 Liquidity risk

Although the Compartment will only invest in liquid products, a risk of lower liquidity cannot be ruled out when there are insufficient buyers or sellers to allow the Compartment to sell or buy investments readily.

Events in which the trading of the securities that the Compartment holds is suspended or stopped may have an impact on the liquidity of and the value of its investments. Consequently, the processing of redemption requests may be delayed under exceptional circumstances, including in the event of the absence of liquidity that may make it difficult to determine the net asset value of the Compartment's Shares and thus cause the issuance and redemption of the Shares to be suspended.

5.21 Risk Management

In accordance with the Law of 2010 and the applicable regulations, in particular Circular CSSF 11/512, the Compartment is subject to a risk management process, which enables it to assess its exposure to market, liquidity and counterparty risks, and to all other risks, including operational risks, which are material for the Compartment. The Management Company will employ a process for accurate and independent assessment of the value of any OTC derivative instruments.

Depending on market environments and subject to the Investment Policy, the Compartment may employ leverage.

The Investment Manager's approach is to construct the Compartment's portfolio in a diversified manner by adopting the principle of risk spreading through diversification because holding positions in a wide-range of markets reduces concentration risk and may, over time, decrease portfolio volatility. The Investment Manager assesses exposure within the Compartment by using a variety of measures including volatility of the underlying securities.

5.22 Calculation of global exposure

As part of its risk management process and in view of the absolute return strategy that is pursued, the global exposure of the Compartment is measured and controlled by the absolute VaR approach. The Compartment will be limited to a 99% 20-days VaR against the regulatory VaR limit of 20% of NAV. That is, if the risk manager estimates that the probability of a loss of 20% of NAV over the immediately forthcoming 20 Business Days is greater than 1%, steps will be taken to reduce the risk levels of the Compartment as rapidly as is prudent.

5.23 Leverage

The Compartment uses the sum of notional of financial derivative instruments approach in calculating leverage (which defines the leverage as the sum of the absolute value of the notional of all financial derivative instruments in the Compartment's portfolio). Based on the sum of notional of financial derivative instruments approach, the Compartment's maximum expected level of leverage is 1,100% of the Compartment's NAV. It should also be noted that for certain types of trading strategies the sum of notionals approach to measure leverage could lead to leverage levels that are very different from actual risk-exposures. An increase of leverage does not necessarily represent an increase of risk in the Compartment as some of the derivative instruments used may even reduce risk. The leverage is not expected to exceed the levels indicated above but investors should note that there is possibility of higher leverage levels in circumstances where the Compartment's investment manager may make more extensive use of hedging instruments embedding bigger notional values but not the proportional risk attached to it.

The Compartment's level of leverage is mainly achieved through the use of financial derivatives instruments. Leverage creates an opportunity for greater yield and total return but, at the same time, will increase the exposure of the Compartment to capital risk and interest costs. Any investment

income and gains earned on investments made through the use of leverage that are in excess of the interest costs associated therewith may cause the value of the Compartment's portfolio to increase more rapidly than would otherwise be the case. Conversely, where the associated interest costs are greater than such income and gains, the value of the Compartment's portfolio may decrease more rapidly than would otherwise be the case. As such, the use of leverage may significantly increase the Compartment's investment risk.

5.24 Legislative and tax risk

There is a risk that a change in the tax legislation could affect the value of income or other gains received from underlying investments in certain jurisdictions. Taxation of income, dividends and/or capital gains received by non-residents varies among countries and, in some cases, tax rates may be high. In addition, some countries have less well-defined tax laws and procedures and, in certain cases, there is a possibility of expropriation, confiscatory taxation, imposition of withholding or other taxes on dividends, interest, capital gains, or other income or gains earned by the Compartment.

5.25 Sustainability Risks Likely Impacts

The portfolio of the Compartment is highly diversified; hence the Management Company believes that the Compartment will be exposed to a broad range of Sustainability Risks, which will differ depending on the nature of each asset class.

Some markets and sectors will have greater exposure to Sustainability Risks than others. For instance, the energy sector is known as a major Greenhouse Gas (GHG) producer and may be subject to greater regulatory or public pressure than other sectors and thus, greater risk. However, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Compartment.

In light of the Compartment's investment strategy and risk profile, the likely impacts of Sustainability Risks on the Compartment's returns are expected to be low.

6. Management of collateral

The Compartment only uses cash and bonds of excellent quality and applies the haircut policy described here below. In any case, eligible collateral consist of assets of excellent quality (with an investment grade rating of at least AA- by Moody's or S&P, excluding high yield bonds), or, if no rating is available, to be deemed to be of equivalent quality by the Investment Manager)), diversified, expected to be uncorrelated with the performance of the counterparty and liquid (traded in a Regulated Market or multilateral trading facility having a transparent pricing and that can be sold quickly). The Compartment will not invest in distressed et defaulted securities. Collateral will be valued on a daily basis on the basis of market prices, taking into the haircuts determined by the Company and may be subject to daily variation margin requirements. The haircut policy takes into account a variety of factors depending on the nature of received collateral, such as the credit quality of the issuer, the maturity, the currency, the price volatility as well as, if applicable, the results of stress-tests in normal and exceptional liquidity conditions.

7. Shares and fees

The Compartment will bear all costs incurred in relation to its establishment and the subscription for its Shares, including, but not limited to, all marketing costs (excluding placement fees and expenses paid to a placement agent which shall be borne by the Management Company), promotion costs, reasonable travel and accommodation expenses, and administrative, legal, tax and accounting costs incurred in this respect (the “**Establishment Costs**”) up to 105,000 Euros (the “**Establishment Costs Cap**”).

The Company shall only pay for duly documented expenses. For the avoidance of doubt, any Establishment Costs in excess of the Establishment Costs Cap shall be borne by the Management Company.

Investors shall bear the costs they have incurred for the purpose of subscribing for Shares, and in particular the costs of any advice they might have sought.

8. Cut-off Time

11:30 a.m. Luxembourg time on the applicable Valuation Day. The Investment Manager (and/or its directors, employees, related entities and connected persons) may subscribe, directly or indirectly for Shares during and after the relevant Initial subscription period.

8.1 Initial subscription price

The initial subscription price share class "I1-E" is set at EUR 100.

The initial subscription price share class "I1-G" is set at GBP 100.

The initial subscription price share class "I1-S" is set at CHF 100.

The initial subscription price share class "I1-U" is set at USD 100.

The initial subscription price share class "R1-E" is set at EUR 100.

The initial subscription price share class "R1-G" is set at GBP 100.

The initial subscription price share class "R1-S" is set at CHF 100.

The initial subscription price share class "R1-U" is set at USD 100.

Shares will be issued in registered form. Fractional entitlements to Shares will be rounded to 2 decimal places.

9. Performance Fee

All Shares of the Compartment are subject to a Performance Fee of 20% with High Water Mark ("**HWM**"), taking subscriptions and redemptions into account and payable yearly to the Investment Manager (as described further below).

The Performance Fee Calculation Date is either:

- (i) the last Business Day of each calendar year, commencing in December 2017;
- (ii) the date on which the Compartment terminates; or
- (iii) the date on which the Investment Management Agreement terminates.

The Compartment shall pay the Investment Manager, on an annual calendar basis, within 10 Business Days following each Performance Fee Calculation Date, out of the assets of the Compartment, an amount equal to 20% of the amount, if any, that the Net Asset Value of the Compartment as of the relevant Performance Fee Calculation Date (after deduction of the

Management Company Fee and other expenses, but before deduction of any Performance Fee) exceeds the HWM.

For the avoidance of doubt, if the Net Asset Value of the Compartment is below the HWM, no Performance Fee will be payable to the Investment Manager until the Net Asset Value of the Compartment has exceeded the HWM as of a Performance Fee Calculation Date.

The Investment Manager will not be paid a Performance Fee with respect to the Compartment if the Compartment has suffered net losses until, as a result of subsequent net profits, the Net Asset Value of the Compartment exceeds the net losses carried forward, adjusted for redemptions and subscriptions.

The Performance Fee is calculated and accrued in the calculation of the net asset value per Share for each Performance Period, on the basis of the number of Shares currently in issue, including Shares which fall to be redeemed and excluding Shares which fall to be issued.

Although the Performance Fee is paid as of the end of a calendar year, such Performance Fee is accrued on each Valuation Day. For the purpose of determining the Net Asset Value of the Compartment the Performance Fee is accrued (and deducted as a liability), and the accruals are reversed (and added as a credit) to reflect losses, as of each Valuation Day.

A redemption or distribution from a Share Class other than as of a Performance Fee Calculation Date, at a time when there is an accrued Performance Fee, will result in a proportional Performance Fee payment to the Investment Manager in respect of either the redeemed Shares or any distribution (as appropriate).

Any refund of this Performance Fee is not contemplated, even if the net asset value per Share falls down again after the Performance Fee has been paid.

Where a Performance Fee is payable out of the Compartment, it shall be calculated upon the increase in the net asset value per Share calculated at the end of the relevant Performance Period. Net realised and unrealised capital gains plus net realised and unrealised capital losses as at the end of the relevant Performance Period will be taken into consideration. As a result, the Performance Fee may be paid on unrealised gains which may subsequently never be realised.

APPENDIX V

Twenty First Funds – ID France Smidcaps

1. Currency

The net asset value per Share of this Compartment is EUR

2. Profile of the typical investor

The Compartment is suitable to investors who wish to invest primarily in French equity markets and, where applicable, to benefit from tax advantages linked to the PEA (*Plan d'Épargne en Actions*). The Compartment is eligible for PEA and can serve as a support for life insurance contracts.

Class C shares are intended for all investors. Class I shares are intended for institutional investors as defined by Luxembourg law or guidelines or recommendations issued by the CSSF from time to time (“**Institutional Investors**”).

The Compartment will be exposed to a minimum of 60% in French equities.

The amount that it is reasonable for investors to invest in this Compartment depends on their individual circumstances. To determine this, investors must take into account their personal wealth, current and future needs, investment horizon, but also their desire to take risks or, on the contrary, to favor a prudent investment. It is also strongly recommended to sufficiently diversify its investments so as not to expose them solely to the risk of this Compartment.

This Compartment may not be appropriate for investors who plan to withdraw their money within 5 years.

All investments involve risk. It is not possible to guarantee against loss resulting from an investment in the Compartment, nor can there be any assurance that the Compartment’s investment objectives will be achieved. Future returns of the Compartment are not guaranteed. Investors assume the risk of receiving a lower amount than the original investment.

3. Investment Objectives and Policy

3.1 Investment objective

The investment objective of the Compartment is to outperform the index CAC Mid & Small net dividend reinvested (the “**CACMS**” or the “**Benchmark**”) through a stock picking approach of the investment in equities.

The Compartment is actively managed and references the Benchmark for performance comparison purposes. As indicated above, the Compartment’s objective is to exceed the performance of the Benchmark. The Benchmark only consists in an outperformance target for the Compartment.

This approach is complemented by the management of the equity risk exposure level (60% minimum in French equities), driven by a risk premium of the Mid and Small Caps market: since the risk premium is high in a volatile market environment, exposure to equity markets is reduced,

and vice versa. Thus, whatever the market exposure, the aim of the stock-picking approach is to allow the Compartment to increase its performance in comparison to the Benchmark.

3.2 Investment policy

The selection of shares listed on Euronext Paris retains the securities presenting the highest potential for revaluation according to criteria established by the Management Company with the assistance of France Actionnaire SA. This approach is based on the analysis of multiples complemented by a fundamental analysis of the economic model of the society mixing quantitative and qualitative analysis in the "stock picking" phase. The calculation of intrinsic value is based on a multi-criteria approach (DCF and stock market comparison). The final selection includes an SRI dimension based on ESG criteria (Environment, Social and Governance) aimed at limiting the weight in the portfolio of securities presenting a risk with respect to these criteria.

The investment process breaks down into two complementary stages:

- 1) A stock selection with a significant discount to historical multiples and comparable securities in terms of business model and margin level. The fundamental value of each security of the universe is compared to its indicated market price. The construction of the portfolio construction seeks optimal diversification, which does not mean sector neutrality in the composition of the CACMS. The sector allocation is a result of the choice of securities resulting from the investment process which is purely bottom-up.

The consideration of ESG criteria in the final selection of the securities used in the composition of the portfolio aims at eliminating securities with specific risks, particularly in terms of governance, management quality, quality of the economic model or the quality of the portfolio financial structure. The criteria relating to the social context (number of employees, turnover, age and sex distribution, number of social conflicts, etc.) will be closely monitored, as are the criteria relating to governance and the environment. This extra-financial analysis is carried out during the analysis of the reports as well as meetings with the management. This extra-financial analysis is therefore performed concomitantly with the fundamental analysis. The Twenty First Capital and France Actionnaire S.A. teams give as much importance to the extra-financial analysis as to the financial analysis. The Twenty first Capital and France Actionnaire S.A. teams strive to gather as much information as possible about these criteria, but it is important to note that the reports of SMEs and mid-caps companies are not always exhaustive as to the information provided concerning these criteria, and do not always allow to have a satisfactory analysis of these. In the event that the information made available to Twenty First Capital and France Actionnaire S.A. is insufficient to perform an extra-financial analysis of the target, the target is not, however, dismissed by the management team as long as it does not present any specific risks, particularly in terms of governance, management quality, quality of the economic model, or the quality of the financial structure.

The strategy implemented is turned towards the long term. It is a patrimonial and conservative approach.

- 2) A management of the Compartment's global exposure to equity risk through a risk premium built by France Actionnaire S.A. from an aggregate of 245 mid and small caps stocks. The use of a risk premium allows a good reading of the business cycle. The risk premium compares the internal rate of return of equities to that of 10-year government bonds, which is a good alternative for long-term investment.

The Compartment may also engage in securities lending and securities borrowing transactions, subject to the conditions set-out in section 2.5 “Securities Financing transactions and total return swaps” of this Prospectus.

The maximum proportion and expected level of assets which may be subject to securities lending and securities borrowing transaction are as follows:

	Maximum proportion of assets	Expected level of assets
Securities lending	10%	5%
Securities borrowing	10%	5%

4. Structured Financial Instruments

The Compartment's portfolio consists of the following asset classes and financial instruments:

Actions

The Compartment will be exposed to a minimum of 60% in French shares.

More specifically, because of its eligibility for the PEA tax regime and its "French Shares" classification, the Compartment's equity investment is at least 75% of the net assets in French securities or in the euro zone.

In this context, the Compartment's portfolio is primarily intended to invest in French shares listed on Euronext's small and mid-cap stocks. For information purposes, the investment universe covers equities from Alternext and compartments Eurolist A, B and C of Euronext.

The portfolio may be invested on an ancillary basis in Eurozone equity markets other than France. Apart from stocks that make up at least 75% of the Compartment's assets, the following assets may be included in the composition of the portfolio:

Debt securities and money market instruments

In the context of the Compartment's cash management or the management of equity market exposure, the Investment Manager may use euro-area government debt securities, deposits and money market instruments up to a limit of 25% of its net assets.

The private / public debt distribution is not determined in advance, it will be made according to market opportunities.

Similarly, the Investment Manager will determine the duration and sensitivity of the debt securities it holds in the portfolio based on management objectives and market opportunities. The Investment Manager will invest in securities whose maturity is less than one year and which are issued by entities whose rating, upon acquisition, is at least A-1 (Standard & Poor's short-term rating or deemed equivalent according to the analysis of the Management Company).

Shares or units of other UCIs or investment funds

In order to manage cash flow or to access specific markets (sectoral or geographic), the Compartment may invest up to 10% of its assets in units and shares of French or foreign UCITS that meet the four criteria of article 41(1)(e) of the Law of 2010 and are compliant with the UCITS Directive themselves investing a maximum of 10% of their assets in units or shares of Other UCIs or investment funds, or in AIF units and shares, such AIF being established in other Member States of the European Union or investment funds established on the basis of a foreign law that satisfy the conditions laid down in the UCITS rules. FIA refers to investment funds covered by Directive 2011/61/EU of the European Parliament and of the Council of 8 June 2011.

Such UCITS, AIFs or investment funds may be managed or promoted by Twenty First Capital or a subsidiary of it.

Other eligible assets

The Compartment may hold up to 10% in aggregate of money market instruments, debt securities or equity securities not traded on a regulated market complying with Article 41 (1) (h) of the Law of 2010.

The Compartment will not use financial contracts traded on regulated or organized French and foreign markets or traded over the counter. Thus, the investment strategy will in no way imply the use of derivatives listed or traded over the counter.

Any subscription warrants or warrants held in the portfolio will be issued solely as a result of securities transactions involving the handing out of this type of security. The purpose of the Compartment is not to seek the direct acquisition of assets of this nature.

The Compartment may make deposits of up to 12 months with one or more credit institutions.

In the course of its normal operation, the Compartment may occasionally be in a debtor position and in this case it may resort to borrowing cash up to a limit of 10% of its net assets.

The Compartment will not use temporary acquisitions and sales of securities. Thus, the investment strategy will in no way imply the use of temporary acquisitions and sales of securities.

5. Risk considerations linked to the investment policy of the Compartment

Investments will be mainly made in financial instruments selected by the Management Company. These instruments will be subject to the evolutions and uncertainties of the markets.

The Compartment is a UCITS classed as "French Shares". The investor is therefore mainly exposed to the risks below, which are not exhaustive:

5.1 Capital and performance risk

The investor is warned that the performance of the UCITS may not be in line with its objectives and that its capital may not be fully returned to him, as the Compartment does not benefit from any guarantee or protection of the invested capital.

5.2 Equity risk

The Compartment is invested or exposed to one or more equity markets that may experience significant fluctuations. The attention of the investor is drawn to the fact that changes in the value of the portfolio and / or market risk will result in a significant decrease in the net asset value of the Compartment.

5.3 Small caps risk

The Compartment is exposed to companies whose capitalization size may be small. These companies, because of their specific characteristics, may present risks for investors. This can lower the net asset value more sharply and more quickly.

5.4 Liquidity risk

The liquidity risk represents the price decrease that the UCITS should potentially accept in order to sell certain assets for which there is insufficient demand in the market. Positions in small capitalization companies may be particularly difficult to liquidate quickly, which may affect the value of the UCITS.

5.5 Risk of concentration

The momentary exposure of the portfolio to a limited number of sectors, geographical areas, currencies, can cause significant losses in the event of adverse events in the exposed area.

5.6 Risk inherent to discretionary management

Discretionary management is based on a selection of securities decided by the Investment Manager and on the anticipation of the evolution of the different markets. There is a risk that the Compartment may not be invested at all times in the best performing stocks and markets.

5.7 Interest Rate Risk

Due to its composition, the Compartment may be subject to interest rate risk. This risk arises from the fact that, in general, the price of debt securities falls when rates rise. The net asset value will fall in the event of an increase in interest rates.

5.8 Credit Risk

In the case of a downgrade of private or sovereign issuers (e.g. rating by financial rating agencies), or their default, the value of debt securities or money market instruments may decline; the net asset value of the UCITS will fall accordingly.

5.9 Sustainability Risks Likely Impacts

The portfolio of the Compartment is highly diversified; hence the Management Company believes that the Compartment will be exposed to a broad range of Sustainability Risks, which will differ depending on the nature of each asset class.

Some markets and sectors will have greater exposure to Sustainability Risks than others. For instance, the energy sector is known as a major Greenhouse Gas (GHG) producer and may be subject to greater regulatory or public pressure than other sectors and thus, greater risk. However, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Compartment.

In light of the Compartment's investment strategy and risk profile, the likely impacts of Sustainability Risks on the Compartment's returns are expected to be low.

6. Risk Management

In accordance with the Law of 2010 and the applicable regulations, in particular Circular CSSF 11/512, the Compartment is subject to a risk management process, which enables it to assess its exposure to market, liquidity and counterparty risks, and to all other risks, including operational risks, which are material for the Compartment. The Management Company will employ a process for accurate and independent assessment of the value of any OTC derivative instruments.

7. Calculation of global exposure

As part of its risk management process and in view of the long-only strategy that is pursued, the global exposure of the Compartment is measured and controlled by the Commitment Approach.

The global exposure of the Compartment does not exceed 100% of its total net assets on average.

8. Management of collateral

Any collateral will exclusively consist in cash and will not be re-invested.

9. Shares and fees

Twenty First Funds - ID France Smidcaps

10. Cut-off Time

12:00 a.m. Luxembourg time on the day before each applicable Valuation Day.

11. Subscription of Shares

Applications must be received by the Company no later than the Cut-off Time.

Payment of the Subscription Price must be made in cleared funds on the first Business Day from the relevant Calculation Day.

Any taxes and duties levied in connection with the subscription of Shares in certain countries (if

any) shall be charged to the concerned investors.

12. Redemption of Shares

Redemption requests must be received by the Company no later than the Cut-off Time.

13. Conversion of Shares

Conversion requests must be received by the Company no later than the Cut-off Time.

14. Net Asset Value

The net asset value per Share of the Compartment is calculated each Calculation Day, dated as of the Valuation Day, based on the closing prices of the preceding Valuation Day.

The net asset value per Share will be rounded to 2 decimal places.

Fractional entitlements to Shares will be rounded to 2 decimal places.

15. Investment Advisor

France Actionnaire S.A. has been appointed as investment advisor for this Compartment.

16. Performance Fee

The Compartment is subject to a performance fee of 15% for class I and C Shares above benchmark defined by:

- For Class I Shares : CACMS net dividend reinvested
- For Class C Shares : CACMS net dividend reinvested

(being together referred to as the “**Benchmark**” or the “**Benchmarks**”).

The Performance Fee for the Compartment will be crystallized and accrued upon launch of the Compartment. The Performance Fee shall be calculated annually with the first year starting on 1 January 2019 (the “**Performance Period**”).

The first Performance Fee will be paid on 31 December 2019 and will cover the period starting from 1 January 2019 and ending on 31 December 2019. The following Performance Periods will be calculated over a one year period.

The performance Fee is calculated and accrued in the calculation of the net assets value per Share for each performance Period, on the basis of the number of Shares currently in issue, including Shares which fall to be redeemed and excluding Shares which fall to be issued, if the performance of the Compartment before deduction for any accrued performance fee is positive during the Performance Period.

If a Share is redeemed (or converted) other than at the end of a Performance Period, the Performance Fee calculated in respect of such Shares as at the Valuation Day as of which such share is redeemed (or converted) shall be crystallized and become payable to the Management Company.

Any refund of this Performance Fee is not contemplated, even if the Net Asset value per share falls down again the Performance Fee has been paid.

The Performance Fee in respect of each Performance Period will be calculated by reference to the Net Asset Value before deduction for any accrued Performance Fee.

The Management Company has adopted a written plan setting out actions, which it will take with respect to the Compartment in the event that any of the Benchmarks materially changes or ceases to be provided (the “**Contingency Plan**”), as required by article 28(2) of the Benchmarks Regulation.

Shareholders may access the Contingency Plan upon request free of charge at the following address: contact@twentyfirstcapital.com.

As of the day of this visa-stamped Prospectus, the Benchmark is being provided by Euronext Paris, which is listed in the register referred to in article 36 of the Benchmarks Regulation, as an administrator authorised pursuant to Article 34 of the Benchmarks Regulation.

Where a Performance Fee is payable out of the Compartment, it shall be calculated upon the increase in the net asset value per Share calculated at the end of the relevant Performance Period. Net realised and unrealised capital gains plus net realised and unrealised capital losses as at the end of the relevant Performance Period will be taken into consideration. As a result, the Performance Fee may be paid on unrealised gains which may subsequently never be realised.
